ENFORCEMENT OF CIVIL LIABILITIES

The Company is a Public Limited (Listed) Company under the laws of India and all the Directors and all Executive Officers are residents of India. It may not be possible or may be difficult for investors to affect service of process upon the Company or these other persons outside India or to enforce against them in courts in India, judgments obtained in courts outside India. India is not a party to any international treaty in relation to the automatic recognition or enforcement of foreign judgments.

However, recognition and enforcement of foreign judgments is provided for under Sections 13, 14 and 44A of the Code of Civil Procedure, 1908, as amended (the “**Civil Procedure Code**”). Section 44A of the Civil Procedure Code provides that where a certified copy of a decree of any superior court (within the meaning of that section) in any country or territory outside India which the Government of India has by notification declared to be a reciprocating territory, is filed before a district court in India, such decree may be executed in India as if the decree has been rendered by a district court in India. Section 44A of the Civil Procedure Code is applicable only to monetary decrees or judgments not being in the nature of amounts payable in respect of taxes or other charges of a similar nature or in respect of fines or other penalties. Section 44A of the Civil Procedure Code does not apply to arbitration awards even if such awards are enforceable as a decree or judgment. Among others, the United Kingdom, Singapore, Hong Kong and the United Arab Emirates have been declared by the Government of India to be reciprocating territories within the meaning of Section 44A of the Civil Procedure Code.

The United States has not been declared by the Government of India to be a reciprocating territory for the purposes of Section 44A of the Civil Procedure Code. Under Section 14 of the Civil Procedure Code, an Indian court shall, on production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction unless the contrary appears on the record; but such presumption may be displaced by proving want of jurisdiction.

A judgment of a court in any non-reciprocating territory, such as the United States, may be enforced in India only by a suit upon the judgment subject to Section 13 of the Civil Procedure Code, and not by proceedings in execution. Section 13 of the Civil Procedure Code, which is the statutory basis for the recognition of foreign judgments (other than arbitration awards), states that a foreign judgment shall be conclusive as to any matter directly adjudicated upon between the same parties or between parties under whom they or any of them claim litigating under the same title except where:

- The judgment has not been pronounced by a court of competent jurisdiction;
- The judgment has not been given on the merits of the case;
- The judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable;
- The proceedings in which the judgment was obtained are opposed to natural justice;
- The judgment has been obtained by fraud; and/or
- The judgment sustains a claim founded on a breach of any law in force in India.

A suit to enforce a foreign judgment must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. In addition, it is unlikely that an Indian court would enforce foreign judgments if it considered the amount of damages awarded as excessive or inconsistent with public policy or if the judgments are in breach of or contrary to Indian law. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the Reserve Bank of India to repatriate any amount recovered pursuant to execution of such judgment. Any judgment in a foreign currency would be converted into Rupees on the date of such judgment and not on the date of payment

and any such amount may be subject to income tax in accordance with applicable laws. The Company cannot predict whether a suit brought in an Indian court will be disposed of in a timely manner or be subject to considerable delays.

FORWARD - LOOKING STATEMENTS

This Draft Letter of Offer contains certain “forward-looking statements”. Forward looking statements appear throughout this Draft Letter of Offer, including, without limitation, under the chapters titled “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” and “*Industry*”. Forward-looking statements include statements concerning our Company’s plans, objectives, goals, strategies, future events, future revenues or financial performance, capital expenditures, financing needs, plans or intentions relating to acquisitions, our Company’s competitive strengths and weaknesses, our Company’s business strategy and the trends our Company anticipates in the industries and the political and legal environment, and geographical locations, in which our Company operates, and other information that is not historical information. These forward-looking statements generally can be identified by words or phrases such as “aim”, “anticipate”, “believe”, “continue”, “can”, “could”, “expect”, “estimate”, “intend”, “likely”, “may”, “objective”, “plan”, “potential”, “project”, “pursue”, “shall”, “seek to”, “will”, “will continue”, “will pursue”, “forecast”, “target”, or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of our Company are also forward-looking statements. However, these are not the exclusive means of identifying forward-looking statements.

All statements regarding our Company’s expected financial conditions, results of operations, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to our Company’s business strategy, planned projects, revenue and profitability (including, without limitation, any financial or operating projections or forecasts), new business and other matters discussed in this Draft Letter of Offer that are not historical facts. These forward-looking statements contained in this Draft Letter of Offer (whether made by our Company or any third party), are predictions and involve known and unknown risks, uncertainties, assumptions and other factors that may cause the actual results, performance or achievements of our Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or other projections.

Actual results may differ materially from those suggested by the forward-looking statements due to risks or uncertainties associated with our expectations with respect to, but not limited to, regulatory changes pertaining to the industry in which our Company operates and our ability to respond to them, our ability to successfully implement our strategy, our growth and expansion, the competition in our industry and markets, technological changes, our exposure to market risks, general economic and political conditions in India and globally which have an impact on our business activities or investments, the monetary and fiscal policies of India, inflation, deflation, unanticipated turbulence in interest rates, foreign exchange rates, equity prices or other rates or prices, the performance of the financial markets in India and globally, changes in laws, regulations and taxes, incidence of natural calamities and/or acts of violence. Important factors that could cause actual results to differ materially from our Company’s expectations include, but are not limited to, the following:

- If our Company is unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects;
- Our Company depends on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations;
- Our Company is highly dependent on our fabric manufacturers and suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of denim fabrics. In the event we are unable to procure adequate amounts of products, at competitive prices our business, results of operations and financial condition may be adversely affected;
- Any failure in our Company’s quality control processes may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of our products does not meet our customers’ expectations; and
- Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company’s profits, thereby affecting our operation and financial condition.

For further discussion of factors that could cause the actual results to differ from our estimates and expectations, see “*Risk Factors*”, “*Our Business*” and “*Management’s Discussion and Analysis of Financial Position and Results of Operations*” beginning on pages 21, 68 and 120, respectively, of this Draft Letter of Offer. By their nature, certain market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual gains or losses could materially differ from those that have been estimated.

We cannot assure investors that the expectations reflected in these forward-looking statements will prove to be correct. Given these uncertainties, investors are cautioned not to place undue reliance on such forward-looking statements and not to regard such statements as a guarantee of future performance.

Forward-looking statements reflect the current views of our Company as of the date of this Draft Letter of Offer and are not a guarantee of future performance. These statements are based on the management's beliefs and assumptions, which in turn are based on currently available information. Although we believe the assumptions upon which these forward-looking statements are based are reasonable, any of these assumptions could prove to be inaccurate, and the forward-looking statements based on these assumptions could be incorrect. Neither our Company, our Directors, our Promoters, the LM, the Syndicate Member(s) nor any of their respective affiliates or advisors have any obligation to update or otherwise revise any statements reflecting circumstances arising after the date hereof or to reflect the occurrence of underlying events, even if the underlying assumptions do not come to fruition.

In accordance with the SEBI ICDR Regulations, our Company and the Lead Manager will ensure that investors are informed of material developments from the date of this Draft Letter of Offer until the time of receipt of the listing and trading permissions from the Stock Exchange.

Additional risks and uncertainties, not presently known to us or that we currently deem immaterial may arise or may become material in the future and may also impair our business, results of operations and financial condition. If any of the following risks, or other risks that are not currently known or are now deemed immaterial, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the trading price of our Equity Shares could decline, and as prospective investors, you may lose all or part of your investment. You should consult your tax, financial and legal advisors about particular consequences to you of an investment in this Issue. INTERNAL RISK FACTORS

BUSINESS RELATED RISKS

- 1. If we are unable to anticipate and respond to changes in fashion trends and changing customer preferences in a timely and effective manner, the demand for our products may decline, which may have an adverse effect on our business, results of operations and prospects.***

Our Company is engaged in trading of denim fabrics. Our results of operations are dependent on our ability to anticipate, gauge and respond to changes in customer preferences and design of new products or modifying the fabrics we deal in by associating with diverse fabric manufacturers in accordance with changes in fashion trends as well as customer demands and preferences. If we are unable to anticipate, gauge and respond to changing customer preferences or fashion trends, or if we are unable to adapt to such changes by modifying our suppliers and products on a timely basis, we may lose, or fail to attract customers, our inventory may become obsolete and we may be subject to pricing pressure to sell our inventory at a discount. A decline in demand for our products or a misjudgment on our part could lead to lower sales, excess inventories and higher markdowns, each of which may have an adverse effect on our results of operations and financial condition.

- 2. We depend on a few customers of our products, for a significant portion of our revenue, and any decrease in revenues or sales from any one of our key customers may adversely affect our business and results of operations.***

Our Company is engaged in trading of denim fabrics. In the nine months period ended December 31, 2022 and the Fiscals 2022 and 2021, 30.77%, 40.58% and 42.87%, respectively, of our revenue from operations were derived from our top five customers (in the respective Fiscals). Our business operations are highly dependent on our customers, and the loss of any of our customers from any industry which we cater to may adversely affect our sales and consequently on our business and results of operations.

While we typically have long term relationships with our customers, we have not entered into long terms agreements with our customers and the success of our business is accordingly significantly dependent on us maintaining good relationships with our customers and suppliers. The actual sales by our Company may differ from the estimates of our management due to the absence of long term agreements. The loss of one or more of these significant or key customers or a reduction in the amount of business we obtain from them could have an adverse effect on our business, results of operations, financial condition and cash flows. We cannot assure you that we will be able to maintain historic levels of business and/or negotiate and execute long term contracts on terms that are commercially viable with our significant customers or that we will be able to significantly reduce customer concentration in the future.

Further, if there occurs any change in the market conditions, requirements of our customers, or if we fail to identify and understand evolving industry trends, preferences or fail to meet our customers' demands, it might have a direct impact on our revenue and customer base. The inability to procure new orders on a regular basis or at all may adversely affect our business, revenues, cash flows and operations.

- 3. We highly depend on our fabric manufacturers and suppliers who help us procure the same. Our Company has not entered into long-term agreements with its suppliers for supply of denim fabrics. In the event we are unable to procure adequate amounts of products, at competitive prices our business, results of operations and financial condition may be adversely affected.***

Our Company is engaged in trading of denim fabrics which it sources directly from denim manufacturers. Therefore, our business is highly dependent on our suppliers. Our top five suppliers accounted for 54.99%, 58.20% and 59.41% of our expenses towards the purchase of denim fabrics for the nine months period ended December 31, 2022 and the Fiscals 2022 and 2021, respectively. Thus, if we experience significant increase in demand, or need to replace an existing supplier, we cannot assure you that we will be able to meet such demand or find suitable substitutes, in a timely manner and at reasonable costs, or at all.

We have not entered into long term contracts with our suppliers and prices for the products purchased are normally based on the quotes we receive from various suppliers. We rely on pre-booking capacity with our suppliers, based on our demand projections. Since we have no formal arrangements with our suppliers, they are not contractually obligated to supply their products to us and may choose to sell their products to our competitors. Non-availability or inadequate quantity of denim fabrics, could have a material adverse effect on our business. Further, any discontinuation or a failure of these suppliers to adhere to the delivery schedule or failure to deliver the required quality and quantity could hamper our business and operations. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of denim fabrics to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside us.

