SECTION I - OVERVIEW

Preservation Activities in Ventura

The Historic Preservation Commission was established in 1973 under Ordinance No. 1801 and is a seven-member board appointed by the City Council. An attempt is made to appoint members with backgrounds in archaeology, local history, architecture, and fields related to historic preservation. Currently, several members have backgrounds in some of these areas.

The Commission has designated some 58 landmarks in Ventura, which include archaeological sites, natural features, commercial and residential buildings. Two National Register Districts have also been declared: the Mitchell Block and the Mission Historic District. The duties of the Commission, in addition to designating landmarks, includes review of alterations to designated landmarks. The Commission maintains historic records and a variety of current publications on historic preservation to encourage the interest and support of citizens in maintaining their heritage.

The Commission has sponsored annual Historic Preservation Week activities, which have included walking tours, presentation of awards to landmark owners, and educational displays.

In 1976, the Historic Preservation Commission initiated the Historic Building Revolving Fund for low interest loans for landmark owners. The money is allocated from the City's Housing and Community Development Act Funds. To date, some six owners have participated in the program.

In 1977-79, the City had an initial historic building survey done by an intern from the Public History Program at UCSB. At that time, a developmental history of Ventura was written by intern Lynn Brady and a Historic Preservation Policy and Plan was adopted by the City Council.

The City of Ventura has undertaken several major restoration projects, including the Olivas and Ortega Adobes, which are operated by the Parks and Recreation Department and the restoration in 1972 of the Ventura County Courthouse into the current City Hall.

Archaeology has also been important to the City. The first investigation in 1966, in connection with the Redevelopment Project on the Promenade, discovered the Chumash Village site of Shisholop. Further investigations uncovered a 10-room adobe in Mission Plaza Park. The most recent large investigation has been the area next to the Mission, where an interpretive center known as the Albinger Archaeological Museum was built. The San Miguel Chapel site was purchased by the City and an archaeological investigation was done by Moorpark College archaeology classes.

The City has leased property across from the Albinger Archaeological Museum next to the Mission Plaza Park to the Ventura County Historical Society, who built a new museum there in 1978. The land was leased to the museum for 99 years at \$1.00 per year.

In addition to the Ventura County Historical Museum, there is San Buenaventura Heritage, a non-profit organization that is restoring the Dudley House, an 1890's farmhouse.

Preparation of Survey Grant

The Historic Preservation Commission, realizing the necessity of a comprehensive survey in order to give a basis for future landmark and district nominations, had the Survey Grant prepared in 1981.

Developmental History of Ventura

The City of Ventura was incorporated in 1866 and the town at that time was primarily a dirt road with a row of adobes along Main Street, west of the Mission. The official town map of Ventura was adopted in 1869 by G. H. Thompson. In 1876, the eastern addition to the City was annexed.

Old Downtown Area

Prior to 1900, there were two building booms in Ventura, one in the 1870's and the other in the 1880's. Both saw a tremendous change in the physical growth of the City. The City began to grow east and south from the Mission. Many new houses were built on Palm, Oak, Meta, Figueroa, Santa Clara and Chestnut Streets. Commercial buildings were constructed primarily on Main Street. Most of the buildings built in the 1870's and 1880's in this section of the City are now gone due to changing uses and the freeway. The few that remain, built in Italianate and Queen Anne Styles, are found in this survey and several have been declared landmarks. Part of the reason for this growth was the building of "The Wharf" in 1871 and the arrival of the railroad in Ventura in 1887. Also, farming land was being subdivided in 1867 east of the town on which is now Telegraph and Telephone Roads, which attracted many settlers. The Wharf was a busy place, where many farmers came to ship their crops and warehouses stood near the shore. The lumber and planing mills were primarily located near The Wharf area, although a few of the earliest lumber yards were found on Main and Santa Clara Streets.

After 1900, the City began to grow slowly eastward from Chestnut Street all the way out to Crimea Street, which was the edge of the City/County boundaries. In the 1880's and 1890's, a few houses had been built in this area. After 1900, the lots began to fill in more quickly with Colonial Revival and California Bungalow style residences and finally with Mediterranean styles.

The 1920's produced the largest building boom ever felt in Ventura. Lots were at a premium and every square inch was being utilized for housing. There was a housing shortage in Ventura due, in part, to the discovery of oil on Ventura Avenue. Today, the area has stabilized somewhat. With the current interest in preservation, many individual families have decided to resettle in the old downtown section and have restored or are in the process of restoring their residences. Many older residences have found new commercial uses. Several commercial structures are also undergoing restoration and taking on new uses.

The Avenue area is in transition. Many young families are finding affordable housing here and are investing in the area. However, both areas still suffer from many rentals, whose landlords don't care about the condition of the property.

Ventura Avenue

The "Avenue" area, as it has come to be called, was subdivided early for farmland. Wheat, grains, apricots and honey were important early exports from this area. The land closest to the downtown was subdivided in the 1880's and a few houses on Park Row and Harrison remain today. Many fine, Vernacular Victorian ranch houses were located on Ventura Avenue. Several have since been moved when industrialization came to the Avenue in the early 1920's with the discovery of oil. The Avenue area changed "almost overnight" with the opening of many new tracts to accommodate the oilworkers and those in related industries. Two new schools--The Avenue and E.P. Foster Schools--were built in the 1920's and Ventura Avenue began its change from primarily residential to commercial use. Mill School was built in the 1930's.

Most of the tracts developed in the 1920's contained modest California Bungalows and Mediterranean style residences. Land that was not developed was filled in with houses in the 1930's and 1940's. Several older houses were relocated to the Avenue from the downtown or from Ventura Avenue itself.

The Avenue area, which was once quite rural and whose source of income came from agriculture, was transformed beginning in the 1920's to an oil industrial area with residences mixed in.

SECTION II - STATEMENT OF PURPOSE

The primary reason for undertaking the Survey was to have a comprehensive inventory of historical, architectural and cultural resources in Ventura. This will provide a basis for decisions by the Historic Preservation Commission and the City Council as to the declaration of landmarks, landmark districts and points of interest. It will also serve as a planning tool for local government when making decisions as to zoning and rehabilitation of older areas. Its purpose is also one of education. The general public will have the opportunity to participate as volunteers and receive training in historical research and architectural styles. The information generated from the survey will be available to the public for research purposes.

The City of Ventura entered into an agreement with the State of California, Department of Parks and Recreation, to do a comprehensive block-by-block survey beginning May 1, 1982 and ending May 31, 1983. The sections of the community to be surveyed were the Downtown and "Avenue" areas shown on the maps found in the appendix. All buildings in the downtown were photographed, although no worksheets were done on post 1940 buildings. Architectural and research worksheets were done on most buildings prior to 1940. The Downtown Redevelopment area had already been surveyed so nothing was done on those buildings.

The Ventura Avenue area was done selectively with all buildings prior to 1900 being surveyed. Also, representative examples from each street and a streetscape photograph and form for each street were done on buildings prior to 1940. All buildings on North Ventura Avenue were photographed.

The inventory includes buildings, districts, structures, and objects of historical, architectural, cultural and archaeological interest.

SECTION III - METHODS USED

Time and Organization of Survey Project

The survey took exactly one year to complete beginning June 1, 1982 and ending May 31, 1983. Survey flyers had gone out in May to begin soliciting volunteers before the coordinator was hired. The coordinator was hired June 1. During the month of June, the Volunteer Handbook was prepared and publicity notices went out for the training sessions to be held in July.

Publicity efforts included the printing of an informative survey brochures, flyers, newspaper articles and radio coverage. (See appendix) A special effort was made to attract residents from the Avenue area, using a flyer, newsletter coverage and appearance at Avenue Days with a booth.

Training sessions for volunteers began in July. The training was divided into two morning sessions. One session was devoted to architectural styles and the other to research techniques. An all day Saturday session was held to accommodate those who worked. A walking tour of the neighborhood followed all sessions. In September, a second session on research techniques was held for new volunteers. A separate training session was held for Ventura College architecture students at the college. About 20 students participated in the field work.

The Survey itself (field work and photography) was conducted from July through March with the Downtown area completed primarily by December. The Avenue area began in January and was completed in April. Volunteers signed a contract to complete the field work and photography usually within a two-week period. Their work was reviewed by the Survey Coordinator and new assignments were made. Initially, all volunteers, except those doing photography, were asked to do the field work. A few who wanted to do research only were allowed to begin work. The research work began in September and continued through the end of the survey.

The Project Review Committee began its meetings in January and continued through May, meeting on the average every three weeks for about two hours each meeting. After structures were selected by the Project Review Committee for inclusion in the inventory, State Historic Resources forms were prepared and more research completed if necessary. Some buildings were categorized, such as workers' cottages and apartments and held until the last meeting, where they could be compared and a final selection made.

The survey was extended for two weeks to complete the typing of the State forms and the preparation of the final report.

Personnel

The Survey Coordinator was hired by the City of Ventura as a full time paid staff person. The coordinator was Judy Triem, who holds a Master's Degree in History from the University of California, Santa Barbara. She had previous experience working on the Oxnard and Santa Paula Historical Surveys. Her background in the field of Historic Preservation includes seven years on the Ventura Historic Preservation Commission, two years as chairperson and an internship with the National Trust.

The remainder of the personnel were volunteers.

Selection of Boundaries and Criteria

The boundaries selected for the downtown and surrounding residential areas were based on the original townsite map drawn up in 1876. The Avenue boundaries included the whole area and extended to County boundaries.

The criteria used for making this selection was based on the age of the structures, the relatively few intrusions in the neighborhoods, the significant amount of well maintained buildings and the viability of the area as a neighborhood. The majority of structures surveyed were pre-1940 buildings.

Number of Buildings and How They Were Surveyed and Researched

A total of approximately 1,167 buildings were surveyed in the Downtown section and the Avenue area and about 359 are contained in the final survey. All of the buildings in the old town section were done on a block-by-block basis with a photograph taken of each building and an architectural and research worksheet prepared for the majority of structures built prior to 1940. The Downtown Redevelopment was eliminated, except for landmark buildings because of a survey already done in that area.

On the Avenue, photographs were taken of all the buildings constructed prior to 1900. Representative examples of later houses were photographed as well as a streetscape photograph of each street. All buildings on North Ventura Avenue were photographed. A research worksheet was done on each of the buildings selected.

Properties of historic and cultural significance were researched using several methods, which included Sanborn Maps, City building permits, assessor's rolls, City Directories, architectural plans, newspapers and photograph collection at the Ventura County Historical Museum. The County Assessor's Master Property File was somewhat helpful for those properties on the Avenue that had been part of the County until recently. The Ventura County Historical Atlas of 1912 was also helpful for Avenue properties.

The Ventura County Historical Society Quarterlies and the Ventura County Biographical History Books (mug books) were helpful in identifying individuals. Many oral interviews were done with local residents to obtain additional information on a property.

Project Review Committee

The Project Review Committee selected the list of structures for the State Inventory of Historic Resources, evaluated these structures for National Register status and compiled a list of potential City landmarks and districts. The composition of the Committee is as follows:

Ann Chaney is a member of the Ventura Planning staff and has the position of Senior Planner, with a Master's Degree in Urban Planning.

Katie Korzun served on the Project Review Committee for the first month. She is also a member of the Planning staff and is a Senior Planner, with an M.A. in Urban Planning.

Cheryl Aldrich is Chairperson of the Ventura Historic Preservation Commission and has been a Commissioner since 1975.

Ron Morgan served as an alternate on the Project Review Committee. He is also a member of the Historic Preservation Commission.

Pat Sales is the Research Librarian at the Ventura County Historical Museum and is a new member of the Ventura Historic Preservation Commission. Pat has an M.A. in History and Library Science.

Judy Triem is Survey Coordinator and has her M.A. in History from UCSB. She served as an intern with the National Trust in 1979.

Project Costs

The total project costs were approximately \$15,000. The total grant was \$15,000 and was matched by volunteer time.

SECTION IV - FINAL RESULTS

Comprehensiveness of Survey

The survey was a comprehensive inventory of all structures in the Downtown section of Ventura. It should be noted that this area is the oldest part of the City with the majority of structures built prior to 1940. The boundaries are detailed on the map in the Appendix. The area east of these boundaries also contains many houses built in the 1920's. On the Avenue, the selection was done by surveying each street and inventorying all buildings built prior to 1900 and representative examples of those built after 1900 on each street. The number and category of buildings selected for the State Historic Resources Inventory are as follows:

	<u>Residential</u>	<u>Commercial</u>	<u>Cultural (Churches, Schools)</u>	<u>Total</u>
Downtown Ventura	198	55	21	274
Ventura Avenue	<u>79</u>	<u>3</u>	<u>3</u>	<u>85</u>
	<u>277</u>	<u>58</u>	<u>24</u>	<u>359</u>

The total number of buildings surveyed in the Downtown and Avenue areas was approximately 1,200. A master list by street and address of all buildings selected for the inventory is included in the Appendix.

Balance between Historically, Architecturally and Culturally Significant Buildings

There is a fairly even balance between the historically and architecturally significant buildings. The majority of structures are single-family residences and are important as good representative examples of the following architectural styles--Italianate, Queen Anne, Colonial Revival, California Bungalow and Period Revival of the 1920's. Research into each structure also indicated their historical significance.

There was also a good percentage, although much smaller than architectural or historical, of buildings or sites with cultural significance. These included churches, schools, theaters, archaeological sites, natural features, such as trees, parks, etc.

New Information Uncovered about the History, Settlement, Architect and Building Styles of the Survey Area

In the Downtown section of Ventura, a few of the very early residences from the 1870's were discovered on Palm Street and the 300 block of Thompson Blvd. This area was once the main residential section of the City in the 19th Century. As the City grew to the east, later residences filled in. However, there were several houses between Ash Street and Crimea that were built in the 1880's and 1890's, but they were scattered.

Early residents who occupied these structures were primarily merchants and their families who operated businesses on Main Street or worked at the Ventura County Court House or taught school at one of the several schools in the area.

In the 1920's there was a housing shortage due, in part, to the discovery of oil on Ventura Avenue. Many modest bungalows were built and filled in the empty lots on the north-south streets, such as Hemlock, Laurel and Kalorama. Many oil workers and their families occupied these residences.

The Ventura Avenue area was settled in the 1880's and 1890's by settlers who developed the land for farming. Several of the old farmhouses were discovered, some of which have been moved back from North Ventura Avenue when oil was discovered and the area become industrial. It was also discovered that several houses had been moved from the Downtown area to the Avenue and, in some cases, owners of historical importance were uncovered.

In the 1880's and 1890's, there were a few Mexican-American families who lived on Park Row, Mission and Harrison Streets. Some of the farming families, whose houses faced onto Ventura Avenue, also had other occupations. Some early examples are Lloyd Selby and W. H. Barnes, who lived across the street from each other and practiced law together in an office downtown. Superior Court Judge Ben Williams owned a residence on Ventura Avenue.

The bulk of the houses on Ventura Avenue were built in the 1920's and 1930's in response to much needed housing created by the oil boom. Occupants of these houses were oil workers or people who worked in related industries.

Most of the buildings in the survey area were designed and built by carpenter/builders and contractors. Some of those builders included:

1870-1900: Jesse A. Shaw, Selwyn Shaw, W. D. Hobson,
Mitchell Brothers, J. J. Mahoney

1900-1920: Selwyn Shaw, Bert Shaw, H. A. Giddings,
Hall and Bailey, Herbert Sly, A. B. Eels,
Likens and Cavnah

1920-1940: Bergseid and Barr, Louis Rudolph, J. A. Bullis,
Lowdermilk and Carrico, H. L. Stennet

Los Angeles Architects

Albert Martin designed the Ventura County Courthouse and 69 South California Street.

John C. Austin designed Bahn's Jewelers.

Morgan, Walls and Clements designed the Bank Furniture Building at Main and Oak Streets.

Robert Stacy Judd designed the Church of Religious Science on Laurel Street.

SECTION V - RECOMMENDATIONS

The City of Ventura plans to use the results of the survey in the following ways:

1. Educational Uses:

The survey has produced a wealth of material, including historical and architectural data, photographs, maps, etc. This material will be stored at the City Clerk's Office and will be available to the general public for research purposes. There has been discussion as to the publication of a survey document with examples of the most significant structures, their history and architectural descriptions. The City has already published a listing and map of its some 50 landmarks. This list will be updated when new landmarks are declared as a result of the survey recommendations.

2. Planning Uses:

Currently, the Planning Division has several tools that it uses to identify historically and architecturally important buildings. The first is the Historical Overlay Zone which has been adopted for the whole downtown area. This serves as a warning to the Planning Division that all buildings in this zone are historically sensitive. The Historic Preservation Commission should work with the Planning staff to implement the Historical Overlay designation of the General Plan on the Downtown and Avenue areas through adoption of an ordinance which would establish specific review procedures for historic buildings and districts and would include: design standards and procedures and maintaining the historical qualities of buildings.

There are currently plans to incorporate the survey into the planning process by putting each building or site that is on the final inventory on the computer.

Copies of the Sanborn Maps have been made with the notation of current landmarks and buildings selected from the preliminary survey done in 1978-79. All buildings selected for this survey will be added to the maps used by the Planning Division.

Both the Building and Safety and Planning Divisions shall consider keeping a copy of Rehabilitation Right published by the Oakland Planning Department for use as a rehabilitation guide for homeowners.

Developmental Uses of the Survey

The list of potential local landmarks and landmark districts should be made available to the Historic Preservation Commission and the general public for possible declaration. Also, the list of potential National Register buildings and districts identified in the survey should be made available to the general public, including developers who may wish to rehabilitate them.

Specific Recommendations

1. The Historic Preservation Commission review the list of potential landmarks and landmark districts and make recommendations to the City Council on those structures it feels qualify as landmarks and landmark districts.
2. The Historic Preservation Commission recommend that owners of potentially eligible National Register property be notified to see if they are interested in having their property recommended. They should also be told of the matching grant money available for rehabilitation.
3. The Historic Preservation Commission pursue the printing of a survey document as an educational tool for the general public and as a guide for interested persons looking for older structures to restore and rehabilitate.
4. The Historic Preservation Commission have a walking tour printed showing the new material discovered and include potential landmarks.
5. The Historic Preservation Commission work with City Planning staff to incorporate the buildings included on the inventory onto the computer. Also, add to the current Sanborn Map, the newly identified buildings not included previously. Make this map available to the Building Department and other departments that will find this information useful.
6. Continue to seek and use Community Development Block Grant funds for low interest loans for the rehabilitation of landmarks. Consider other uses for these funds, such as moving endangered houses, walking tour brochures, etc.
7. Apply for funding to continue the second phase of the survey east of the current survey area and to continue to survey the City until it is completed.
8. Continue updating and expanding the survey as new information becomes available.
9. The Historic Preservation Commission work with the Planning staff to implement the Historical Overlay Designation of the General Plan on the Downtown area through the adoption of an ordinance which would establish specific review procedures for historic buildings and districts.
10. The Historic Preservation Commission should work with neighborhoods to encourage them to develop neighborhood associations to effectively create historic districts and to deal with review power of their districts. This is especially true in the Avenue area, where several 1920's era neighborhoods need to be identified.
11. The Historic Preservation Commission should consider having a historic element to the General Plan done.

Potential Local Landmarks/Landmark Districts

The following structures are recommended as potential landmarks and landmark districts. The criteria for selection of these structures is included in the appendix. This list is not all inclusive and may be added to. The structures that deserve immediate attention are those that for reason of their age, location and integrity should be selected first. The remaining structures/districts may be selected, over time, when one or more of the following takes place: The building has regained its original integrity (asbestos shingles removed, commercial buildings removed from front of residences, etc.); there are fewer examples of the style (California Bungalow, Period Revival of the 1920's); new historical information is gathered on the structure that may increase its significance; threat to the structure.

Potential List of National Landmarks/Landmark Districts

The following structures are recommended for the National Register of Historic Places: This list is by no means inclusive and buildings may be added as necessary.

Downtown Ventura

Ash Street	:	82 South
Laurel Street	:	101 South
Main Street	:	215 West, 2 West, 394 East, 451-61 East, 495 East, 597 East, 598 East, 721 East, 835, 896, 902 East
Palm Street	:	168, 180 South
Poli Street	:	501 (Sheriff's Building), 605, 637-39, 1200 Block + 122 and 140 North Ann.
Santa Clara Street	:	235 West, 793 East, 993, 1065
Thompson Blvd.	:	351, 856

Ventura Avenue

Bell Way	:	41
Cameron	:	1034-36
Harrison Avenue	:	303 West
Mission Street	:	52 West
North Ventura Avenue:		684-96, 2400, 2453, 2647
Pleasant Place	:	20

SECTION VI - CONCLUSIONS

Successes and Failures of the Survey

The biggest success of the survey was the accomplishment of comprehensively inventorying and photographing the majority of structures in the Downtown Survey Area. This was possible only through the enthusiastic hardworking volunteers who photographed all the buildings, did all the field work and assisted with the research.

One failure of this project was the lack of time to do more field work and research on the Avenue Area. Because of time constraints, only the structures built prior to 1910 were inventoried. The remainder of structures, primarily built in the 1920's and 1930's, were done on a street-by-street basis with representative examples selected from each street. Identification of potential neighborhood districts needs to be done as there was no time to do it in this survey.

Also, due to lack of time, the selection of final landmarks and districts, both for local use and for the National Register, did not get the proper review.

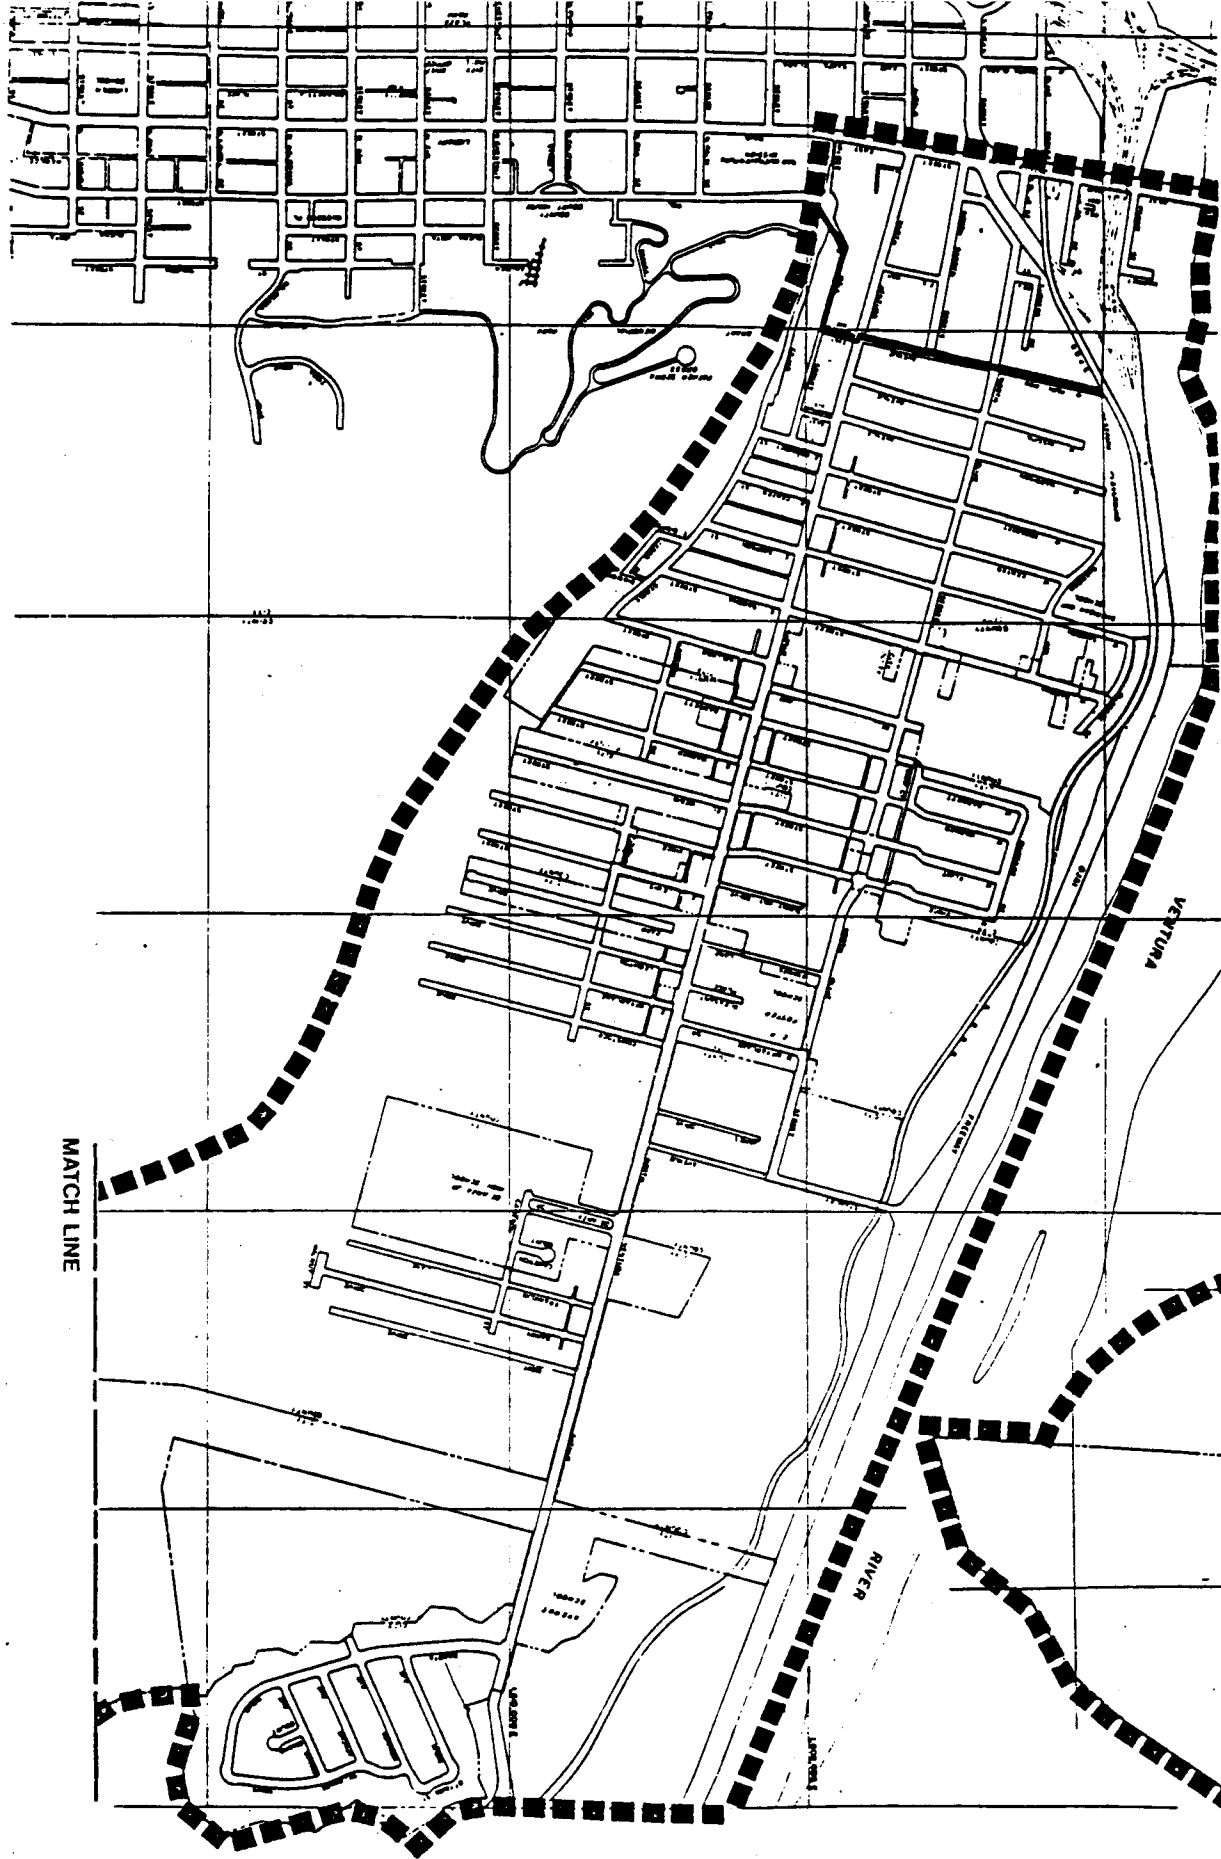

Future Surveys

The City of Ventura has applied for a grant with the State Office of Historic Preservation to do a second phase of the survey. This survey would include the area immediately east of the presently surveyed area. This area includes many small neighborhoods comprised of houses built primarily in the 1920's and 1930's in Period Revival and Bungalow styles. There are a few sections that have houses built prior to 1900 and several 1890's farmhouses that remain alongside recent developments. There is also commercial development from that period.

The value in doing a survey of this area is to preserve the integrity of the neighborhoods and to recognize the value in some of the commercial structures built between 1920 and 1940. The zoning in many of these neighborhoods is R-3 which may encourage higher development of the property.

SURVEY CRITERIA

The following criteria, based in part on the National Register Criteria, will be used to determine structures to be included in the State Inventory. A structure must meet one or more of the following criteria:

1. Any building, structure, place or natural configuration that acts as a focal or pivotal point important as a key to visual quality or character of an area, neighborhood, or survey district; or
2. Its identification with a person or persons who significantly contributed to the culture and development of the City; or
3. It serves as an example of a particular architectural style or period that illustrates the historical character and development of the City; or
4. Its identification as the work of locally or nationally known architects, craftsmen, or builders; or
5. Its location as a site of a significant historic event; or
6. Its embodiment of elements with attention to architectural design, detail, materials or craftsmanship; or
7. It remains in original condition and illustrates a particular architectural style or period; or
8. Its relationship to other landmarks or landmark districts if its preservation is essential to the integrity of the landmark or landmark district; or
9. Its unique location or singular physical characteristics representing an established familiar visual feature of a neighborhood or community; or
10. It exemplifies the cultural, political, economic, social or historic heritage of the community; or
11. It relates to distinctive cultural ethnic groups.

City of San Buenaventura Cultural Heritage Survey 1982-83

The City of San Buenaventura will be conducting a survey of historically and architecturally significant buildings, streetscapes and natural resources under a grant from the State Office of Historic Preservation. The Survey will include an in-depth study of the Downtown and Ventura Avenue areas, with a "windshield" survey taken of older structures in the remaining areas of the City.

Classic Box

The Survey: What is it and why do we need it?

The Cultural Heritage Survey, compiled by local citizen volunteers, is an inventory of our community's historically and architecturally significant buildings, structures, districts, streetscapes and natural resources.

The Survey is needed to determine the important cultural resources within our community. This information will be used as:

- A planning tool for local government
- A basis for declaring local, state and national landmarks or landmark districts
- As an educational tool for broadening public awareness of our community's rich heritage

California Bungalow

The Volunteer: How can you help?

Volunteers are an essential part of the Survey. They are needed to carry out the field work, provide valuable research and to take photographs. As a volunteer you will receive special training in:

- How to determine the historical and architectural significance of a building
- Research techniques
- Photography

The Rewards

As a survey volunteer you will have the unique opportunity to discover history in your own community. Your efforts in identifying the significance of a building will help develop an awareness and appreciation of local history and architecture. It will also lead to an increased sense of pride and caring in your community.

Master Lists of Buildings Selected for the State Historic Resources Inventory

Some of the buildings are submitted as blocks because they are more significant as a group of buildings than as individual buildings. Buildings submitted this way will have the term "district" after the listing and surrounded by brackets.

HISTORIC RESOURCES INVENTORY

IDENTIFICATION

1. Common name: North Aliso Street and Buena Vista Street
2. Historic name: Same
3. Street or rural address: 100 Block North Aliso/1400 Block Buena Vista Streets
 City Ventura Zip 93001 County Ventura
4. Parcel number: See attached sheet.
5. Present Owner: Various Address: _____
 City _____ Zip _____ Ownership is: Public _____ Private X
6. Present Use: Single-Family Residences Original use: Same

DESCRIPTION

- 7a. Architectural style: California Bungalows and one Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The 100 block of North Aliso Street and the south side of Buena Vista Street (1400 Block) are comprised of mainly one or 1-1/2 story single-family residences built in the California Bungalow style, except for one Vernacular Victorian built in 1900. The houses maintain fairly even setbacks on lots ranging from approximately 50' X 150'. There are several mature trees, including palm and pines, on the lots. The parking strips are treeless. The houses have mainly low pitched gable roofs, porches, chimneys, clapboard siding and raised foundations.

8. Construction date: 1890-1928
 Estimated X Factual _____
9. Architect Unknown
10. Builder Unknown
11. Approx. property size (in feet)
 Frontage _____ Depth _____
 or approx. acreage _____
12. Date(s) of enclosed photograph(s)
8/82

13. Condition: Excellent ___ Good ___ Fair ___ Deteriorated ___ No longer in existence ___
14. Alterations: Additions in rear or side.
15. Surroundings: (Check more than one if necessary) Open land ___ Scattered buildings ___ Densely built-up X
 Residential X Industrial ___ Commercial ___ Other: ___
16. Threats to site: None known X Private development ___ Zoning ___ Vandalism ___
 Public Works project ___ Other: ___
17. Is the structure: On its original site? X Moved? X Unknown? ___
18. Related features: Detailed garages, rear additions, mature trees, fences.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This neighborhood of late California Bungalows, built between 1922 and 1928, except for one early example in 1900, maintains a consistency of style with very few alterations.

Primarily middle class residences, most of the families owned their houses and their professions varied from oilworker to bookkeeper and dentist.

20. Main theme of the historic resource: (If more than one is checked, number in order of importance.)
 Architecture X Arts & Leisure ___
 Economic/Industrial ___ Exploration/Settlement ___
 Government ___ Military ___
 Religion ___ Social/Education ___

21. Sources (List books, documents, surveys, personal interviews and their dates).

143 North Aliso Street

153 North Aliso Street

160 North Aliso Street

194 North Aliso Street

136 North Aliso Street

144 North Aliso Street

100 Block of North Aliso Street - West Side

143 North Aliso Street

72-132-06

Built in 1924 for Frank Stover, oilworker, this single-story California Bungalow has a sidefacing gable roof with offset front gable over the porch. Tapered columns, with capitals covered with medium clapboard siding on the lower half, support a plain frieze with dentils in upper portion. The house is on a raised foundation, is covered with clapboards and has a stucco chimney.

153 North Aliso Street

72-132-05

Built in 1924 for John H. Morrison, a bookkeeper and secretary-treasurer of Ventura Hardware, this single-story, square shaped bungalow has a low-pitched sidefacing gable roof with exposed beams under the eaves. The facade is treated symmetrically with a small low-pitched front gable over the porch supported by two capped square columns. The front door is flanked by multi-paned sidelights. The house is on a raised concrete foundation and covered with narrow clapboard siding and has a brick chimney.

163 North Aliso Street

72-132-04

Built in 1924 for Robert Georgeson, whose occupation was listed as notions, this late bungalow is rectangular in shape with a low-pitched hipped gable roof. On the south is an offset gable with a small recessed front porch. Exposed beams and rafters appear under the wide eaves. The house is on a raised concrete foundation, covered with narrow clapboard siding and has a brick chimney.

193 North Aliso Street

72-131-06

Built in 1890 to 1900, and possibly moved to this site, this Vernacular Victorian residence was owned in 1907 by W. R. Roberts, occupation unknown. The house is 1-1/2 stories tall, with a high-pitched intersecting gable roof. The shed roof porch is supported by carved square columns and spindle and spool balustrade. A plain cornice is found above the columns. The south side of the house has a square bay with spindle and spool balcony above. The balcony is a later addition. The house is covered with medium wood siding and the brick chimney has a decorative design at the top.

100 Block of North Aliso Street - East Side

136 North Aliso Street

73-134-22

Built in 1926 for William N. Collins, a driller, this single-story California Bungalow has a medium-pitched front gable roof with recessed porch on the south. Open beams and rafters are found under the eaves. One square wood column rests on a brick porch wall. The house rests on a concrete foundation and is covered with clapboard siding.

144 North Aliso Street

73-134-18

Built in 1924 for Malcolm T. Boles, owner of a trucking business, this bungalow is stuccoed and has an unusual H-shape. The main sidefacing gable has two cross gable wings with exposed beams underneath. Concrete steps and curved concrete or stucco railing lead to the open porch contained between the two wings.

160 North Aliso Street

72-134-01

Built for Dalton R. Smith, a dentist, in 1922, this 1-1/2 story California Bungalow has a medium-pitched sidefacing gable roof with offset front gable over the porch. Exposed beams and rafters are found under the wide eaves. The lower portion of the front porch is of brick with square columns above as supports. A wood flower box is attached to the porch. The house is on a raised foundation with a brick chimney and covered with medium clapboard siding.

194 North Aliso Street

72-133-01

Built in 1928 and occupied by James A. Savage, a janitor, in 1930, this late Provincial style bungalow has a medium-pitched sidefacing gable with a gabled portico supported by Doric columns. The eaves are boxed in classical manner and the symmetrical facade has sidelights next to the front door. The house is covered with narrow to medium clapboard siding.

North Aliso Street
(100 Block East Side)

Buena Vista Street
(1400 Block South Side)

1400 Block of Buena Vista Street - South Side

1444 Buena Vista Street

72-134-24

This California Bungalow was built in 1922 for Maynard M. Perrett, Manager of Pacific Telephone and Telegraph Co. This single-story residence has a low-pitched sidefacing gable roof with offset front gable. The front porch is recessed on the west side and exposed rafters and beams are found under the eaves. The house is covered with clapboards and shingles around the base.

1456 Buena Vista Street

72-134-03

Built in 1923 for Alfred B. Bixler, District Equipment Superintendent for Pacific Telephone and Telegraph Co., this large two-story bungalow has a combination of low-pitched gable roofs with rafters and beams. The second story is set back from the main roofline. A shed roof extends over the front porch and is supported by blond square brick columns with red brick design and blond brick chimney. The house is covered with shingles at the base and clapboard on upper portion. Mr. Bixler owned the three lots to the east and had the houses at 1482 and 1494 built in 1924.

1474 Buena Vista Street

72-134-04

This medium stucco house was built in 1961.

1482 Buena Vista Street

72-134-05

Built in 1925 for Martin F. Jensen, Business Manager and Secretary for the Ventura County Star, this single-story California Bungalow has a medium sidefacing gable roof with offset front gable. The recessed front porch on the east is supported by square concrete or stucco columns with red brick trim on lower half and upper half are tapered wood Doric columns. The porch has a turned wood balustrade. The house is covered with narrow clapboards, except for a red brick covering (maybe a later addition) on lower portion of west side of the facade.

1494 Buena Vista Street

72-134-06

Built in 1924, possibly by Alfred B. Bixler, who owned this lot, this California Bungalow was occupied by John R. Church, Manager of Singer Sewing Machine Co., in 1930. This single-story residence has a low hip roof with intersecting gables. The main front gable has enclosed and return eaves as do the side gables. Two large buff brick columns, indented at the top, support the porch roof. The house has multi-paned windows similar to French doors and front door.

6. Present Use: Single-Family Residence Original use: Same

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian - Queen Anne
 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The high-pitched cross gable roof of this 1-1/2 story residence has a slanted bay with a high-pitched gable with boxed cornice and wavy shingles under the gable. Bay windows appear on both sides of the house with upside down finials in the corners. The house is covered with wood slats. A shed roof covers the front porch on the south side and is supported by a square post. Wooden steps, newel posts and wood banisters help preserve the originality of the porch together with an old wood and glass door.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
This is the most elaborate hitching post left in the City. There are only two other known hitching posts--one at the Mission which is not original and one on Ann Street, across the street from this post.

Supposedly the hitching post had a horse's head at the top and rings in the lions' mouths.

DESCRIPTION

- 7a. Architectural style: Queen Anne
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This three-story, irregular shaped house with intersecting hip and gable roof features a prominent slanted bay window. Located on a hillside lot, the bay is the most distinctive feature seen from Poli Street with its "tree of life" design of applied wood, its decorative shingles and windows with flashed glass.

The front has a gabled front entry and shed roof extension. Cut out stickwork in circular and geometric patterns is found under the porch roof and porch ballusters. The house rests on a raised foundation and is of medium-wide shiplap siding with a decorative brick chimney.

18. Related features: White picket fence surrounds the front yard

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Selwyn Shaw was a prominent early Ventura citizen and builder. The Bard Hospital, Southern Methodist Episcopal Church, and the Dudley House are some of his accomplishments.

Mr. Shaw was President of the Ventura Mill and Lumber Co., elected to the School Board in 1886, and served as City Trustee from 1897 to 1902.

The Shaw Family had a long tradition of building in Ventura from 1868 to the 1930's. The house on Ann Street is part of a block once owned by members of the Shaw Family, on which the majority of the houses facing Poli were built by the Shaws (and lived in).

Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

122 North Ann Street

140 North Ann Street

100 NORTH ANN STREET

122 North Ann Street

72-124-09

This modest single-story bungalow was built in 1920, possibly by the Shaw Family, and was owned in the late 1920's by George W. Ormsby, who resided at 1129 Poli Street. The house has a low-pitched gable roof, exposed rafters and beams. A small gabled portico, hung-by chains, is located over the front porch. The house, covered with clapboard siding, is on a hillside and has a flat roofed garage with deck above on the south.

140 North Ann Street

72-124-01

Selwyn Shaw built this house for himself in 1888. This three-story (including basement) Queen Anne residence has a combination of intersecting hip and gable roofs with a half octagon bay window on the south side. The south side of the house is the most elaborate with a combination of shingle patterns and stylized "tree of life" design. Small geometric colored glass panes are found in upper half of window. The front porch displays a profusion of wood detail, including square spindles and cutout brackets in geometric square shapes. Octagonal shingles are found under the gables and wide clapboard siding covers the rest of the house. A corbeled brick chimney punctuates the roofline.

DESCRIPTION

- 7a. Architectural style: Mediterranean
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This three-story stucco building has a medium low pitched gable tile roof with two one-and-a-half story wings which create a patio effect in front. On the street level are four large arched recessed multi-paned windows--one in each wing and one on either side of the main entrance. The entrance itself is a series of step-backed arches with double rope stone trim and an elk's head serves as the keystone above the entry. A tile covered portico extends from the front entrance and down the walk where it meets a low stucco wall. The upper portion of the building has six recessed arched stained glass windows with fraternal insignias divided by pilasters and supported by a horizontal frieze. The main street side of the building features a Mediterranean style balcony and large arched window.

18. Related features: Minimum landscaping, low wall across entry

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Elks Lodge was founded in Ventura in 1921. It was not until 1930 that the Lodge was completed by the contracting firm of Rudolph & Barr and designed by architect C. W. Russell.

The building, with its corner location on Main and Ash Streets, is a visual landmark. It is a fine representative example of the Mediterranean Style with relatively few alterations.

DESCRIPTION

- 7a. Architectural style: Queen Anne Cottage with Eastlake influences
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:
Queen Anne cottage style with Eastlake influence. It is unaltered with the Eastlake influence shown in the elaborately turned porch columns, spindlework and blaustrade. The front gable end reflects the detail seen in the cross bracing. Shadow effects are seen with this cut work. Elaborate use of patterns and design are seen in the shingles, bargeboard, and frieze. Half columns outline the windows with their attractive flashed glass. Sunburst design and stamped and cut-out flowers are part of the Victorian motif. The Queen Anne influence is seen in the multi-gables and bays. The fine craftsmanship in this house is found in the meticulousness of detail and how it was applied one layer at a time.

DESCRIPTION

- 7a. Architectural style: Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

An offset low pitched front gable extends from the main sidefacing gable of this square shaped bungalow. Underneath the gable is an enclosed porch supported by elephantine brick columns, low brick bannister and stair railing. A solid beam extends above the porch columns and across the front of the house next to the porch. The beam is supported by a square column and additional cross beams that extend out from the front of the house, all resulting in a perogola effect. Craftsman details include the notched beams, clinker bricks and dark stained shingles covering the house.

18. Related features: None apparent

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is the only remaining residence from the 1890's on a once residential block. It has recently been restored adding a strong visual element to the block.

Frank J. & Cora Sifford family-lived in the house from 1895 to the 1940's. Mr. Sifford took over the Ventura Transfer Co. from his father Louis Sifford who came to the County in 1869 and built it into a large & profitable business. In 1915 he sold the business and purchased a 194 acre farm 2½ miles east of Ventura where he raised beans.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian, Colonial Revival, California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The east side of the 200 block of South Ash Street represents a transition in styles ranging from the Victorian Vernacular of the 1890's to the Colonial Revival of the early 1900's and the California Bungalows of the 1920's. The buildings are on lots that average 45' wide X 80' deep, except for 252 which is 200' deep and has three bungalows in the rear. The lower end of the street has several large mature palms in the parkway. The houses maintained somewhat even setbacks with very minimal alterations. The house at 238 may have been a garage conversion.

8. Construction date: 1897-1928
 Estimated X Factual _____
9. Architect Unknown
10. Builder Unknown
11. Approx. property size (in feet)

13. Condition: Excellent Good Fair Deteriorated No longer in existence
14. Alterations: Garage converted to residence.
15. Surroundings: (Check more than one if necessary) Open land Scattered buildings Densely built-up
Residential Industrial Commercial Other: _____
16. Threats to site: None known Private development Zoning Vandalism
Public Works project Other: _____
17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Mature trees, including large palms, in parkway.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This block of residences, just a few blocks from the beach, maintains a consistency in setbacks and presents a variety of styles all well-maintained.

The block is situated in one of the oldest sections of the City where, at one time, the lumber mills were located. The first to build on the block in the 1890's was Frank Hobart, Justice of the Peace, who owned the upper half of the block. On the lower half was the Beronio family, who owned a grocery store which faced onto Front Street at the turn-of-the-century. The store burned down in 1981.

SOUTH ASH STREET - Cont.

266 South Ash Street

73-142-27

This modest board and batten cottage has a medium gable roof with shed roof supported by square columns and wide wood balustrade. The front windows have multi-panes in upper portion. The house was built in 1919 and owned by Josephine Needham, wife of C. L. Needham. Mr. Needham had an insurance agency, Needham and Daigle, in 1926.

278 South Ash Street

73-142-27

This single-story L-shaped residence has a high-pitched gable roof with shed roof board and batten addition in rear. A small low shed roof covers the porch and is supported by beveled post and pilaster. A slanted bay window is located next to the porch and boxed eaves and plain frieze are found under the eaves. The house is on a raised foundation with clapboard skirt and covered with wide shiplap siding. The house was built in 1898 for the Beronio Family. Peter Beronio owned a grocery store next to his residence that faced onto Front Street.

SOUTH ASH STREET

230 South Ash Street

73-142-17

This 1-1/2 story residence is an excellent example of the Colonial Revival style seen in the slanted bay with classical dentil dividing upper and lower windows. Dentils are also found under the boxed eaves above the plain frieze. The medium hip roof has an intersecting gable and two gabled dormers which also contain classical details. The front porch is covered by a hip roof with gabled dormer and supported by Doric columns. The house is on a raised foundation covered by a vertical board skirt and narrow clapboard siding on upper portion. The house was built in 1902 and owned by Frank Hobart, whose address was located on the same lot but faced Meta Street in the 1890's. Mr. Hobart was a Justice of the Peace.

238 South Ash Street

73-142-16

This small residence was probably used by the owner of 230 as a shed or garage originally and was converted into a residence by 1928. It has a medium gable roof with low-pitched gable over front porch which is supported by square columns connected by wood balustrade. This property was owned by Frank Hobart, who lived on Meta Street in the 1890's. The exact date of construction is unknown.

244 South Ash Street

73-142-16

This single-story residence has a medium-pitched sidefacing gable roof with intersecting front and rear gables. The front gable forms an L-shape with a low shed roof porch next to the gable. Decorative wood details on the porch includes turned posts and pilasters, carved dentils, intricate brackets and sawtooth bargeboard. The house is on a raised foundation with vertical board skirt and wide shiplap on body of house with narrow rounded clapboards under the gables. Under the eaves is a decorative boxed cornice with plain frieze. The house was also owned by Frank Hobart and was built in 1898.

252 South Ash Street

73-142-15

Built in 1897 and owned by D. Bogetti, this single-story Vernacular Victorian residence has an L-shape with a porch on the south. The roof shape is a combination of high-pitched intersecting gables with boxed cornice. Exposed rafters are found under shed roof porch which is supported by square columns connected by wood balustrade. The house is on a raised foundation with vertical board skirt and covered with narrow rounded clapboards.

254-258 South Ash Street

73-142-15

Three modest California bungalows behind 252 are all identical with gable roof and offset gable over the porch, clapboard siding and exposed rafters and beams. These were built for George Bogetti, a farmer, in the mid-1920's.

DESCRIPTION

- 7a. Architectural style: Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The medium pitched gable roof of this 1-1/2 story bungalow has an offset front porch gable with exposed beams and rafters under the wide eaves. The main Craftsman features include the tapered stone porch columns, porch wall and chimney. Exposed crisscross rafters extend from the porch across the front of the house and are supported by stone columns. Multi-paned windows are found in the upper portion of the windows and the house is covered with medium dark brown clapboard siding.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1912 for Richard N. Hayden, under-sheriff, the house was later purchased, in 1916-17, and occupied by Thomas S. Newby, who operated the Ventura Drug Company on Main Street.

Architecturally, the house is an excellent example of the Craftsman Bungalow, with the heavy use of stonework in the porch and chimney.

DESCRIPTION

- 7a. Architectural style: Mediterranean Style
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The combination flat and low pitched gable roof of tile adds interest to this one-and-a-half story, long rectangular Mediterranean style office building. Spanish style features include the impressive Moorish shell shaped arch over the front entrance flanked by pilasters and arched wood multi-paned windows. Under the gable are two small arched stained glass windows. The flat roofed portions of the building have a plain moulded cornice which is repeated about two feet below producing a nice relief effect on the stucco building.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Under the high pitched gable roof of this two-story residence is an elaborate intersecting slanted bay on the north side. The decorative bargeboard under the gable has an interesting semi-circular shape with cutout details. Under the gable are diamond and fishscale shingles and diagonal applied stickwork. Windows have molded shelf detail above, and the house is covered with wide shiplap siding. Alterations include the front porch which has been replaced with open square post and beams. A large two-story addition using the same materials was added after 1910 to the south side.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was constructed in 1887 for J. A. Bates, who was a wagon and carriage maker and general blacksmith.

It is one of the few survivors from the boom of the 1880's and is a nice complement to the Colonial Revival house across the street at 94 North Ash Street.

DESCRIPTION

- 7a. Architectural style: Period Revival Style of the 1920's
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This unusually high pitched gable roof sweeps to the east side with an intersecting mansard-type roof on the east. The dominant feature of the facade is the large arched window. To the east of the window is a recessed entry with pediment and wood bannister. On the west side is another recessed arched entrance with bannisters. Decorative wood brackets are found under the eaves.

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Cement block retaining wall with built-in garage and arched entry with wrought iron gate.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The original owner of the property was R. E. Brakey, who owned a large portion of the hillside at one time. The house was constructed in 1927 for Mary Brakey and was occupied in 1930 by Olga Klarquist, who had a dance studio there.

Architecturally the house is an unusual example of the Period Revival Style of the 1920's, remotely resembling English Cottage design. Its location on a hillside lot close to the City Hall makes it a visual landmark.

16. Threats to site: None known Private development _____ Zoning _____ Vandalism _____
Public Works project _____ Other: _____
17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Stone boulders trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The arch was constructed in 1936 by the City of Ventura in memory of Kenneth T. Grant and his wife, who donated the land for the park. A plaque was placed on the arch the year it was built reading "Kenneth T. Grant and wife Memorial Park." The original plaque is missing as the result of vandals and a new wood sign reads "Grant Park."

K. T. Grant came to Ventura in 1867 and had a blacksmith shop and undertaking business. He also was a realtor and purchased 350 acres, which included the park. He also served as Ventura County Supervisor.

The arch may have been built with W.P.A. funds.

Public Works project ___ Other: _____
17. Is the structure: On its original site? X Moved? _____ Unknown? _____
18. Related features: Grant Park, a hillside park, surrounds the cross

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The original cross was placed on the hillside in this location, overlooking the site of the San Buenaventura Mission, by Father Junipero Serra on March 21, 1782. This was the last and ninth mission Father Serra founded before his death.

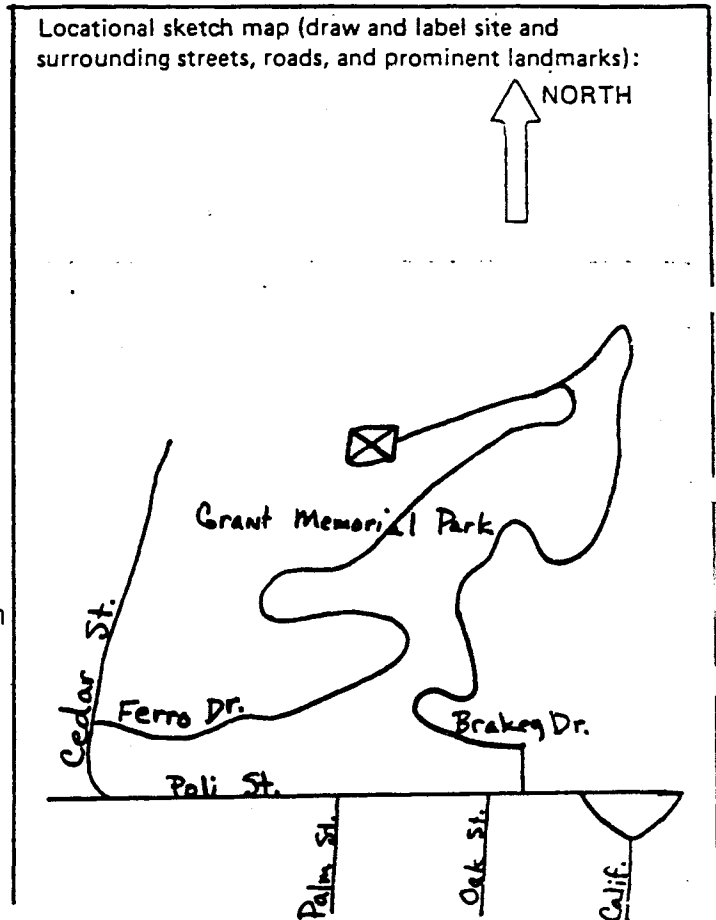

In 1912 the Landmarks Committee of the Chamber of Commerce enlisted the civic minded women of the E. C. O. Club to reconstruct a new cross of Jeffry Pine Timbers to replace the original cross that fell in 1875. People's Lumber Co. under the supervision of Selwyn Shaw, assembled the cross. A ceremony on Admission's Day, 1912, marked the re-erection of the cross.

DESCRIPTION

- 7a. Architectural style: Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large Craftsman Bungalow has a medium high pitched gable roof with gabled dormer windows and rough stuccoed chimnies. Under the broad eaves is a second story balcony facing the ocean with shed roof and underneath a square bay window. Notched rafters and knee brackets are found under the wide eaves. A recessed entrance with a large square column is accented with heavy wood trim. The house is covered in a combination of shingles under the gables, narrow clapboard siding in the mid-section and stucco on the bottom.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian with Italianate elements
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story clapboard house features a prominent slanted bay window with a flat roof with boxed eaves and inset wood panels above and below the windows. The medium pitched side facing gable roof has an intersecting front gable with stucco chimney in the corner. The formality of the Italianate is seen in the boxed eaves, pedimented windows and slanted bay. The recessed front porch on the east is supported by a square column. Lattice work is found on the lower portion of the bay window. A geometric wood bannister leads to the raised porch whose east side has an open lattice and vine enclosure.

DESCRIPTION
7a. Architectural style: Mediterranean Style
7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large irregular shaped stucco residence is two stories in height on the west with a single-story portion on the east. The roof shapes are a combination of low-pitched gables and shed roofs of red tile. The Mediterranean influence is seen in the recessed quatre foil window, arched windows and entry, wrought iron balcony, stair rail and lamps, and exposed rafters and beams. The house also features a round stained glass window west of the entrance. The house is on a hillside lot with wrought iron entrance gate and formal plantings.

17. Is the structure: On its original site? Moved? Unknown?
18. Related features: California Bungalow in 1910 in rear; well landscaped.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

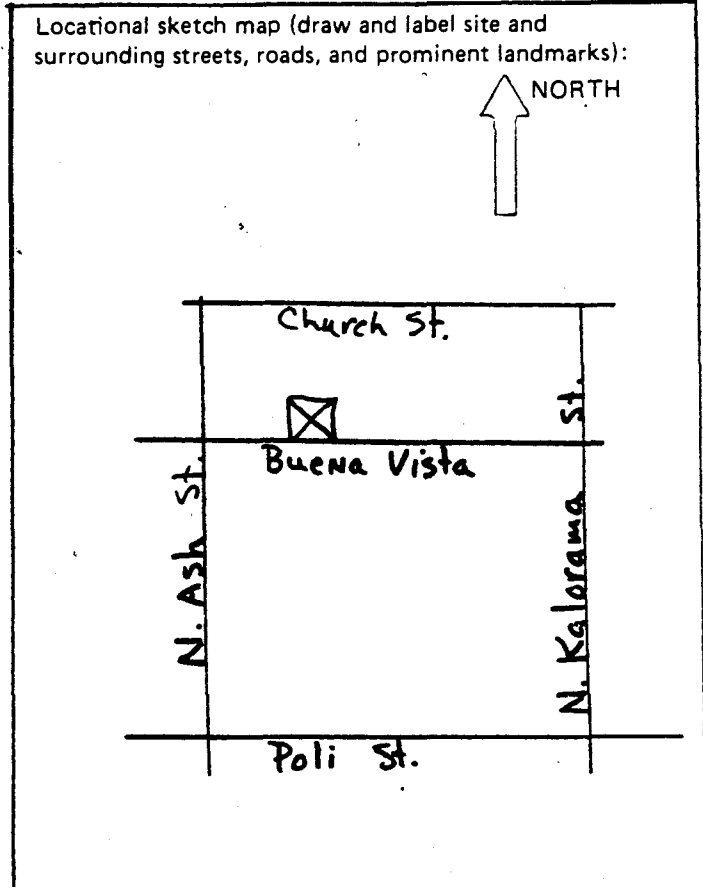

The house was built for Charles B. Corcoran and his family in 1930-31. Mr. Corcoran came to Ventura in 1918 and was manager and owner of the Apollo and American Theatres. In 1929, he had the current Ventura Theater built, which is now a local landmark as the only remaining theater from the movie palace era.

Mr. Corcoran was successful in his endeavors, and had this house built in 1930-31. The house he had been living in, a bungalow built in 1910, was moved to the rear of the lot.

18. Related features: garage converted into apartment and built in same style as house. Many mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

On a one-acre hillside lot, the house is a prominent visual feature of the neighborhood surrounded by mature trees. Most likely, the original owner, W. D. Clark, a Los Angeles builder, constructed the house for himself. A later owner was Dr. E. E. Gallison in 1948 who constructed a retaining wall of concrete and changed the garage into an apartment.

18. Related features: The hill has been well landscaped with shrubs and trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house was constructed by Bert Shaw for his son Ernest in 1924-25. Ernest helped in the construction. The Shaws were a family of carpenter builders who came to Ventura in the 1870's and constructed many local buildings, including most of those in the block across the street. Ernest Shaw was a registered civil engineer and worked for the firm of Wand, Ramelli and Lewis. He and his family lived in the house for approximately 25 years.

18. Related features: Terraced stucco wall across front and street level garage

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in California 1895 by L.E. Mercer, an apiarist, for his family. His sons, Fred and H.B. Mercer, ran a planning mill near the wharf on Front Street --Laurel. Many of the early structures in Ventura were probably built from wood planned at their mill.

The use of curly redwood, rare even in those days, was found on the interior of the house. There was also a fancy fireplace with metal trim.

18. Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1927 as the Southern Counties Gas Co. Headquarters, this building is significant as it was designed by the well known Los Angeles firm of Marston, Van Pelt and Maybury.

It has been well maintained over the year with few, if any, alterations. The building at 275 South Hemlock was built at the same time as a warehouse for the gas company and is almost identical in style to this building at 39 North California Street.

DESCRIPTION

- 7a. Architectural style: Mediterranean - Commercial
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story, flat roofed rectangular building is divided into four shops on the first floor, with a hotel on the second story. The building was modernized on the second story and the storefronts were also altered. The outstanding remaining feature is the elaborate hotel entrance and frieze done in the Spanish churrigueresque style.

8. Construction date: 1927

17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The building is significant for its design by the prestigious Los Angeles firm of Albert C. Martin in 1927. However, the only portion that remains of significance is the elaborate Mediterranean entrance and frieze above the first floor windows.

The building first housed the El Nido Hotel on the second floor.

DESCRIPTION

7a. Architectural style: Queen Anne Cottage

7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

A prominent slanted bay window divides the unusual double entrance of this 1-1/2 story Queen Anne Cottage. Two separate wooden stairways lead to a decorative arched porch entrance which are supported by elaborate turned columns. The hipped roof is punctuated at the top with a gabled dormer. Decorative fishscale shingles and cut-out stickwork are found under the gables. Donut-shaped designs in the frieze above the slanted bay window are repeated in the porch arches. Covered with wide shiplap siding, the house rests on a raised foundation.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian Cottage
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This steep-pitched, almost pyramidal roof is clipped on the sides and extends over the front porch in a curved fashion. A large high-pitched gable dormer and balcony punctuates the roof line. Under the gable roof are decorative shingles and square shingles cover the remainder. The recessed front porch is supported by square double columns attached by wood strips. These will be removed and replaced by the arched facade that was there originally. The owner has currently replaced the balustrade. The house is covered with clapboard siding.

18. Related features: Low stone planter wall across front.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is historically significant, for it was built in 1891-92 for William Vandever, first U. S. Congressman from Ventura (1886-1890). Mr. Vandever was a Civil War hero and General who first visited California when he was appointed Indian Inspector by President Grant. Prior to the Civil War, he served as a Congressman in Iowa from 1859-61. He moved to Ventura in 1884 and was elected to Congress in 1886 and again in 1888 as a Republican. He decided against running and returned to Ventura in 1891 when he built his house on California Street in 1891-92. Upon his death in 1893, his family continued to occupy the house until 1912-13.

DESCRIPTION

- 7a. Architectural style: Zigzag Moderne
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This irregular shaped single-story concrete structure has a flat wood truss roof. The main parapet over the office portion of the garage is stepped and in the center is the Firestone seal with the letter "F." The sign in raised letters is below. The parapet that extends along the garage portion is recessed at the top with a frieze in the shape of an upside-down letter "S" or wave design. The office portion has plate glass windows across the front. The garage portion has sliding doors. The entrances are divided by fluted pilasters. The California Street side has a large raised Firestone sign.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
Built in 1926 as the Motley-Gallentine Co., Packard Distributor, for J. D. Burnham, the building is architecturally significant for its elaborate Spanish Colonial Revival entrance. It was designed by the Santa Barbara architectural firm of Soule, Murphy and Hastings. The spacious interior has skylights and exposed wooden beams and trusses.

In 1956, the County of Ventura purchased the building for use as a warehouse until the 1970's.

DESCRIPTION

- Architectural style: Mediterranean (Spanish)
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The Ventura Theatre is a long rectangular two-story structure with a combination of red tiled hipped & shed roofs. The main part of the Theatre retains its arched window/entrances and recessed triple arched balcony divided by double Corinthian columns. Exposed beams are found under the eaves and once decorative crests provide relief above the arched windows.

The Theatre Building on the north side has been modernized with a 1950's look. The marquee was also replace in 1950. Over the years, the gold leafing has been removed but the interior fixtures remain as well as the silver sunburst dome.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
Built in the style of the great movie palaces of the 1920's, the Ventura Theatre is Ventura's only luxury theater. The theatre portion of the building, both inside and out, has maintained its integrity over the years.

Charles B. Corcoran, who had previously owned & operated the American & Apollo Theatres in Ventura, became the manager of the Ventura Theatre. L. A. Smith was the architect and the owner was the American Amusement Co.

The interior of the theatre was extremely lavish with stenciled ceiling beams, chandeliers and a 40' dome with sunburst design of silver and gold leaf. Interior was designed by Robert E. Power Studios of San Francisco.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Peirano House is significant as one of two remaining houses on a block that was filled with ornate residences built in the 1890's. Figueroa Street had many ethnic residents, including Italian, French and Spanish. Nicola Peirano came to Ventura in 1882 from Genoa, Italy to work in his Uncle Gandolfo's store. This store became Peirano's Market in the 1890's. The store is one block north of Main Street and Nick Peirano, Jr., runs it today. Mr. Peirano had the house built in 1897, the same year that he married Clara Rafetto. The house remained in the family until 1976 and was restored by its current owner, Jan Harmonson.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This area is the site of Shisholop, a major Chumash Coastal Village, which saw the first Spanish landings on the California Coast by Juan Rodriguez Cabrillo in 1542.

Other explorers to visit this area and write about the Chumash Village were Sebastian Vizcaino in 1602 and Captain Gaspar de Portola in 1769.

The village had the first Spanish building in the County erected near it and contributed the first Indian converts to Mission San Buenaventura.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This parcel of land was owned as early as 1881 by William Elwell and Edelfrieda Tico Elwell and their family. Edelfrieda was the great granddaughter of Fernando Tico who was granted the Rancho Ojai in 1837 by Governor Juan Alvarado. William Elwell was the son of Robert Joseph Elwell, a merchant seaman from Boston who engaged in the China trade. He came to California in 1824 and later married Vicenta Sanchez. William, one of eight children, lived in Santa Barbara and attended Santa Ynez College. He later moved to Ventura County and farmed for Don Adolfo Camarillo. In his later years he moved to Ventura and had a house built for his family on Figueroa Street. He became a teamster and worked for the City of Ventura. He and his family spent their remaining years in the house. Upon their deaths, the house was sold ca 1921.

Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

Elwell House

Significance (Continued)

A succession of owners have lived in the house since 1921 including Nathan Bargman, a tailor.

The Elwell family had another house built on the property prior to the existing house. They rented this house out while they were living in Camarillo. In 1892 a different house appears on the Sanborn Map but is not completed. The Assessor's Rolls for 1902 indicate that the house was completed during that year.

The house is significant as one of the two remaining houses on Figueroa Street from the turn-of-the-century. The other remaining house is the Peirano House. At one time Figueroa Street was lined with houses all the way to the beach. Many Spanish, Italian and French families lived on the street.

DESCRIPTION

- 7a. Architectural style: Colonial Revival and California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The 0-100 block of North Fir Street is made up primarily of one-story single- and multi-family residences built between 1906 and 1926. The houses are transitional in style with examples of both Colonial Revival and California Bungalow.

Fir Street is on a gradual hill that reaches Poli Street where the massive Bard Hospital is located. It has recently been restored and is on the National Register. The houses maintain even setbacks and are on small lots with the minimum landscaping of shrubs and trees. Most houses have raised basements to accommodate the hillside lots. Building at 40 and 62-66 North Fir Street are later two-story buildings used for offices and apartments.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This block of Fir Street is part of the original townsite of Ventura when it was laid out in 1876. Mrs. Shepherd's famous seed gardens were located on the west side of the block in the 1890's. The block was primarily developed on both sides between 1906 and 1910. It is distinguishable for its age and number of houses remaining virtually unaltered from that period.

Most of the residents were merchants, businessmen and professionals, whose places of work were located a few blocks down Main Street.

West Side - 0-100 Block of North Fir Street

31 North Fir Street - 73-043-06

The decorative front porch gable of this Colonial Revival residence is covered with square shingles and a three-part vent/window. This single-story, medium pitched hipped roof residence is covered with narrow clapboard siding and has a vertical board skirt covering the raised foundation. The front windows have diamond panes in upper portion. Part of the front porch has been enclosed with glass. Built in 1910, this late Colonial Revival residence was owned by J. P. Rasmussen, Vice-President of the Bartlett Co. on Main Street.

43 North Fir Street - 73-043-05

This single-story bungalow residence has a medium pitched hipped roof with intersecting hipped roof wing on the south and exposed rafters under the eaves. The recessed front porch features a heavy wood beam with decorative brackets. The house is covered with medium clapboard siding, except for the board and batten skirt around the raised basement. Several of the windows are multi-paned and hinged at the top or on the sides. The house was built in 1909 for Frank E. Jones, proprietor of the Pioneer Drug Store on Main Street.

57 North Fir Street - 73-043-04

Built in 1912 for William B. Aplin, this shingled California Bungalow has a sidefacing low pitched gable roof punctuated by two brick chimneys. The front entrance has an open arched, vine covered trellis supported by two square columns on each side. A low brick wall, added later, surrounds the porch area. Mr. Aplin was manager of the Aplin Co. and later ran La Floreria Florist Shop in the El Jardin Patio on Main Street.

69 North Fir Street - 74-043-03

The medium pitched hipped roof displays an offset gable roof on the north side with a recessed front porch on the south. A large decorative beam extends across the front of the house under the eaves and is supported by three stone pillars with double wooden columns above. Crosscross panes are found in the upper portions of the front windows and medium clapboard. Siding covers the house. Vertical board siding is found under the front gable. The house was built for District Attorney Don G. Bowker in 1910 and occupied in 1918 by James E. Rains, City Trustee and later President of Rains Shoe Company on Main Street.

85-87 North Fir Street - 73-043-02

The medium high pitched sidefacing gable roof on this single-story California Bungalow slightly curves at the edge where it extends over the front porch. Typical bungalow features include the notched rafters and knee brackets under the wide eaves and the shed vent dormer. The house is covered with medium clapboard siding and has a slanted bay window on the south and multi-paned windows in front. The house has been converted to a duplex. Built for Clay G. Knox, Deputy County Clerk, in 1910, the house was later occupied by his mother, Mrs. Pacific I. Knox, in the 1920's.

31 North Fir Street

43 North Fir Street

57 North Fir Street

69 North Fir Street

85-87 North Fir Street

East Side - 0-100 Block of North Fir Street

40 North Fir Street - 73-045-11

Two-story stucco box with front addition, red tile roof.

58 North Fir Street - 73-045-12

This one-story Colonial Revival style house has a medium pitched gablet roof with boxed eaves and brackets underneath. A recessed porch on the north side is supported by square columns covered with medium clapboard siding and capped with large decorative curved brackets. The slanted bay, south of the front entrance, has a combination of multi and diamond paned windows. The house was built in 1906 for Thomas H. Daley, owner of Daley and Crothers Livery on Main Street. Mr. Daley lived on Santa Clara Street and probably rented out this house at 58 North Fir Street.

62-68 North Fir Street - 73-045-13

This two-story rectangular shaped apartment building has a medium pitched sidefacing gable roof with exposed rafters under the eaves. The symmetrical facade with its even placement of windows features a hipped roof porch in the center supported by Doric columns. The apartment was built in 1926 for Burt C. Wigton, owner of Wigton and Noyes Plumbers. In 1949, the wood siding was covered with asbestos shingles.

92-92½ North Fir Street - 73-045-015

A combination of gablet and hipped roof, slightly flared at the edge, adds an interesting dimension to this Colonial Revival style house built in 1907 for Eliza J. Arnold, widow of M. H. Arnold. Colonial Revival details include Doric porch columns, curved brackets under boxed eaves, hipped dormer windows. This single-story house rests on a raised foundation and has been covered with asbestos siding. The basement has been converted to a rental unit.

- Present Owner: Bard Professional Center Ltd. Address: 23161 Ventura Blvd.
City Woodland Hills Zip 91364 Ownership is: Public Private
- Present Use: Offices Original use: hospital

DESCRIPTION

- Architectural style: Mission Revival
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:
Set off by its hillside location just two blocks east of the City Hall, this large rectangular building is a visual landmark with its stucco walls and red tile roof. A combination of arched loggia, scalloped parapeted gables and domed bell tower create a Mission appearance on this two and three story plus basement structure.

The later stucco buildings added to the rear of the main building have recently been removed. The building is currently undergoing a complete rehabilitation for use as office buildings.

18. Related features: Sespe sandstone retaining walls

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

In addition to being the only remaining example of Mission Revival Architecture in Ventura, the building is important for its historical associations as well.

The Elizabeth Bard Hospital building was opened on Jan. 1, 1902 by Dr. Cephas Bard and Senator Thomas Bard in memory of their mother. Dr. Bard is said to have been Ventura County's first doctor who came to Ventura in 1868. He acted as physician and surgeon for almost 34 years and died shortly after the opening of the hospital on April 25, 1902. The Star Free Press attests to his popularity in the County, reporting that approximately 300 children marched in his funeral parade and 5,000 people were at the railroad depot as his body was being shipped to Los Angeles for cremation.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This combination one-and two-story bungalow has a low-pitched sidefacing gable roof with intersecting front gable on the north. The two-story portion forms an L-shape in front with the second story portion over the main floor slightly recessed. Cement steps lead to the main recessed front entrance. Exposed rafters and beams, brick chimney and porch stair railing and wall, all characteristics of the bungalow style. Unusual features include the long bank of multi-paned windows under the second story front gable, decorative wood planter box below, and combination narrow and wide clapboard siding.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Architecturally the house is significant, for it is one of two 2-story bungalows in downtown Ventura. The other bungalow is located at 1093 Poli Street. It was built in 1914 for Henry H. Neel, who maintained a ranch in the Saticoy area and a residence on Meta Street. This house was probably a rental.

DESCRIPTION

- 7a. Architectural style: Queen Anne Cottage
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story raised cottage has a high truncated hipped roof with intersecting front and rear gables. Two slanted bays, with boxed cornice and dentils underneath, are connected by the front porch. The south gable has a decorative sunburst design and crushed rock panel, whereas the north gable has alternating recessed rectangles in bands with a rectangular crushed rock panel above the window. Wooden steps and plain wood railing lead to the front porch which is supported by narrow turned columns. The house is covered with shiplap siding.

18. Related features: low concrete wall across front

SIGNIFICANCE

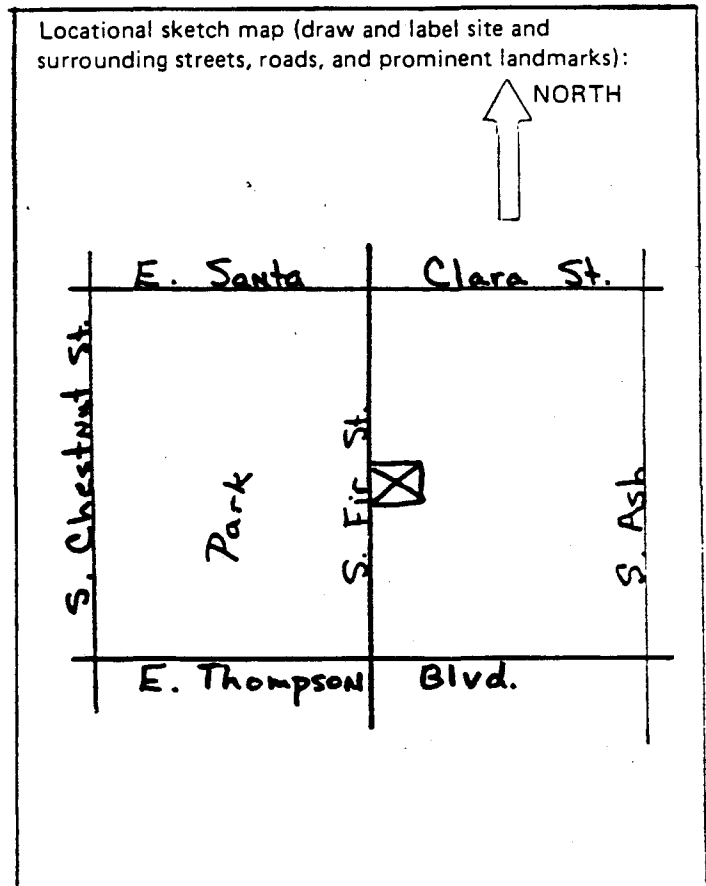

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
The house was built in 1887 for Mrs. Carrie Newby. Sometime between 1892 and 1906, the bays were added to the front. A kindergarten canvas sided structure was located on the rear of the property in 1892. Perhaps Mrs. Newby ran a school there.

The building is significant architecturally as one of the two remaining examples of Queen Anne Style left across from Plaza Park that was built in the 1890's. The other example is located at 670 East Thompson Blvd.

DESCRIPTION
7a. Architectural style: California Bungalow
7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Under the medium-pitched, front facing gable roof, a recessed front porch extends across the front of this single-story bungalow. Four square shingle-covered pillars extend from the raised basement to the bannister level of the porch. Above the pillars are square columns with caps at top and bottom. One column appears to be missing next to the stairway and the south side of the porch has been enclosed. The house is covered with shingles and medium clapboard siding and has slanted bays on north and south sides as well as two brick chimneys.

18. Related features: Large palm tree.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1924 by contractor Louis Rudolph for Joseph Fossati, Caretaker of Plaza Park. Mr. Fossati came from Italy with his bride in 1905 and worked in Ventura as a gardener and on ranches. He acquired eight acres of land on East Main Street, where he raised lima beans and was later subdivided as the Fossati Tract.

Although somewhat altered, the house maintains its essential Bungalow characteristics and contributes to the neighborhood surrounding Plaza Park.

DESCRIPTION

- 7a. Architectural style: California Bungalow with stucco false front facade.
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

A stucco false front has been added to the facade of this small rectangular building. Behind it lies a medium-pitched front gable roof with exposed rafters under the eaves. A single wood frame window is found on each side of the front door. The door has a wood crisscross design in lower portion with window above. Iron railing and cement steps are directly in front of the door. Large letters indicating the business are located above the entrance.

3. Construction date: 1900

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Vacant lot on west side.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house served as a residence for members of the Beronio Family who ran a grocery store next door. It was located to the west on the corner and recently burned down. The Beronio Family came from Italy in the 1880's and operated a store and hotel one block away on Fir and Front Streets. They moved to the current location in 1899 and built a grocery store and small residence. They also owned property at 266 and 278 South Ash. This building and the Beronio houses around the corner represent early commercial interests in the Front Street area.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Simple lines reflect the character of this two-story L-shaped house. The second story was added after 1910. It differs from the first story in window treatments and siding. The first story has long narrow windows, some with bracketed hoods and wide ship-lap siding whereas the second floor has narrow ship-lap siding and wide windows. An arched window and decorative square butt shingles are found under the front gable & brackets occur under the eaves. The tapered wooden porch columns capped with decorative cut out brackets and saw tooth detail support a balcony. The house rests on a brick foundation. A stairway has been added to the second floor on the east side.

18. Related features: None

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was constructed ca 1886 for Robert C. Sudden, son of Captain Robert Sudden who was active in the construction and management of the San Buena Ventura Wharf Co. Robert C. Sudden succeeded his father as President of the Buena Ventura Wharf Co. ca. 1912, and became Manager of the Sudden Estate and ranches. He apparently moved from Ventura around 1918-19 and his house was moved sometime during that period from the southeast corner of Thompson and Fir to Front Street.

DESCRIPTION

- 7a. Architectural style: Vernacular Brick Commercial
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story rectangular brick building has a medium-pitched, wood truss gable roof of metal on the east and a flat roof on the west. The brick facade is broken by a concrete block band about a foot wide that runs across the front of the building about two feet below the roof line. The concrete blocks are also found on the sides of the two entrances. A recent board and batten shed roof is located over the main entrance. Two board and batten panels are attached to the facade. The entrance to the west has been glassed in. The main entrance is a more recent combination of wood and glass.

8. Construction date: 1906-1910

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Mature Palms

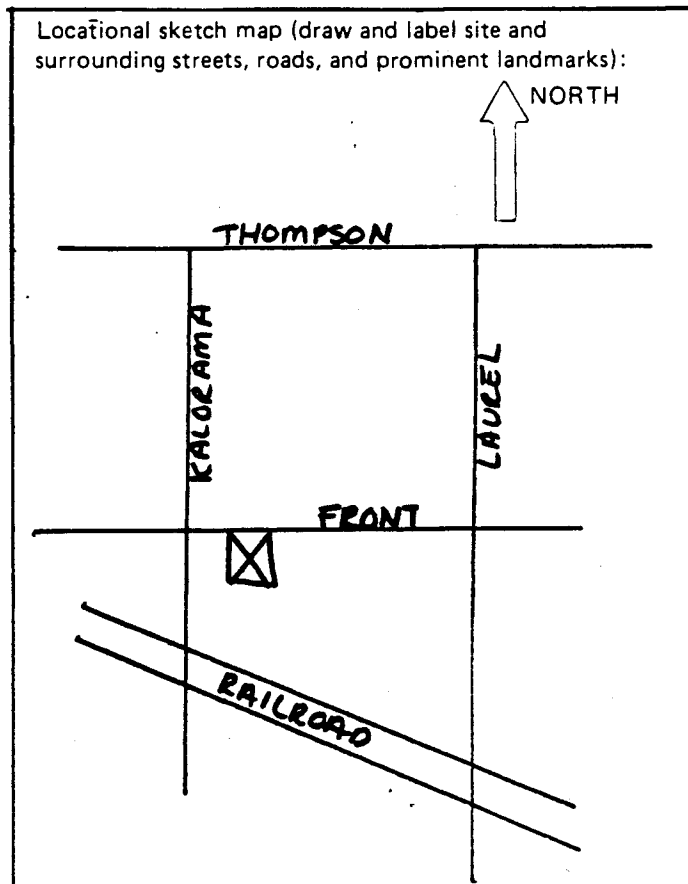

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The main brick building was constructed between 1906-1910 for the Ventura Mill and Lumber Co., which had been at this location since about 1892. During that period, the company took up the entire block. Herbert A. Giddings was the building contractor and also manager of the Planing Mill at the lumber company in 1898-99.

This building is all that remains of the many early lumber industries that once lined Front Street at the turn-of-the-century.

DESCRIPTION Vernacular Victorian, Colonial Revival,
7a. Architectural style: California Bungalow and Mediterranean
7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

Primarily a residential area, the houses on this block are a mixture of one and two stories of various styles ranging from a two-story Vernacular Victorian to a flat-roofed Mediterranean bungalow. Lots vary in size, but are approximately 50' X 100' to 190' deep. The houses on the west side have fairly flat lots, while those on the east have raised yards with concrete/stone walls. The houses maintain somewhat even setbacks, except for those two south of Hemlock Lane which are close to the sidewalk.

39 North Hemlock Street

59 North Hemlock Street

69 North Hemlock Street

81 North Hemlock Street

West side of North Hemlock

39 North Hemlock

73-061-13

This single-story, flat-roofed Mediterranean style stucco residence has two front wings with an entrance porch in between with shed tile roof. In 1930, the occupant of the house was E. A. Walsh, a clerk at the Blue and White Stores. The house was built in 1927.

59 North Hemlock

73-061-12

Built in 1919 for C. B. Stevens, agent for Associated Oil Co., this California Bungalow has a medium-pitched gable roof with offset front gable over the porch. A flat-roofed extension of the porch is enclosed on south side with open beams extending from porch on north side. Bungalow details include the exposed beams and decorative slatted bents under main front gables. The house rests on a raised foundation and is covered with clapboard siding.

69 North Hemlock

73-061-11

In 1903, Owen Boling built a brick house on this site. The house was probably torn down and this California Bungalow constructed in 1918. The Boling Family still owned it in 1930. Owen Boling was a brick layer, and Wesley Boling was a Justice. Both occupied the house in 1910. The house has a low-pitched, double front gable roof. The second gable covers the porch and has stickwork and exposed beams supported by tapered wood square columns with brick bases. House is covered with asbestos siding.

81 North Hemlock Street

73-061-10

Built in 1887 for George Parker, rancher, and his family, this Vernacular farmhouse exhibits some characteristics from the Stick-Eastlake and Queen Ann styles. Sunburst designs above the upstairs window and in the brackets under the second story square bay window. The house has high-pitched, irregular shaped intersecting gable roof with octagonal shingles under main gable. The recessed front porch has a small gable above with diagonally applied stickwork. The house is covered with wide shiplap siding.

94 North Hemlock Street

40 North Hemlock Street

54 North Hemlock Street

66 North Hemlock Street

82 North Hemlock Street

East side of North Hemlock

40 North Hemlock Street

73-062-13

Originally located on the corner of Main and Hemlock, facing Main Street, this Swiss Chalet style bungalow was moved between 1910-1928. The house was built in 1910 for Thomas G. Gabbert, President of the Ventura Chamber of Commerce. It is a large two-story bungalow with sloping sidefacing gable roof and a large gabled double dormer. Notched brackets and beams appear under the wide eaves. The recessed front porch is supported by three square capped columns, wood porch railing and decorative notches above the columns. On a raised concrete foundation, the house is covered with dark stained clapboard siding and shingles under the gables.

54 North Hemlock Street

73-062-18

The medium-pitched hip roof on this single-story residence has exposed brackets under the eaves. This house is a transition style between the Colonial Revival and California Bungalow. A slanted bay window with multi-panes in the upper portion is located in the center of facade with the porch, which has been enclosed on the south. The house is on a raised yard with concrete foundation and block wall and is covered with asbestos siding. The house was built in 1908 for Phil Glezen, Manager of the Ventura Drug Co.

66 North Hemlock Street

73-062-19

Built in 1905 for Prosper J. Istas, this transitional single-story bungalow is similar to the house at 54 North Hemlock, except that the short side of the house faces the street. A slanted bay window, under the medium-pitched hip roof, has multi-paned windows in upper third. The front porch is recessed on south side with modified square capped column support. Lattice work covers the porch opening. The house is on a raised yard and foundation with board and batten skirt and covered with clapboard siding with corbeled brick chimney on roof.

82 North Hemlock Street

73-062-020

The medium-pitched hipped roof of this single-story residence has an intersecting offset hip roof with corbeled chimney above. A shed roof extends over the front porch which is enclosed. A slanted bay features cutout brackets and upside down finial attached to the plain cornice. The house is on a raised yard and covered with wide shiplap siding. The porch has been remodeled with new board and batten siding, and a garage of concrete block and deck above were added to front of lot.

82 North Hemlock Street - Cont.

The house was built in 1889 by Herbert A. Giddings, local contractor, who came to Ventura in the 1880's. Mr. Giddings was manager of the Planing Mill for the Ventura County Lumber Company on Front Street. He built several residences in Ventura as well as commercial buildings. The house at 969 Santa Clara Street is attributed to him, as well as some of the commercial buildings on the 500 block of Main Street, south side, which included the American and Apollo Theatres, no longer used as theatres.

94 North Hemlock Street

73-062-021

By 1910, this residence had made the transition to the California Bungalow, except for the diamond pane windows in upper third which are stylistically Colonial Revival. The sidefacing medium-pitched gable roof has a shed dormer and outside clinker brick chimney which punctuates the roofline on the north. The house is on a raised foundation with wood steps leading to recessed front porch. The porch is supported by a single square column and wood slatted railing. Knee brackets and exposed rafters are found under the eaves. House is covered with medium clapboard siding. The house was built in 1910 for John B. Adamson, a piano tuner, and has been made into a duplex.

SIGNIFICANCE

- 19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1872 to encourage growth in Ventura as well as to provide an outlet for farmers and their crops, the pier contributed greatly to Ventura's expansion. It was the main source of transportation in Ventura prior to the arrival of the railroad in 1887.

The San Buenaventura Wharf Co. ran the wharf and several large warehouses were located on the pier primarily for the storage of grain and beans, two of Ventura's early crops. The wharf was used extensively for the delivery of lumber to the mills which were located north and east of the wharf on Front Street.

This one-and-a-half story residence has a medium pitched hip roof with hipped dormers on front and side. The broad eaves have a plain fascia board with curved rafters underneath. Slanted bay windows appear on front and side with diamond pane windows in upper portion. The recessed front has a bungalow feel to it with square column supports, curved brackets and slatted wood balustrade. Wooden steps have a plain wood stair railing. The house is on a raised basement with medium clapboard siding and vertical board skirt.

18. Related features: Separate rental units in rear--bungalow style.

SIGNIFICANCE

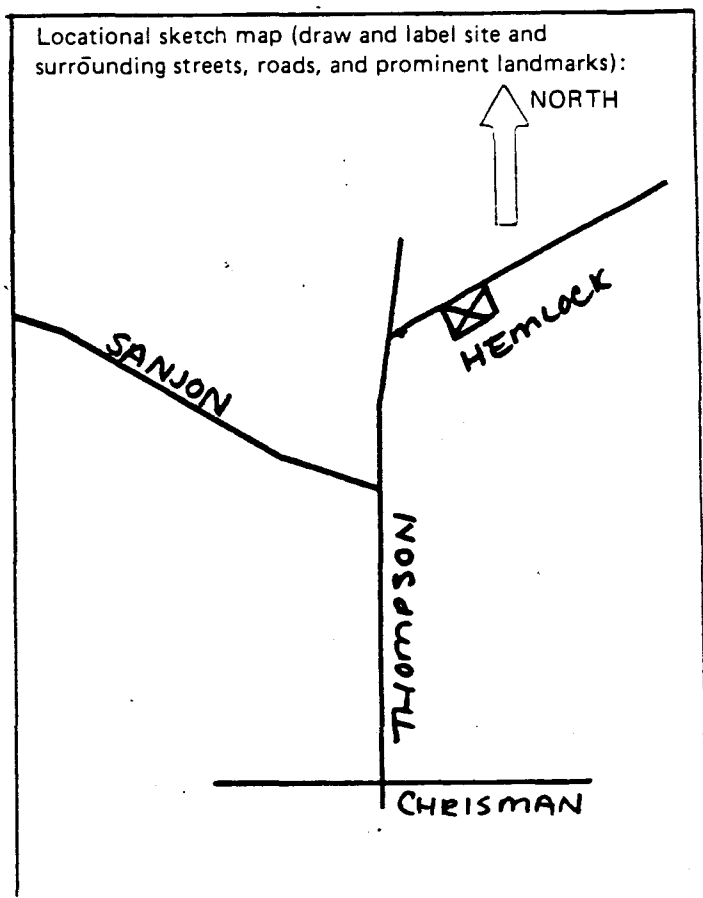

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1910 possibly by the owner, John Pratt, a local carpenter who owned several properties in the area. He only lived there for one year and from 1918 to 1927, Mrs. Lena Adison was the owner-occupant. The house is a good unaltered transitional style between the Colonial Revival and the California Bungalow.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This residence was built in 1920 and occupied by Alonzo F. Bonestell, a rancher, from about that time through 1930. The owner of the property in 1925 was Mary Love.

The house is a virtually unaltered example of the California Bungalow and contributes to the other bungalows on the block.

18. Related features: None.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This bungalow was built on the rear of the lot owned by Jules Feraud, whose house faces Santa Clara Street (913). It was sold to the Bianchi Family, who lived in the house and possibly built it in 1916-17. Adelaide Bianchi worked in millinery.

The house is owned by the Assistance League, who also own the big residence at 913 Santa Clara, and both houses are now on the same parcel.

The house is a good representative example of the California Bungalow style.

DESCRIPTION

- 7a. Architectural style: California Bungalow - late
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This row of single-story California Bungalows are identically constructed, except for the house at the south end which is more Provincial in style and on a larger lot. The houses have gabled roofs with front porches, clapboard siding, and maintain even street setbacks. The only alteration appears to be asbestos siding on the house at 122 South Kalorama plus a partial porch enclosure. Landscaping is minimal, except for mature palm trees located in the street next to the parkway.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This group of four modest bungalows, constructed between 1921-23 as rental units, are representative of worker housing built during the housing shortage in the 1920's in Ventura. It is possible that the three units on the north, built by Mr. Emil Gratzky, were prefab houses. Mr. Pierre Larramendy had the residence at 156 built. All of the residences are well-maintained and have preserved their integrity over the years.

SOUTH KALORAMA STREET

122 South Kalorama Street

73-143-19

This modest California Bungalow is almost identical to the bungalows at 134 and 144 South Kalorama. It is possible that they were prefab bungalows and were constructed in 1922 for Emil A. Gatzky, a rancher, as rental units. The medium pitched front gable roof of these square shaped residences has an offset front porch gable. Under the gable are exposed beams and rafters and strutwork which is supported by square columns with pillars on lower portion covered by clapboards and more recently asbestos siding. The porch is enclosed on the south. A wooden balustrade connects the piers.

134 South Kalorama Street

73-143-21

This bungalow is virtually identical to 122, except that it is covered with clapboard and shingles and the porch has not been enclosed. This is one of three residences built by Emil A. Gratzky as a rental in 1922. The front wood door has three rectangular panes in upper portion.

144 South Kalorama Street

73-143-22

Identical to 134, this bungalow has the same siding--wood clapboards and shingles. It was also built as a rental in 1922 by Mr. Gratzky.

156 South Kalorama Street

73-143-14

This fourth bungalow is slightly different in style from the other three and was built as a rental in 1922 by Pierre Larramendy. The house has a symmetrical facade with a centered, rounded arched portico supported by Doric columns. The front door is multi-paned as are the sidelights. The windows resemble French doors and have multi-panes. The hipped gable roof has bays on north and south with some roofline and the eaves are boxed. The house is covered with medium clapboards and has a brick chimney.

122 South Kalorama Street

134 South Kalorama Street

144 South Kalorama Street

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The front porch lends a distinctive air to this otherwise modest single-story residence. The truncated hipped roof is intersected by a hipped roof in the rear and side. The shed roof porch runs the length of the facade and contains tapered wooden columns, geometrically patterned balustrade on porch and stairway, and boxed cornice with frieze. The house is of medium shiplap siding on a raised concrete foundation covered with a vertical board skirt.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is one of the few remaining structures from the 1890's in a neighborhood that once contained many residences from that period.

It was built in 1898 for Robert J. and Libbie Simmons. Mr. Simmons was a salesman for People's Lumber Company, which was located on the next block.

- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

A square bay with hipped roof and combination shingle patterns is the distinctive feature of this one-and-a-half story house. The house has a truncated hipped roof with intersecting front and side gables. A small hipped roof covers the front porch area with scalloped trim on porch eaves. The house is of narrow horizontal board siding and rests on a stone foundation.

8. Construction date: 1902

6. Present Use: Church Original use: Church

DESCRIPTION

- 7a. Architectural style: Art Deco with Pre-Columbian (Mayan) influences
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The impressive 50' stepped tower of this rectangular building, on a prominent corner location, is the focal point of the block. The building is of textured cast concrete with a flat roof. The decorative cornice is a stylized version of the rope binding used in Mayan dwellings. The Mayan arch is found above the stained glass windows and front entrance. The art deco influence is seen in the stepped tower with emphasis on the vertical and the geometric designs and shapes both inside and out.

The first part of the church was a rectangular portion with a basement constructed in 1927 and used as the chapel and kitchen. The main sanctuary was added in 1930-31.

17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: None

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
The building is significant for it is one of the few buildings that Hollywood architect, Robert Stacy-Judd, was able to realize in the pre-Columbian mode. Stacy-Judd believed this style was "native-American" and therefore should form a basis for future American styles.

The building was originally constructed for the First Baptist Church. The interior features a stepped-up ceiling, Bas-relief carvings on the lectern in the Mayan motif and colorful painted ceiling with original lamp fixtures.

The Church of Religious Science purchased the building in 1959.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story house features a medium hipped roof with peaked gable in center facade and boxed cornice and frieze under eaves. The front porch has been enclosed and is a later addition with its low-pitched gable roof with exposed rafters and beams in the bungalow style. The windows have small panes in the upper portion, which was characteristic of a later period as well. The house is covered in wide shiplap siding and rests on a concrete foundation.

DESCRIPTION

- 7a. Architectural style: Turn-of-the Century Commercial brick
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The 1903 Building is a 1 1/2 story rectangular building with a flat roof. Built of unreinforced brick, the facade and east side of the building have the most interesting detail. A decorative cornice on the facade of the building contains brackets, inset wooden panels, leaf moulding and "1903" raised numbers.

Two sets of double wooden doors have six panes each with transoms of eight panes above the doors. Four round arched windows separate the doors. The east side of the building has a corbeled brick cornice, round arched wooden windows and wooden door. The west side remains in the natural brick and wooden doors left unpainted. All of the doors and windows are round arched with radiating brick. The rest of the building has been painted white.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building is significant architecturally for it is one of the few commercial brick buildings from the early 1900's that has not been altered.

It was built for Jules Feraud in 1903 as a general store and bakery. Mr. Feraud, a native of Marseilles, France, came to Ventura in the 1870's and had a bakery and general store on the same site in the 1880's. The ovens and wood floors are still intact. The store remained in the family hands until 1944.

6. Present Use: Interpretive site Original use: residence

DESCRIPTION

- 7a. Architectural style: California Adobe
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This simple one story square shaped adobe has a red tiled side facing gable roof that extends over the front of the house to form an open porch supported by wooden columns.

The double front door is framed with square wooden beams and is divided into a series of eight panels per door.

Buttresses extend from the front and back of the house. During the 1861-62 floods, a 40' frontage of the structure was lost. The adobe was restored by the City of Ventura in 1966. The exterior walls were wrapped with mesh and a coating of cement

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
The Ortega adobe is the only remaining single story adobe in Ventura. It is the sole survivor of the many adobes that once lined Main Street. It was constructed in 1857 by Emigido Ortega using beams from an old adobe in Fillmore.
- Emigido Miguel Ortega was the grandson of Captain Jose Francisco Ortega who helped Father Serra in his travels and in the building of the presidio and town of Santa Barbara. Emigido received the property as part of a land grant from Governor Pico in 1846. The adobe remained in the family until 1905 when it was purchased by Ung Hing and became part of the Chinese portion of town until 1913. The City of Ventura has owned the adobe since 1921.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian, with Eastlake details
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This is an elaborate 2-1/2 story Vernacular Victorian farmhouse, featuring a prominent tower and a profusion of Eastlake details. A long veranda across the front of the house contains an attached Gazebo-like tower on the south side and a pedimented entrance on the north, supported by turned posts and carved brackets. The detailed porch frieze combines spindle and spool decoration with cutout stickwork. The two-story slanted bay window on the south side of the house is divided by decorative shingles which also appear under the main roofline. The house is of medium shiplap siding and rests on a stone foundation with a lattice work base under the porch.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Records indicate that property consisting of 75 acres originally belonged to McGlinchey in 1870. His name appears on a plaque in Foster Park as one of those who brought about the separation of Ventura from Santa Barbara County.