Further, the quantity of denim fabrics procured and the price, at which we procure such fabrics, may fluctuate from time to time. In addition, the availability and price of denim fabrics required by us may be subject to a number of factors beyond our control, including economic factors, seasonal factors, environmental factors and changes in government policies and regulations, including those relating to the textile and fabric industry in general. We cannot assure you that we will always be able to meet our product requirements at prices acceptable to us, or at all, or that we will be able to pass on any increase in the cost of denim fabrics sold to our customers. Further, we also cannot assure you with a reasonable certainty that the denim fabrics that we would procure in the future will not be defective. In the absence of formal agreements, should we receive any defective denim fabrics, we may not be in a position to recover advance payments or claim compensation from our suppliers consequently increasing the procurement costs or reducing the realisation of our products. Any inability on our part to procure sufficient quantities of denim fabrics, on commercially acceptable terms, may lead to a decline in our sales volumes and profit margins which could adversely affect our business, results of operations and financial condition.

4. *In the past, there have been instances of delayed or non-filing of certain forms which were required to be filed as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 to RoC by our Company.*

In the past, there have been certain instances of delay in filing of statutory forms as per the reporting requirements under the Companies Act, 1956 and Companies Act, 2013 with the RoC, which have been subsequently filed by payment of an additional fee as specified by RoC by our Company. Further, there have been instances of non-filings of statutory forms with RoC as per the reporting requirements laid down under the Companies Act 1956 and Companies Act, 2013 by our Company. No show cause notice in respect to the above has been received by our Company till date. The occurrence of instances of delayed or erroneous filings in future may impact our results of operations and financial position.

5. *Any failure in the quality control processes by our suppliers may adversely affect our business, results of operations and financial condition. We may face product liability claims and legal proceedings if the quality of products supplied by our manufacturers does not meet our customers' expectations.*

Our products might have certain quality issues or undetected errors, due to defects in manufacture of products caused by our suppliers. Any shortcoming in the products procured by us due to failure of the quality control procedures adopted by the suppliers, negligence, human error or otherwise, may damage our products and result in deficient products. It is imperative for our suppliers to meet the quality standards set by our customers and agencies as deviation from the same may cause them to reject our products and cause damage to our reputation, market standing and brand value.

In the event the quality of the products is sub-standard or the products procured by us suffer from defects and are returned by our customers due to quality complaints, we may be compelled to take back the sub-standard products and reimburse the cost paid by our customers. While, our suppliers reimburse us with the damages suffered by us due to quality defects, however, in the event our suppliers refuse to reimburse us or dispute the claims made by the customers, we may have to address the customers' grievances directly and also bear the losses caused due to the same, which may affect our business, results of operations and financial condition. Such quality lapses may strain our longstanding relationship with our domestic and international customers and our reputation and brand image may suffer, which in turn may adversely

affect our business, results of operations and financial condition. Our customers may lose faith in the quality of our products and could in turn refuse to further deal in our products, which may have a severe impact on our revenue and business operations. We along with our suppliers also face the risk of legal proceedings and product liability claims being brought against us by our customers for defective products sold. A product liability claim may adversely affect our reputation and brand image, as well as entail significant costs.

6. *Any delays and/or defaults in customer payments could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our operation and financial condition.*

We are exposed to payment delays and/or defaults by our customers. Our financial position and financial performance are dependent on the creditworthiness of our customers. As per our business network model, we supply our products directly to our customers without taking any advance payment or security deposit against the orders placed by them. Such delays in payments may require our Company to make a working capital investment. We cannot assure you that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it may have a material adverse effect on our Company's results of operations and financial condition. We cannot assure you that the said policy will provide adequate cover towards the losses which may be incurred due to the defaults committed by our customers. For the nine months period ended December 31, 2022 and the Fiscals 2022 and 2021, our trade receivables were ₹ 1,304.01 lakhs, ₹ 1,061.45 lakhs and ₹ 2,152.92 lakhs, respectively, out of which, debts amounting to ₹ 215.44 lakhs, ₹ 478.62 lakhs and ₹ 547.47 lakhs were outstanding for a period exceeding six months.

There is no guarantee on the timeliness of all or any part of our customers' payments and whether they will be able to fulfill their obligations, which may arise from their financial difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

7. *If our Company is unable to continue being creative or if we are unable to keep up to the changing trends in the textile industry, it may adversely affect our business, results of operations and prospects.*

Our results of operations depend upon the continued demand of our products by our customers. Since we operate in a competitive industry where customers' purchases are highly subjective and sensitive to current trends along with creativity, keeping in with the latest trends is one of the key attributes for success. If we are unable to anticipate consumer preferences or industry changes, or if we are unable to update our suppliers and products on a timely basis, we may lose customers to our competitors, or may be forced to reduce our sales realization on products by having to offer them at a discount, thereby reducing our margins. If we are not able to anticipate the demand, or misjudge the quantity, *inter alia*, this could lead to lower sales, higher inventories and higher discounts, each of which could adversely affect our brand, reputation, results of operations and financial condition.

8. *Our business and prospects may be adversely affected if we are unable to maintain and grow the image of our brands.*

Our Company has created a brand presence with our brands "**Gericho London**", "**Mittalier London**" and "**McAllen Paris**". We sell our products under our brands, which we believe are well recognized, have been developed to cater to our intermediaries and have contributed to the success of our business in the market for denim fabrics. We believe our brand's image serve in attracting intermediaries and end use customers to our products in preference over those of our competitors.

Maintaining and enhancing the recognition and reputation of these brands is critical to our business and competitiveness. Many factors, some of which are beyond our control, are important to maintaining and enhancing our brands, including maintaining or improving customer satisfaction and the popularity of our products and increasing brand awareness through brand building initiatives. In particular, from time to time we showcase newly launched brands and products, and if any of those products do not meet standards for quality and performance or customers' subjective expectations, our brand reputation and the sales of our products may be impacted. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our products, or the quality of our products declines, our business and prospects may be adversely affected.

9. *The business orders which we undertake may be delayed, modified, cancelled, or not fully paid for by our clients and therefore, could materially affect our business, results of operations and financial condition.*

The business orders which we undertake may be cancelled or may be subject to changes in scope or schedule. We may also encounter problems executing the orders or executing them on a timely basis. Moreover, factors beyond our control or the control of our clients may postpone an order or cause its cancellation. Such factors could include delays or failures to obtain necessary permits, right-of-way, or receive performance bonds and other types of difficulties or obstructions. Any delay, failure, or execution difficulty with respect to orders in our Order Book could materially affect our business, results of operations and financial condition.

10. *Our results of operations are likely to vary from year to year and be unpredictable, which could cause the market price of the Equity Shares to be volatile.*

Our results of operations in any given year can be influenced by a number of factors, many of which are outside of our control and may be difficult to predict, including:

- our ability to acquire and retain clients for our products & services;
- maintaining high levels of customer satisfaction;
- costs relating to our operations;
- adhering to our high quality and process execution standards;
- pricing policies introduced by our competitors;
- the timing and nature of, and expenses incurred in, our marketing efforts;
- recruiting, training, and retaining sufficient skilled technical and management personnel; and
- developing and improving our internal administrative infrastructure, particularly our financial, operational, communications, and other internal systems.

All of these factors, in combination or alone could negatively impact our revenues and may cause significant fluctuations in our results of operations. This variability and unpredictability could materially and adversely affect our results of operations and financial condition.

11. *We may not be able to maintain our current levels of profitability due to increased costs or reduced trading spreads or margins.*

Our business strategy involves a relatively high level of ongoing interaction with our clients. We believe that this involvement is an important part of developing our relationship with our clients, identifying new cross selling opportunities and monitoring our performance. However, this level of involvement also entails higher levels of costs and also requires a relatively higher gross spread, or margin, on the various products we offer in order to maintain profitability. There can be no assurance that we will be able to maintain our current levels of profitability if the gross spreads on our traded products were to reduce substantially, which could adversely affect our results of operations.

12. *We have experienced negative cash flows in relation to our operating activities and investment activities in recent years/periods. Any negative cash flows in the future could adversely affect our results of operations and financial condition.*

We have experienced negative cash flows from operations in the recent past. Our cash flow for FY 2020-21, FY 2021-22 and nine months period ended December 31, 2022, are set forth in the table below:

Particulars	For the year ended March 31		Period ended	
	2021-22	2020-21	December 31, 2022	December 31, 2021

Financial year 2021-22

Net cash used in investing activities was negative ₹ 701.84 lakhs for the financial year 2021-22. This was primarily on account of purchase of fixed assets of ₹ 1.84 lakhs and mutual funds of ₹ 725.00 lakhs which was offset by proceeds received from sale of mutual funds of ₹ 24.48 lakhs and gain on sale of mutual funds of ₹ 0.52 lakhs.

Financial year 2020-21

Net cash used in investing activities was negative ₹ 3.15 lakhs for the financial year 2020-21, primarily on account of purchase of of purchase of fixed assets.

Financial year 2020-21

Net cash used in financing activities for the financial year 2020-21 was negative ₹ 42.85 lakhs. This was on account of finance cost paid to banks.

Any negative cash flows in the future could adversely affect our results of operations and financial condition.

For further details, see “*Management’s Discussion and Analysis of our Financial Condition and Results of Operations*” on page 120.

13. *If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.*

We manage our internal compliance by monitoring and evaluating internal controls and ensuring all relevant statutory and regulatory compliances. However, there can be no assurance that deficiencies in our internal controls will not arise or that we will be able to implement and continue to maintain adequate measures to rectify or mitigate any such deficiencies in our internal controls, in a timely manner or at all. If we are unable to establish and maintain an effective system of internal controls and compliances, our business and reputation could be adversely affected.

14. *Our Company requires significant amount of working capital for a continuing growth. Our inability to meet our working capital requirements may adversely affect our results of operations.*

Our business requires a significant amount of working capital. As per our settled business terms, we require our customers to pay the full amount of the consideration only after they receive the order, as a result, significant amounts of our working capital are often required to finance the purchase of denim fabrics from our suppliers before payment is received from our customers. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks are required to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing such increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products.

Further, one of the objects of this Issue include funding of working capital requirements of our Company, which is based on management estimates and certain assumptions. For more information in relation to such management estimates and assumptions, please see “*Objects of the Issue*” on page 52. Our working capital requirements may be subject to change due to factors beyond our control including force majeure conditions, an increase in defaults by our customers, non-availability of funding from banks or financial institutions. Accordingly, such working capital requirements may not be indicative of the actual requirements of our Company in the future and investors are advised to not place undue reliance on such estimates of future working capital requirements.

Any delay in processing our payments by our customers may increase our working capital requirement. Further, if a customer defaults in making payments for a product on which we have devoted significant resources, it could affect our profitability and liquidity and decrease the capital reserves that are otherwise available for other uses. We may file a claim for compensation of the loss that we incurred pursuant to such defaults but settlement of disputes generally takes time and financial and other resources, and the outcome is often uncertain. In general, we make provisions for bad debts, including those arising from such defaults based primarily age of the debt and other factors such as special circumstances relating to special customers. There can be no assurance that such payments will be remitted by our clients to us on a timely basis or that we will be able to effectively manage the level of bad debt arising from defaults. We may also have large cash outflows, including among others, losses resulting from environmental liabilities, litigation costs, adverse political conditions, foreign exchange risks and liability claims.

All of these factors may result, in increase in the amount of receivables and short-term borrowings. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

15. *If our Company is unable to protect its intellectual property, or if our Company infringes on the*

intellectual property rights of others, our business may be adversely affected.

Our Company has created a brand presence with our major brands “**Gericho London**”, “**Mittalier London**” and “**McAllen Paris**”. Our Company’s success largely depends on our brand name and brand image, therefore we have trademarked our brand names and their logos differentiating our Company’s products from that of our competitors. We deal under other brand names as well, which have also been trademarked by us to maintain a distinction and differentiation for our products and brands. Our current trademark and logo , is owned by our Company under the provisions of the Trademarks Act, 1999. Our trademarks may be subject to counterfeiting or imitation which would adversely impact our reputation and lead to loss of customer confidence, reduced sales and higher administrative costs.

Further, we believe that there may be other companies or vendors which operate in the unorganized segment using our tradename or brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. We rely on protections available under Indian law, which may not be adequate to prevent unauthorized use of our intellectual property by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving, and could involve substantial risks to us. Notwithstanding the precautions we take to protect our intellectual property rights, it is possible that third parties may copy or otherwise infringe on our rights, which may have an adverse effect on our business, results of operations, cash flows and financial condition.

We are also exposed to the risk that other entities may pass off their products as ours by imitating our brand name and attempting to create counterfeit products. We believe that there may be other companies or vendors which operate in the unorganized segment using our brand names. Any such activities may harm the reputation of our brand and sales of our products, which could in turn adversely affect our financial performance. Furthermore, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. We may need to litigate in order to determine the validity of such claims and the scope of the proprietary rights of others. Any such litigation could be time consuming, continuous supply of denim fabrics or to deliver our costly and the outcome cannot be guaranteed. We may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect its intellectual property, which might adversely affect our business, results of operations and financial condition.

16. We do not own certain premises used by our Company. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our business.

The Registered Office of our Company is taken on lease for a fixed tenure. The lease is renewable on mutually agreed terms. Upon termination of the lease, we are required to return the said business premises to the Lessor/Licensor, unless renewed. There can be no assurance that the term of the agreements will be renewed and in the event the Lessor/Licensor terminates or does not renew the agreements on commercially acceptable terms, or at all, and we are required to vacate our offices, we may be required to identify alternative premises and enter into fresh lease or leave and license agreement. We may have to find new premises which may lead to higher costs. However, since the registered office premises are owned by our promoter/promoter group, we do not foresee any problem in renewal.

17. Our inability to receive or renew the necessary licenses, approvals and registrations in a timely manner or at all may lead to interruption of our Company’s operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our trading business, some of which have been granted for a fixed period of time and need to be renewed from time to time. As of date of this Draft Letter of Offer, there are no pending proceedings, which have been initiated against us by the statutory authorities. We cannot assure you that in the near future there will not be any legal actions taken against us for the same.

Further, our licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or

approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may adversely affect our business.

18. *We may be unable to grow our business in additional geographic regions or international markets, which may adversely affect our business prospects and results of operations.*

Our Company seeks to grow its market reach domestically to explore untapped markets and segments; however, we cannot assure you that we will be able to grow our business as planned. Infrastructure and logistical challenges in addition to the changing customers' taste and preferences may prevent us from expanding our presence or increasing the penetration of our products. Further, customers may be price conscious and we may be unable to compete effectively with the products of our competitors. If we are unable to grow our business in these new markets effectively, our business prospects, results of operations and financial condition may be adversely affected.

Further, expansion into new international markets is important to our long-term prospects. Competing successfully in international markets requires additional management attention and resources to tailor our services to the unique aspects of each new country. We may face various risks, including legal and regulatory restrictions, increased advertising and brand building expenditure, challenges caused by distance, language and cultural differences, in addition to our limited experience with such markets and currency exchange rate fluctuations. International markets require a very high standard of quality of products and our Company might not be able to match the international standards thereby failing to make a brand presence in the international markets. If we are unable to make long-lasting relations with the major customers in the overseas market or if we are unable to justify the quality of our products to them, it may make it difficult for us to enter into such markets. These and other risks, which we do not foresee at present, could adversely affect any international expansion or growth, which might have an adverse effect on our business, results of operations and financial condition.

19. *We are dependent on third party transportation providers for delivery of denim fabrics to us from our suppliers and delivery of our products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations may adversely affect our business, financial condition and results of operation.*

In order to ensure smooth functioning of our business operations, we need to maintain continuous supply and transportation of the products from the suppliers to our Company and transportation of our products to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of denim fabrics to us and delivery of our products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of products is likely to have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to deliver our products to our customers in a timely, efficient and reliable manner may adversely affect our business, results of operations and financial condition.

Further, we have not entered into any long-term agreements with our transporters and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfill their obligations or would not commit a breach of the understanding with us. While, our supplier avail insurance for the products transported to us and charge the costs of the same to our Company, however, in the event that the products suffer damage or are lost during transit, and in the event the insurance is insufficient to cover the damage suffered by us, we may not able to prosecute the transport agencies due to lack of formal agreements and may have to bear additional costs, which could strain our financial resources. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which might adversely affect our business, results of operations and financial condition.

20. *If we are unable to identify customer demand accurately and maintain an optimal level of inventory proportionately, our business, results of operations and financial condition may be adversely affected.*

The success of our business depends upon our ability to anticipate and forecast customer demand and trends. Any error in such identification could result in either surplus stock, which we may not be able to sell in a timely manner, or no stock at all, or under stocking, which will affect our ability to meet customer demand. We plan our inventory and estimate our sales based on the forecast, demand and requirements

for our products based on past data. An optimal level of inventory is important to our business as it allows us to respond to customer demand effectively by readily making our products available to our customers. Ensuring continuous availability of our products requires prompt turnaround time and a high level of coordination across suppliers, inventory management and departmental coordination. While we aim to avoid under-stocking and over-stocking, our estimates and forecasts may not always be accurate. If we fail to accurately forecast customer demand, we may experience excess inventory levels or a shortage of products available for sale. If we over-stock inventory, our capital requirements may increase and we may incur additional financing costs. Any unsold inventory would have to be sold at a discount, leading to losses. We cannot assure you that we will be able to sell surplus stock in a timely manner, or at all, which in turn may adversely affect our business, results of operations and financial condition. If we under-stock inventory, our ability to meet customer demand may be adversely affected.

21. *Our industry is competitive and our inability to compete effectively will adversely affect our business, results of operations, financial condition and cash flows.*

The textile industry in India is fragmented and competitive with several regional brands and retailers present in local markets across the country. The textile market in India has historically been dominated by the unorganized sector. Our products compete with local retailers, non-branded products, economy brands and products of other established brands. Any increase in sale of such brands or if preference is given to such brands it may have an adverse impact on our business and results of operations. Some of our competitors may be able to procure denim fabrics at lower costs than us, and consequently be able to sell their products at lower prices. As a result, our competitors may be able to withstand industry downturns better than us or provide customers with products at more competitive prices.

We cannot assure you that we will be able to effectively and successfully compete in future against our existing or potential competitors or that our business and results of operations will not be adversely affected by increased competition. For further details, please see “*Industry Overview*” on page 61 of this Draft Letter of Offer.

22. *Our Promoters, Directors and Key Managerial Personnel have interests in our Company other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters, Directors and Key Managerial Personnel, may be deemed to be interested in our Company, in addition to the regular remuneration or benefits, reimbursements of expenses, Equity Shares held by them or their relatives, their dividend or bonus entitlement, benefits arising from their directorship in our Company. Our Promoters, Directors and Key Managerial Personnel may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are directors or partners. Further, as on December 31, 2022, our Company has availed unsecured loans from our Promoters, our Director, namely Sudha Brijesh Mittal and certain relatives of our Directors and entities associated with our Directors, therefore our Promoters and Directors may be deemed to be interested to the extent of the loans availed by our Company. For further details, please see the section titled “*Financial Information*” at page 79 of this Draft Letter of Offer.

There can be no assurance that our Promoters, Directors, Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters and members of our Promoter Group will continue to exercise significant control over our Company, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business, which may conflict with the best interests of our Company or that of minority shareholders.

23. *We rely significantly on our direct marketing network for sale of our products. Also, we do not have any formal agreement with our customers.*

We sell our products through our direct marketing network and through our marketing and sales executives. We sell our products in Mumbai, and Ulhasnagar Districts. As on date, we do not have any formal agreement with our customers. In the absence of any formal agreement with them, these clients may stop purchasing our products which may adversely affect our operations. Furthermore, our business growth depends on our ability to attract additional customers and widen our network and our marketing and sales executives. While we believe, that we have good relations with our customers but there is no

assurance that our customers will continue to do business with us or that we can continue to attract additional customers. If we do not succeed in maintaining the stability of our customer network, our market share may decline, materially affecting our results of operations and financial condition. However, we have been constantly adding more customers which is evident from our growth in sales.

24. *Certain agreements may be inadequately stamped or may not have been registered as a result of which our operations may be adversely affected.*

Our lease agreements for registered office have not been stamped & registered. The effect of inadequate stamping is that the document is not admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, is to make the document inadmissible in legal proceedings. Any potential dispute due to non-compliance of local laws relating to stamp duty and registration may adversely impact the operations of our Company.

25. *Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.*

We have taken insurance which may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. There can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time by the insurers. In addition, our insurance coverage expires from time to time. We apply for the renewal of our insurance coverage in the normal course of our business, but we cannot assure you that such renewals will be granted in a timely manner, at acceptable cost or at all. To the extent that we suffer loss or damage for which we did not obtain or maintain insurance, and which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected. For further details on insurance arrangements, see the section titled “*Our Business*” on page 68 of this Draft Letter of Offer.

26. *Our Promoters and members of the Promoter Group have significant control over the Company and have the ability to direct our business and affairs; their interests may conflict with your interests as a shareholder.*

After the completion of the Issue, our Promoters and the members of the Promoter Group will hold approximately [●]% of the paid-up equity share capital of our Company assuming full subscription to the Rights Entitlement in the Issue. Our Promoters and the members of the Promoter Group holding Equity Shares in our Company, have undertaken to fully subscribe for their Rights Entitlement. They reserve the right to subscribe for their Rights Entitlement pursuant to any renunciation made by any member of the Promoter Group to another member of the Promoter Group. Such subscription for Equity Shares over and above their Rights Entitlement, if allotted, may result in an increase in their percentage shareholding above their current percentage shareholding. So long as the Promoters have a majority holding, they will be able to elect the entire Board and control most matters affecting us, including the appointment and removal of the officers of our Company, our business strategy and policies and financing. Further, the extent of the Promoters’ shareholding in our Company may result in the delay or prevention of a change of management or control of our Company, even if such a transaction may be beneficial to the other shareholders of our Company.