The property was subdivided and a large piece was bought by Chrisman and then subdivided. It is noticed in the Ventura County Star of December 13, 1932. It is likely that John C. Morrison was the first owner of this property. He was rather prominent and was involved with Thomas Bard in real estate in the Colonia area of Oxnard. The remainder of the history has been clouded and unverified. In 1907, J. B. Beardsley purchased the property from J. C. Morrison. In 1927, James Carruthers, a popular figure on the Avenue, owned the house. In the 1930's, the house ownership was passed to Homer Canterbury, who presently is living in Ojai. This house was moved from its location at 1785 North Ventura Avenue.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The major portion of this building, The Washington Hotel, was built on the site of the San Buenaventura Mission Quadrangle in the 1920's. In the 1890's, the Quadrangle was removed and a brick building constructed, which became the Oliver Reardon Mortuary in 1912. When the hotel was constructed in the 1920's, it was built onto the existing building. A portion of that building remains on the east side in the rear.

DESCRIPTION

- 7a. Architectural style: Commercial Brick, 1920's
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story masonry building has a wood truss roof which is barely visible over the stepped brick parapet. The original garage entrance on the east has been enclosed with a wooden door. Large plate glass windows are found on either side of the entrance and the facade is of buff colored bricks.

DESCRIPTION

- 7a. Architectural style: Commercial Brick
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The decorative brick facade of this rectangular shaped commercial structure shows the hand of an expert brick layer. The flat roofed building has an interesting frieze under the roofline which is graduated with recessed square design. The frieze extends above the roofline as a parapet in the center of the building. There are four main windows across upper story and the corners of the building resemble quoins. Above the windows is a recessed alternating and hexagon pattern. The upstairs entrance is flanked by pilasters with caps. The storefronts have been modernized although transom windows exist.

8. Construction date: 1906-1910

17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

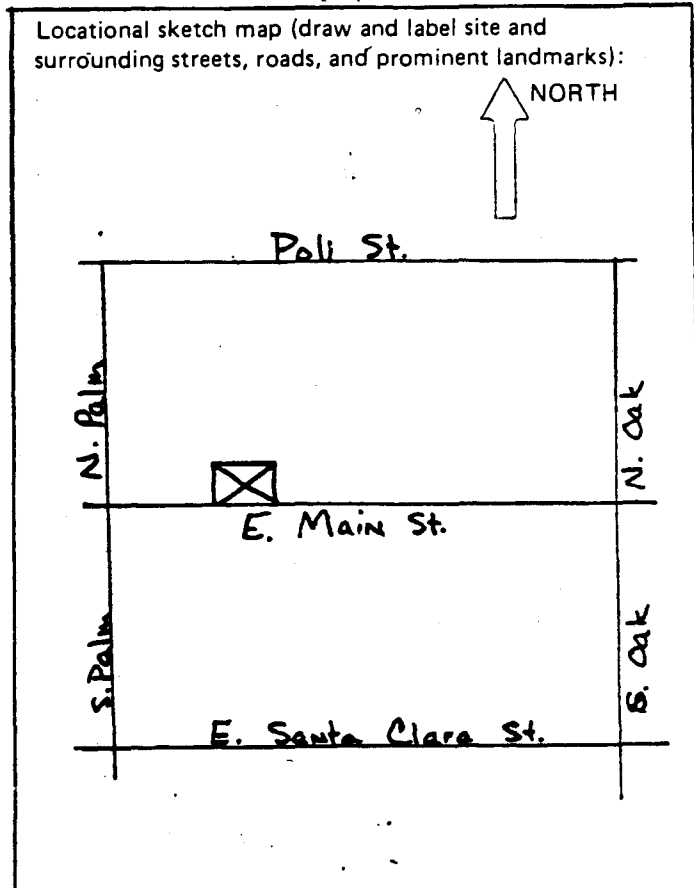

Architecturally, the building is significant as one of the few decorative brick buildings which has maintained its facade except for the storefront modernizations.

Built between 1906 and 1910 and owned by Wm. McQuire, the building was used upstairs as a hall and downstairs, on the west, as Le Petite Theatre, moving pictures and vaudeville, Dixon and Dixon, proprietors. For many years the Loyal Order of Moose used the upstairs hall.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built between 1892 and 1906, this masonry building was used as a billiards hall for awhile. The building was remodeled and added onto in the rear probably in the 1920's. J. C. Penney's Dry Goods Store occupied the building in the 1920's and 1930's.

The building has maintained its facade over the years and is one of the few brick structures that has not been stuccoed.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This was the first building constructed as a post office in Ventura. In 1902, the Ventura Improvement Co., comprised of local businessmen, was organized with the purpose of raising capital to build a two-story building to house the Post Office. They raised \$20,000 and the building was completed in June, 1903, by contractor H. A. Giddings.

DESCRIPTION

- 7a. Architectural style: Beaux Arts Style
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:
 This classical revival style building typifies a time period of architectural history. The material, cream colored speckled terra cotta (to resemble granite) was at its peak of use in 1924 when this structure was built. It is 3 stories high, built of reinforced concrete (granite base) with terra cotta veneer and ornamentation. Originally the building had proportions to simulate the grand structures of Rome, with 2 story arched windows, and 3 story high columns and corinthian pilasters in front. An elaborate cornice line with large dentils and complete entablature projects along the upper edge. The ornamentation included rich mouldings and women's busts at the top of each arched window. Windows have metal mullions. New store front windows were added in 1936, when the original design was severely compromised. The interior remains intact with rich plaster mouldings and gilded cornices.

17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Ventura Old Town district with street signs & Mexican tile walkway.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
This structure has architectural & historical merits even though it has been altered. The structure exemplifies the work of Morgan, Walls & Clements, one of the top 5 LA based architectural firms of the time, 1924. The beaux arts training of a member of the firm comes across often in their buildings of the period, however it is a rare style in Ventura. By 1930 they had abandoned this style for the zig-zag modern. The material, cream colored terra cotta speckled to resemble granite, was popular and expensive even then. It was considered very fine, as it still is today. The Lagomarsino family, prominent in local Ventura history & now renowned throughout the State of California, influenced the building of this structure.

18. Related features: None apparent.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The current 1926 facade of this Mediterranean style building was built around an 1890's commercial brick building. The alteration was done in 1925-26 by Albert Hogsett, architect, for Roger's Furniture Company. Since that time, it has always been a furniture store. Prior to its remodeling, Greene and Orton had a furniture store there in 1910 and Charlebois had a hardware store in the other half of the store.

The building is a well designed example of the Mediterranean style on Main Street and has kept its integrity over the years.

SHERMAN OAKS, CA 91403
(818) 1-1-1-1
WALTER SPAULDING*

DESCRIPTION

- 7a. Architectural style: Spanish Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

A large arched entryway divides this two-story building in half and leads into a court surrounded by one and two-story shops. On the east facade of the building is a small arched entrance leading to the second floor. A row of rectangular shaped windows with metal frames, originally french doors, run across the facade of the second story directly above the wrought iron balcony.

On the street level are two large display windows, one on each side of the arched entry. These were additions done in the 1950's. At this time the arched front entrances and the arched side windows were removed to allow more room for display purposes.

The court remains basically the same with large multi-paned arched windows with wooden frames, wrought iron railings and lamps, carved wooden spools, beams and brackets and mission tile. Some of the tile was replaced with brick tile.

The open court is raised slightly into three levels and is well landscaped. The stucco and wood trim buildings combine low-pitched tile parapets and flush tile roof lines to enhance the effect of a "Spanish Village."

SIGNIFICANCE

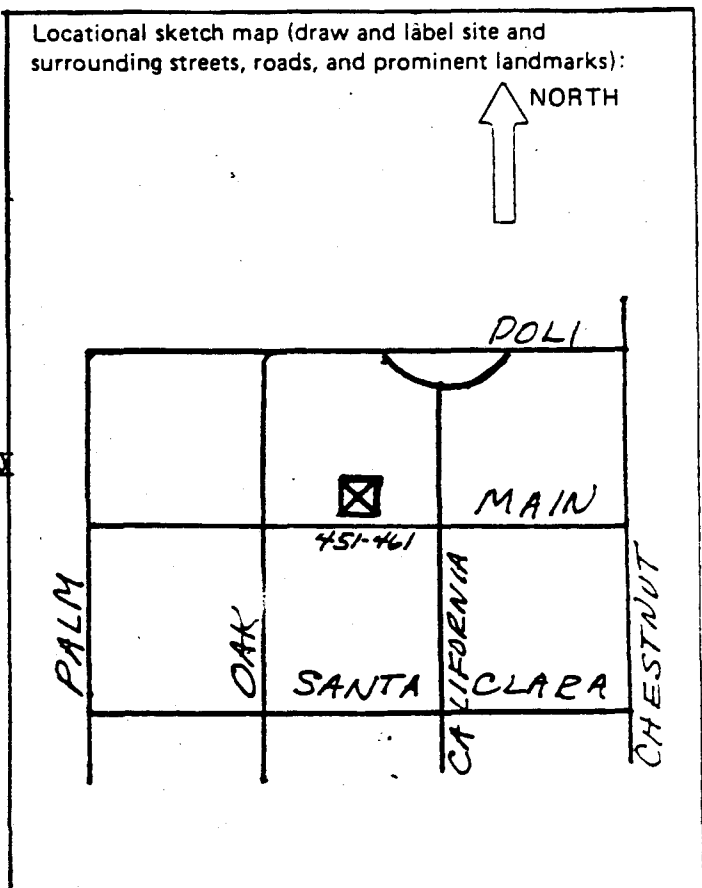

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

El Jardin Patio appears to be the only shop court built in Ventura during the time shop courts were so prevalent in Southern California in the 1920's. The building was designed by the prominent Los Angeles architectural firm of Webber, Staunton and Spaulding in 1925 for G.W. Chrisman and his son and daughter-in-law, W.B. and Mary Aplin. The Aplins ran La Floreria, the flower shop on the west side of the court for many years. Their son, William Aplin, a photographer for Sunset Magazine, had his studio in the rear of the court. The El Jardin Patio stayed in the family from 1925 until recently.

- 17 Is the structure: On its original site? Moved? ___ Unknown? ___
- 18 Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building was originally constructed in 1925 for Parker, Porter and Ramelli as the Southern California Title Building by Santa Barbara Architects Soule, Murphy and Hastings. In 1929 and 1947, local architect Harold Burket made some alterations and additions to the building. In 1953, the store was quite altered as Thrifty Drug Store and the original arched openings were replaced with aluminum windows and doors.

DESCRIPTION

- 7a. Architectural style: Mediterranean Style
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This very large four-story structure has a flat roof with shed tile parapet with classical dentil frieze underneath. Window placement and main entry are all symmetrical. The double arched entry has a slightly recessed rope design and suspended metal awning. The facade has a square textured design. All details are of cast stone. Above the main entrance on the second story is a pedimented window with a crest design and a modified balcony attachment with circular designs. The fourth floor has a wrought iron balcony along the entire facade. The Main Street entrances have been modernized.

SIGNIFICANCE

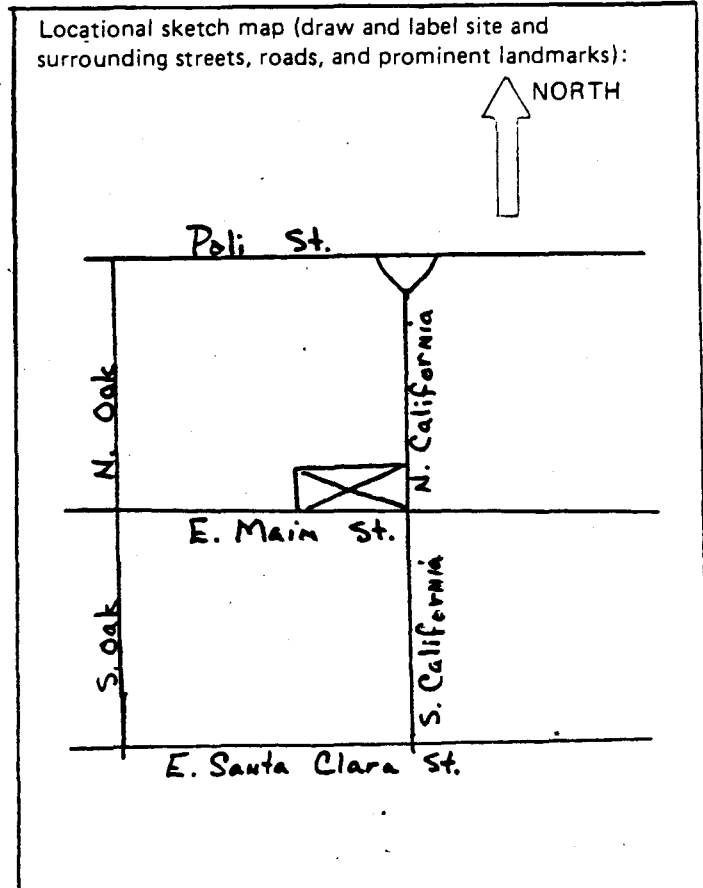

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

On Main and California Streets, one block from City Hall, this four-story hotel is a visual landmark due to its size and Main Street corner location.

It was designed in 1925-26 for Santa Barbaran Gus Berg by the architectural firm of Willard Bell and Clarence Jay of Pasadena.

It was originally used as a hotel, but is now strictly a residential hotel primarily for senior citizens.

DESCRIPTION

- 7a. Architectural style: Renaissance Revival (Spanish influence)
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This bank building has distinctive characteristics for the time period & method of construction. It is 4 story, reinforced concrete with Terra cotta cladding and some brick. It has California/Mediterranean motifs such as the twisted columns, placques between windows and corbelled cornice line. The moorish arched windows extend from the top of the 1st floor to the roof. The first floor has elegant rustication around segmental arched openings. Inside, the lobby has stately columns, chandeliers, marble counters & decorative plaster mouldings. Although it had minor alterations in 1939, 1941 and 1963, the building retains its original integrity and is essentially intact.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
This structure has architectural significance. It was built by a San Francisco architect, H.H. Winner, as a bank building and has retained this use ever since. The style is particular to California during this time period - 1926. Its Mediterranean motifs are rare in Ventura. It is located at a prominent corner, just down from the City Hall. Its beautiful Terra Cotta cladding was popular and expensive even then. Few structures in Ventura have such style & quality in design, craftsmanship and material.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Jack Rose Building opened in October 1948 and was the largest department store in the City. The architect was Arthur Forehlich of Beverly Hills and the contractor was George Macleod of Ventura. Jack Rose had a clothing store in other Main Street locations before building this store.

The building, together with the Mayfair Theater on Santa Clara Street, are the most outstanding examples of Streamlined Moderne architecture in the City.

DESCRIPTION

- 7a. Architectural style: Spanish Colonial Revival with Art Deco details
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The single story brick commercial building has a flat roof with a short red tile parapet. The decorative cornice is a combination of brick relief and glazed terracotta Spanish tile in a geometric design. The corner location of the building allows for an elaborate front entrance with a stepped parapet at the top and flat roof portico supported by carved brackets over the door. The windows are divided by square brick columns. Above the plate glass windows are a series of three smaller windows with a decorative geometrical pattern in leaded glass. The colorful tile work above the windows formed three arches. At the rear of Bahn's Jewelers is a separate office with entrance on Chestnut Street. On the west side of Bahn's is a separate store with its own Main Street entrance.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Bahn's Jewelers was originally constructed as the Ventura Guaranty Building and Loan in 1930. The building was designed by the prestigious architectural firm of John C. Austin & F.M. Ashley who were also responsible for the Griffith Park Observatory & Planetarium (1935) and the Los Angeles City Hall (Austin) (1926-28). Many of their buildings contained murals as did Ventura Guaranty Building & Loan. The interior is extremely elaborate with the west wall covered by three murals painted on canvas by Norman Kennedy of La Jolla and depicting the Mission and early California life. The ceiling is of pre-cast plaster and decorated to give it the appearance of wood combined with stenciling and relief. Portions of the interior have wooden panels and there is an open mezanine above the offices in the rear of the store and a safe.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Theodosia Burr Shepherd attained national acclaim as a horticulturist in 1892 when she showed her flowers at the Chicago World's Fair, where she was dubbed the "Flower Wizard of California."

One of her finest contributions to California was her 1893 Catalogue which contained a descriptive section on California flowers.

Today, except for a few trees, there is nothing that remains of her house and extensive gardens and greenhouses and once covered three-fourths of a City block.

DESCRIPTION

- 7a. Architectural style: P.W.A. Moderne - Classical
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This long rectangular shaped building has a low-pitched tile hipped roof with plain cornice underneath. The flat surface of the horizontal structure is broken by tall vertical bonds of windows interrupted by fluted pilasters. Above the pilasters is a decorative raised design. A shed aluminum roof and light fixtures, typical of the Moderne period, are found at the front and side entrance. The building is 1-1/2 stories with a basement. The building has a smooth surface, possibly terra cotta.

DESCRIPTION

- 7a. Architectural style: Swiss Chalet Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large two-and-a-half story residence takes up almost the entire lot on its corner location. The steeply pitched sidefacing gable has three offset front gables--two on the west and a small one on the east. The front gables have an unusual stickwork design over stucco with decorative projecting beam ends and knee brackets. The front porch is enclosed under the main front gable and is supported by elephantine brick columns. A massive brick chimney punctuates the roof line and extends down across the front of the house. The upper portion of the house is covered with shingles and the remodeling on the east side is of clapboard siding with a flat roofed side entry.

City Ventura Zip 93001 County Ventura
4. Parcel number: 73-045-09
5. Present Owner: Taylor, McCord, Paul and Johnson Address: same
City _____ Zip _____ Ownership is: Public _____ Private X
6. Present Use: Offices Original use: Single family residence

DESCRIPTION

- 7a. Architectural style: Late Queen Anne with Colonial Revival Elements
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large 2 1/2 story residence would be a perfect Colonial Revival style house except for the shingled tower and wrap around porch. The medium pitched gablet roof has a hipped dormer window, boxed cornice and decorative brackets under the eaves. The shingled tower, topped with a finial, displays dentils below the shingled roof. The wrap around porch, on a raised foundation, is covered by a curved shed roof supported by double Corinthian columns. A small balcony with wooden balustrade occurs above the entrance. The front door is of oak and flanked by sidelights. The house is of narrow clapboard siding. An addition on the west side for office space uses compatible materials except for front portion.

8. Construction date: 1905
Estimated _____ Factual X
9. Architect none
10. Builder unknown
11. Approx. property size (in feet)
Frontage 68' Depth 185'
or approx. acreage _____
12. Date(s) of enclosed photograph(s)
9/82

13. Condition: Excellent Good _____ Fair _____ Deteriorated _____ No longer in existence _____
14. Alterations: Large addition on southwest side of building. Front porch glassed in with aluminum windows.
15. Surroundings: (Check more than one if necessary) Open land _____ Scattered buildings _____ Densely built-up
Residential Industrial _____ Commercial Other: _____
16. Threats to site: None known Private development _____ Zoning _____ Vandalism _____
Public Works project _____ Other: _____
17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Large stone retaining wall across front and up stairway, mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1905 for pioneer David S. Blackburn, early Ventura farmer.

Architecturally, the house is significant as one of the most elaborate residences from the turn-of-the-century remaining on Main Street.

20. Main theme of the historic resource: (If more than one is checked, number in order of importance.)

DESCRIPTION

7a. Architectural style: Mediterranean Style

7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This one-and-a-half story stucco building with basement has a flat roof with tile trim on west side (748) and a gabled parapet on east side capped with a giant, cast stone finial. An elaborate high arched recessed entrance has a cast stone rope design ending with a shelled shield scroll at the top. Moorish tile squares are located on either side of the main entrance. Entrance door is modern glass with elaborate capped pilasters on either side under an arched multi-paned window. The store at 748 has a plain frieze and wood and glass storefront.

DESCRIPTION

- 7a. Architectural style: Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The house marks a stylistic transition from the Queen Anne mode of Victorian design, a period which was ending at the turn of the century, to the Classical or Colonial revivals, a movement which swept the nation from about 1895 to 1905. The more austere classically based Colonial Revival details can be seen as a reaction to the "excesses" of the flamboyant Victorian period.

The square tower of the Blackstock House, with its pointed peak, or finials, lends a distinctly Victorian feeling. The Classical or Colonial, details can be seen in the triangular pediments, the brackets which support the eaves, and the elaborate frieze details.

~~Mature night-blooming Cereus and Oregon Yew Tree~~

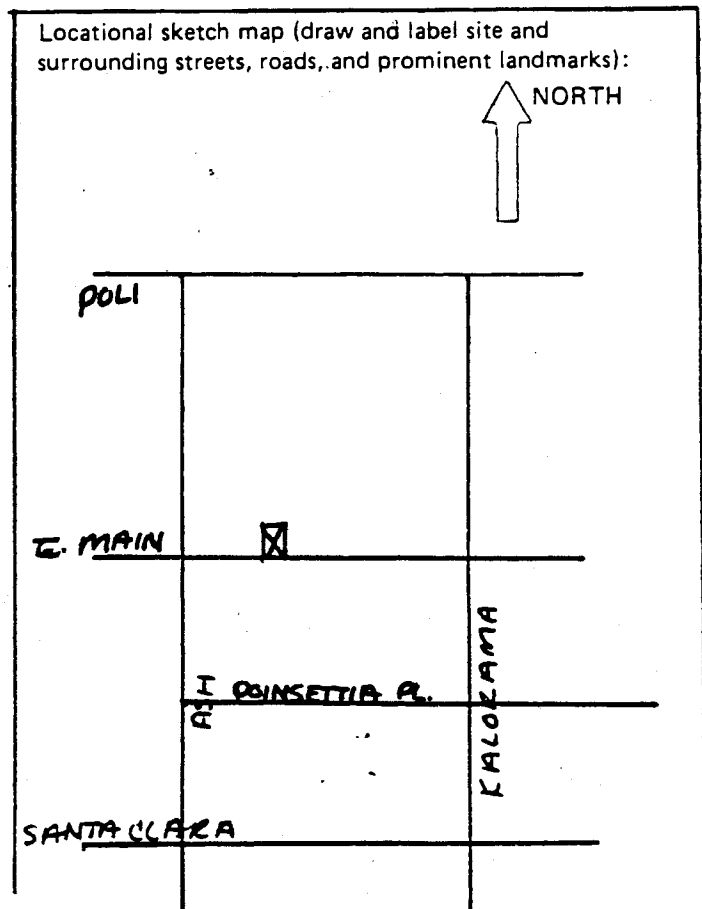

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The home was commissioned to be built by James and Caroline Blackstock, who was a Main Street businessman and proprietor of the Central Cash and Meat Market and the Union Ice Co. from 1910 to 1926. The house was constructed in 1901 on the site of what is now the Ventura City Hall on Poli Street (built as the Ventura County Courthouse) and so was moved in 1911 to its present site at 835 E. Main Street, a prestigious address in early Ventura. The house remained in the Blackstock family until 1944.

James Blackstock died January 19, 1932. He was Mayor of the City when he died - he served as a Freeholder from June 3, 1930; then there was a Special Election in December, 1931, and he served as Mayor from that time until he died. His other community activities included: President of the Chamber of Commerce; President of the Lion's Club; Advisory Board Member of the Bank of America; and managing Director of "new Hospital de Buenaventura".

DESCRIPTION

- 7a. Architectural style: Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

One story turn-of-the-century classical cottage incorporates several distinctive architectural features. The main characteristics include a pyramid shaped roof, narrow clapboard siding, slanted bay windows, and large pedimented porch supported by classical Corinthian columns. Elements of style are seen in the small Palladian vent enclosed in the shingled pediment, the dentils running under the eaves, and the decorative redwood front door with its sunburst design. A handsome cobblestone wall complements the house.

18. Related features: Raised cobblestone wall. A small single story wood frame house with the address 853 E. Main is located behind the main house.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is architecturally significant as a good unaltered example of the Colonial Revival style and is rich in classical detail.

Built in 1903 for Melvin Clover, a carpenter, the house was deeded to Nellie J. Clover, Melvin's wife, in 1913. She owned the property until her death in the 1960's. She lived in the small house at the rear of the property and rented out the main house.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This bungalow has an unusual double high-pitched cross gable roof which extends from the main sidefacing gable.

It is 1-1/2 stories high and under the fascia board are exposed beams. A slanted bay window is contained under small front gable and an open porch under the main gable that is supported by a large brick square column. Stair and porch railing as well as chimney are out of brick. The house is on a raised foundation and covered with medium clapboard siding and dark-stained shingles under the gable.

18. Related features: Raised yard and short concrete wall, detached garage.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1914 for Francis A. Crampton, a farmer, and his family, this unusual bungalow with its high-pitched gable roof is a fine contribution to the 800 block of Main Street.

DESCRIPTION

- 7a. Architectural style: Carpenter Gothic with Eastlake Detailing
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The Gothic influence is clearly seen in the high-pitched gable roof and lancet arched stained glass windows and doors. Eastlake detail can be seen in the fluted turned columns and the applied cut-out designs under the eaves and windows. The square tower is topped with an elaborate pointed roof covered with three different shingle patterns and an arrow shaped finial at the top. The building has a full basement and the siding is of medium-wide shiplap. Boulbons finials are found at the tops of the gables.

8. Construction date: 1890

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: None

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The cornerstone for the Southern Methodist Episcopal Church was laid in 1889 and the church was completed in 1890. The builder was Selwyn Shaw, who was a prominent local builder in Ventura, having designed and built, along with his father and son, many of the important buildings between 1880 and 1920.

Architecturally, the building is significant, for it is the only remaining church in the Gothic style left in the City. It has maintained its integrity over the years and is well maintained by its current owners.

5. Present Owner: Various Address: _____
- City _____ Zip _____ Ownership is: Public _____ Private X
6. Present Use: Mainly residences, two commercial buildings, church Original use: Residences and Church

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The south side of the 900 block of Main Street consists primarily of single-story California Bungalows built between 1913 and 1923. There are three exceptions; two of the bungalows have commercial buildings in front, one attached and the other separate. An octagonal wood church, dating from the 1890's, was moved to the west corner in the 1920's.

Where there are no commercial buildings, the setbacks are even and the lots average 50' X 140' to 180'. Homes in this neighborhood typically have low-pitched gable roofs, with exposed beams and rafters, porches, clapboard siding, and minimum landscaping.

8. Construction date: 1913-1923
Estimated _____ Factual X
9. Architect Unknown
10. Builder Unknown
11. Approx. property size (in feet)

15. Surroundings: (Check more than one if necessary) Open land Scattered buildings Densely built-up
Residential Industrial Commercial Other: _____
16. Threats to site: None known Private development Zoning Vandalism
Public Works project Other: _____
17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Some mature palm trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

There is a consistency in style, primarily California Bungalows from 1913 to 1923, on this block. Two of the buildings, 932 and 902 East Main Street, are City landmarks. The character of the bungalow neighborhood has been altered somewhat by the presence of two commercial structures which interrupt the setbacks, but the integrity of only one of the bungalows at 964-76 has been impaired. Several of the residences have been converted to commercial use without sacrificing the integrity of the structures. The various owners/occupants reflect varying occupations ranging from oilworker to engineer, and built primarily for the middle class.

902 East Main Street

73-055-01

See individual landmark form.

920 East Main Street

73-055-02

This single-story California Bungalow has a commercial building constructed in front of it, The Colonial Flower Shop. The residence has maintained its bungalow characteristics, with low-pitched gable roof with offset front gable, exposed beams and rafters and medium clapboard siding. Built in 1924, Zeb Dyer, oilworker, occupied the house in 1926.

932 East Main Street

73-055-03

See individual landmark form.

942 East Main Street

73-055-04

The sidefacing gable of this single-story California Bungalow features two offset front gables with exposed beams and knee brackets. The smaller gable covers the front porch with an open beam trellis on the west side. Elephantine columns support porch with slatted wood railing. The house rests on a raised foundation, is covered with clapboard siding and has the original beveled glass wood door. One of the first houses on the block, this residence was built for S. M. Wilson, who worked as a foreman for Southern California Edison Company. Built in 1913.

958 East Main Street

73-055-05

Built in 1914 for H. A. Johnson, Fire Chief and City Building Inspector, this single-story California Bungalow features a main front gable over the porch on east side. The base of the porch is of brick with triple columns in upper portion and knee brackets attached under the eaves. The house is on a raised foundation and covered with asbestos siding.

964-76 East Main Street

73-055-06

Built in 1920 for Florence M. Owens, realtor, this modest duplex bungalow has had a commercial building attached to the front at the roofline edge. This stucco one-story building extends to the sidewalk.

982 East Main Street

73-055-07

The low-pitched sidefacing gable roof of this bungalow has an intersecting front gable on the west and a gabled dormer vent at the ridge line. The recessed front porch on the east is supported by large square stucco columns. The house is covered with medium clapboard siding and has a basement in the rear and a stucco chimney. This house was built in 1915 for M.E.V. Bogart, a jeweler and watchmaker, and his family.

996 East Main Street

73-055-08

This single-story California Bungalow has a Craftsman influence seen in the use of cobblestones for the porch and stair railing, as well as the heavy use of knee brackets under the double front low-pitched gables. The porch has been enclosed with windows similar to rest of house. The house was built in 1923 for Alice Merry, widow of G. W. Merry.

DESCRIPTION

- 7a. Architectural style: Moderne
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story rectangular building has a flat roof, a portion of which extends over the driveway and is supported by two round metal columns to form a carport. Rectangular fixed plate glass windows with horizontal bands at the top are found on the front and side of the building and the walls are of stucco and cement blocks. The streamlined modern detail is found in the carport roof and top of the building as a narrow double band of relief.

17. Is the structure: On its original site? ___ Moved? Unknown? ___
18. Related features: None

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The First Christian Church was constructed sometime between 1892 and 1900. In 1923, it was moved from its location on the southeast corner of Fir and Santa Clara to Main and Kalorama. Prior to its being moved, it was converted to the Alice Bartlett Clubhouse (originally the E.C.O. Club). The E.C.O. Club was an active social and civic improvement club for women.

Architecturally, it is very significant since it is the only octagonal building in the City and has maintained its integrity, except for a few minor additions.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house is one of several large houses which have maintained their integrity on the 900 block of Main Street built between 1900 and 1905.

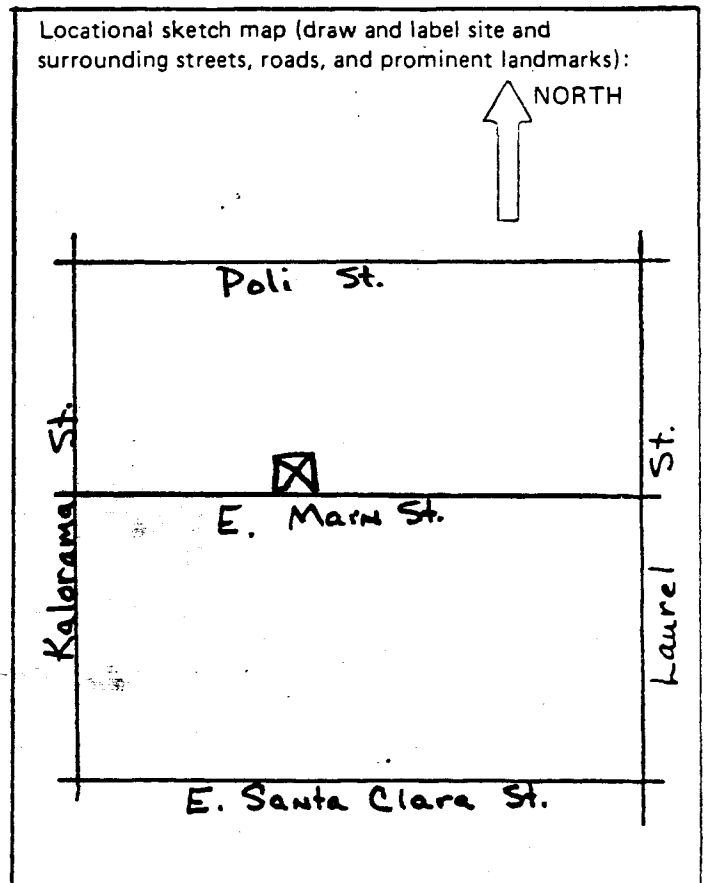

The house was built for Edwin Isensee, City Clerk, in 1900. The block has been interrupted by two large office buildings which extend to the sidewalk, thus cutting off the even setbacks of the houses.

DESCRIPTION

- Architectural style: California Bungalow
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story bungalow, built in 1920, has a side facing gable roof with offset low pitched gable over porch and low pitched gabled dormer vent. Exposed rafters appear under eaves with heavy decorative beams across the porch. Large stucco columns with diamond design support the porch roof. The slanted bay window on the east side of the house contains a window seat. The house is covered with narrow clapboard siding and has a red brick chimney. Both the exterior and interior retain the original California Bungalow feel and are in excellent condition; only the kitchen and bathroom have been modernized.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was first occupied by Wm. Arthur Dunning and his wife, Adella, in 1920 or 1921. The same family occupied the house from that date to 1965. Mr. Dunning was a Ventura rancher who came to Ventura County in the 1880's from Illinois. He was born in 1872 and died January 28, 1934. He and his wife had one daughter, Mrs. George Ecker of Los Angeles. He was a member of the First Methodist Church.

The house contributes to a group of four nearly identical California Bungalows in the 900 block on the south side of Main Street.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is an excellent, virtually unaltered example of a transition style--Queen Anne and Colonial Revival. It is one of several houses on the block built between 1900-1905.

This house was built in 1905 for Eugene W. Duval, son of pioneer E. A. Duval from Saticoy. Mr. Duval had a hardware store on Main Street with Mr. Sanchez. Eugene and his wife Kate owned the house next door at 953 East Main Street.

Public Works project ___ Other: _____
17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: Garage in rear; stone wall across the front with iron gate.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

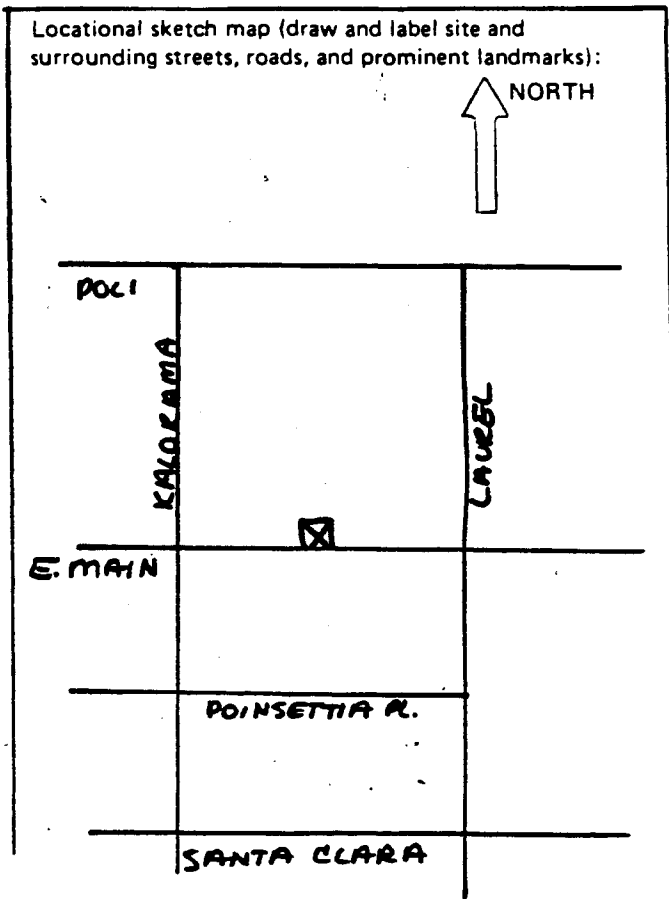

Built in 1902 for the Eugene W. Duval family, this house was listed as owned by Kate Duval, the wife of Eugene. Mr. Duval operated a hardware store on Main Street with Mr. Sanchez, and also owned the house next door at 943 East Main Street. This house may have been used as a rental.

This house is significant as a group of houses built between 1902-1905 on Main Street and has maintained its integrity over the years.

 City Ventura Zip 93001 County Ventura
4. Parcel number: 73-054-015
5. Present Owner: Wanabelle Oller Address: Same
 City _____ Zip _____ Ownership is: Public _____ Private x
6. Present Use: Multi-family house Original use: Single family house

DESCRIPTION

- 7a. Architectural style: Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This house is characteristic of the classic two-story box shape, which includes Ionic columns on the recessed front entrance and on the second floor balcony. An unusual diamond pattern of wood is found on windows and dormer. Two ball finials are found at the top of the hipped roof and dormer. The house has narrow clapboard siding and rests on wood piers with a wooden skirt of vertical boards.

8. Construction date: 1904
 Estimated _____ Factual x
9. Architect none
10. Builder unknown
11. Approx. property size (in feet)

Public Works project ___ Other: ___
17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Attached both house in rear - separate old a house in rear.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is significant as part of a group of Colonial Revival houses built on the north side of the block of Main Street around 1900. The property was owned by N.A.D. Taylor who lived in another residence one block to the west. The house was constructed in 1904 and is a stylistic example of the Colonial Revival.

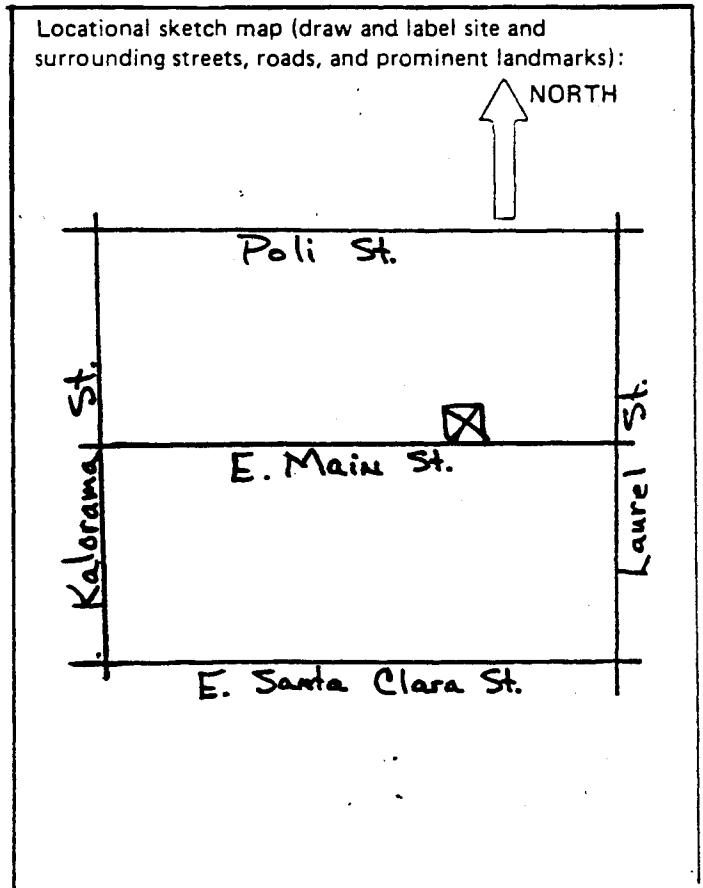

In the 1940's and 50's, Dr. G. W. Oller lived in the house and in 1959 erected a new building in the rear for use as his office.

DESCRIPTION

- 7a. Architectural style: 1920's Vernacular Brick Church
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story rectangular building was originally of blond brick which was stuccoed over. Its prominent Main Street corner location makes it a strong visual landmark. The projecting facade, stepped parapets and setback square tower create an interesting visual effect. The building's main features are its recessed pointed arched windows, slit windows, and rose windows, some with stained glass in bands of twos and threes. Coast stone details are found around windows and doors as quoins.

18. Related features: Concrete wall around raised front yard.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built for Earl Moss, a court reporter, in 1911. In 1923, Judge W. L. Pierce purchased the house and lived in it until his death in 1934. He had an active law practice with Thomas Gould, Jr.

The house is a good example, except for the minor alterations, of an early California bungalow.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This one-and-a-half story vernacular Victorian house features a high pitched truncated hipped roof topped with iron cresting and intersecting gables on the south and west sides. The return gables contain decorative shingles and the house is covered with narrow ship lap siding. The main decorative feature of the house is the front porch with its low hipped roof supported by square columns and delicate spindle and spool frieze. A small one story addition on the east side has maintained the integrity of the house. Stairs were also added to the rear of the house when it was used as a rooming house. The house, located on a corner lot, is enclosed by a white picket fence and shaded by a mature tree in the parking strip.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Granger House represents a wellmaintained unaltered example of turn-of-the-century vernacular architecture. Its corner location, white picket fence and mature trees make it a visible landmark and important asset to the remaining houses on the block.

W. H. Granger was a grocer in the downtown area.

17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This park was the City's first cemetery and was divided among the Protestant, Oriental, Catholics and Jews. In 1968-69, all of the gravestones, except for a few, were removed and the cemetery was converted to a park. At that time, some of the graves were relocated to other cemeteries for families that requested it done. Otherwise, the park is, in reality, still a cemetery and has been since the City was incorporated in 1860.

DESCRIPTION

- 7a. Architectural style: Colonial Revival and California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Primarily consisting of California Bungalows, with the exception of one Colonial Revival residence, this 1000 block of Meta Street contains single-story residences which maintain fairly even setbacks on lots 50' X 100' to 130' deep. Some mature trees are found on individual lots with no trees in the parking strip. Some of the residences have enclosed porches and some have additions to the rear of the houses.

At the west end of the block are two intrusions, an apartment complex on the north and an office building on the south.

17. Is the structure: On its original site? Moved? Unknown? ___
18. Related features: Detached garages, some mature trees.

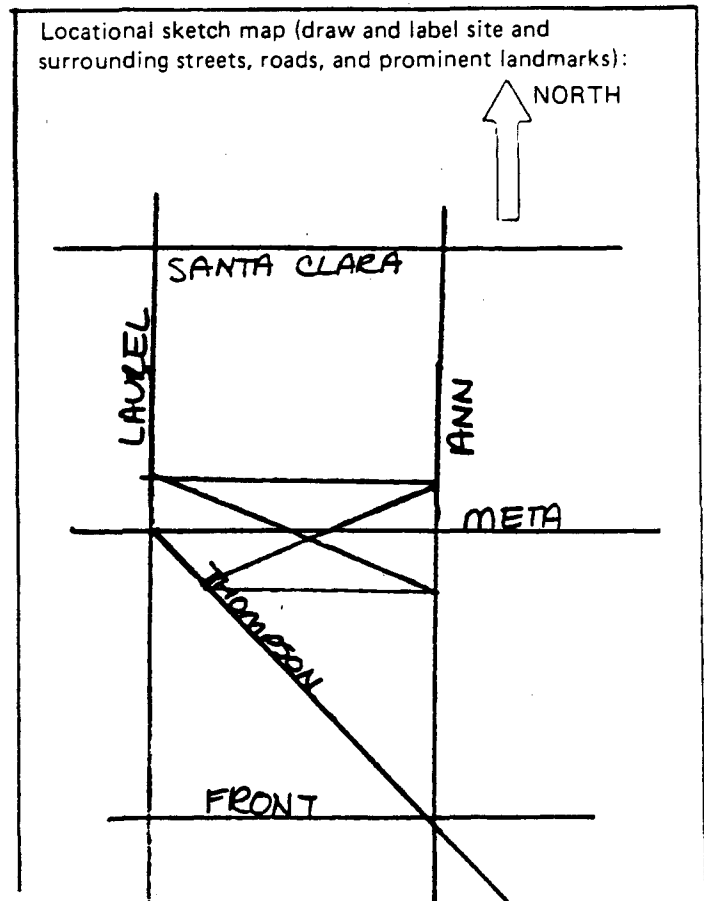

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The north side of the 1000 block has a consistency of style seen in the four California Bungalows, built in 1924; all of which have been well maintained. The south side has two well-maintained residences from 1910, surrounded by several mature trees.

In 1924, Steve Kral owned all of the lots on the north side and built the bungalows. They were eventually sold.

1000 Block Meta Street
(North Side)

1056 Meta Street

73-146-02

Contemporary office building.

1082 Meta Street

73-146-03

This one-and-a-half story Colonial Revival residence has a hipped roof with hipped dormer window and a boxed cornice and plain frieze. A slanted oriel window is located on the west side and an enclosed porch on the east side. Geometric window treatment is found in upper portion of main bay. The house was built in 1906 and moved to the lot sometime between 1910 and 1928. In 1926-30, Henry Schwab, Manager of Schwab Tool Company, occupied the house.

1094 Meta Street

73-146-04

This large one-and-a-half-story irregular shaped California was built in 1910 for Mary E. Crump, widow of Oliver Crump. Knee brackets and exposed beams are found under the wide eaves. Part of the recessed front porch has been enclosed. Under main gable is a rectangular shaped vent with multi-paned window in center.

1057 Meta Street

73-145-22

This single-story California Bungalow, built in 1920, is almost identical to the houses at 1069 and 1081 Meta Streets, with its sidefacing low-pitched gable roof and offset front gable over the porch. Concrete steps and floor have three square supporting columns, the lower half of stucco or concrete and upper half of wood. Houses are covered with medium-narrow clapboard siding and have multi-paned windows in front. Notched beams, scrolled brackets and exposed rafters are found under the wide eaves. The house was occupied from 1921 to 1930 by William S. Jewett, oilworker.

1069 Meta Street

73-145-12

Identical to the house at 1057, except for stucco or concrete low porch wall. This house was occupied from 1926-1930 by Nicola Marinovitch, a laborer.

1081 Meta Street

73-145-13

This house is identical to the houses at 1056 and 1069, except for the addition of a room and carport on the east side. The house was built in 1920 and occupied by Charles W. Pierce, City Engineer, in 1926.

1091 Meta Street

73-145-10

Built in 1924, this single-story California Bungalow is rectangular in shape, with an offset front gable over the porch and intersecting side gable over the square bay. Exposed rafters and beams are located under the wide eaves and the porches supported by triple wood square columns and slatted wood railing. The house was occupied in 1926-1930 by Dean A. Griffith, Hudson Car Dealer.

DESCRIPTION

- 7a. Architectural style: Victorian Vernacular
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story, square shaped residence has a combination hip and gable roof with low hip roof over the front porch. On the porch are simple columns with cutout brackets, spindle and spool detail, and geometric balustrade. The frieze under the intersecting front hip roof has applied circular designs and brackets underneath. The front door has recent panels and a glass transom above. A corbelled brick chimney is centered on the roof. Fish scale shingles are found under side gables.

DESCRIPTION

- Architectural style: California Bungalow - Mediterranean
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

All of the residences are single story, except for a two-story apartment building. Setbacks are fairly even with lots approximately 50' X 180' on the average. Houses on the north side have raised yards and concrete or brick retaining walls with minimum landscape. On the south side, several mature trees are found and lots are flat. Residences are primarily California Bungalows, except for one Mediterranean style residence, contemporary apartments (3) and a possible Vernacular Victorian.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The 1200 block of Meta Street maintains its residential image as a neighborhood of California Bungalows from 1917 to 1928, except for three Contemporary apartment buildings.

Several of the houses were rentals, including 1206, 1212 and 1220. The neighborhood itself was developed in response to the tremendous population growth in Ventura, in part due to the discovery of oil on Ventura Avenue.

One-story contemporary apartment building.

1209-1221 Meta Street

73-154-15 and 14

Contemporary apartment building on large lot.

1243 Meta Street

The only Mediterranean style residence on the block, this single-story square shaped residence has a flat roof with red tile parapet. A small shed tile roof with decorative brackets is located over the main front window which has multi-panes in upper portion. Two Doric columns support flat roofed portico with a wrought iron railing. The house was built in 1923 for Kenneth C. Murphy, Captain of the California Highway Patrol.

1255 and 1259 Meta Street

73-154-11

This square shaped single-story, low pitched gable California Bungalow, built in 1923, has an offset gable over the porch which has been enclosed. The house is covered with clapboard siding and has exposed beams under the eaves. In the rear, at 1259, is a small hip roofed bungalow, built in 1920, covered with asbestos siding and has multi-paned windows in upper portion. The house at 1255 was occupied by Edward Fry, a driller, in 1926. Forest T. Waldron, oilworker, lived at 1259 in 1926.

1267 Meta Street

73-154-10

Built in 1918 for Edward H. Lindsay, manager of the John Lagomarsino Association, this single-story California Bungalow has been well-maintained. The low-pitched shingled hip roof has a hipped dormer vent with exterior brick chimney. Four clapboard columns support the recessed front porch with slatted wood railings. Wood front door has small beveled glass panes and multi-paned windows in upper portion of front windows. The house is on a raised yard with brick retaining wall, stairs and walk. The house is covered with clapboard siding and board and batten skirt.

1206 Meta Street

73-162-01

This modest California Bungalow, built in 1924, is almost identical to 1212 and 1220 Meta Street. The single-story, rectangular shaped residence has a low-pitched gable roof with offset front gable over the porch supported by small elephantine wood columns and wood porch railing. Dentils appear under main porch gable as primary decorative element, in addition to knee brackets and exposed rafters under the eaves. Constructed possibly as a prefab, this house was occupied by John J. O'Neil, an engineer, between 1926 and 1930. The house has been covered with asbestos siding. All three houses were owned by Mr. O'Neil and rented out.

1212 Meta Street

73-162-02

Virtually identical to the house at 1206 Meta. This house has the original medium clapboard siding. It was occupied in 1926 by Vinnie Fitch and built in 1924.

1220 Meta Street

73-162-02

Again, identical to 1206 and 1212, this California Bungalow is surrounded by mature trees. The occupant in 1926 was John J. Vaughn, who owned Vaughn and Robbins Tire business.

1228 Meta Street

73-162-03

A contemporary two-story stucco and wood apartment building.

1242-46 Meta Street

73-162-04

The medium-pitched gable roof of this single-story, rectangular shaped bungalow contains a recessed front porch on the east side with elephantine column support. Under the gable is a woven lattice vent and plain fascia board with knee brackets in the corners and exposed rafters under the eaves. Louvered shutters next to front window are a later addition. The house is covered with narrow to medium clapboard siding and has a separate contemporary single-family residence in the rear. The house was built in 1916 for Rose Balderson, the widow of J. H. F. Balderson.

1252-56 Meta Street

73-162-05

The low-pitched gable roof on this single-story California Bungalow, built in 1918, features unusual stickwork detail under the offset front porch gable. A combination of exposed beams and triple column supports are found together with additional stickwork design under porch gable. A shed roof addition using similar materials is located on the west side. The house is on a raised foundation and covered with medium clapboard siding. In 1921-22, Howard A. Havens and his family occupied this house. Mr. Havens was a painter.

1279 Meta Street

73-154-09

This single-story residence appears to have been built prior to 1900 and moved to this location sometime before 1928. The medium side-facing gable has plain boxed cornice with eaves extending partly around the corner and a plain frieze. A front gabled portico has the same cornice as the roof gables with fish scale shingles in the gable. The portico and open beams on the west are supported by three Doric columns with slatted wood balustrade. The house rests on a concrete foundation and the porch floor is of concrete. The house is covered with wide shiplap siding. The front door, sidelights and front windows appear to be later changes. The house was rented in 1930 by Ellwood D. Cooper, manager for F. C. Snodgrass. The owner was Leona Lincoln, who lived on Ventura Avenue.

1293 Meta Street

73-154-08

The medium-pitched sidefacing gable on this single-story California Bungalow has a centered gable portico supported by slightly tapered square wood columns and slatted wood balustrade. Exposed beams and rafters are found under the eaves. The wood door has multi-paned glass and sidelights. The house is on a raised yard with concrete retaining wall and steps that lead up to the front porch. The porch on the east is enclosed and a brick chimney punctuates the roofline of the house on the east side. The house was built in 1922 by W. E. Mercer and rented to Wm. M. Hines, a collector, in 1930.

DESCRIPTION

- 7a. Architectural style: Italianate
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This one-and-a-half story Italianate cottage has a truncated hipped roof with broad, broken pedimented gables symmetrically placed on all four sides of the house. This feature is characteristic of the more formal aspect of the earlier phase of Italianate architecture. Other distinctive features include elaborate paired brackets and dentils under the eaves and long narrow windows with pedimented hoods. Sheathed in original wide shiplap siding and topped with an ornate widow's walk, the house maintains its original integrity. The roof is of composition shingles and has two brick chimneys one of which is mostly gone. Although located in a commercial area, the house is buffered by mature trees and shrubs.

A shed roof addition at the rear of the house is hidden on the side by an extension of a false front roofline. The Sanborn Maps indicate this was part of the original house in 1886. Since the house was built in 1879, if it was an addition, it was built between 1879 and 1886. Sometime after 1928, a small porch was added to the rear of the house.

18. Related features: Some mature trees and shrubs and cistern at rear of property.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Emmanuel Franz House is the only remaining unaltered example of urban Italianate cottage style architecture from the 1870's in the City of Ventura. The house is a remnant of the many fine residences that once stood in the original downtown section of Ventura and a product of the first building boom of the 1870's. It is also significant for its historic association with the early settlement of Ventura--built for Austrian immigrant Emmanuel Franz, early settler and merchant, who operated one of the first mercantile businesses on Main Street, one-half block from his house.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Although constructed in 1924, the entire facade was modernized to a Moderne style about 1948. This combination of angles and curves has remained virtually the same to the present. It is an unusual late example of the Streamlined Moderne style for Ventura. The 1947 remodeling of this facade was done for Leon Walker by Alfred Schocken, architect.

DESCRIPTION

- 7a. Architectural style: Streamlined Moderne
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This reinforced concrete flat roofed building is rectangular in shape and one story in height. The facade, although altered in the 1950's, maintains its Streamlined Moderne characteristics, which includes a curved sign which is the main decorative element. This sign extends from the facade in a curve fashion and rises about four or five feet above store height with three square holes at the top. The neon "Great Eastern" sign is attached within the curve. In the 1950's, new windows and small tiles were added.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building was designed by local architect Harold Burket in 1940 on the site of the Ventura County Star Building. It was built for the Great Eastern Department store, one of the earliest department stores in Ventura originally dating from the 1870's on Main Street. It was called then Einstein and Berheim and changed in the 1880's under the new partnership of Roos and Hartsfield to the Great Eastern. The name honored a famous steamship which laid the first transatlantic cable in 1866.

6. Present Use: Thrift Store Original use: Grocery Store

DESCRIPTION

- 7a. Architectural style: Streamlined Moderne
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This flat roofed single-story rectangular shaped building has a stucco exterior and tile bulkhead. The Moderne design is seen in the simple facade of the building with the emphasis on raised vertical lines in the corners resembling pilasters which have a series of setbacks near the top. One setback is fluted in a band across the top emphasizing the horizontal. The old raised Safeway sign has been covered with an aluminum "Goodwill Industries Store" sign. In 1947, plate glass was added across the front plus a tile bulkhead at the base of the building.

8. Construction date: 1939
Estimated X Factual _____
9. Architect H. L. Stennett
10. Builder H. L. Stennett
11. Approx. property size (in feet)
Frontage 100' Depth 200'
or approx. acreage _____
12. Date(s) of enclosed photograph(s)
9/82

13. Condition: Excellent ___ Good X Fair ___ Deteriorated ___ No longer in existence ___
14. Alterations: 1947 - install plate glass storefront and tile bulkhead.
15. Surroundings: (Check more than one if necessary) Open land ___ Scattered buildings ___ Densely built-up X

16. Threats to site: None known X Private development ___ Zoning ___ Vandalism ___
Public Works project ___ Other: _____
17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building, originally constructed as the Safeway Store in 1939 by local contractor Harry L. Stennett, is a good relatively unaltered example of the Streamlined Moderne style in Ventura. In 1947, Contractor Robert D. Patterson of Santa Barbara added the plate glass and tile bulkhead. The store was built for W. M. Jones.

The structural engineer was Francis N. Dlouhy.
The tile trim was from Gladding McBean.

DESCRIPTION

- 7a. Architectural style: Early 1900's Commercial Brick
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This false front brick structure features a stepped parapet and large radiating brick arched front door and windows. The large square window south of the entrance was a later modification. The structure was added to sometime after 1921. The section in the rear was added, as well as the equipment yard and buildings.

Today the property includes the Livery building and the Old County Garage Equipment Yard and buildings which have new false fronts attached, done in a western and Victorian theme design.

8. Construction date: 1906-07

Public Works project ___ Other: _____
17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: Courtyard and theme village

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

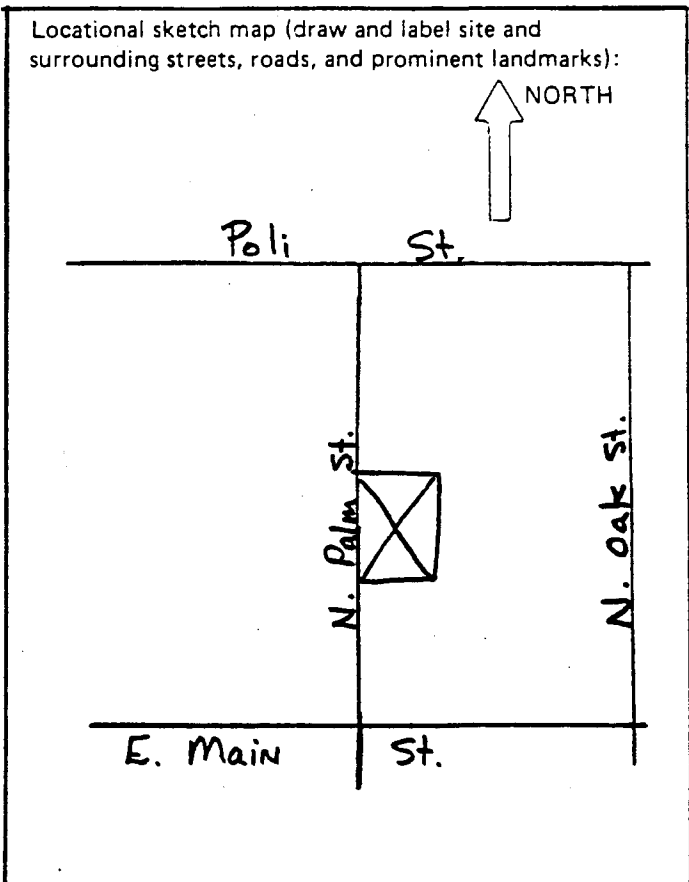

The brick structure was built between 1906-07 as a Carriage house for the Phoenix Stables by Wm. McGuire, Sr. The livery was located where the courtyard buildings are now. It is significant as the only relatively unaltered carriage house in the downtown.

In 1921, the County of Ventura purchased the building and turned it into the County Garage. They later added the equipment yard and maintenance buildings.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large 1-1/2 story bungalow has a sidefacing gable roof with a gabled dormer window/balcony that punctuates the center of the roof. A porch extends the width of the house supported by large square stuccoed columns and a porch railing with repeated wood sunburst designs. The house is on a hillside lot with a raised basement on the south side. Bungalow characteristics include carved knee brackets under wide eaves, exposed rafters and combination shingle and clapboard siding.

8. Construction date: 1911

18. Related features: Stucco wall and mature pine

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1911 for Katherine Hartman, widow of Fridolin Hartman, on the same foundation as the Ventura Brewery. Mr. Hartman came to Ventura in 1873 from Germany and purchased the west side of Palm Street between Poli and Main Streets on which he built a house, a brewery and the Anacapa Hotel in 1888. This land has been owned by the Hartman family since the 1870's. Only the house remains today and it is being leased by the heirs.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This irregular shaped, single-story structure features an offset gable wing on the north and intersecting gable on the south. A prominent diamond shaped window under the south gable is balanced with a square vent in the north gable. A porch extends from the wing across the width of the house and has a shed roof supported by simple Doric columns with clapboard railing. The house has a basement which is covered with vertical boards and the remainder of wide shiplap siding. Under the eaves are simple boxed eaves and plain cornice.

17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Minimum landscaping with cement wall and iron railing going up the hill adjacent to sidewalk.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1884 for Pioneer Ventura Lumber Man Charles O. Bonestel, who came to Ventura with his family in 1882. Mr. Bonestel became partners with Chaffee and Gilbert and ran a general lumber and merchandise company. He also served as Deputy County Sheriff and member of the Board of City Trustees.

The house is significant for it has maintained its integrity over the years and is the only remaining example from the 1880's on the 100 block of North Palm Street.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This modest early California Bungalow is single story and rectangular in shape with a medium pitched front facing gable roof. Under the main gable is a decorative fascia board and curved bracket and modified Palladian vent. The plain frieze over the enclosed front porch is slightly curved in upper portion with a small dentil design. A small shed roof has been added over the front door and an entrance added to south side. The house is covered with medium clapboard siding.

18. Related features: Minimum landscaping, raised concrete wall in front.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is significant as one of the few remaining bungalows in the original old town tract. Other houses on the block date from the 1870's. This house was built in 1912 for Benjamin D. Moraga, a farmer. Mr. Moraga was representative of many of the Early Spanish families and other early residents in Ventura, many from Italy, France and Germany.

DESCRIPTION

- 7a. Architectural style: Italianate
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Underneath the medium-pitched hipped roof of this single-story residence are decorative carved brackets in pairs with long rectangular shaped raised wood panels in between. Additional Italianate details include window shelf moulding and narrow arched panels in the front door which were probably glass at one time. On a raised foundation, the house is covered with wide shiplap siding and has a vertical board skirt. The hipped roof porch, across the front of the house, has been partially enclosed by multi-paned windows.

18. Related features: low cement curb across front of house.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1884 for J. V. Sanchez, a barber, who in this same year owned 40 acres. In 1898, Mr. Sanchez's barbershop was located in the Hotel Anacapa on Main and Palm. The Sanchez residence represents one of a handful of residences that remain in the original town tract in the Italianate style built in the 1880's. It is also the only survivor from this era owned by a Spanish family who at one time occupied many of the residences in this area.

18. Related features: Well-kept small yard.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built on property owned by Saxby, Walton and Preble, who operated a lumber yard in the 1870's on the south side of the block on Thompson Blvd. between Palm and Oak Streets. The house is believed to have been built in 1879 on a portion of that lot and occupied by W. J. Walton and his family. Miss G. Walton, a daughter and music teacher, lived in the house in 1898-99.

The house is a rare two-story simple Italianate structure and the only two-story remaining in the downtown. It is also one of only three residences remaining in the City built in the 1870's.

18. Related features: Two large palm trees, hedges and shrubs.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Originally built as the Dos Palmas Hotel in 1927, this Mediterranean style apartment building has since been converted into apartments.

The building, although somewhat deteriorated, has maintained its basic integrity and typifies a Southern California hotel-apartment building of the 1920's with its use of arched openings, stucco siding and red tile roof, and open courtyard effect complete with mature palm trees.

DESCRIPTION

- 7a. Architectural style: Spanish Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This Spanish style stucco residence is on three levels and terraced into its hillside location. The street level holds the two-car garage with wooden doors and curved parapets and the arched entry wall with curved cement steps leading to the second level and main entrance. The entry is slightly recessed with arched door and wrought iron railing and lamps. The third level is set back with a balcony and the curved parapet walls are repeated. A curved wrought iron railing is located above the entry. The roof is flat with a parapet and offset gable tile roof on the west.

18. Related features: Two-car garage built into hillside

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
 The house was constructed in 1927 for Albert M. Kemper, who had worked as a shoemaker for Hirschfeld Shoe Co. on Main Street.

Architecturally the house is one of the finest examples of the Spanish Colonial Revival Style in downtown Ventura and is especially well suited to its hillside location, taking advantage of the City and ocean views.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian with Eastlake Influences
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Located on a hillside lot above the City, this two-story residence has a medium pitched intersecting gable roof. The facade is an L-shape with a two-story porch. A shed roof extends over the upper balcony and is supported by turned columns and curved brackets. A stairway, covered with woven lattice and single wood railing, leads to the second story. A two-story slanted bay was added and covered with shingle. The windows were altered in front and are multi-paned. Under the gables is a cutout and curved bargeboard with dropped pendant and shingle. An open porch was added to the front with wood balustrade and woven lattice skirt.

18. Related features: Stucco retaining wall, mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is significant historically for its association with Ventura's major house mover, Robert E. Brakey, who had it built in 1890. Mr. Brakey owned a large portion of the hillside which extended from Oak Street to the County Jail. Brakey Road, next to the County Jail, has been named for him. In 1916-17, he was a City Trustee. His family continued to live on this property through the 1930's.

The house has recently been restored and some bays have been added to the front.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
This statue was commissioned as part of the Federal Art Project of the Works Progress Administration in 1936 by the City of Ventura. John Palo-Kangas, a Finnish sculptor, received his major commissions primarily as WPA projects in the 1930's. Living in Los Angeles, his first important commission was that of a CCC worker for Griffith Park. It was dedicated by Franklin D. Roosevelt in the 1930's. Mr. Kangas moved his family and studio to Meiners Oaks in 1942. He died in 1958.

Mr. Kangas studied photographs of Father Serra and constructed a clay mold from which to cast the concrete statue.

City Ventura Zip 93009 Ownership is: Public Private _____
 - Present Use: vacant Original use: County offices & Sheriff's Department

DESCRIPTION

- Architectural style: Neo-Classical
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This rectangular two-story structure is almost an exact replica of the main Courthouse building although it was built approximately 18 years later. Some of the features are modified such as the recessed hooded entrance which is smaller in scale and flanked by fluted pilasters. The annex is attached to the main building by a second story enclosed walkway. Underneath is an arched drive-through providing access to the buildings in the rear. The building is constructed of terra cotta and concrete, the flat roof is of copper and the front door of bronze.