27. *System failures or inadequacy and security breaches in computer systems may adversely affect our business.*

Our business is increasingly dependent on our ability to process transactions and banking data into well managed accounts systems. Our financial, accounting or other data processing systems may fail to operate adequately or become disabled as a result of events that are wholly or partially beyond our control, including a disruption of electrical or communication services. Our ability to operate and remain competitive will depend in part on our ability to maintain and upgrade our information technology systems on a timely and cost-effective basis. The information available to and received by our management through our existing systems may not be timely and sufficient to manage risks or to plan for and respond to changes in market conditions and other developments in our operations. We may experience difficulties in upgrading, developing and expanding our systems quickly enough to accommodate a growing customer base or product portfolio or supplier base. Any failure to effectively maintain or improve or upgrade our

management information systems in a timely manner could materially and adversely affect our competitiveness, financial position and results of operations. Moreover, if any of these systems do not operate properly or are disabled or if there are other shortcomings or failures in our internal processes or systems, it could affect our operations or result in financial loss, disruption of our businesses, regulatory intervention or damage to our reputation.

28. *We have in past entered into related party transactions and we may continue to do so in the future.*

As of December 31, 2022, March 31, 2022, March 31, 2021, we have entered into several related party transactions with our Promoters, individuals and entities forming a part of our promoter group relating to our operations. In addition, we have in the past also entered into transactions with other related parties. For further details, please see the section titled “*Financial Information*” at page 79 of this Draft Letter of Offer.

While we believe that all our related party transactions have been conducted on an arm’s length basis, we cannot assure you that we may not have achieved more favourable terms had such transactions been entered into with unrelated parties. There can be no assurance that such transactions, individually or taken together, will not have an adverse effect on our business, prospects, results of operations and financial condition, including because of potential conflicts of interest or otherwise. In addition, our business and growth prospects may decline if we cannot benefit from our relationships with them in the future.

29. *The agreements executed by our Company with lenders for financial arrangements contain restrictive covenants for certain activities and if we are unable to get their approval, it might restrict our scope of activities and impede our growth plans.*

We have entered into agreements for our borrowings with certain lenders. These borrowings include secured fund based and non-fund based facilities. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, granting loans to directors, repaying unsecured loans/inter corporate deposits availed from Promoters and third parties, undertake guarantee obligations on behalf of any other borrower, which require our Company to obtain prior approval of the lenders for any of the above activities. We cannot assure you that our lenders will provide us with these approvals in the future.

Further, some of the financing arrangements include covenants which mandate us to maintain total outside liabilities and total net worth up to a certain limit and certain other liquidity ratios. A default under one of these financing agreements may also result in cross-defaults under other financing agreements and result in the outstanding amounts under such financing agreements becoming due and payable immediately. This might have an adverse effect on our cash flows, business, results of operations and financial condition.

30. *We face risks of delisting or debarment from online platforms.*

We have recently started selling our products through certain online commercial platforms. In the event, we receive negative reviews on our products or receive complaints in respect of products supplied by us, we may face the risk of delisting or debarment from online platforms. Damage caused to our business reputation and brand name may deter users from using our brands, which may have an adverse effect on our financial performance and prospects.

31. *In addition to the existing indebtedness, our Company may incur further indebtedness during the course of business. We cannot assure that our Company would be able to service the existing and/ or additional indebtedness.*

As on December 31, 2022 the total fund based secured and unsecured indebtedness of our Company is ₹ 233.03 lakhs. In addition to the indebtedness for the existing operations of our Company, may incur further indebtedness during the course of their business. We cannot assure you that our Company will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt-equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in

arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows.

Any failure to service the indebtedness of our Company or otherwise perform our obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

32. *Our Promoters and members of our Promoter Group have extended personal guarantees and have provided their property and shares as collateral security for loan facilities availed by our Company. Revocation of any or all of these personal guarantees or withdrawal of such property may adversely affect our business operations and financial condition.*

Our Promoters, Pratik Brijeshkumar Mittal and Brijeshkumar Jagdishkumar Mittal, and members of our Promoter Group, Sudha Brijeshkumar Mittal and Brijesh Kumar Mittal (HUF) have extended personal guarantees in favour of Bank of Maharashtra with respect to the loan facilities availed by our Company. Further, Brijeshkumar Jagdishkumar Mittal and Sudha Brijeshkumar Mittal have also provided certain of their personal properties as collateral security for the loan availed by our Company from Bank of Maharashtra.

In the event any of these guarantees are revoked or the properties and shares provided as a security are withdrawn, our lender may require us to furnish alternate guarantees or an additional security or may demand a repayment of the outstanding amounts under the said facilities sanctioned or may even terminate the facilities sanctioned to us. There can be no assurance that our Company will be able to arrange such alternative guarantees or provide an alternate collateral security in a timely manner or at all. If our lender enforces these restrictive covenants or exercise their options under the relevant debt financing agreements, our operations and use of assets may be significantly hampered and lender may demand the payment of the entire outstanding amount and this in turn may also affect our further borrowing abilities thereby adversely affecting our business and operations.

33. *Our future fund requirements, in the form of further issue of capital or securities and/or loans taken by us, may be prejudicial to the interest of the Shareholders depending upon the terms on which they are eventually raised.*

We may require additional capital from time to time depending on our business needs. Any further issue of Equity Shares or convertible securities would dilute the shareholding of the existing Shareholders and such issuance may be done on terms and conditions, which may not be favourable to the then existing Shareholders. If such funds are raised in the form of loans or debt or preference shares, then it may substantially increase our fixed interest/dividend burden and decrease our cash flows, thus adversely affecting our business, results of operations and financial condition.

34. *Our success largely depends upon the knowledge and experience of our Promoters, Directors and our Key Managerial Personnel. Loss of any of our Directors and key managerial personnel or our ability to attract and retain them could adversely affect our business, operations and financial condition.*

The growth and success of our Company's future significantly depends upon the experience and continued services and the management skills of our Key Managerial Personnel and the guidance of our Directors for development of business strategies, monitoring its successful implementation and meeting future challenges. We believe the expertise, experience and continued efforts of our Key Managerial Personnel and their inputs are valuable to for the operations of our Company. Our future success and growth depend largely on our ability to attract, motivate and retain the continued service of our highly skilled management personnel. Our Company has never been faced with a challenge of high rate of attrition of our Key Management Personnel in the past, however, any attrition of our experienced Key Managerial Personnel, would adversely impact our growth strategy. We cannot assure you that we will be successful in recruiting and retaining a sufficient number of personnel with the requisite skills to replace those Key Managerial Personnel who leave. In the event we are unable to motivate and retain our key managerial personnel and thereby lose the services of our highly skilled Key Managerial Personnel may adversely affect the operations, financial condition and profitability of our Company and thereby hampering and adversely affecting our ability to expand our business. For further details on our Directors and Key Managerial Personnel, please refer to the chapter titled — "*Our Management and Organisational Structure*" on page 76 of this Draft Letter of Offer.

35. *Our ability to pay dividends in the future may be affected by any material adverse effect on our future earnings, financial condition or cash flows.*

Our ability to pay dividends in future will depend on our earnings, financial condition and capital requirements. Our business is working capital intensive and we are required to obtain consents from certain of our lenders prior to the declaration of dividend as per the terms of the agreements executed with them. We may be unable to pay dividends in the near or medium term, and our future dividend policy will depend on our capital requirements and financing arrangements in respect of our operations, financial condition and results of operations. Our Company has not declared dividends in the past, and there can be no assurance that our Company will declare dividends in the future.

36. *The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

As the issue size is not more than ₹10,000 lakhs, under Regulation 82 of the SEBI ICDR Regulations it is not required that a monitoring agency be appointed by our Company, for overseeing the deployment and utilisation of funds raised through this Issue. Therefore, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. Our Board of Directors along with the Audit Committee will monitor the utilisation of Issue proceeds and shall have the flexibility in applying the proceeds of this Issue. However, the management of our Company shall not have the power to alter the objects of this Issue except with the approval of the Shareholders of the Company given by way of a special resolution in a general meeting, in the manner specified in Section 27 of the Companies Act, 2013. Additionally, the dissenting shareholders being those shareholders who have not agreed to the proposal to vary the objects of this Issue, our Promoters shall provide them with an opportunity to exit at such price, and in such manner and conditions as may be specified by the SEBI, in respect to the same. For further details, please refer to the chapter titled — “Objects of the Issue” on page 52 of this Draft Letter of Offer.

37. *As the securities of our Company are listed on National Stock Exchange of India, our Company is subject to certain obligations and reporting requirements under the SEBI Listing Regulations. Any non-compliances/delay in complying with such obligations and reporting requirements may render us liable to prosecution and/or penalties.*

The Equity Shares of our Company are listed on NSE, therefore we are subject to the obligations and reporting requirements prescribed under the SEBI Listing Regulations, as well as requirements under the Companies Act for a listed Company. During the preceding one year from the date of filing of this Draft Letter of Offer, there have been no defaults in complying with the applicable provisions of SEBI Listing Regulations and accordingly, our Company has filed this Draft Letter of Offer under Part B of Schedule VI of SEBI ICDR Regulations. Our Company endeavours to comply with all applicable obligations/reporting requirements, however, upon occurrence of any future instances of non-disclosures/delayed/erroneous disclosures and/or any other violations by us, our Company may be exposed to imposition of penalties, warnings and show cause notices being against us by SEBI and Stock Exchange. Any future adverse regulatory action or development could affect our business reputation, divert management attention, and result in a material adverse effect on our business prospects and financial performance and on the trading price of the Equity Shares.

38. *We have not commissioned an industry report for the disclosures made in the chapter titled “Industry Overview” and made disclosures on the basis of the data available on the internet and such data has not been independently verified by us.*

We have neither commissioned an industry report, nor sought consent from the quoted website source for the disclosures which need to be made in the chapter titled “Industry Overview” of this Draft Letter of Offer. We have made disclosures in the said chapter on the basis of the relevant industry related data available online for which relevant consents have not been obtained. We have not independently verified such data. We cannot assure you that any assumptions made are correct or will not change and, accordingly, our position in the market may differ from that presented in this Draft Letter of Offer. Further, the industry data mentioned in this Draft Letter of Offer or sources from which the data has been collected are not recommendations to invest in our Company. Accordingly, investors should read the industry related disclosure in this Draft Letter of Offer in this context.

ISSUE SPECIFIC RISKS

- 39. *We will not distribute the Draft Letter of Offer, the Letter of Offer, the Abridged Letter of Offer, Application Form and Rights Entitlement Letter to overseas Shareholders who have not provided an address in India for service of documents.***

In accordance with the SEBI ICDR Regulations and SEBI Rights Issue Circular our Company will send, only through email, the Abridged Letter of Offer, the Rights Entitlement Letter, Application Form and other issue material to the email addresses of all the Eligible Equity Shareholders who have provided their Indian addresses to our Company or who are located in jurisdictions where the offer and sale of the Rights Equity Shares permitted under laws of such jurisdictions and in each case who make a request in this regard. The Issue Materials will not be distributed to addresses outside India on account of restrictions that apply to circulation of such materials in overseas jurisdictions. However, the Companies Act, 2013 requires companies to serve documents at any address which may be provided by the members as well as through e-mail. Presently, there is lack of clarity under the Companies Act, 2013 and the rules made thereunder with respect to distribution of Issue Materials in overseas jurisdictions where such distribution may be prohibited under the applicable laws of such jurisdictions. While we have requested all the shareholders to provide an address in India for the purposes of distribution of Issue Materials, we cannot assure you that the regulator or authorities would not adopt a different view with respect to compliance with the Companies Act, 2013 and may subject us to fines or penalties.