17. Is the structure: On its original site? X Moved? _____ Unknown? _____
18. Related features: None

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The building is significant as part of the Original Courthouse complex. It served as the jail and Sheriff's Office for approximately 50 years.

Harold Burkett, local architect of the project, designed many County buildings, among them the Presbyterian Church on Lincoln & Poli.
This structure is a compliment to the Courthouse Building next door having been designed as closely as possible to the original style of the Courthouse.

ATTACHMENT 1

14. Two sections were added to the original portion of the Court House. The first addition in 1940-41 and the second in 1952-53. The two added areas were designed and constructed as a box system, which is a structural system without a complete vertical load-carrying space frame, but wherein lateral forces are resisted by shear walls as in a box. These two additions are not visible from the front or sides but square off the rear portion of the building by filling in between the two L-shaped wings. (See attached sketch.)

19. The Ventura County Court House was designed in 1910 by one of the early pioneers of architecture in Southern California, Albert C. Martin, Sr. The structure was dedicated in July, 1913, and is an outstanding example of neo-classic architecture, a style prevalent in the United States at the turn of the century. The Court House is an extremely well proportioned building and is rich in detail and materials not likely to be found elsewhere in the Southern California area. The building's strong, horizontal proportions achieve a fine relationship to its hillside site and surrounding mountainous terrain. The site is both prominent and accessible. The neo-classic architectural design of this structure is an outstanding example of the type of architecture which was prevalent in the United States at the turn of the century. It is the most significant of its type in Southern California in terms of its hillside site and the detail and materials of its construction. The structure is visible for several miles along the major Pacific Coast Highway linking Northern and Southern California. Los Angeles Architect Albert C. Martin has stated that "it is one of three buildings in which I take particular pride." One of the others cited was Los Angeles Union Station.

Special interior features include stained glass domes, marble entrance lobby and sweeping staircase and mahogeny and walnut paneling. The stained glass domes in the Council Chamber, a gift from Architect Martin, depict law and justice to compliment the original purpose of the former courtroom.

DESCRIPTION

- 7a. Architectural style: Neo - Classic Style with Roman Doric Influences
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition: This impressive two-story structure (plus basement and attic) consists of two L Sections with a center dome. The building is 280' in length and 95' deep with the peak of the copper hipped roof dome and cupola reaching 75'. The 80' central portion, at the head of California Street, features four massive fluted Doric columns separated by three two-part arched windows. The east and west wings have keystone arches over the windows on the first floor and a straight lintel with ornamental keystone on the second. The recessed front entrance is capped by a richly ornamental pediment and underneath, a highly decorated bronze gate. The building is clad in terra cotta with a unique feature being the friar's heads above the arched 1st floor windows showing the Mission influence in the County.

In 1973, the City of Ventura purchased the building from the County and restored it to its original condition and bringing it up to earthquake standards.

DESCRIPTION

7a. Architectural style: Queen Anne

7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition: This two and a half story impressive hillside residence, adjacent to the former Courthouse, has a combination of intersecting hipped roofs and features a curved two story bay on the west side. A sweeping curved porch with ionic columns on the east side supports a curved balcony whose outside entrance is covered by a columned portico. Decorative detail is found in the dentils under the eaves, leaded glass windows and curved glass in the bay. The porch wall is of native stone and the foundations, stair railing and raised street wall are all of Sespe sandstone. The first story is done in medium shiplap siding and the second story is of shingles with a diamond pattern in the bay and curved shingles in the gablet. The front door is arched with two sidelights.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Felix W. Ewing was a prominent and influential citizen in Ventura serving as District Attorney from 1899 to 1902 and Superior Court Judge from 1903 to 1907. Arriving in Ventura in 1892, he went into law partnership with Nehemiah Blackstock. Ewing was Chairman of the Ventura Democratic Central Committee and after his term as judge, stepped down to become a bank president. The house has maintained its character having been restored by Attorney Edward Lascher in the early 1970's. Special features of the house include five fireplaces with mantelpieces of different designs, inlaid parquet floors and carved golden oak staircase and balustrades.

DESCRIPTION

- 7a. Architectural style: Queen Anne with Colonial Revival elements
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Located on a hillside lot, this 1-1/2 story Queen Anne house features a wrap-around porch and elaborate pediment supported by Corinthian columns. The house has an irregular gabled roof line with two tall decorative brick chimneys and rests on a raised foundation. Special features include both slanted and round bay windows, some with diamond patterns, brackets under the extended eaves and shingles under the gable. Covered with narrow clapboard siding, a vertical board skirt wraps around the base of the house.

DESCRIPTION

- 7a. Architectural style: Mediterranean
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story, rectangular shaped stucco apartment building has a flat roof with shed tile parapet intersected by three peaked gable dormers that extend as windows and a recessed balcony on the second floor. The windows are multi-paned French style casement windows, and on the second story they have flat hoods and sills that extend with brackets underneath. The main entrance, which is recessed, is symmetrically placed as are all the facade openings. The entrance is arched with a Doric column on each side. The column is repeated as a pilaster on the balcony directly above. Quoins are located on corners of building.

17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Minimum landscaping.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This apartment building was constructed in 1928 as the Noble Hill Apartments for Noble Hill, owner. Recently restored by the current owner, the apartments are in excellent condition and are an excellent example of the Mediterranean style. The apartment is a complement to the recently restored National Register Landmark across the street, The Bard Hospital. Several of the first residents worked at the hospital.

DESCRIPTION

- 7a. Architectural style: Spanish Colonial Revival with Monterey Revival Influence
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large two-story stucco residence has a low pitched sidefacing hip roof of red clay tile which extends on the west side to cover a front balcony. The balcony, reminsent of Monterey Revival, features three large square columns with carved brackets and balustrade all done in dark stained wood. A single story wing extends from the east side next to the arched entry. Located on a hillside lot, a two-foot stone retaining wall surrounds the sidewalk area. A series of concrete steps and high stucco wall lead up to the front entry.

DESCRIPTION

- 7a. Architectural style: Two-Story Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story shingle style house features a prominent second story recessed balcony, capped with a medium pitched gable roof which extends from the center of the sidefacing gable roof. Decorative features include the carved knee brackets and notched rafters which appear under the broad eaves. A shed roof under the balcony extends over the front entrance and is supported by two large square columns. The front porch is open and extends around the east side of the house. Windows are placed in groups of twos and threes with multi-square panes in the upper portion. The front door is flanked by multi-paned sidelights. The house is on a raised foundation on a hillside lot.

DESCRIPTION

- 7a. Architectural style: Stick
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story, irregular shaped house with its intersecting high-pitched gable roofs rests on a raised foundation with concrete block facing. Underneath the gables are unusual details of applied stickwork in waffle and triangle designs. Narrow vertical boards are nailed under the eaves creating an interesting effect with the horizontal wide shiplap siding. The front porch and balcony above also boast a profusion of wood detail seen in the ballusters and frieze. Other details include decorative pediments over the windows and stained glass (flushed glass) over the door and around the windows.

DESCRIPTION

- 7a. Architectural style: California bungalow with Craftsman features
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The side facing gable of this 1 1/2 story bungalow features a broad shed roof dormer with multi-paned windows, knee brackets and exposed rafters under the eaves. These same features are repeated under the main roof line. The upper portion is of medium clapboard. Craftsman features are seen in the use of brick for the chimney and retaining wall with the use of irregular fired bricks as decorative relief in two bands across the upper portion and a cutout wooden railing across the top of the wall.

18. Related features: High brick retaining wall with wooden railing on top

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was constructed in 1910 for Minnie P. Gales. It is a good unaltered example of the California bungalow with special attention given to the brick and wood retaining wall.

The house is significant as a group of houses built between 1889 and 1930 in a hillside setting which have retained their character and integrity over the years.

Oliver Gales designed this house for his family in 1909.

DESCRIPTION

- 7a. Architectural style: Mediterranean Style
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This two-story, stucco apartment has a flat roof with a shed tile parapet with decorative brackets underneath. The building is divided symmetrically with a flat roofed portico with Doric columns and carved wood balustrade above. A wide flight of concrete steps leads to the entrance which leads to an inner courtyard. Wrought iron decorative railings are located on some openings. On both sides are exterior stucco chimneys with brick trim. Ornamental cast stone relief is found above facade windows.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This California bungalow house with its low pitched roof deviates from the traditional box-like shape of bungalows. The L-shaped plan has a front courtyard which has been enclosed by the later addition of a small studio. The courtyard is enclosed by a wooden fence and gate which support open beams that run from the house to the fence in a criss-cross pattern.

The exterior finish of the house is of horizontal wide clapboard siding which is repeated in the courtyard fence. Windows and doors have french panes.

Landscaping compliments the house and blends in well with the flagstone steps and patio. A small studio apartment has been added to the rear of the property.

18. Related features: Many plantings around house

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
Historically the house is important for it was built for Robert M. Sherdian, son of early pioneer E.M. Sheridan, who was editor of the Ventura Signal. Robert was a leading county attorney and was in partnership with Earl Stanley Gardner.

The house itself became important when it was transformed inside by Sheridan's second wife, Ellen. The Sheridans traveled extensively and their home became a museum for their folk art collections. Ellen was known both nationally and internationally as an editor, designer, and writer. The Ventura County Library has 30 volumes which were donated on the death of Mrs. Sheridan and contain photographs and articles written by her and about her. Her list of accomplishments include Associate Editor of Sunset Magazine, 1941; West Coast Editorial Consultant for House and Garden Magazines; free lance writer for many magazines; organized museum shows in Southern California.

Architecturally, the building is significant for it is one of the few houses in Ventura from the Craftsman Period that was built for its site. The house is reportedly one of the first homes in Ventura to be designed by an architect.

Public Works project Other: _____
17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Low concrete wall across front and small single-story residence in rear.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1914, this house was probably constructed by the owner, Wm. Burchett, a carpenter. The lot had been owned in 1912 by Floyd Shaw, so it is possible that one of the Shaw builders was responsible for the construction.

The house is a virtually unaltered example of the California Bungalow and is a complement to the house on the east at 1093, built approximately the same time and in the same style.

- Present Use: Single family residence Original use: same

DESCRIPTION

- Architectural style: Two-story Shingle Style Craftsman House
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Built on a hillside lot, this irregular shaped two-story house rests on a raised basement. A combination of low and medium pitched intersecting gable roofs show exposed rafters and beams underneath the overhanging eaves. The raised porch has a red brick and mission tile bannister and wooden stairway. The windows are double hung and in sets of three or four. The wood shingles found on the first and second floors have been painted a cream color. The ground floor is covered with clapboard siding layered in sets of three.

An early addition included porch enclosure, second story room extended over the porch and two-story additions in the rear.

- Construction date: 1912-13
Estimated Factual
- Architect unknown
- Builder Possibly one of the Shaws - Bert Shaw did additions to houses.
- Approx. property size (in feet)

16. Threats to site: None known Private development _____ Zoning _____ Vandalism _____ Public Works project _____ Other: _____
17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Two garages - first was originally a wood shed and second was built later. A rainwater tank once stood where cement slabs are now located in backyard. Stone wall in rear.
- SIGNIFICANCE**
19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Historically the house is significant for its ties to important pioneer Ventura families. Frederick Neill Baker was the son of Ventura pioneer F.W. Baker, a Bostonian who owned and operated one of the first hardware stores in Ventura.

F. Neill Baker married into another important pioneer family--Ida Foster, daughter of E.P. Foster, "Father of Ventura County." F. Neill Baker attended U.C. Berkeley and became a mining engineer in Arizona. He later returned to California and had the house on Poli Street built for his family, one son Robert and a daughter. Mr. Baker also worked for the County Surveyor's office and as an assistant cashier for the Bank of Italy. The house remained in the Baker Family until just recently when it was sold to the present owner.

Architecturally, the house is significant as one of the few two-story Shingle Style houses in Ventura. The fireplace and porch tiles are said to have come from the Ventura Mission. The interior has many special features such as leaded glass book cases and buffet, built-in cupboards, drawers and window seat, many original lighting fixtures and hammered brass doorplate.

DESCRIPTION

- 7a. Architectural style: Various Styles
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The majority of houses built on the north side of Poli Street in the 1100 block were constructed between 1890 and 1928 and represent architectural styles from this period, including Queen Anne, Colonial Revival, California Bungalow and Mediterranean.

The houses are primarily single or 1-1/2 stories in height and maintain fairly even setbacks with lots about 50 feet wide and 108 feet deep. The parking strip is narrow and treeless and there are very few mature trees planted in the yards--mostly small front yards with shrubs.

8. Construction date: 1890-1928

17. Is the structure: On its original site? Moved? _____ Unknown? _____
18. Related features: Detached garages.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The entire block was purchased by Selwyn Shaw and his family in the 1890's. Mr. Shaw was a prolific carpenter-builder in Ventura. His father, Jesse Allen Shaw, came to Ventura in the late 1860's and built houses between that time and 1880. Selwyn's son, Jesse Bert Shaw, also became a builder. Selwyn and his son constructed most of the houses on the block and Selwyn did the design work as well. Selwyn's house faced Ann Street. He was active in the community as a member of the School Board and as City Trustee.

The residences on this block, primarily unaltered, are a testament to the building career of the Shaw family. Other significant buildings constructed by the Shaws include the Southern Methodist Church at Main and Kalorama Streets and the Bard Hospital on Poli Street.

1100 BLOCK OF POLI STREET

1109 Poli Street

72-124-09

The slightly flared eaves and base of the house are unusual features of this 1-1/2 story medium-hipped roof structure. The hipped dormer window is symmetrically placed over the front porch, which is recessed with square columns and an arched entry with exposed beams. The front windows are leaded in a diamond shaped pattern in the upper portion. The house rests on a stone foundation, which is covered with a board and batten skirt, and is covered with shingles.

The house is part of the Shaw block of houses designed and built by the Shaw Family about 1905. Selwyn Shaw owned the house and rented it. The first occupancy is believed to have been Richard Haydock, Principal of the Grammar School. Many renters have lived in the house over the years, including the widow of W. A. Hobson.

1129 Poli Street

72-124-08

Built in 1920, this single-story California Bungalow has a medium-pitched sidefacing gable roof with a shed roof extending over the front porch. Wood columns with concrete bases form the porch supports. The west side of the porch has been partially enclosed. Exposed rafters and beams are found under the wide eaves. The house is on a raised foundation and covered with medium clapboard siding.

The house, built by the Shaw Family, was owned by George W. Ormsby, a gardener, in 1922.

1141 Poli Street

72-124-07

This 1-1/2 story residence has a medium high pitched cross gable roof with plain boxed cornice. The main feature of the house is the modified Palladian window on the front of the house. A flight of wood steps leads to the recessed front porch. Additional detailing is found in the simple porch column and the scrolled design over the second floor window. The house is covered with narrow clapboard siding and on a raised foundation. A flat roofed addition on the west side in 1929 has used the same materials.

This house was built by Jesse Bert Shaw, son of Selwyn Shaw, in 1896. He lived in the house with his family and worked as a carpenter-builder with his father and was foreman of the Ventura Mill and Lumber Company.

1100 BLOCK OF POLI STREET - Cont.

1157 Poli Street

72-124-06

Built in 1890-91 by Selwyn Shaw as a rental, this Queen Anne style residence features a prominent two-story slanted bay tower which extends from the sidefacing high-pitched gable roof. The tower roof is octagon shaped with a rooster finial at the peak. Decorative details include fishscale shingles, stained glass, dentils and elaborate flower and tendril applied design in small porch gable. The house is on a raised foundation and covered with wide shiplap siding. In the 1920's, William Suytar, Deputy Sheriff, lived in the house.

1169 Poli Street

72-124-11

The high-pitched sidefacing gable roof is intersected by a main front gable that forms an L-shape. Tucked into the L-shape is the raised front porch which is covered with a shed roof and enclosed. A sunburst design is found under the shed roof and over the entrance. Underneath the decorative bargeboard of the front gable is a half circular window. The house has two corbeled brick chimneys and is covered by wide shiplap siding.

The house was built by the Shaw Family in 1895 for Floyd Shaw, brother of Selwyn Shaw, who operated the Acme Soda Works to the east of this property.

1183 and 1193 Poli Street

72-124-10 and 11

These two virtually identical houses were constructed in the 1920's on the site of the Acme Soda Works. Both Mediterranean style stucco buildings have flat roofs with tile shed roof over main entrance. The house at 1193 has shed tile roofs over the front windows and a recessed front porch with exposed beams and French doors.

1141 Poli Street

1157 Poli Street

1109 Poli Street

1129 Poli Street

1169 Poli Street

1183 Poli Street

1193 Poli Street

DESCRIPTION

- 7a. Architectural style: English Tudor - Period Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This one-and-a-half story residence has an unusually steep pitched offset hipped roof with small intersecting peaked gable over the front balcony. The sloping shingled roof extends over the front entrance. Tudor characteristics are seen particularly in the herring bone brick pattern around the front door and the use of dark stained wood to separate the brick. The chimney and low wall in front of the house are also of brick. A narrow shed dormer covered with shingles is located on the north side and above the front door are medium wood horizontal strips cut in a wavy design.

18. Related features: Two-car garage, low terraced brick wall.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built for David J. Reese in 1927-28. Mr. Reese was Secretary of the Free Press, Postmaster and Secretary-Manager of Ventura Guarantee Building and Loan. Before moving to this location, Mr. Reese resided at 637 Poli Street.

This house takes advantage of its corner location on Poli and Ann Streets by creating interesting facades on both streets. It is an excellent example of the Period Revival style of the 1920's and has been very well maintained.

18. Related features: Large double lot, mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Henry C. Wilbur, a nurseryman, and his family lived in this area in 1898-99. The assessor's rolls indicate the house was built in 1904-05.

Although the house has several additions, it has maintained its basic integrity and is representative of an early turn-of-the-century farmhouse on what was once the outskirts of the City.

DESCRIPTION

- 7a. Architectural style:
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story rectangular commercial building rests on a raised concrete basement. The flat roof is faced with stepped parapets and the building is covered with blond brick and stucco. The large flat stucco surfaces are broken by occasional multi-paned wood frame windows. A narrow string course of stucco also breaks up the rather flat surface and this band is repeated at the cornice of the building.

18. Related features: Railroad tracks run in front of building

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building stood near the site of an earlier Hobson Brothers Packing Co. started by W. D. Hobson in the 1870's. Son Abram Lincoln Hobson bought the business in 1881 and William Arthur Hobson joined the business in 1883. The slaughter house made sausages and cut meat for delivery to most parts of the County.

In 1923, Fred Smith, a son-in-law, had this new building constructed. The office was added in 1927.

The building is significant as an example of an important early industry in Ventura and is connected with a respected pioneer family. W.D. Hobson is known as the "Father of Ventura County."

DESCRIPTION

- Architectural style:
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This four story brick building is Mediterrean in style. The north and east sides have Spanish tile shed roofs bordering a flat roof, and stucco facades with closed eaves, a thin, simple frieze, large arched second floor windows, and a monolithic first floor with storefronts. The main lodge entrance is set in a large pointed arch with elaborate woodwork around the glass doors. The second and third floor east windows and one third floor north window have wrought iron balconies. The concrete foundation sits on wood piers.

The first floor has been extensively remodeled, with a bank and offices replacing the shops and large windows replacing the storefronts.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

One of the tallest building in Ventura, built in 1929, with significant character particularly inside: arched windows; high ceilings with hand painted beams; curved wooden staircase; extensive use of well maintained wood throughout, particularly around windows, bookcases, and doors.

The Ventura Masons are one of Ventura's oldest fraternal orders, forming in 1871. Ventura Lodge 214 was started by E. P. Foster, who formed a small stock corporation to begin building and sold shares to the members. The building was dedicated January 3, 1930.

- Present Owner: U. S. Government Address: same
City _____ Zip _____ Ownership is: Public Private _____
- Present Use: Post Office Original use: Post Office

DESCRIPTION

- Architectural style: 1930's modern; with 1960's facade change.
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This basically one-story rectangular shaped stucco structure with a U-shaped facade has a basement and a few upstairs offices. The simple 1930's building took on a 1960's facade. The windows and doors are symmetrically placed and the shingle hipped roof is low pitched.

The mural covers the upper portions of the four interior walls of the lobby. Wooden beams and ceiling still exist.

In 1966, the Post Office was enlarged primarily doubling in size in the rear and dock space and basement were added. The facade was altered with the addition of an open raised entry with overhang supported by square posts. Windows and door were enlarged. Metal louvers were added to old windows.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Of historical importance are the murals which were painted on canvas by Santa Barbara artist Gordon Grant as part of the Federal Arts Project of the W.P.A. between 1936 and 1937. The mural represents the "Regionalist" style and depicts Ventura County's major industries, resources and commerce.

When the post office was remodeled in 1965, the mural was slightly damaged. It was restored by Franz Trevors in 1966.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is the most representative and possibly finest example of a Craftsman bungalow in downtown Ventura. It was built for Wallace R. Gibson, an undertaker, in 1914. George Harkey purchased it ca 1916-17 and lived there with his family through the 1930's. Mr. Harkey's occupations were varied and included rancher, Mound Threshing Co., (1916-17) President of Ventura Abstract Co. (1921-22); Real estate salesman (1930). Ramona Hammons was listed as a resident as well for some forty years.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is significant as one of a group of Colonial Revival houses built between 1903-05 on the block. This house and the one at 848 East Santa Clara were built for Juan Camarillo, who had previously had an earlier house on the property. Several families lived in the house after Mr. Camarillo sold it in 1905-06 to A. C. Mahoney.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1903 for Jacques Roos, President of the Great Eastern Co. Mr. Roos lived at 82 South Ash and this was an additional residence on his property.

This modest Colonial Revival residence has maintained its integrity over the years and blends well with its neighbors which were built between 1897 and 1910.

DESCRIPTION

- 7a. Architectural style: Queen Anne Cottage
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This 1 1/2 story truncated hipped roof residence features prominent front and side bays with cut out floral corner brackets over the slanted bay windows and fish scale shingles under the gables. The front porch has been enclosed on the east with one turned column and dentil frieze remaining. The house is sheathed in wide shiplap siding and rests on a raised basement which is covered with wide vertical boards with decorative cutout vents. Additional details include an elaborately corbelled brick chimney and a stone retaining wall across the front of the property.

DESCRIPTION

- Architectural style: Spanish Colonial Revival
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

An arched arcade with shed tile roof extends across the facade of this Spanish Colonial Revival building. The front portion of the building is two stories with a medium pitched side facing gable roof of red clay tiles. An intersecting gable roof at the rear covers the long rectangular portion of the sanctuary. Recessed arched windows are found on the sides of the building, and at the rear of the Church, a two-story house has been attached, its roof made flat and stuccoed to blend with the rear of the building.

A projecting hipped roof square tower is found on the east side and attached to the side chapel.

18. Related features: Large asphalt parking lot on west and small landscaped front and side area on east.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This church is a well-maintained unaltered example of the Spanish Colonial Revival Style. It was constructed in 1938 as the Foursquare Gospel Church by W. F. Semro and architect Clyde Devel of Sherman Oaks.

Its prominent location on a corner lot makes it of visual importance to the neighborhood largely composed of residences. Of special interest is the old house attached to the rear. It was originally built for Jacob Argabrite between 1892-1906 and was moved to the rear of the lot when the church was built.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Jules Feraud, a successful Ventura merchant, had this house built for him near the end of 1906. Mr. Feraud came to Ventura in the 1870's from Marseilles, France and opened a bakery on the corner of Main Street and Ventura Avenue. In 1903, he built a new general merchandise store and bakery on the same location which is a City Landmark. The house is an excellent example of the Colonial Revival style which has maintained its integrity over the years.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story bungalow has a basement in the rear where the land slopes down. The low pitched hipped gable roof has exposed rafters under the broad eaves. Two large square stuccoed columns support the hipped gable roof and cross beam. A half brick design is featured on both the columns and fireplace. The house has narrow clapboard on the upper portion and shingles on the lower portion. The wood front door shows the Craftsman influence with its four narrow panes.

DESCRIPTION

- 7a. Architectural style: Colonial Revival with Queen Anne elements
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The prominent feature of this two-story house is the hipped roof square tower with finial and shingled frieze. This is also the major element of the Queen Anne style. The high-pitched bellcast gable roof extends over the front porch which is supported by plain square columns. Additional features include classical details under the boxed eaves and window lintels. The upper portion of the house is covered with shingles and the lower part in clapboard siding.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1923 by Louis Rudolph, a local contractor and sold to J. Hoover, Love, Deputy County Tax Collector. Mr. Rudolph also built and lived in the house at 958 E. Santa Clara (next door). He built the Elk's Hall on Main and Ash Streets as well as many other residences and buildings throughout Ventura. The house is a well designed and proportioned Mediterranean Style building that has maintained its integrity over the years.

DESCRIPTION

- 7a. Architectural style: California Bungalow with Oriental influence
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story bungalow shows an Oriental influence seen in the low overhanging gable roof with turned up ends on exposed rafters and unusual peaked gables. A front porch extends across the front and side of the house and is supported by large stuccoed square columns which contain a T-shaped relief design and an arched niche. The design of the columns is reminiscent of that in the stucco chimney. The house is covered with shingles laid in an interesting pattern.

8. Construction date: 1915

DESCRIPTION

- 7a. Architectural style: Modest Queen Anne Cottage
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This simple 1 1/2 story cottage has a medium pitched gable roof with brick chimney and a flat roof single story addition on the west. The raised recessed front porch is supported by simple square columns and bannisters with modest cutout details. The facade is divided into three parts with wide boards placed vertically under the gable and punctuated with a gable vent window; rows of octagonal shingles above the slanted bay window; and wide shiplap siding with a vertical board skirt.

18. Related features: None apparent

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is important historically for it was built for Dr. Stephen Bowers in 1895. Dr. Bowers came to Ventura in 1885 and was publisher and proprietor of the Free Press. Mr. J. H. Mason, business manager of the Free Press, lived in the house in the late 1890's. Dr. Bowers became well known for his research on the Santa Barbara and Ventura Chumash Indians.

The house is significant as one of four houses on the street that represent a mixture of styles from the 1890's to 1910 and has maintained its character over the years.

City Santa Barbara, CA Zip 93111 Ownership is: Public _____ Private x
6. Present Use: Multi-family Original use: Single family residence

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The interesting front gable roof symmetrically extends from the two-story medium hipped roof structure. On either side of the front gable is a raised entrance with a hipped roof supported by a plain square column. The main focus of the house is on the front gable with its fish scale shingles, slanted bay window with shingled roof and balcony above. The house is covered with medium ship-lap siding, the skirt is of vertical board siding and has a corbelled brick chimney. An early hipped roof single story addition is found on the east side.

8. Construction date: 1898
Estimated x Factual _____
9. Architect none
10. Builder unknown
11. Approx. property size (in feet)

DESCRIPTION

- 7a. Architectural style: California Bunaglow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This irregular shaped single-story bungalow has a main low-pitched gable roof with offset front and side gables with exposed beams and rafters under the wide eaves. The front porch gable is supported by wood columns and projecting stickwork under the gable. The chimney has been stuccoed with a decorative brick design in a T-shape. The house is on a raised yard with concrete steps and curved walk to the porch. The concrete porch railing repeats the brick trim in the chimney. The house is covered with medium clapboards.

DESCRIPTION

- 7a. Architectural style:
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This U-shaped stucco building consists of two large north facing halls linked by a 2 1/2 story east-west row of offices and classrooms. On the north side, the classrooms have first floor windows set in arched depressions, a wrought iron balcony, and a hip roof of spanish tile bordering the flat composition roof. The two halls have Spanish tile gable roofs, arched windows, and doors set in ornate arches, the larger east hall having an elaborate art stone arch with thin columns with Corinthian capitals supporting sculpted concentric arches around a rose window. There is another rose window at the far end, plus a circular window over the east doors. The bell tower beside the east hall has quatrefoil windows on each side below an elaborate octagonal art stone cuppola.

The interior of the east hall has been remodeled.

17. Is the structure: On its original site? Moved? Unknown?
18. Related features: N/A

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

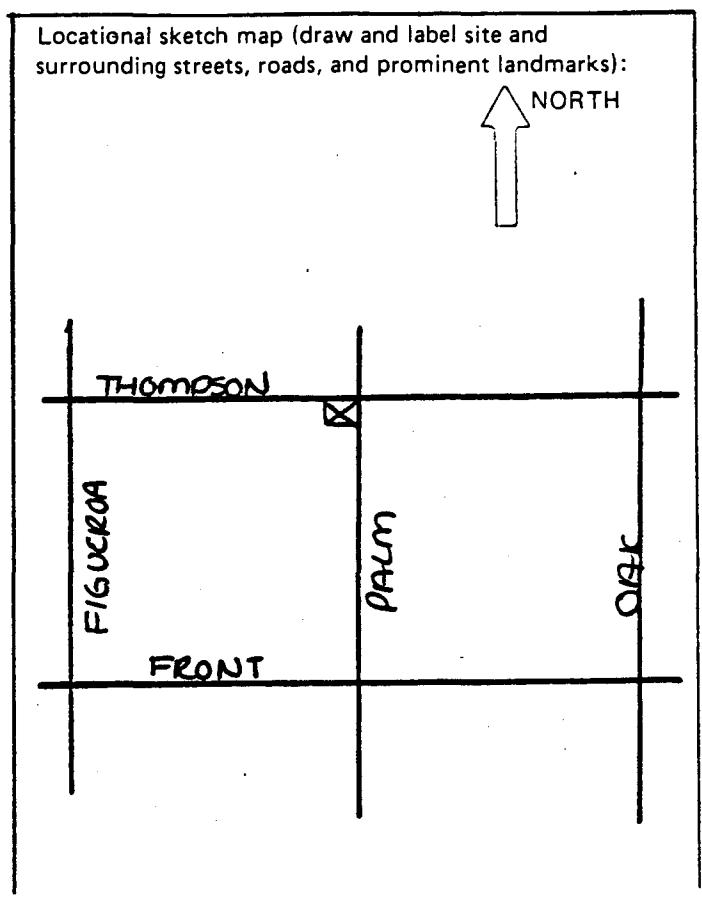

Historical references indicate that the Chapel was first built in 1782, thus making the Chapel the oldest structure built for Spanish colonists in Ventura County. The Chapel was destroyed by earthquake in 1812 but the walls and foundations could still be seen in 1873.

The site was excavated by a group of students from Moorpark College between 1974 and 1980.

DESCRIPTION

- 7a. Architectural style: Gothic
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This rectangular shaped residence has a medium, high pitched sidefacing gable roof with an offset front gable which forms an L-shape in front. The porch extends across the front on the east under the main sidefacing gable which is supported by slender square columns and has wooden steps and railing.

Gothic details are found in the cut-out scrollwork under the front gable, narrow pedimented windows, and board and batten siding.

18. Related features: Wood fence

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1874-75 for Lafette Rawls Herbert, early Ventura merchant. It has had many owners over the years, including Alex Gandolfo from 1881-1886 and Celia A. Poplin from 1916 to 1930. Mr. Gandolfo had a general merchandise store which later became Peirano's Market on the corner of Main and Figueroa Streets.

The house is architecturally important for it is the only residence with Gothic details built in the 1870's. It is also rare since it is one of three residences left that were constructed in the 1870's in Ventura. It has been well-maintained and is virtually unaltered.

DESCRIPTION

- 7a. Architectural style: California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single story bungalow has a low-pitched gable roof with exposed beams and dormer window. The exterior is of clapboard siding painted green. A porch runs across the front of the house with the west side enclosed. The foundation is of brick. The wooden front door is typical of many Craftsman doors. Other craftsman features are found in the interior with many built-in features such as the heavy use of dark stained wood for room dividers, cupboards, floors, and a stained glass window. Located in a corner on the east side of the house is a square bay window.

A carriage house/barn remains on the property. It is of board and batten construction with a peaked roof and a loft. Many older trees and shrubs

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Orville A. Wadleigh, early Ventura County rancher and City Trustee 1918-19, had this house built in 1910. Dazy and her husband, Ben Fazio, who operated the Fazio-Newby grocery store on Main Street, lived in the house.

The carriage house is significant as one of the few remaining in the old section of town that is relatively unaltered.

DESCRIPTION

- 7a. Architectural style: Mixture of Italianate, Queen Anne, Colonial Revival and Bungalow.
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

The 600 Block of Thompson Blvd. consists mostly of one-story houses built in the Colonial Revival style with elements of Queen Anne and Bungalow. The eight houses were built between 1886 and 1925 and are uniform in size, scale and setback. All of the houses have wood siding except the two brick houses which were built prior to 1900. The houses all face onto Plaza Park, a one-block square park, which is heavily landscaped with mature trees, including a Moreton Bay Fig Tree, which is a City Landmark.

The three-story Shell Oil Building on the northeast corner of Fir and Thompson was built in 1950's and is out of scale for the area. Many commercial structures have been built around the park since the 1920's replacing houses.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Mitchell Block is significant as the only intact and relatively unaltered block of houses remaining in the downtown section of the City in what had once been a large residential area.

The Mitchell Brothers, bricklayers from Ireland, owned the land and constructed two brick houses for their families. Gradually they sold off the lots between 1904 and 1905, and houses were constructed filling out the remainder of the block. The last house at 608 Thompson was built in 1925 and replaced an older structure. The houses at 670 and 692 are the only remaining examples of brick houses constructed prior to 1900 in the City.

Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

THOMPSON BLVD. - 600 BLOCK

608 East Thompson Blvd.

73-134-01

This structure was completely remodeled in 1927 as a Period Revival in the Colonial style. Characteristics of this style include the fanlight over the front door and the windows with their louvered shutters all placed symmetrically.

The original house was smaller and owned in 1883 by Hanna and George Rotsler. It was sold to Thomas Mitchell, who then gave it to his daughter and son-in-law, Mr. and Mrs. Ed McGonigle in 1899 as a wedding gift.

620 East Thompson Blvd.

73-134-01

This 1-1/2 story hipped roof structure, with its projecting dormer and narrow shiplap siding, has a combination of stylistic elements. The Classical Revival can be seen in the porch columns. Elements of the Craftsman Bungalow are seen in the stone porch wall and exposed eaves.

In 1905, William McGuire purchased the lot from Thomas Mitchell and had this house constructed for his new bride.

632 East Thompson Blvd.

73-134-02

Classical Revival elements are seen in the slightly flared hipped roof with projecting dormer capped by a finial. The wood frame house is completely covered with wide clapboard siding which even includes the porch columns. The outstanding feature of the house is its stained glass doors and windows with their Mariposa Lily design.

Built in 1904 for Earl E. Barnes. The contractor was Herbert Sly.

644 East Thompson Blvd.

73-134-03

Stylistically this structure can be called a Queen Anne Cottage, although built at the same time as the houses to either side of it. Queen Anne features include the gabled roof with its decorative shingle pattern and bay window. Classical Revival elements are found in the porch columns. Special features include leaded glass panes in the bay window.

Built in 1904 for Joseph M. Riley, a blacksmith.

658 East Thompson Blvd.

73-134-04

Queen Anne elements are found in the gabled roof with its Classical relief ornamentation. This 1-1/2 story cottage has clapboard siding which covers the porch posts as well. The skirt around the porch is slightly flared at the base.

Built in 1903 for Dr. J. J. Streets, a veterinary surgeon, by local contractor H. A. Giddings.

EAST THOMPSON BLVD. - Cont.

670 East Thompson Blvd.

73-134-05

This two-story brick masonry structure is a combination of Queen Anne and Eastlake with the decorative wood detail under the front gable and the spindle and spool decoration on the porch and balcony. Of unusual interest is the square tower with crenalated parapet, which is reminiscent of medieval Gothic towers.

Built in 1890 by the Mitchell Brothers, who were bricklayers, this residence was given to Mary Mitchell, daughter of Ed L. Mitchell, in 1890.

682 East Thompson Blvd.

73-134-06

This 1-1/2 story structure is a combination of Queen Anne and Classical Revival styles. The decorative gabled roof that extends over the front porch is typical of Queen Anne, whereas Classical elements are found in the curved corner window with its narrow clapboard exterior.

The house was built in 1905 for W. F. Sittel, a buyer for A. L. Chaffee and Co.

692 East Thompson Blvd.

73-134-07

This brick masonry structure is 1-1/2 stories with a gabled roof and decorative brackets under the eaves. Interesting detail is seen in the quoins on the corners of the house and the arched brick detail radiating over the windows with a keystone in the center. The tall narrow windows and brackets under the eaves suggest the Italianate influence.

This house, built in 1886, was the second house built on the block. It was constructed by the Mitchell Brothers for John Mitchell. T. B. Steepleton was the architect.

608 East Thompson Blvd.

DESCRIPTION

- 7a. Architectural style: Programmatic
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

A programmatic structure with ship imagery, the "deck" being the parking lot and sidewalk, the building itself developed as a cabin with bridge. The structure is constructed of vertical tounge-in-grove siding with "fore" cabin windows and "midships" oval portholes placed near roofline. Roof is flat with deep eaves, curved at front. Shallow "bridge" is placed slightly off-center to "aft," with multiple oval windows and running lights, curved mast with cross arm supported by guide wires is located in front of bridge. A chain rail runs along "port" on street corner side.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This building was constructed in 1963 for D. W. Mandell and operated at the Blue Galley Drive-In until its conversion to Kodani's Japanese Restaurant in 1974. The building is a complete programmatic theme structure, with well developed and imaginative ship imagery. It is particularly notable as the only example of programmatic architecture in Ventura.

DESCRIPTION

- 7a. Architectural style: Colonial Revival
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story, rectangular shaped building has a high pitched hip roof with slightly curved edges and an offset hip roof on the north and east sides. The eaves have a boxed cornice and wide plain frieze. The recessed porch has a narrow entablature with 2-1/2 foot paired Ionic columns on top of clapboard railing which support porch arches. All but one pair is boxed with plywood and the porch is enclosed on the east side. The house is covered with wide shiplap siding, except for clapboards on porch, and rests on a raised concrete foundation covered with vertical board skirt.

18. Related features: One-foot concrete wall across north.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1893 for George T. McFadden, occupation unknown.

Although the porch has been altered, the house maintains its general character and, together with the house at 856 East Thompson, is a reminder of the residential turn-of-the-century styles.

DESCRIPTION

- 7a. Architectural style: Queen Queen
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large 2-1/2 story residence has an unusual roofline with a high-pitched main truncated hip and intersecting gablet roofs which extend as slanted bays on the sides and front. The hipped roof front porch is supported by square columns and an elaborate frieze and brackets with spindle and spool detail and dentils. Larger spool and spindle detail are found on the porch balustrade and the front door has elaborate panels in the lower portion with sunburst and button designs. The most distinctive feature is a large Moorish arched window with sunburst designs and stained glass. The house is covered with wide shiplap siding and is on a raised concrete foundation.

18. Related features: Two bungalows in rear; board and batten cabinet shop.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house was built in 1894 for Arthur D. Briggs, who was retired at the time. In 1876, Mr. Briggs lived in Saticoy and was a butcher.

It is an unusually fine and well-maintained example of the Queen Anne style and stands with the house next door at 844 Thompson as an example of the many homes that were located in this neighborhood at the turn-of-the-century.

DESCRIPTION

- 7a. Architectural style: Mediterranean
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This rectangular shaped single-story stucco building, located on a V-shaped lot where two major streets come together, has a medium-pitched gable tile roof. Windows are recessed and have multi-panes. A large three part multi-paned window on the west side of the building has modified brackets and recessed wood panels under the gable above the window. An offset gable wing on the east contains a recessed front entrance with red ceramic entry tile and stairs. A flat roofed wing appears on the west side and another entrance here is surrounded by cast stone squares with a slightly tapered chimney on the west. Doors are of wood with multi-panes in upper portions.

Residences

DESCRIPTION

- 7a. Architectural style: California Bungalow/Mediterranean
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

These three blocks on Barnett Street are primarily comprised of modest single-story residences built in the Mediterranean and California Bungalow styles of the 1920's. Residences maintain fairly even setbacks with lot sizes averaging 50' X 115'-140'. Some mature trees are located in the parkway and landscaping around houses is kept to a minimum.

8. Construction date: Estimated X Factual _____

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Street trees in parkway.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

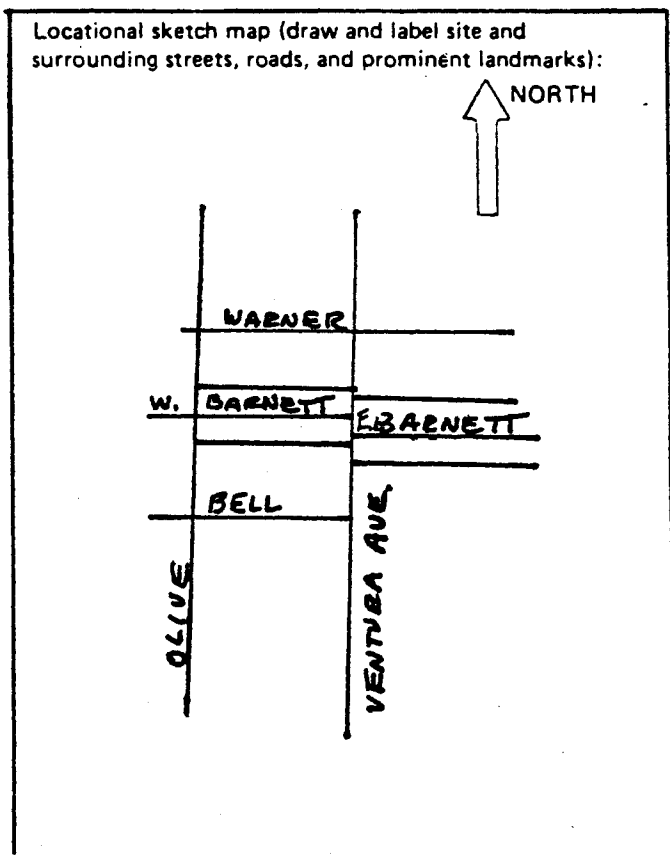

The east side of Barnett Street was developed primarily in the 1920's in response to the Avenue oil boom. Portions of the west side were developed later in the 1930's and 1940's. The majority of residents worked for the oil companies or in related industries. Some were merchants who serviced the Avenue and whose stores were located on Ventura Avenue.

The east side of Barnett Street is reflective of a 1920's working class neighborhood, whereas the west side has houses built in mixed styles from the 1930's and 1940's.

WEST BARNETT - West Side

30 West Barnett Street

71-021-09

This two-story Craftsman bungalow apartment building was constructed possibly in the early 1920's or before. It is not known if it was built for apartments or a residence. The building is rectangular in shape with medium gable roof and offset two-story gables over slanted bays on the front and side. The use of wood detail is seen in the notched fascia boards, heavy stepbacked beams, and exposed rafters under the eaves. The siding is unusual. Shingles are found under the gables, wide horizontal shiplap siding laid vertically in the bays on the second floor and narrow clapboards on first floor. An addition and balcony on the Ventura Avenue side is not compatible with rest of the building. It is alleged that the second story was added later, but prior to 1928.

52 West Barnett Street

71-021-07

This flat roofed Mediterranean style residence is capped with tile and features an extended gable tiled roof with small offset gable over the entry with recessed rectangular window. The house was built in 1927 and the original owner is unknown.

BARNETT STREET - EAST SIDE

76 East Barnett Street

71-031-04

Built in 1926 and occupied in 1930 by Ora Haddock and Roy Howard, oilworkers, this sidefacing gable bungalow has an impressive gabled entry with a low arch supported by square columns. The front door has sidelights and front windows are multi-paned in upper portion. The house is covered with medium clapboard siding and has a brick chimney. The concrete sidewalk has a diamond pattern.

125 East Barnett Street

69-131-14

This flat roofed Mediterranean style stucco residence has square capped raised corners. The front porch is arched with a shed tile roof and a small tile shed roof supported by curved brackets covers the front window. The porch has a wrought iron railing. The detached garage is constructed in the same style with the driveway comprised of two concrete strips. The house was built in 1925 and original occupant unknown.

SIGNIFICANCE

19 Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Josiah Keene, a native of Massachusetts, came to Ventura in 1871 for health reasons. He worked as a clerk and was eventually able to purchase 18 acres of land on Ventura Avenue. He built this house in the 1870's and went into beekeeping. The house was moved prior to 1928 to Bell Way.

It is the only example of the Second Empire style in Ventura and has been well-maintained over the years.

DESCRIPTION

- 7a. Architectural style: Craftsman Stone Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This single-story residence, entirely of cobblestone, has a main low-pitched gable roof with an attached gable roof addition in the rear and an attached garage, converted to a residence on the south side. The front porch is recessed on the south with a radiating stone arch. Aluminum and glass doors have been added. The windows have wood frames and are recessed. The window on the porch has a radiating arch. Under the gable is a notched fascia board and exposed rafters. The converted garage door has four wood panels with multi-panes in upper portion. One panel has been replaced with a wood door. A decorative iron vent is next to the garage on the side of the house.

18. Related features: Several mature trees, chain link fence/picket fence in rear.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house is architecturally distinctive for its handcraftsmanship. Built completely by hand using stones from the surrounding area, the builder of this residence displayed his skills as stonemason.

The building and owner are unknown, but the house is believed to have been constructed in 1927 and occupied in 1930 by Warren Orwin and his wife Arloa. Mr. Orwin was an oilworker.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian; Period Revival styles of the 1920's
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The east side of Center Street is comprised primarily of single-story residences built in 1900 with two houses moved in from the 1890's. Lots average 50' X 125' with setbacks fairly uniform. There is minimal landscaping.

The west side of Center Street was developed in the 1920's and most residences are Mediterranean in style with lots averaging 50' X 116'. Setbacks are uniform and there are mature trees in the parkways.

8. Construction date: 1890-1930

17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Street trees, picket fences.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The east side of Center Street was originally called Pearl Street and developed around the turn-of-the-century. Most of the residences are modest Vernacular structures with simple Victorian details. Early residents were ranchers on Ventura Avenue.

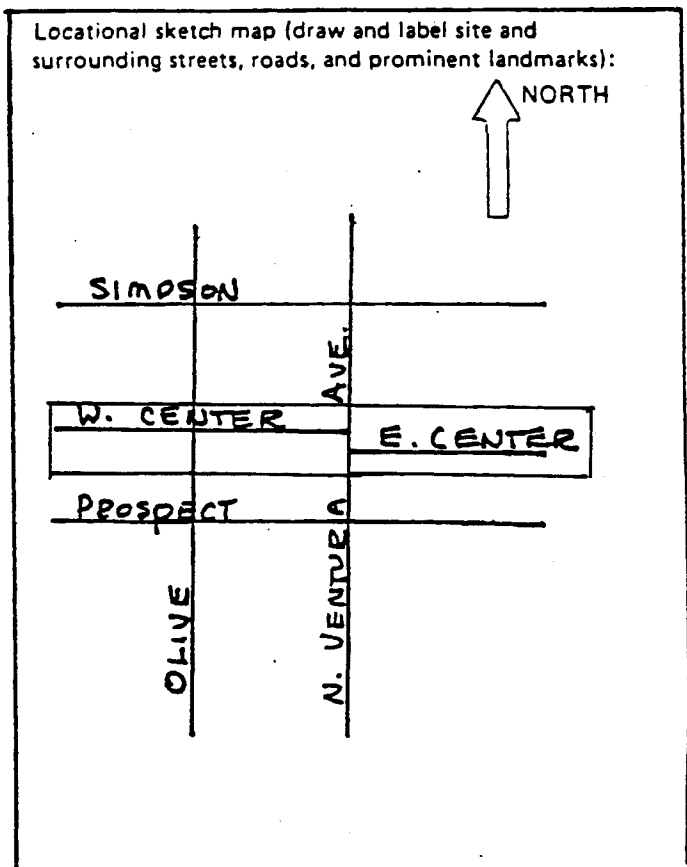

The west side of Center Street developed as part of the Simpson Tract beginning in 1926. The houses were built quickly since there was a housing shortage at that time as a result of the oil boom on the Avenue. Many of the early residents were oil workers or worked in a related industry.

CENTER STREET - WEST

161 West Center Street ✓

71-062-16

This Mediterranean style stucco residence was built in 1926 by local contractor Wm. T. Pierce and occupied in 1930 by Harry Griffin, who worked at an automatic laundry. Primarily square in shape with a flat roof edged with tile, this residence features an offset tile gable roof with a centered tiled gable entry with an unusual Moorish arch. The original detached garage, similar in style, and concrete strip driveway are on east side.

181 West Center Street

71-062-18

Built in 1930 for Ernest Lopez, an oilworker, this single-story residence is built of clay tile and covered with stucco. It is California Bungalow in style with low-pitched gable roof, exposed rafters under eaves and window treatment. The front porch is recessed on west side and supported by square column.

250 West Center Street ✓

71-093-12

Built in 1930 possibly by William Kirchner, a carpenter, this house was supposedly used as a maternity home in the 1930's. The high-pitched intersecting gable roofs, shingle roof and stucco siding show an English cottage influence typical of the 1920's Period Revival styles. The front porch is recessed under modified arched openings. This same "squared off" arch is repeated in the multi-pane windows and the gabled porte cochere. -

399 West Center Street

71-054-28

This unusual shaped building was constructed in 1900 and was called the Pilgrim Holiness Church in 1930 and moved to its present location in 1952. Currently, the church is called the True Vine Missionary Baptist Church. The main part of the church has a high-pitched gable roof with boxed eaves and plain cornice. Windows have pediments with raised scrollwork. A flat roofed addition with square tower on the east was added to the front. The tower has a low-pitched gable roof supported by square columns with stickwork in between. Over the front entrance is a shingled mansard roof supported by brackets. Another flat roof addition is found in the rear. The building is covered with wide shiplap siding.

250 West Center Street

399 West Center Street

CENTER STREET - EAST

44 East Center Street

71-111-03

This modest board and batten cottage has a pyramidal roof with low hip roof porch addition across the front. The windows have shelf mouldings and eaves are closed. The porch has a woven trellis effect under the eaves and balustrade. A low white picket fence runs across the front of the property. Built in 1900, this property was owned in 1912 by Charles Simpson, a farmer, who had several acres of land on the west side of Ventura Avenue, near Simpson Street.

57 East Center Street

71-072-21

This single-story residence, built possibly in the 1890's, was moved to this site prior to 1928. In 1930, Roy Symonds, a well driller, and his wife Belle lived here. The house has a truncated hip roof with two front gables. The gable on the west is over a slanted bay. The porch is recessed within the second gable. A plain frieze and fascia board are found under the gables and the house is covered with narrow clapboards.

68 East Center Street

71-111-14

Built in the 1890's, this single-story Vernacular Victoria residence has a high-pitched offset gable roof with shed roof over the porch. The cornice is plain and there is shelf moulding over the windows. The house is covered with wide shiplap siding and was owned in 1910 by Christopher J. Ostrander.

83 East Center Street

71-072-30

Moved in 1952 from 486 West Center Street, this plain Vernacular Victorian, built possibly in the 1890's, has two high-pitched gable roofs that form an L-shape. A high roof covers the enclosed front porch and the front windows have been altered. Side windows maintain original shelf moulding. House has a plain cornice treatment and wide shiplap siding. Charles A. Bench had the house moved by Brakey house movers. An old picket fence runs along the side yard.

DESCRIPTION

- 7a. Architectural style: Period Revival from 1920's; California Bungalow
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

Cedar Street and Cedar Place are primarily hillside lots and irregular in size and setbacks. Many of the single-story residences have raised yards with retaining walls and fences. The Period Revival styles include English cottage and Mediterranean, all modest in scale although with well-appointed details. A few late California Bungalows are found on the street. Most of the residences maintain their original style and character with few alterations, except for the house at 163 Cedar Street.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Laid out in the 1920's, Cedar Street and Cedar Place were developed in response to the Avenue Oil Boom. The only house there prior to the 1920's is at 163 Cedar Street, which was built in 1885 on what was then called "Obiols Alley."

The houses, located against the hillside, commanded better views and were the more expensive houses in the "Avenue" area. Occupations of residents continued to reflect the oil industry and other related industries.

CEDAR STREET

163 Cedar Street

71-152-01

LANDMARK No. 67

Although rich in Victorian detail, much of this has been added recently to this single-story residence. The house is believed to have been constructed in 1885-86 by Charles L. Cooper, possibly a farmer. The cross gable roofline is punctuated with a corbelled brick chimney. Both hip roof porches have been enclosed and there are two square bay windows with shingled mansard roofs on the west and south. The lot is heavily landscaped and has an unusual decorative wood fence and gate.

442-44-46 Cedar Street ✓

71-112-135

Built in 1925, these three separate, but nearly identical California Bungalows form a U-shape on this hillside lot. The bungalows have medium gable roofs with offset gables over the porch supported by tapered wood columns. Exposed beams, strutwork and rafters, all bungalow characteristics, are prevalent. The two bungalows in front have decorative vents under the main gable. Double garages are built into the hillside under the houses. In 1926, the occupant at 442 was Harold Vork and at 444 was Jacob Feyma, carpenter, who was also the owner in 1928.

456 Cedar Street ✓

71-112-14

This modest stucco cottage has a sidefacing medium gable roof with exposed rafters. The curved roofline over the entrance is repeated in the rounded arched wood door. The window appears to be altered and slatted wood shutters and shingled mansard roof are next to front windows. The lot is tiered and heavily landscaped with a stucco wall at the street level. Built in 1927, this house was occupied by Kenneth G. Estey, a pump installer, in 1930. This house is identical to 676 Cedar Place and was owned in 1929 by People's Lumber Co.

746 Cedar Street ✓

71-081-02

Built in 1925 for Moulton G. Walker, a salesman for Stow Motor Co. on Main Street. This English Tudor residence has a matching garage. The high pitched gable roof has an offset front gable with steep pitched roof. The Tudor effect can be seen in the cross timbering applied under the gables combined with the stucco finish. An exterior brick fireplace divides the facade and the use of brick is extensive on the porch seen in the arched entry, porch walls and along the lower portion of the residence. Located on a hillside lot, the raised yard has concrete and stucco retaining walls and is well landscaped.

CEDAR PLACE

676 Cedar Place

71-082-09

This house is virtually identical to 456 Cedar Street, except that it retains its original multi-paned windows. Built in 1923 and occupied in 1930 by Elmer C. Honan, an oiler for Midway Gas Co. The landscaping is quite formal with closely trimmed hedges on each side of the walk leading to the front wrought iron gate.

688 Cedar Place

71-082-07

Built in 1925, this single-story flat roofed residence has an offset low pitched tile roof and wing wall on the south. Moorish arches are repeated across the facade in the porch entry and above the windows. The windows have an unusual diamond shaped pattern in upper half. Located on a hillside lot, a concrete and stucco retaining wall runs across the front of the property ending with two square capped pillars at the base of the stairs. In 1928, D. Smith was listed as the owner of this property.

DESCRIPTION

- 7a. Architectural style: Period Revival - 1920's
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The 100 and 200 blocks of East Comstock Drive were built primarily in the 1920's and consist of single-story residences located on lots 50' X 107' with even setbacks. Some mature trees remain in the parkways.

The houses are Period Revival styles from the 1920's and include the Mediterranean and Provincial style bungalows with flat or gable roofs and stucco or wood siding.

8. Construction date: 1920's

18. Related features: A few mature street trees.

SIGNIFICANCE

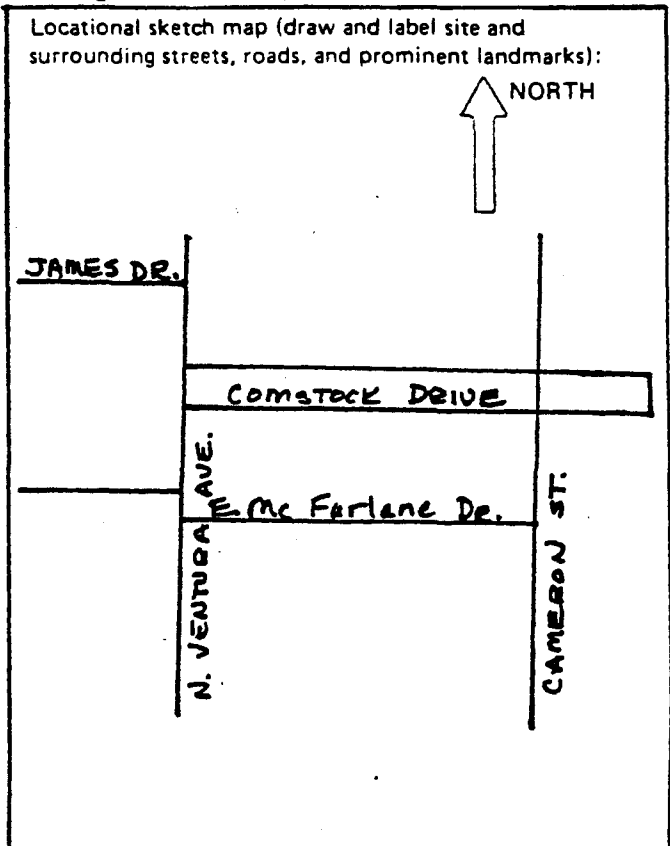

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Comstock Drive was developed between 1926-1928 as part of the McFarlane Subdivision. The houses are significant as workers' cottages built in response to the Avenue oil boom of the 1920's. Most of the residences have maintained their integrity over the years, as well as a consistency of style. This area has long been a part of Ventura County which was just recently annexed to the City of Ventura.

(North Side - Looking East)

COMSTOCK DRIVE

172 East Comstock Drive

69-082-03

This modest single-story bungalow was constructed in 1926 and occupied in 1930 by Milton Oliver, oilworker, and his wife Emma. The low-pitched sidefacing gable roof has an offset front gable which extends over the arched portico with low gable above. Exposed rafters are found under the eaves and windows have diamond-panes in upper portion. The house has been covered with asbestos siding.

243 East Comstock Drive

69-081-09

This bungalow, built in 1927, also employs the arched entry under the swept offset gable roof. The stucco exterior chimney is a major design element located next to the entry. The house is covered with wide clapboard siding.

DESCRIPTION

- 7a. Architectural style: California Bungalow with Craftsman Influence
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This single-story bungalow has a medium-pitched front gable roof with exposed rafters under the eaves. A frieze extends above the porch and across the front of the house with decorative wood squares resembling dentils. The porch is recessed under the main gable and is supported in one corner by a tapered stone column. The house is covered with narrow clapboards. An exterior brick chimney is located on the east side.

8. Construction date: 1920
Estimated X Factual _____
9. Architect Unknown
10. Builder Unknown
11. Approx. property size (in feet)
Frontage 50' Depth 150'
or approx. acreage _____
12. Date(s) of enclosed photograph(s)
10/82

13. Condition: Excellent ___ Good X Fair ___ Deteriorated ___ No longer in existence ___
14. Alterations: Aluminum window screens
15. Surroundings: (Check more than one if necessary) Open land: ___ Scattered buildings ___ Densely built-up X
 Residential X Industrial ___ Commercial ___ Other: ___
16. Threats to site: None known X Private development ___ Zoning ___ Vandalism ___
 Public Works project ___ Other: ___
17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Mature trees, wood fence.

SIGNIFICANCE

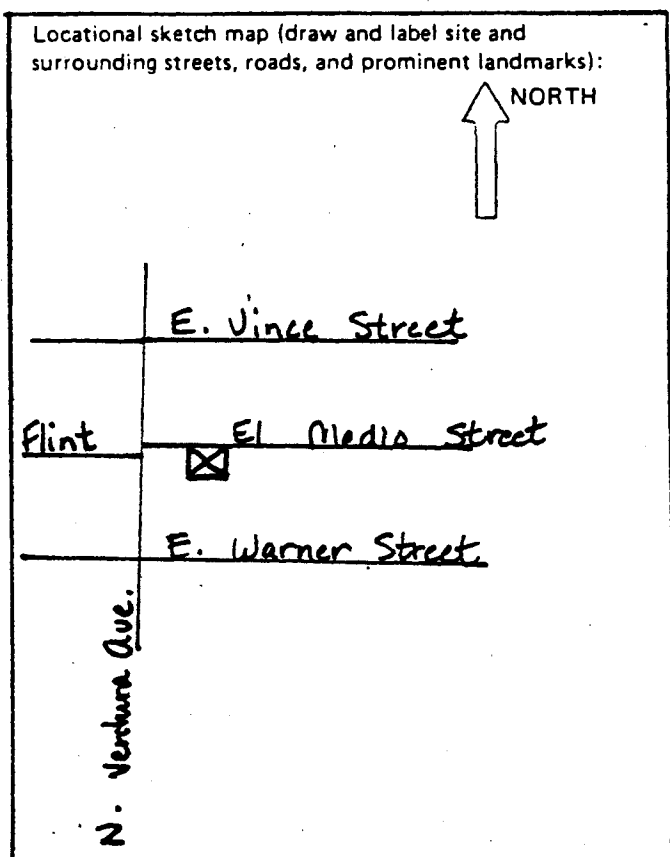

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house is significant as a well maintained and virtually unaltered example of the California Bungalow on El Medio Street. It was built in 1920 and occupied by Leonard C. Lamp in 1930.

20. Main theme of the historic resource: (If more than one is checked, number in order of importance.)

City Ventura, CA Zip 93003 Ownership is: Public _____ Private X
6. Present Use: Single-Family Residence Original use: Same

DESCRIPTION

- 7a. Architectural style: Italianate
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The medium-pitched hip roof on this single-story residence has a peaked gable above the entry. Boxed eaves and plain cornice with brackets all show Italianate influence. A low-pitched hip roof covers the porch and is supported by square tapered columns capped at the top with wood balustrade connecting the columns. The house is covered with wide shiplap siding and the only alteration appears to be the front windows.

8. Construction date: 1870's or 80's
Estimated X Factual _____
9. Architect None
10. Builder Unknown
11. Approx. property size (in feet)

DESCRIPTION

- 7a. Architectural style: Mediterranean
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Four individual stucco duplexes are contained in this court and each has a gabled tile roof with shed tile roof over the entry. Wrought iron stair railings are found at each entry and across the court walls are two openings with wrought iron railings. A large arched entry connects the court and comes to a point with red tile cap. Below are the words "El Medio Court." The units are slightly elevated as you enter the court with stepped concrete walkway.

DESCRIPTION

- 7a. Architectural style: Queen Anne
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The sidefacing high-pitched gable on this two-story residence features a prominent offset octagonal tower on the west. The tower is covered with octagonal shingles and has closed eaves with dentil moulding and applied rectangles in a band under the roof. The slanted bay windows in the tower have small wooden corner balustrades. Below the tower is a large ornate stained glass window with an arched design. A shed roof dormer window is located over the recessed entry. The porch is a more recent addition, done probably when the house was moved. It has brick pillars with tapered wood columns on upper portion. The house is covered with wide shiplap and shingles.

- 7a. Architectural style: Queen Anne with Stick-Eastlake Influence
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large two-story residence has a high pitched cross gable roof with a combination shed and gable roof over the porch. Applied stickwork is found under the porch gable with decorative fascia board and decorative wood column supports with cutout wood frieze above. Decorative fascia board and fish scale shingles are found under all gables, including dormer gables. On the east side is a slanted bay window on first floor with sunburst brackets and sawtooth moulding. An enclosed porch is located on west side of the house near the back. The house is covered with wide shiplap siding.

DESCRIPTION

- 7a. Architectural style: Mediterranean, California Bungalow and Vernacular Victorian
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The two long blocks of West Harrison Avenue contain a variety of residences ranging from Vernacular Victorian to California Bungalow and Mediterranean styles. The north side of the street has the oldest houses, especially in the 0-100 block. Setbacks are even and lot sizes range from 50' X 100' on south side to 50' X 195' on north side. The south side of Harrison was developed in the 1920's and is comprised of primarily California Bungalows. There are several mature trees on the street.

17. Is the structure: On its original site? X Moved? ___ Unknown? ___
18. Related features: Mature Trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The west side of Harrison Avenue is significant primarily for the several early homes on the north side of the street which was subdivided in 1887 as the Nash Tract. The south side of Harrison has a consistency of style seen in the rows of California Bungalows built in the early to mid-1920's. A Mediterranean Bungalow Court at the end of the block is an excellent example of a modest court from the 1920's.

Several of the early occupants at the turn-of-the-century were early Spanish and Mexican families, and the houses have remained in the families to the present day.

275 West Harrison Avenue

71-094-27

This 1-1/2 story early California Bungalow has a medium high pitched gable roof with board and batten siding. The recessed front porch is enclosed on the west side, while on the east the porch is supported by square posts and slatted wood railing. The house has a vertical board skirt. It was built in 1910 for Alfred F. and Rosa M. Ortega. Mr. Ortega was listed as a laborer.

303 West Harrison Avenue

71-094-30

The unique feature of this 7-unit Bungalow court is the mottled texture of the stucco exteriors. The roofs are flat with raised parapets and shed tile roofs cover the entry. Built in 1927 by A. Fabian, this court was known as Fabian Court.

Leighton Drive
(North Side)

LEIGHTON DRIVE

67-69 Leighton Drive

69-073-16

This two-story rectangular Mediterranean apartment building has a flat roof and single-story flat roof porch entry with Moorish arches. The building constructed in 1928 has been stuccoed and the front door has panels in lower portion and multi-paned windows in upper portion. A mature palm tree is on the property. Many of the early occupants were oilworkers.