- 40. *SEBI has recently, by way of circular dated January 22, 2020, streamlined the process of rights issues. You should follow the instructions carefully, as stated in such SEBI circulars, and in this Draft Letter of Offer.***

The concept of crediting Rights Entitlements into the demat accounts of the Eligible Equity Shareholders has recently been introduced by the SEBI. Accordingly, the process for such Rights Entitlements has been recently devised by capital market intermediaries. Eligible Equity Shareholders are encouraged to exercise caution, carefully follow the requirements as stated in the SEBI circular dated January 22, 2020 and ensure completion of all necessary steps in relation to providing/updating their demat account details in a timely manner. For details, see “*Terms of the Issue*” on page 139 of this Draft Letter of Offer.

In accordance with Regulation 77A of the SEBI ICDR Regulations read with the SEBI Rights Issue Circular, the credit of Rights Entitlements and Allotment of Rights Equity Shares shall be made in dematerialized form only. Prior to the Issue Opening Date, our Company shall credit the Rights Entitlements to (i) the demat accounts of the Eligible Equity Shareholders holding the Equity Shares in dematerialised form; and (ii) a demat suspense escrow account opened by our Company, for the Eligible Equity Shareholders which would comprise Rights Entitlements relating to (a) Equity Shares held in a demat suspense account pursuant to Regulation 39 of the SEBI Listing Regulations; or (b) Equity Shares held in the account of IEPF authority; or (c) the demat accounts of the Eligible Equity Shareholder which are frozen or suspended for debit or credit or details of which are unavailable with our Company or with the Registrar on the Record Date; or (d) credit of the Rights Entitlements returned / reversed / failed; or (e) the ownership of the Equity Shares currently under dispute, including any court proceedings.

- 41. *The Rights Entitlement of Eligible Equity Shareholders holding Equity Shares in physical form (“Physical Shareholder”) may lapse in case they fail to furnish the details of their demat account to the Registrar.***

In accordance with the circular SEBI Circular SEBI/HO/CFD/DIL2/CIR/P/2020/13 dated January 22, 2020, the credit of Rights Entitlement and Allotment of Equity Shares shall be made in dematerialised form only. Accordingly, the Rights Entitlements of the Physical Shareholders shall be credited in a suspense escrow demat account opened by our Company during the Issue Period. The Physical Shareholders are requested to furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date to enable the credit of their Rights Entitlements in their demat accounts at least one day before the Issue Closing Date. The Rights Entitlements of the Physical Shareholders who do not furnish the details of their demat account to the Registrar not later than two Working Days prior to the Issue Closing Date, shall lapse. Further, pursuant to a press release dated December 3, 2018 issued by the SEBI, with effect from April 1, 2019, a transfer of listed Equity Shares

cannot be processed unless the Equity Shares are held in dematerialized form (except in case of transmission or transposition of Equity Shares). For details, please refer chapter “*Terms of the Issue*” on page 139 of this Draft Letter of Offer..

42. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of shareholding.*

The Rights Entitlements that are not exercised prior to the end of the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration for them. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Issue. Renounees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renounees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renounee will not be able to apply in this Issue with respect to such Rights Entitlements. For details, see “*Terms of the Issue*” on page 139 of this Draft Letter of Offer..

43. *Any future issuance of Equity Shares, or convertible securities or other equity-linked securities by our Company may dilute your shareholding and any sale of Equity Shares by our Promoters or members of our Promoter Group may adversely affect the trading price of the Equity Shares.*

Any future issuance of the Equity Shares, convertible securities or securities linked to the Equity Shares by our Company may dilute your shareholding in our Company; adversely affect the trading price of the Equity Shares and our ability to raise capital through an issue of our securities. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of the Equity Shares. We cannot assure you that we will not issue additional Equity Shares. The disposal of Equity Shares by any of our Promoters and Promoter Group, or the perception that such sales may occur may significantly affect the trading price of the Equity Shares. We cannot assure you that our Promoters and Promoter Group will not dispose of, pledge or encumber their Equity Shares in the future.

44. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of STT, on the sale of any Equity Shares held for more than 12 months. STT will be levied on and collected by a domestic stock exchanges on which the Equity Shares are sold. Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India. Capital gains arising from the sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

45. *Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.*

In terms of the SEBI ICDR Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant’s demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation, cash flows or financial condition, or other events affecting the Applicant’s decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The

Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price for the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

46. *Investors will be subject to market risks until the Equity Shares credited to the investors demat account are listed and permitted to trade.*

Investors can start trading the Equity Shares allotted to them only after they have been credited to an investor's demat account, are listed and permitted to trade. Since the Equity Shares are currently traded on the Stock Exchange, investors will be subject to market risk from the date they pay for the Equity Shares to the date when trading approval is granted for the same. Further, there can be no assurance that the Equity Shares allocated to an investor will be credited to the investor's demat account or that trading in the Equity Shares will commence in a timely manner.

47. *You may not receive the Equity Shares that you subscribe in the Issue until fifteen days after the date on which this Issue closes, which will subject you to market risk.*

The Equity Shares that you subscribe in the Issue may not be credited to your demat account with the depository participants until approximately 15 days from the Issue Closing Date. You can start trading such Equity Shares only after receipt of the listing and trading approval in respect thereof. There can be no assurance that the Equity Shares allocated to you will be credited to your demat account, or that trading in the Equity Shares will commence within the specified time period, subjecting you to market risk for such period.

48. *The trading price of our Equity Shares may be subject to volatility and you may not be able to sell your Equity Shares at or above the Issue Price.*

The trading price of our Equity Shares may fluctuate after this Issue due to a variety of factors, including our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India's fiscal regime, volatility in the Indian and global securities market, performance of our competitors, changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets in general experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could adversely affect the price of our Equity Shares.

49. *Holders of Equity Shares could be restricted in their ability to exercise pre-emptive rights under Indian law and could thereby suffer future dilution of their ownership position.*

Under the Companies Act, any company incorporated in India must offer its holders of equity shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares voted on such resolution, unless our Company has obtained government approval to issue without such rights. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without us filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. We may elect not to file a registration statement in relation to pre-emptive rights otherwise available by Indian law to you. To the extent that you are unable to exercise pre-emptive rights granted in respect of the Equity Shares, your proportional interests in us would be reduced.

50. *Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may adversely*

affect the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchange. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by equity shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated substantially in recent years and may continue to fluctuate substantially in the future, which may adversely affect the trading price of our Equity Shares and returns on our Equity Shares, independent of our operating results.

51. Investors will not have the option of getting the allotment of Equity Shares in physical form.

In accordance with the SEBI ICDR Regulations, the Equity Shares shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of Equity Shares in physical form. The Equity Shares Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. For details, see “*Terms of the Issue*” on page 139 of this Draft Letter of Offer. This may impact the ability of our shareholders to receive the Equity Shares in the Issue.

52. There is no guarantee that our Equity Shares will be listed, or continue to be listed, on the Indian stock exchanges in a timely manner, or at all, and prospective investors will not be able to immediately sell their Equity Shares on the Stock Exchange.

In accordance with Indian law and practice, final approval for listing and trading of our Equity Shares will not be applied for or granted until after our Equity Shares have been issued and allotted. Such approval will require the submission of all other relevant documents authorizing the issuance of our Equity Shares. Accordingly, there could be a failure or delay in listing our Equity Shares on the Stock Exchange, which would adversely affect your ability to sell our Equity Shares.

53. Sale of Equity Shares by our Promoters or other significant shareholder(s) may adversely affect the trading price of the Equity Shares.

Any instance of disinvestments of equity shares by our Promoters or by other significant shareholder(s) may significantly affect the trading price of our Equity Shares. Further, our market price may also be adversely affected even if there is a perception or belief that such sales of Equity Shares might occur.

54. Rights of shareholders under Indian laws may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors’ fiduciary duties and liabilities, and shareholders’ rights may differ from those that would apply to a company in another jurisdiction. Shareholders’ rights including in relation to class actions, under Indian law may not be as extensive as shareholders’ rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as shareholder in an Indian company than as shareholder of a corporation in another jurisdiction.

EXTERNAL RISK FACTORS

55. Significant differences exist between Ind AS, Indian GAAP and other accounting principles, such as US GAAP and International Financial Reporting Standards (“IFRS”), which investors may be more familiar with and consider material to their assessment of our financial condition.

Our summary statements of assets and liabilities and summary statements of profit and loss (including other comprehensive income), cash flows and changes in equity, as per the Financial Statements, have been prepared in accordance with the Indian Accounting Standards notified under Section 133 of the

Companies Act, 2013, read with the Ind AS Rules and restated in accordance with the SEBI ICDR Regulations, the SEBI Circular and the Prospectus Guidance Note.

We have not attempted to quantify the impact of US GAAP, IFRS or any other system of accounting principles on the financial data included in this Draft Letter of Offer, nor do we provide a reconciliation of our financial statements to those of US GAAP, IFRS or any other accounting principles. US GAAP and IFRS differ in significant respects from Ind AS and Indian GAAP. Accordingly, the degree to which the Restated Financial Information included in this Draft Letter of Offer will provide meaningful information is entirely dependent on the reader's level of familiarity with Ind AS, Indian GAAP and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Letter of Offer should accordingly be limited.

56. *Political, economic or other factors that are beyond our control may have adversely affect our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located in other countries, including India. Negative economic developments, such as rising fiscal or trade deficits, or a default on national debt, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products or services may be adversely affected by an economic downturn in domestic, regional and global economies.

Economic growth is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production.

Consequently, any future slowdown in the Indian economy could harm our business, results of operations and financial condition. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margins.

57. *A slowdown in economic growth in India could cause our business to suffer.*

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally,

- including in India's various neighboring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

58. *Changing laws, rules and regulations and legal uncertainties, including adverse application of corporate and tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory and policy environment in which we operate is evolving and subject to change. Such changes, including the instances mentioned below, may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy.

The Government of India has issued a notification dated September 29, 2016 notifying Income Computation and Disclosure Standards (“**ICDS**”), thereby creating a new framework for the computation of taxable income. The ICDS became applicable from the assessment year for Fiscal 2018 and subsequent years. The adoption of ICDS is expected to significantly alter the way companies compute their taxable income, as ICDS deviates from several concepts that are followed under general accounting standards, including Indian GAAP and Ind AS. In addition, ICDS shall be applicable for the computation of income for tax purposes but shall not be applicable for the computation of income for minimum alternate tax. There can be no assurance that the adoption of ICDS will not adversely affect our business, results of operations and financial condition.

- the General Anti Avoidance Rules (“**GAAR**”) have been made effective from April 1, 2017. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to our Company, it may have an adverse tax impact on us.
- a comprehensive national GST regime that combines taxes and levies by the Central and State Governments into a unified rate structure, which came into effect from July 1, 2017. We cannot provide any assurance as to any aspect of the tax regime following implementation of the GST. Any future increases or amendments may affect the overall tax efficiency of companies operating in India and may result in significant additional taxes becoming payable. If, as a result of a particular tax risk materializing, the tax costs associated with certain transactions are greater than anticipated, it could affect the profitability of such transactions.

In addition, unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations including foreign investment laws governing our business, operations and group structure could result in us being deemed to be in contravention of such laws or may require us to apply for additional approvals. We may incur increased costs and other burdens relating to compliance with such new requirements, which may also require significant management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future.

Any increase in taxes and levies, or the imposition of new taxes and levies in the future, could increase the cost of production and operating expenses. Taxes and other levies imposed by the central or state governments in India that affect our industry include customs duties, excise duties, sales tax, income tax and other taxes, duties or surcharges introduced on a permanent or temporary basis from time to time. The central and state tax scheme in India is extensive and subject to change from time to time. Any adverse changes in any of the taxes levied by the central or state governments may adversely affect our competitive position and profitability.

59. *Financial instability in both Indian and international financial markets could adversely affect our*

results of operations and financial condition.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange's indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

60. Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

61. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

As an Indian Company, we are subject to exchange controls that regulate borrowing in foreign currencies, including those specified under FEMA. Such regulatory restrictions limit our financing sources for our projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, we cannot assure you that the required approvals will be granted to us without onerous conditions, or at all. Limitations on foreign debt may adversely affect our business growth, results of operations and financial condition.

Further, under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

62. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial performance and the price of our Equity Shares.

63. *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business, prospects and results of operations.*

The regulatory environment in which we operate is evolving and is subject to change. The GoI may implement new laws or other regulations that could affect the insurance industry, which could lead to new compliance requirements, including requiring us to obtain approvals and licenses from the GoI and other regulatory bodies, or impose onerous requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Accordingly, any adverse regulatory change in this regard could lead to fluctuation of price points of various input costs and thereby increase our operational cost.

The Taxation Laws (Amendment) Act, 2019, also prescribes certain changes to the income tax rate applicable to companies in India. According to this Act, companies can henceforth voluntarily opt in favour of a concessional tax regime (subject to no other special benefits/exemptions being claimed), which would ultimately reduce the effective tax rate (on gross basis) for Indian companies from 34.94% to approximately 25.17%. Any such future amendments may affect our ability to claim exemptions that we have historically benefited from, and such exemptions may no longer be available to us. Any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability. Due to COVID -19 pandemic, the Government of India had also passed the Taxation and Other Laws (Relaxation of Certain Provisions) Act, 2020, implementing relaxations from certain requirements under, among others, the Central Goods and Service Tax Act, 2017 and Customs Tariff Act, 1975. Furthermore, the Government of India announced the Union Budget for Fiscal 2022 ("**Budget 2022**"), pursuant to which the Finance Bill 2022 (defined below) has proposed various amendments which will only come into effect upon receipt of Presidential assent to the bill and notification in requisite acts. We have not fully determined the impact of these recent and proposed laws and regulations on our business.

There can be no assurance that we will not be required to comply with additional procedures or obtain additional approvals and licenses from the government and other regulatory bodies or that they will not impose onerous requirements and conditions on our operations in connection with GST. While we are and will comply with the GST rules and regulations, any failure to comply with the same may result in noncompliance with the GST and may adversely affect our business and results of operations. The GoI announced the union budget for fiscal year 2023, following which the Finance Bill, 2022 was introduced

in the Lok Sabha on February 1, 2022. Subsequently, the Finance Bill 2022 received the assent from the President of India on March 30, 2022, and became the Finance Act, 2022 (“**Finance Act 2022**”). We cannot predict whether the amendments made and yet to be notified pursuant to the Finance Act 2022 would have an adverse effect on our business, financial condition, future cash flows and results of operations. Any changes in the Finance Act 2022 or interpretations of existing, or the promulgation of new, laws, rules and regulations including foreign investment and stamp duty laws that are applicable to our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

Changes in other laws may impose additional requirements, resulting in additional expenditure and time cost. For instance, the GoI has announced four labour codes which are yet to come into force as on the date of this Draft Letter of Offer, namely, (i) the Code on Wages, 2019, (ii) the Industrial Relations Code, 2020; (iii) the Code on Social Security, 2020; and (iv) the Occupational Safety, Health and Working Conditions Code, 2020. Such codes will replace the existing legal framework governing rights of workers and labour relations. While the rules for implementation under these codes have not been announced, we are unable to determine the impact of all or some such laws on our business and operations which may restrict our ability to grow our business in the future. For example, the Social Security Code aims to provide uniformity in providing social security benefits to employees which were previously segregated under different acts and had different applicability and coverage. The Social Security Code has introduced the concept of workers outside traditional employer-employee work-arrangements, such as “gig workers” and “platform workers” and provides for the mandatory registration of such workers in order to enable these workers to avail themselves of various employment benefits, such as life and disability cover, health and maternity benefits and old age protection, under schemes framed under the Social Security Code from time to time. Any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may impact the viability of our current businesses or restrict our ability to grow our businesses in the future.

64. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighbouring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

65. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. Although economic conditions are different in each country, investors’ reactions to developments in one country can have adverse effects on the securities of companies in other countries, including India. A loss of investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any worldwide financial instability could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our business, our future financial performance and the prices of the Equity Shares.

The recent outbreak of Novel Coronavirus has significantly affected financial markets around the world. Any other global economic developments or the perception that any of them could occur may continue to

have an adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity and restrict the ability of key market participants to operate in certain financial markets. Any of these factors could depress economic activity and restrict our access to capital, which could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

SECTION IV – ABOUT THE COMPANY

INDUSTRY

Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured and accordingly, investment decisions should not be based on such information. The information in this section must be read in conjunction with the sections titled “Risk Factors” and “Our Business” beginning on pages 21 and 68, respectively of this Draft Letter of Offer.

Global Industry Outlook

Global economic activity is experiencing a broad-based and sharper-than-expected slowdown, with inflation higher than seen in several decades. The cost-of-living crisis, tightening financial conditions in most regions, Russia’s invasion of Ukraine, and the lingering COVID-19 pandemic all weigh heavily on the outlook. Global growth is forecast to slow from 6.0 percent in 2021 to 3.2 percent in 2022 and 2.7 percent in 2023. This is the weakest growth profile since 2001 except for the global financial crisis and the acute phase of the COVID-19 pandemic.

Global inflation is forecast to rise from 4.7 percent in 2021 to 8.8 percent in 2022 but to decline to 6.5 percent in 2023 and to 4.1 percent by 2024. Monetary policy should stay the course to restore price stability, and fiscal policy should aim to alleviate the cost-of-living pressures while maintaining a sufficiently tight stance aligned with monetary policy. Structural reforms can further support the fight against inflation by improving productivity and easing supply constraints, while multilateral cooperation is necessary for fast-tracking the green energy transition and preventing fragmentation.

Indian Economy Overview

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

Market Size

India’s nominal gross domestic product (GDP) at current prices is estimated to be at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between 2023 and 2030. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 2.1% of GDP in the first quarter of FY 2022-23.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines were losing steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

Recent Developments

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With an improvement in the economic scenario and the Indian economy recovering from the Covid-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- As of September 21, 2022, India's foreign exchange reserves stood at US\$ 524,520 million.
- The private equity-venture capital (PE-VC) sector investments stood at US\$ 2 billion in September 2022.
- Merchandise exports in September 2022 stood at US\$ 32.62 billion.
- PMI Services remained comfortably in the expansionary zone at 56.7 during April-September 2022
- In September 2022, the gross Goods and Services Tax (GST) revenue collection stood at Rs. 147,686 crore (US\$ 17.92 billion).
- Between April 2000-June 2022, cumulative FDI equity inflows to India stood at US\$ 604,996 million.

- In August 2022, the overall IIP (Index of Industrial Production) stood at 131.3. The Indices of Industrial Production for the mining, manufacturing and electricity sectors stood at 99.6, 131.0 and 191.3, respectively, in August 2022.
- According to data released by the Ministry of Statistics & Programme Implementation (MoSPI), India's Consumer Price Index (CPI) based retail inflation reached 7.41% in September 2022.
- In FY 2022-23, (until October 28, 2022), Foreign Portfolio Investment (FPI) outflows stood at Rs. 58,762 crore (US\$ 7.13 billion).
- The wheat procurement in Rabi 2021-22 and the anticipated paddy purchase in Kharif 2021-22 would include 1208 lakh (120.8 million) metric tonnes of wheat and paddy from 163 lakh (16.7 million) farmers, as well as a direct payment of MSP value of Rs. 2.37 lakh crore (US\$ 31.74 billion) to their accounts.

Road Ahead

- In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.
- India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.
- Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

Overview of Indian Textile and Apparel Industry

India's textiles sector is one of the oldest industries in the Indian economy, dating back to several centuries. The industry is extremely varied, with hand-spun and hand-woven textiles sectors at one end of the spectrum, with the capital-intensive sophisticated mills sector at the other end. The fundamental strength of the textile industry in India is its strong production base of a wide range of fibre/yarns from natural fibres like cotton, jute, silk and wool, to synthetic/man-made fibres like polyester, viscose, nylon and acrylic.

The decentralised power looms/ hosiery and knitting sector form the largest component of the textiles sector. The close linkage of textiles industry to agriculture (for raw materials such as cotton) and the ancient culture and traditions of the country in terms of textiles makes it unique in comparison to other industries in the country. India's textiles industry has a capacity to produce a wide variety of products suitable for different market segments, both within India and across the world.

In order to attract private equity and employ more people, the government introduced various schemes such as the Scheme for Integrated Textile Parks (SITP), Technology Upgradation Fund Scheme (TUFS) and Mega Integrated Textile Region and Apparel (MITRA) Park scheme.

Market Size

The Indian textile and apparel industry is expected to grow at 10% CAGR from 2019-20 to reach US\$ 190 billion by 2025-26. India has a 4% share of the global trade in textiles and apparel.

India is the world's largest producer of cotton. Estimated production stood at 362.18 lakh bales during cotton season 2021-22. Domestic consumption for the 2021-22 cotton season is estimated to be at 338 lakh bales. Cotton production in India is projected to reach 7.2 million tonnes (~43 million bales of 170 kg each) by 2030, driven by increasing demand from consumers.

Production of fibre in India reached 2.40 MT in FY21 (till January 2021), while for yarn, the production stood at 4,762 million kgs during the same period.

India's textile and apparel exports (including handicrafts) stood at US\$ 44.4 billion in FY22, a 41% increase YoY. India's textile and apparel exports to the US, its single largest market, stood at 27% of the total export value in FY22. Exports of readymade garments including cotton accessories stood at US\$ 6.19 billion in FY22.

India's textiles industry has around 4.5 crore employed workers including 35.22 lakh handloom workers across the country.

Investment and Key Development

Government Initiatives

The Indian government has come up with several export promotion policies for the textiles sector. It has also allowed 100% FDI in the sector under the automatic route.

Other initiatives taken by the Government of India are:

Road Ahead

The future of the Indian textiles industry looks promising, buoyed by strong domestic consumption as well as export demand. India is working on various major initiatives to boost its technical textile industry. Owing to the pandemic, the demand for technical textiles in the form of PPE suits and equipment is on the rise. The government is supporting the sector through funding and machinery sponsoring.

Top players in the sector are achieving sustainability in their products by manufacturing textiles that use natural recyclable materials.

With consumerism and disposable income on the rise, the retail sector has experienced a rapid growth in the past decade with the entry of several international players like Marks & Spencer, Guess and Next into the Indian market. The growth in textiles will be driven by growing household income, increasing population and increasing demand by sectors like housing, hospitality, healthcare, etc.

The technical textiles market for automotive textiles is projected to increase to US\$ 3.7 billion by 2027, from US\$ 2.4 billion in 2020. MITAL LIFESTYLE LIMITED

I SIGNIFICANT ACCOUNTING POLICIES AND NOTES FORMING PART OF FINANCIAL STATEMENTS

(I) Reporting entity:

Mittal Lifestyle Limited (the 'Company') was incorporated on 31 August, 2005 as Private Limited Company under the Companies Act 1956 and the same was converted in Public Limited Company on 22 November, 2017. The company is engaged mainly in supply of Bottom weight Fabrics & Denims. The company has tied-up with about 16 Composite mills to get denim fabric manufactures as per its need and requirements. The Company is listed on Main Platform of National Stock Exchange (NSE) .

(II) Basis of Preparation:

(A) Statement of Compliance

These financial statements are prepared on accrual basis of accounting in accordance with Indian Accounting Standards (Ind AS) prescribed under Section 133 of the Companies Act, 2013 (The Act)[Companies (Indian Accounting Standards) Rules, 2015 & Companies (Indian Accounting Standards) Amendment Rules, 2016] and other applicable provisions of the Act as amended and the Guidance note issued by ICAI. These are the Company's first Ind AS financial statements and Ind AS 101 'First Time Adoption of Indian Accounting Standards', has been applied.

For all the periods upto and including March 31, 2020, the Company prepared its financial statements in accordance with Generally Accepted Accounting Principles (GAAP) in India, Accounting Standards prescribed under Section 133 of the Companies Act, 2013, read with Rule 7 of the Companies (Accounts) Rules, 2014, the Companies Act, 2013 (to the extent notified and applicable), applicable provisions of the Companies Act, 1956.

Annexures I, II, III, IV explains how the transition from previous GAAP to Ind AS has affected the Company's financial position, financial performance and cash flows.

The above Accounts have been prepared on going concern basis as the management is confident of meeting its obligation based on profit made by the Company in the Current Year and the Previous year.

(B) Basis of Measurement

The financial statements have been prepared on accrual basis of accounting under historical cost convention, except for following financial assets and financial liabilities which are measured at fair value:

- Certain financial assets and liabilities measured at fair value.

The methods used to measure fair values are as follows:

- FAIR VALUATION MEASUREMENT

(i) Fair Value Hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in the financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the company has classified its financial instruments into the following three levels prescribed under Ind AS-113 "Fair Value Measurements"

Level 1:

Level 1 hierarchy includes financial instruments measured using quoted prices. This includes listed equity instruments and traded bonds that have quoted price. The fair value of all equity instruments including bonds which are traded in the recognised Stock Exchange and money markets are valued using the closing prices as at the reporting date.

Level 2:

The fair value of financial instruments that are not traded in an active market is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3:

If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This includes security deposits / retention money and loans at below market rates of interest.

(C) Functional and presentation currency

These financial statements are presented in Indian Rupees (INR), which is the Company's functional currency.

(D) Use of estimates and management judgements

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that may impact the application of accounting policies and the reported value of assets, liabilities, income, expenses and related disclosures including contingent assets and liabilities at the Balance Sheet date. The estimates and management's judgements are based on previous experience and other factors considered reasonable and prudent in the circumstances. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised.

(III) SIGNIFICANT ACCOUNTING POLICIES :

A summary of the significant accounting policies applied in the preparation of financial statements as given below have been applied consistently to all periods presented in the financial statements.

I Property, Plant and Equipment (PPE)

Property, Plant and Equipment up to March 31, 2019 were carried in the Balance Sheet in accordance with Indian GAAP.

- a) The Company has elected to avail the exemption granted by IND AS 101, "First time adoption of IND AS" to regard those amounts as deemed cost at the date of the transition to IND AS (i.e. as on April 1, 2019).
- b) An item of PPE is recognized as an asset if it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably.
- c) PPE are initially measured at cost of acquisition/construction including decommissioning or restoration cost as estimated by management wherever required.
- d) After initial recognition, Property, Plant and Equipment is carried at cost less accumulated depreciation/ amortisation and accumulated impairment losses, if any.

- e) Spares parts (procured along with the Plant & Machinery or subsequently) which meet the recognition criteria are capitalized. The carrying amount of those spare parts that are replaced is derecognized when no future economic benefits are expected from their use or upon disposal. Other spare parts are treated as "stores & spares" forming part of the inventory.

2 Investments in subsidiaries and joint ventures

Investments in equity shares of subsidiaries and joint ventures are carried at cost, if any.

3 Financial assets other than investment in subsidiaries and joint ventures

A financial asset includes inter-alia any asset that is cash, equity instrument of another entity or contractual obligation to receive cash or another financial asset or to exchange financial asset or financial liability under conditions that are potentially favourable to the Company. A financial asset is recognized when and only when the Company becomes party to the contractual provisions of the instrument.

Financial assets of the Company comprise Cash and Cash Equivalents, Bank Balances, Investments in equity shares of companies other than in subsidiaries & joint ventures, Trade Receivables, Advances to employees/ contractors, security deposit, claims recoverable etc.

a) Classification

The Company classifies its financial assets in the following categories:

- at amortised cost,
- at fair value through other comprehensive income (FVTOCI)

The classification depends on the following:

- the entity's business model for managing the financial assets and
- the contractual cash flow characteristics of the financial asset.

For assets measured at fair value, gains and losses will either be recorded in the Statement of Profit and Loss or Other Comprehensive Income. For investments in debt instruments, this will depend on the business model in which the investment is held. For investments in equity instruments, this will depend on whether the group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through Other Comprehensive Income.

b) Initial recognition and measurement

All financial assets except trade receivables are recognised initially at fair value plus, in the case of financial assets not recorded at fair value through profit or Loss, transaction costs that are attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in the Statement of Profit and Loss.

The Company measures the trade receivables at their transaction price, if the trade receivables do not contain a significant financing component.

c) Subsequent measurement

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- i) The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- ii) Contractual terms of the asset give rise on specified dates to cash flows that are Solely Payments of Principal and Interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the Effective Interest Rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit and Loss. The losses arising from impairment are recognised in the Statement of Profit and Loss.

Debt instrument at Fair Value through Other Comprehensive Income (FVTOCI)

A 'debt instrument' is classified as at FVTOCI if both the following criteria are met:

- i) The objective of the business model is achieved both by collecting contractual cash flows and selling the financial assets, and
- ii) The asset's contractual cash flows represent SPPI.

Debt instruments at fair value through Other Comprehensive Income are measured at each reporting date at fair value. Fair value movements are recognized in Other Comprehensive Income (OCI). However, the Company recognizes interest income, impairment losses, reversals and foreign exchange gain or loss in the Statement of Profit and Loss. On derecognition of the asset, cumulative gain or loss previously recognised in OCI is reclassified from the equity to profit and loss. Interest income from these financial assets is included in other income using the EIR method.

Equity investments

All equity investments in entities other than subsidiaries and joint ventures are measured at fair value. Equity instruments which are held for trading, if any, are classified at Fair Value Through Profit or Loss (FVTPL). For all other equity instruments, the Company classifies the same as at FVTOCI. The Company makes such election on an instrument by-instrument basis. The classification is made on initial recognition and is irrevocable.

All fair value changes on an equity instrument classified at FVTOCI, are recognized in the OCI. There is no subsequent reclassification of fair value gains and losses to the Statement of Profit and Loss. However, the Company may transfer the cumulative gain or loss within equity. Dividends from such investments are recognised in the Statement of Profit and Loss as other income when the company's right to receive payments is established.

Equity instruments included within the FVTPL category, if any, are measured at fair value with all changes recognized in the Statement of Profit and Loss.

d) Derecognition

A financial asset is derecognised only when:

- i) The Company has transferred the rights to receive cash flows from the financial asset, or
- ii) Retains the contractual rights to receive the cash flows of the financial asset, but assumes a contractual obligation to pay the cash flows to one or more recipients.

Where the entity has transferred an asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the financial asset. In such cases, the financial asset is derecognised. Where the Company has not transferred substantially all risks and rewards of ownership of the financial asset, the financial asset is not derecognised.

Where the Company has neither transferred a financial asset nor retains substantially all risks and rewards of ownership of the financial asset, the financial asset is derecognised if the Company has not retained control of the financial asset.

Where the Company retains control of the financial asset, the asset is continued to be recognised to the extent of continuing involvement in the financial asset.

e) Impairment of financial assets

In accordance with Ind-AS 109, the Company applies Expected Credit Loss (ECL) model for measurement and recognition of impairment loss on the following financial assets:

- i) Financial assets that are debt instruments, and are measured at amortised cost.
- ii) Financial assets that are debt instruments and are measured as at FVTOCI
- iii) Contract Assets under Ind AS 11, Construction Contracts
- iv) Lease Receivables under Ind AS 17, Leases.
- v) Trade Receivables under Ind AS 18, Revenue.

The Company follows 'simplified approach' permitted under Ind As 109, "Financial Instruments" for recognition of impairment loss allowance on contract assets, lease receivables and trade receivables resulting from transactions within the scope of Ind AS 11, Ind AS 17 and Ind AS 18, which requires expected life time losses to be recognised from initial recognition of the receivables.

For recognition of impairment loss on other financial assets, the Company assesses whether there has been a significant increase in the credit risk since initial recognition. If credit risk has not increased significantly, 12-month ECL is used to provide for impairment loss. However, if credit risk has increased significantly, lifetime ECL is used. For assessing increase in credit risk and impairment loss, the Company assesses the credit risk characteristics on instrument-by-instrument basis. If, in a subsequent period, credit quality of the instrument improves such that there is no longer a significant increase in credit risk since initial recognition, then the entity reverts to recognizing impairment loss allowance based on 12-month ECL. The amount of expected credit loss (or reversal) for the period is recognized as expense/income in the Statement of Profit and Loss.

5 Dividends

Dividends and interim dividends payable to the Company's shareholders are recognised as change in equity in the period in which they are approved by the Company's shareholders and the Board of Directors respectively.

6 Financial liabilities

Financial liabilities of the Company are contractual obligation to deliver cash or another financial asset to another entity or to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the Company.

The Company's financial liabilities include loans & borrowings, trade and other payables.

a) Classification, initial recognition and measurement

Financial liabilities are recognised initially at fair value minus transaction costs that are directly attributable and subsequently measured at amortised cost. Financial liabilities are classified as subsequently measured at amortized cost. Any difference between the proceeds (net of transaction costs) and the fair value at initial recognition is recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, over the period of the borrowings using the effective rate of interest.

Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting period.

b) Subsequent measurement

After initial recognition, financial liabilities are subsequently measured at amortised cost using the EIR method. Gains and losses are recognised in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion, when the liabilities are derecognised as well as through the EIR amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included as finance costs in the Statement of Profit and Loss.

c) Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the Statement of Profit and Loss.

d) Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

7 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when the Company has a present legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Such provisions are determined based on management estimate of the amount required to settle the obligation at the Balance Sheet date. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably. The expense relating to a provision net of any reimbursement is presented in the Statement of Profit and Loss or in the carrying amount of an asset if another standard permits such inclusion.

a)

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows using a current pre-tax rate that reflects the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

b)

Contingent liabilities are possible obligations that arise from past events and whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events not wholly within the control of the Company. Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Contingent liabilities are disclosed on the basis of judgment of management/ independent experts. These are reviewed at each Balance Sheet date and are adjusted to reflect the current management estimate.

c)

Contingent assets are possible assets that arise from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company.

d)

Contingent assets are disclosed in the financial statements when inflow of economic benefits is probable on the basis of judgment of management. These are assessed continually to ensure that developments are appropriately reflected in the financial statements.

8 Employee Benefit

1. Short Term employee benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed or included in the carrying amount of an asset if another standard permits such inclusion as the related service is provided.

A liability is recognised for the amount expected to be paid under short-term performance related cash bonus if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably

2. Defined contribution plan

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into separate trusts and will have no legal or constructive obligation to pay further amounts. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the periods during which services are rendered by employees. Contributions to a defined contribution plan that is due more than 12 months after the end of the period in which the employees render the service are discounted to their present value.

Employees Defined Contribution Superannuation Scheme (EDCSS) for providing pension benefits and contribution to Social Security Scheme are accounted as defined contribution plan.

3. Defined Benefit plan

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The Company's Gratuity Scheme, Retired Employees Health Scheme (REHS), Provident Fund Scheme, Allowance on Retirement/Death and Memento on Superannuation to employees are in the nature of defined benefit plans.

The liability or asset recognised in the Balance Sheet in respect of Gratuity, Retired Employees Health Scheme and Provident Fund Scheme is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets.

The defined benefit obligation is calculated annually by actuary using the Projected Unit Credit Method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss or included in the carrying amount of an asset if another standard permits such inclusion.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in Other Comprehensive Income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

4. other Long Term employee benefit

Benefits under the Company's leave encashment scheme constitute other long term employee benefits.

The Company's net obligation in respect of long-term employee benefits is the amount of future benefits that employees have earned in return for their service in the current and prior periods. The benefit is discounted to determine its present value, and the fair value of any related assets is deducted. The discount rate is based on the prevailing market yields of Indian government securities as at the reporting date that have maturity dates approximating the terms of the Company's obligations. The calculation is performed using the Projected Unit Credit Method. Contributions to the scheme and actuarial gains or losses are recognised in the Statement of Profit and Loss or included in the carrying amount of an asset if another standard permits such inclusion in the period in which they arise.

5. Termination benefit

The expenses incurred on terminal benefits in the form of ex-gratia payments and notice pay on voluntary retirement schemes are charged to the Statement of Profit and Loss in the year of incurrence of such expenses

9 Revenue Recognition and Other Income

- a) Company has applied Ind AS 115 which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognised

Ind AS 115 five step model is used to determine whether revenue should be recognised at a point in time or over time, and at what amount is as below:

- b) • Step 1: Identify the contract with the customer
• Step 2: Identify the performance obligations in the contract
• Step 3: Determine the transaction price
• Step 4: Allocate the transaction price to the performance obligations
• Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

Revenue is recognised upon transfer of control of promised goods or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services.

- Revenue from sales of goods is recognised on output basis measured by units delivered, number of transactions etc.
c) - Revenue from the sale of goods is recognised at the point in time when control is transferred to the customer which coincides with the performance obligation under the contract with the customer.
- Revenue from services is recognized in accordance with the terms of contract when the services are rendered and the related costs are incurred

Revenue is measured based on the transaction price, which is the consideration, adjusted for discounts, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

- d) Revenue from related party is recognised based on transaction price which is at arm's length.
e) The company recognizes Project cost in the Profit and Loss Account in respect of sales of flats on progress of construction based on technical certificate for which revenue is recognized as stated in to note 2 above.
f) Dividend income is recognized when right to receive the same is established.
g) Interest/Surcharge recoverable from customers and liquidated damages /interest on advances to contractors is recognised when no significant uncertainty as to measurability and collectability exists

- For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial asset to the gross carrying amount of the financial asset. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in other income in the Statement of Profit and Loss.
h)

10 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying tangible assets that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs. Capitalisation of borrowing cost ceases when substantially all the activities necessary to prepare the qualifying tangible assets for their intended use are complete.

11 Depreciation & Amortisation

a) Depreciation on additions to /deductions from Property, Plant & Equipment (PPE) during the year is charged on pro-rata basis from / up to the date on which the asset is available for use / disposal.

b) Depreciation in respect of items of PPE is charged on Written Down Method based on the life and residual value (5%) given in the Schedule II of the Companies Act, 2013

12 Impairment of non-financial assets other than inventories

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets of the Company. When the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. The resulting impairment loss is recognised in the Statement of Profit and Loss.

13 Income Taxes

Income tax expense comprises current and deferred tax. Tax is recognised in the Statement of Profit and Loss, except to the extent that it relates to items recognised directly in equity or other comprehensive income, in which case the tax is also recognised directly in equity or in other comprehensive income.

a) Current tax

i) The current tax is the expected tax payable on the taxable income for the year on the basis of the tax laws applicable at the reporting date and any adjustments to tax payable in previous years. Taxable profit differs from profit as reported in the Statement of Profit and Loss because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible (permanent differences).

ii) Additional income taxes that arise from the distribution of dividends are recognised at the same time that the liability to pay the related dividend is recognised.

b) Deferred tax

i) Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Company's financial statements and the corresponding tax bases used in the computation of taxable profit and are accounted for using the Balance Sheet method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are generally recognised for all deductible temporary differences, unused tax losses and unused tax credits to the extent that it is probable that future taxable profits will be available against which those deductible temporary differences, unused tax losses and unused tax credits can be utilised. Such assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of an asset or liability in a transaction that at the time of the transaction affects neither the taxable profit or loss nor the accounting profit or loss.

ii) The carrying amount of deferred tax assets is reviewed at each Balance Sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available against which the temporary differences can be utilised.

iii) Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the Balance Sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would flow in the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

iv) Deferred tax is recognised in the Statement of Profit and Loss except to the extent that it relates to items recognised directly in other comprehensive income or equity, in which case it is recognised in other comprehensive income or equity.

v) Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities, and when the deferred income tax assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

vi) Deferred tax recovery adjustment account is credited/ debited to the extent the deferred tax for the current period which forms part of current tax in the subsequent periods and affects the computation of return on equity (ROE), a component of tariff.

14 Segment Reporting

In accordance with Ind AS 108 – Operating Segment, the operating segments used to present segment information are identified on the basis of internal reports used by the Company’s Management to allocate resources to the segments and assess their performance. The Board of Directors is collectively the Company’s “Chief Operating Decision Maker” or “CODM” within the meaning of Ind AS 108.

b) Dealing in supply of Bottom weight Fabrics & Denims is the principal business activity of the Company.

15 Statement of Cash Flows

a) Cash and Cash Equivalents:

For the purpose of presentation in the statement of cash flows, cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value, and bank overdrafts.

b) Statement of cash flows is prepared in accordance with the indirect method prescribed in Ind AS 7- ‘Statement of Cash Flows’.

15 Current versus non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current / non-current classification.

a) An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or Cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

b) A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

16 Inventories :-

Inventories is valued at lower of cost or net realisable value.

We have not found any such matters related to the audit of this standalone financial statement which are to be reported here.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India including the Ind AS specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider

quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

“Annexure B” to the Independent Auditors’ Report on the standalone financial statements of Mittal Life Style Limited

Report on the internal financial controls with reference to the aforesaid standalone financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (Referred to in paragraph 1(A)(f) under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date)

Opinion

We have audited the internal financial controls with reference to standalone financial statements of Mittal Life Style Limited (“the Company”) as of 31 March 2022 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to standalone financial statements and such internal financial controls were operating effectively as at 31 March 2022, based on the internal financial controls with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the “Guidance Note”).

Management’s Responsibility for Internal Financial Controls

The Company’s management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to standalone financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as “the Act”).

Auditor’s Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to standalone financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to standalone financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to standalone financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to standalone financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to standalone financial statements.

Meaning of Internal Financial Controls with Reference to Standalone Financial Statements

A company's internal financial controls with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of standalone financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of standalone financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the standalone financial statements.

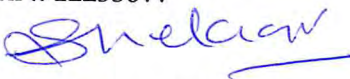

Inherent Limitations of Internal Financial Controls with Reference to Standalone Financial Statements

Because of the inherent limitations of internal financial controls with reference to standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to standalone financial statements to future periods are subject to the risk that the internal financial controls with reference to standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The Allotment of such Equity Shares will be at the sole discretion of our Board in consultation with the Designated Stock Exchange, as a part of the Issue and will not be a preferential allotment.
- (d) Allotment to Renouncees who having applied for all the Rights Equity Shares renounced in their favour and also have applied for Additional Rights Equity Shares provided there is surplus available after making full Allotment under (a), (b) and (c) above. - (e) Allotment to any other person that our Board may deem fit provided there is surplus available after making Allotment under (a), (b), (c) and (d) above, and the decision of our Board in this regard shall be final and binding.
- (f) After taking into account Allotment to be made under (a) to (e) above, if there is any unsubscribed portion, the same shall be deemed to be 'unsubscribed' for the purpose of Regulation 3(1)(b) of the SEBI Takeover Regulations.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“**FDI**”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“**DPIIT**”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DPIIT issued the Consolidated FDI Policy Circular of 2017 (“**FDI Circular 2017**”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DPIIT that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DPIIT issues an updated circular.

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases which are notified by RBI as amendments to FEMA. In case of any conflict between FEMA and such policy pronouncements, FEMA prevails. The Consolidated FDI Policy, issued by the DIPP, consolidates the policy framework in place as on August 27, 2017, and supersedes all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 27, 2017. The Government proposes to update the consolidated circular on FDI Policy once every year and therefore the Consolidated FDI Policy will be valid until the DIPP issues an updated circular.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company falls under the automatic route as provided in the FDI Policy and FEMA and transfer does not attract the provisions of the SEBI Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI Policy; and (iii) the pricing is in accordance with the guidelines prescribed by SEBI and RBI.

As per the existing policy of the Government of India, erstwhile OCBs cannot participate in this Issue.

The above information is given for the benefit of the Applicants / Investors. Our Company and the Lead Manager are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Letter of Offer. Investors are advised to make their independent investigations and ensure that the number of Equity Shares applied for do not exceed the applicable limits under laws or regulations.