225 Leighton Drive

69-083-34

Built in 1927, this house was occupied in 1930 by William G. Neal, a carpenter. This stucco house is characteristic of many Mediterranean style bungalows built in the 1920's with its flat roof, raised parapet, gabled tile entry over the porch with arched openings and recessed arched niches.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

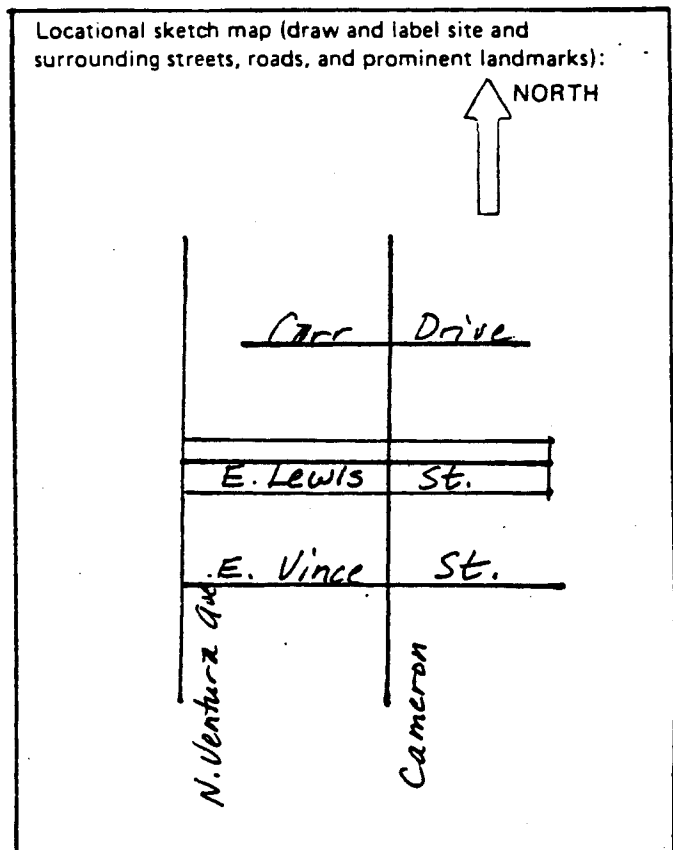

These two blocks of East Lewis Street were destroyed in 1927 - 1935. There is a consistency in the style of houses, mainly Mediterranean and English Cottage, which has been maintained to the present. The original occupants were primarily oilworkers or those who worked in oil related industries. The houses were developed in response to the oil boom on Ventura Avenue in the early 1920's.

EAST LEWIS STREET

35 East Lewis Street

69-091-39

This two-story Mediterranean style stucco residence has a flat roof with stepped parapet. A single-story, low-pitched tile gable wing has French doors and a shed roofed entrance on the west. Mature palms and foundation plantings add to the property which was developed in 1930.

163 East Lewis Street

69-102-32

Built in 1927 and occupied in 1930 by James E. Dorling, an auto painter, this single-story stucco residence has a sidefacing hip gable roof with an offset front hip gable. The recessed front porch has an unusual arched opening and the windows have multi-geometric shaped panes.

162-68 East Lewis Street

69-103-02

This large two-story stucco apartment house has a flat roof with shed tile parapet with peaked gable in center. The second story balcony has a series of five arched openings divided by capped columns. The arches are repeated on the first floor but are larger and create an open feeling on the porch. Windows and doors are multi-paned. This well maintained example of the Mediterranean style was built in 1927 and many of its early residents were oilworkers.

182 East Lewis Street

69-103-04

This English Cottage style residence was built in 1927 for Wallace Thompson, oilworker. The house is L-shaped with a high-pitched, shingled front gable and intersecting side hip gable. Exposed rafters are found under the eaves and an intersecting gable over the entry. Windows have geometric multi-panes. This 1-1/2 story stucco residence has a tall chimney in front which is also stuccoed.

215 East Lewis Street

69-102-28

This single-story residence has an unusual style seen in the high-pitched sidefacing gable roof with exposed rafters reminiscent of the English Cottage style, combined with zigzag and stepped details seen in the entrance with arched opening and large front window with stepped parapet reminiscent of Art Deco detailing. Built in 1927 for Jere Snyder, oilworker, this house has a stucco chimney on the west.

252 East Lewis Street

69-103-10

This single-story Mediterranean style stucco residence has a flat roof with low-pitched tile shed roof across the front and offset front gable. The semi-arched opening over the recessed entry has an open patio on the west. Built in 1927 for George V. Armitage, Superintendent of Lane Tool Co., this residence is well maintained with mature plantings.

(from Oak Street)
18. Related features: None apparent.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house was built for Dr. Cephas Bard in 1886. Dr. Bard had two residences on Oak Street. This one was moved to this site in 1951. Dr. Bard, brother of Senator Thomas Bard, was a favorite physician in Ventura. He died in the hospital built to honor his mother, Elizabeth Bard, in 1903.

The house is significant architecturally as well, with its elaborate Italianate details. It is one of the few remaining Italianate structures in Ventura and has maintained its integrity over the years.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This apartment building was started in 1929 and not completed until 1943 by Santa Paula Architect Roy C. Wilson. The name associated with the property in 1930 was Lincoln D. Goss, concrete contractor.

The apartment building, with its unusual design elements, is one of the most interesting apartments in the Ventura Avenue area. Although somewhat deteriorated, it has maintained its basic integrity.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This Italianate residence is significant architecturally for its elaborate details, seen particularly on the bay window and porch columns. This style was very prolific in San Francisco. It is not known how much of it was done in Ventura, but this is the only remaining example except for the house at 52 West Mission, of elaborate Italianate bays from the 1880's. The house was built in 1886 and the original owner is unknown. Mrs. Louise Ratekin occupied the residence in 1930.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian, Mediterranean, California Bungalows
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

The east side of McFarlane Drive is comprised primarily of single-story residences built during the 1920's and 1930's in styles ranging from California Bungalow to Mediterranean. Houses have uneven setbacks with some located in the rear of the lots and lot sizes average 50' X 106'.

The west side of McFarlane Drive has irregular sized lots and older residences located on the north side. The south side has an old two-story garage and several other commercial structures.

18. Related features: Some mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The east side of McFarlane Drive was developed in 1926-35 in response to the Avenue oil boom in the early 1920's. Many of the early residents were oilworkers and these houses reflect the tastes of these early occupants. Many have maintained their integrity over the years.

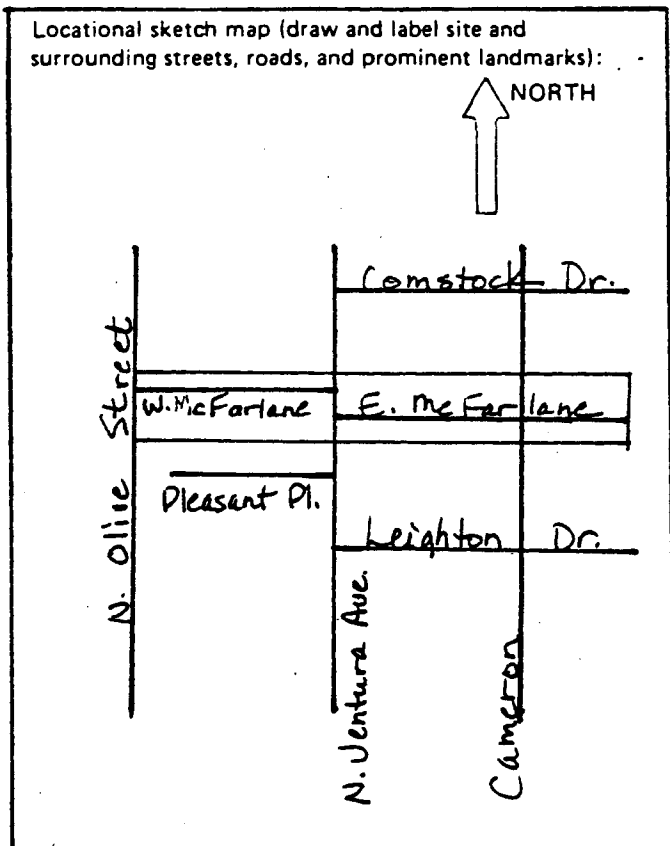

The west side of McFarlane Drive has several older residences dating from the 1890's and earlier, and represent styles generally modest in detail. Some of these residences were probably moved in

MC FARLANE DRIVE

78 East McFarlane Drive

69-073-05

This late California Bungalow, built in 1927, has a main front gable with offset gable over the porch. In the rear is an intersecting gable over the porch. In the rear is an intersecting gable wing which was probably a later addition. The house has unusual cutout vent designs under the gables. These designs are carried down to the porch columns. Rafters are exposed and an exterior brick chimney is located on east side. The house is covered with narrow clapboards. In 1930, Harry C. Tindle, an oilworker, occupied this residence.

132 East McFarlane Drive

69-073-10

This modest California Bungalow, built in 1927, features the same unusual porch columns that the house at 78 East McFarlane had. These differ slightly, in that they are tapered and cutouts are slightly different. This residence is quite symmetrical with the centered gable over the porch and a large window on each side with crisscross panes in upper third. In 1930, Samuel Brakebill occupied the house. he worked at a restaurant on Palm Street.

161 West McFarlane Drive

68-90-31

This single-story Vernacular Victorian, built in 1890, has a medium-pitched cross gable roof with boxed eaves which are returned under the gables. The east gable has a half circular window and fish scale shingles. The porch is recessed under the south gable and partially enclosed. The house is covered with wide shiplap siding and a corbelled chimney punctuates the roofline. The owner of the property in 1930 was Standish H. Lane, oilworker. It is possible that this house was moved here. Earlier owners are unknown.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house is historically significant for it originally belonged to Dr. A. J. Comstock in 1880 and was located on the Ventura Avenue area near the current Rocklite Plant on Comstock Street. The house was later moved by John McFarlane to McFarlane Drive. James Garcia moved the house to its current location on Park Row by 1916-17. Mr. Garcia worked for the City of Ventura for approximately 40 years in the Street Maintenance Department. The house is still owned by the Garcia Family, Manuel T. Garcia, the son, and has been well maintained with virtually no alterations.

SIGNIFICANCE

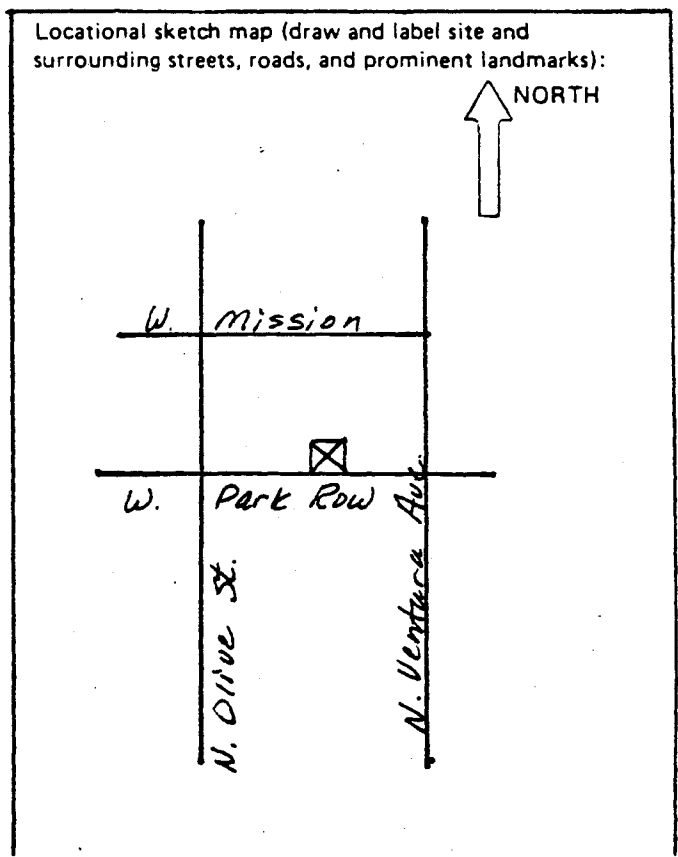

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)
Architecturally the house is significant as one of the few relatively unaltered examples of late Queen Anne in Ventura. It is an important visual landmark for the Avenue Area.
The house was constructed for Daniel J. Righetti in 1907 on Main Street. Mr. Righetti had billiards, cigars, tobacco and confectionery shop on Main Street and was from a pioneer Italian family in Ventura. The Righetti Family lived in the house until 1922. Dr. Julius Bianchi, a prominent physician, lived in the house from 1923 to 1941 and had his practice there for three years before becoming president of the Ventura County Medical Society in 1926. Dr. Bianchi was an envoy from the U.S. to Guatemala from 1920 to 1922.

4. Parcel number: 71-132-18
5. Present Owner: Robert J. and Marion G. Mooney Address: 4914 Marlin Way
City Oxnard, CA Zip 93030 Ownership is: Public _____ Private X
6. Present Use: Apartments Original use: Single-Family Residence

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian with Italianate Influence
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This large two-story residence has an unusual roofline with high-pitched cross gables with the front gable lower on one side. The gables have eaves that return and all have boxed cornices. The windows have shelf moulding. The windows and return eaves, with their classical detail, show the Italianate influences together with the high peaked gables. The side porch has been enclosed and, in 1948 the house was covered with dark stained shingles.

8. Construction date: 1892
Estimated X Factual _____
9. Architect Unknown
10. Builder Unknown
11. Approx. property size (in feet)
Frontage 75' Depth 165'
or approx. acreage _____
12. Date(s) of enclosed photograph(s)
9/82

13. Condition: Excellent ___ Good Fair ___ Deteriorated ___ No longer in existence ___
14. Alterations: House shingled in 1948.
15. Surroundings: (Check more than one if necessary) Open land ___ Scattered buildings ___ Densely built-up

16. Threats to site: None known Private development ___ Zoning ___ Vandalism ___
 Public Works project ___ Other: _____
17. Is the structure: On its original site? ___ Moved? ___ Unknown?
18. Related features: Chain link fence.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

Built in 1892 or earlier, the house may have been moved to this location. In 1910, Samuel Elliott, a nurseryman, lived here. By 1930, the house had been converted to four apartments.

At one time it was quite an impressive house with horizontal siding. It still retains its basic features except for the shingles which were added in 1948.

18. Related features: Playground, concrete pillars and wrought iron fence, mature trees.

SIGNIFICANCE

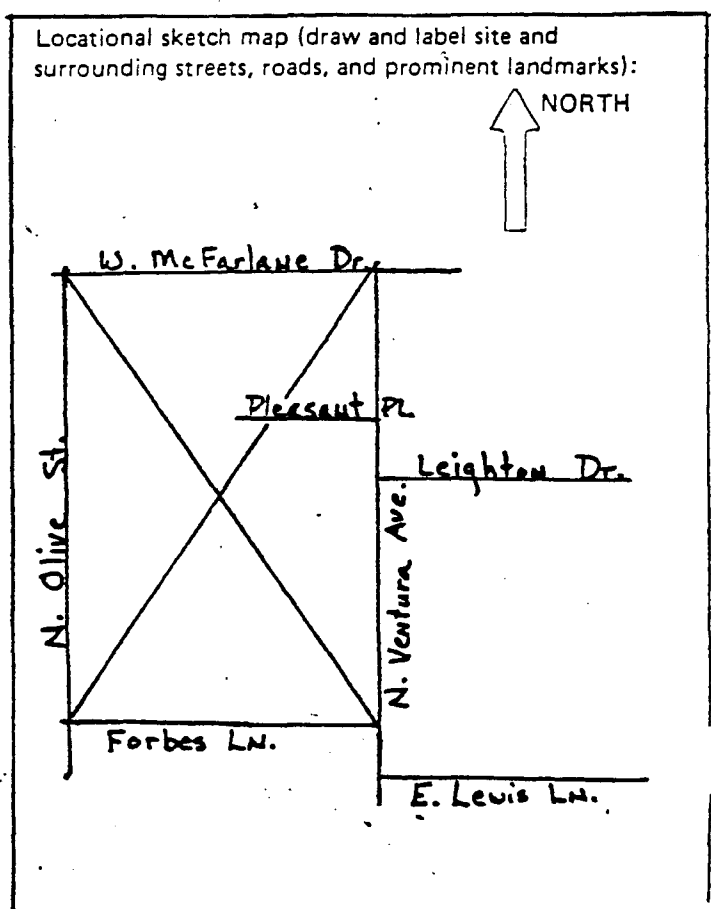

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The school was built in 1929 and named for Eugene P. Foster, Ventura benefactor, who had given land to the schools. The school was designed by Santa Paula Architect Roy Wilson. In 1951, the auditorium, more classrooms, and a garage were built. It is the oldest school on the Avenue that is still being used and was built about the same time as the Avenue School further north on Ventura Avenue. It was built in response to the tremendous growth in the Avenue area in the 1920's.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian, California Bungalow and Mediterranean
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

The east side of Prospect Street is comprised primarily of houses built in the 1890's. Lot sizes average 50' X 100-125' with house setbacks fairly even. Some alterations have occurred and are listed separately. The street is quite short and landscaping sparse.

The west side of Prospect Street was developed in the late 20's and contains mostly single-story bungalows of the California and Mediterranean varieties. Lots range from 40-50' X 116' with even setbacks. There are some mature trees in addition to street trees.

8. Construction date: 1890 - 1930
Estimated X Factual _____

Residential Industrial Commercial Other:
16. Threats to site: None known Private development Zoning Vandalism
Public Works project Other:
17. Is the structure: On its original site? Moved? Unknown?
18. Related features: Street trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

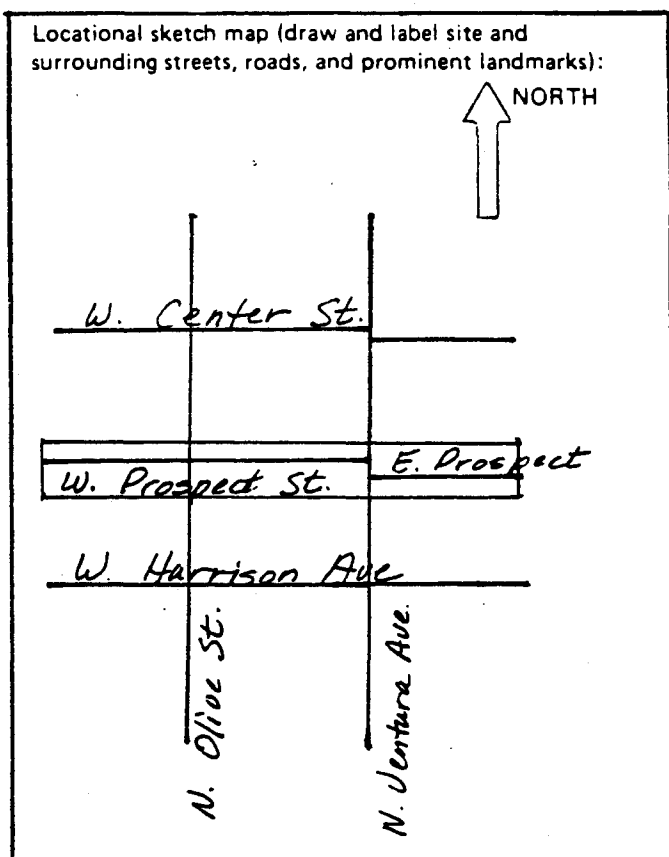

The east side of Prospect Street was developed in the 1880's as the part of the Avenue Tract and no doubt in response to the building boom of the 1887's in Ventura. It was originally called Ruby Street. The two houses listed were presumably built for speculation by Jno. Pinkerton in 1889 and are representative of modest Vernacular Victorians from that period.

The west side of Prospect Street was developed as part of the Simpson Tract from 1925 to 1929. This was also in response to a building boom--that of the 1920's with discovery of oil on Ventura Avenue. Bergseid and Barr, local contractors, built 15 residences on West Simpson Street.

39 West Prospect Street

52 West Prospect Street

58-62 West Prospect Street

183 West Prospect Street

PROSPECT STREET - EAST

45 East Prospect Street

71-111-10

Built in 1889 for Jno. Pinkerton, possibly as a rental, this single-story Vernacular Victorian has a high-pitched gabled roof with boxed eaves and fish scale shingles. The L-shaped residence has a front porch within the L. Windows have been enlarged and siding is wide shiplap.

57 East Prospect Street

71-111-11

This residence is virtually identical to the house at 45 East Prospect. The front porch has been enclosed, windows enlarged and aluminum siding added. This house was also owned by J. Pinkerton in 1889, probably built in response to the Boom of 1887.

211 West Prospect Street

45 East Prospect Street

57 East Prospect Street

WEST PROSPECT STREET

39 West Prospect Street

71-101-04

Built in 1927 for and possibly by George MacPherson, a carpenter, this Provincial style bungalow has a distinctive facade. A centered double hipped gable has an intersecting sidefacing hip gable. Doric columns support the hip gable portico with the open porch extending to each side with open beams. Knee brackets and exposed rafters are found under eaves with a corbelled brick chimney on the side. House is covered with narrow clapboards.

52 West Prospect Street

71-102-16

Built in 1925 for and possibly by Rudolph Feyma, a carpenter, this California Bungalow has a sidefacing gable roof with offset gable over porch. The porch pillars have a brick base and tapered wood top. Exposed beams and rafters appear under the eaves with an exterior brick chimney and narrow clapboard siding.

58-62 West Prospect Street

71-102-15

This single-story stucco duplex has a flat roof in rear and sidefacing tiled gable roof in front with an offset slanted gable over one entry. Both entrances have modified arches. The front window has a decorative slightly recessed arch above. Built in 1926 for Irvin T. Orm, a carrier, this is a well maintained Mediterranean style duplex.

183 West Prospect Street

71-101-17

The unusual mottled stucco texture of this modest Mediterranean style residence helps to distinguish it from the many similar residences on the block. The flat roof has a raised parapet and a shed roof with wood column and railing is found over the porch. Built in 1925, this house was owned in 1930 by Benjamin Marby.

211 West Prospect Street

71-093-19

Built in 1927 for Charles F. Benzien, a bricklayer, this Mediterranean style residence is on a raised lot with a concrete and stucco wall. The roof is flat with a raised parapet and a shed tile roof is found over the recessed arched entry. An exterior stucco chimney is located next to the entrance.

DESCRIPTION

- 7a. Architectural style: Vernacular Victorian, Mediterranean, Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The 0 to 100 block of East Ramona Street has primarily single-story residences mainly constructed in the 1920's in the Mediterranean style. A few older houses from the 1890's appear on the block and were moved to their location. Lot sizes average 50' X 160-175' and setbacks are fairly even. There are some mature trees on individual lots.

18. Related features: Mature trees.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

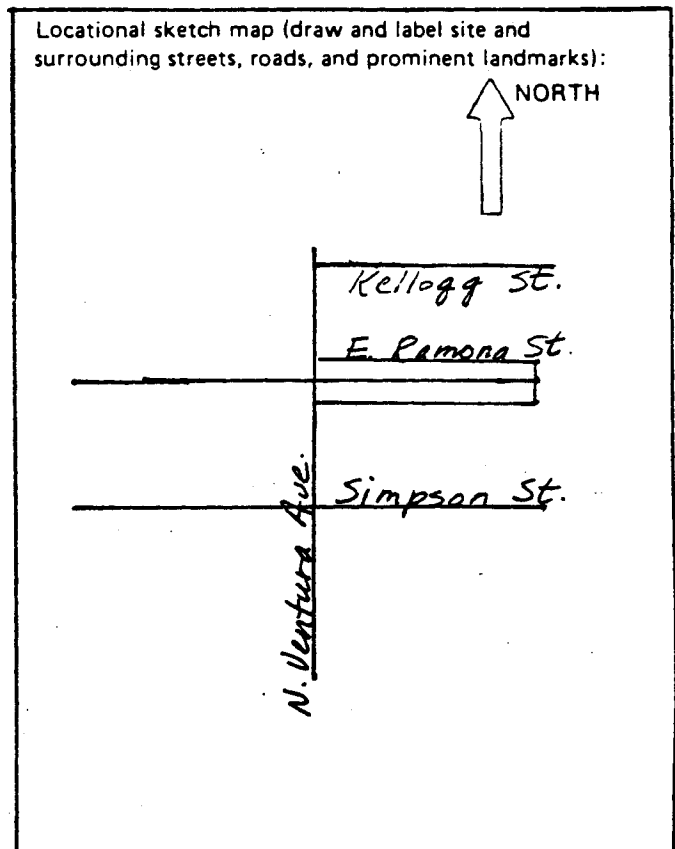

The east side of Ramona Street was laid out in the 1880's as part of the Avenue Tract, but only one house appears to have been constructed. The remainder of the street filled in during the boom period of the 1920's. Two older residences were moved to their current sites prior to 1928. The house at 28 East Ramona may be the residence of Wm. Aiken, a rancher, who owned the south side of the street in 1912.

28 East Ramona Street

71-071-02

This 1-1/2 story residence has a medium hip roof with high pitched cross gable. A hip roof is centered over the porch and is supported by turned columns and wrought iron bannister. The house has boxed eaves and medium clapboard siding. The house appears to have been built in the 1890's or earlier, and may have been owned by Wm. E. Aiken, a farmer, who owned the whole block in 1911.

67-79 East Ramona Street

71-032-24

This Bungalow Court was built in 1928 and has 12 identical rectangular bungalows with low gable roofs, exposed rafters, and low gable over entrance supported by knee brackets. Garages are in the rear.

110 East Ramona Street

71-071-08

Built in 1890, this house was probably moved here before 1928. The single-story residence has a truncated hip roof with an offset hip roof wing. The front porch has a hip roof supported by beveled columns. Windows have molded trim and the house is covered with wide shiplap siding.

18. Related features: Mature trees in parkway.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The east side of Simpson Street was laid out in the 1880's as part of the Avenue Tract and called Diamond Street and less than half of the lots had been developed by 1910.

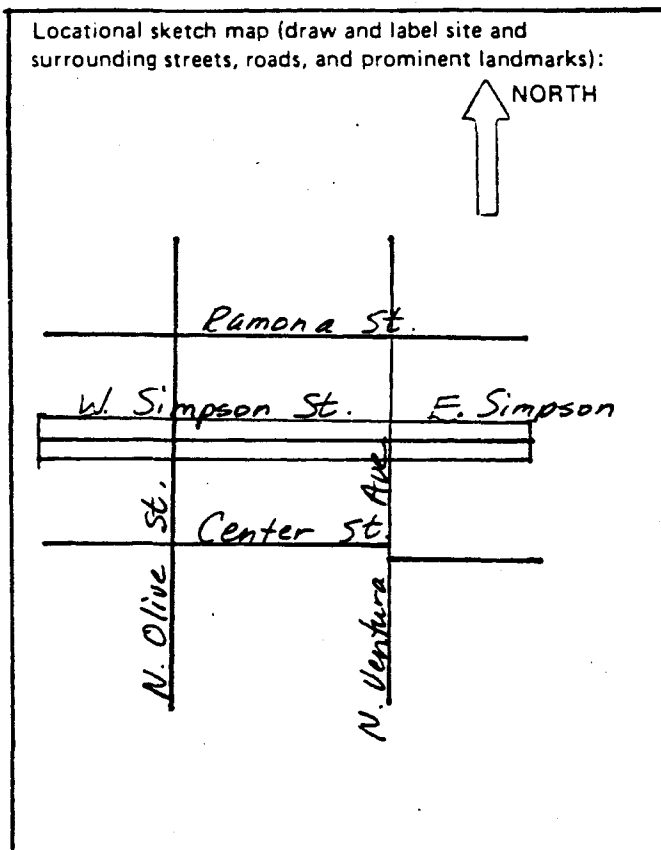

The west side of Simpson Street was developed starting in 1927 and called the Simpson Tract. Many of the residences are in the Mediterranean and Bungalow styles and have maintained their integrity over the years. Some later houses are from the 1930's and 1940's. The neighborhood is primarily working class and was developed in response to the oil boom on the Avenue in the early 1920's.

71-062-31

This single-story Provincial style bungalow has a medium sidefacing gable roof with centered gable over the porch. Under the gable is a round arch supported by Doric columns. Covered with narrow clapboard siding, the house sets on a raised yard with a low stone wall. Built in 1927, the original owner was Edward T. Bozarth, an oilworker.

125 West Simpson Street

71-061-16

Built in 1927 and occupied in 1930 by Clarence C. Neel, this single-story Mediterranean style residence has a flat roof with raised parapet. A shed tile roof extends over the entry and is swept on one side with an arched opening in the center.

447 West Simpson Street

71-053-11

This hipped roof Colonial Revival residence, built in 1915, was moved to this location after 1928. The single-story residence has a hipped dormer and a slanted bay window. The porch has been enclosed on the west and exposed rafters are found under the eaves. Siding is of narrow clapboards and an exterior brick chimney is located on east side of house.

SIMPSON STREET - EAST

56 East Simpson Street

71-072-04

Built in 1910 for Nathan R. Woodworth, a poultry raiser, this modest board and batten cottage has a truncated hip roof with a small hip roof over the porch supported by cutout columns.

132 East Simpson Street

71-072-13

The main portion of this 1-1/2 story residence has board and batten siding and resembles a barn. The front of the house has a shed dormer that connects the main high pitched gable roof to the hip roof porch. The porch has square column supports. Built in 1910, this residence was owned in 1910 by Edwin C. Williams.

when they manufactured bricks in the area.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This large Vernacular Victorian was built in 1890. It is located on property that belonged to Lloyd E. Selby. In 1898, Mr. Selby was listed as an attorney living on Ventura Avenue. He had a practice with W. H. Barnes, who lived across the street.

The house is significant architecturally as one of the few remaining structures on the Avenue that dates from the 1890's, or possibly late 1889's. It originally faced on Ventura Avenue, but was moved by Wm. T. Selby, the grandson of Lloyd Selby, about 40 years ago. Mr. Wm. Selby still owns the property.

18. Related features: Stone wall along sidewalk on both sides of corner lot.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This modest residence was built in 1888 for L. F. Webster. Mr. Webster was listed as a farmer, with 241 acres in the Ventura Directory for 1884-85. He was also listed as a contractor and stonemason in the 1898 Directory. Perhaps the stone wall in front of the house was built by him.

The house is significant as one of the few remaining residences on Ventura Avenue built in the 1880's. It was probably built as an early farmhouse when the "Avenue" was agricultural before oil was discovered in the 1920's.

18. Related features: Chain link fence.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This residence was constructed in 1889 for S. R. Rodibaugh, probably a farmer. The house is significant as possibly the oldest house on Ventura Avenue. The house was occupied by the Rodibaugh family until 1903 when William Burchett purchased the property. Mr. Burchett was a carpenter.

SIGNIFICANCE

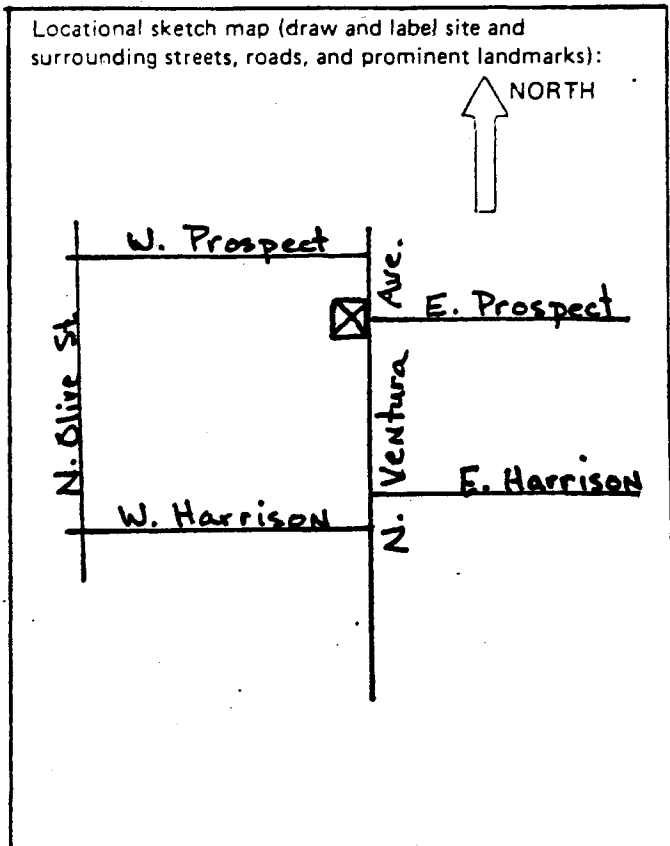

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This residence was built for Carl A. Simpson, a rancher, and his wife Grace in 1928. According to Mrs. Simpson, this house and 459 North Ventura Avenue were built by local contractors Slye and Carrico. The Simpson family were early Avenue residents, and the Simpson tract and street were developed on land farmed by them.

DESCRIPTION

- 7a. Architectural style: Queen Anne with Stick-Eastlake Details
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The medium-high pitched hip roof of this two-story residence has an intersecting front gable which extends from the intersecting front hip roof. This creates a double setback on the front porch which has two entrances. Under the main gable is a decorative bargeboard with cutouts and applied designs and fish scale shingles. The portico to the south of the shed roof has intricate curved wood detail within the gable. The front window has a mansard roof detail above, covered with fish scale shingles and below a curved stained glass window. Curved brackets are located under boxed eaves in corners. The house is on a concrete foundation and covered with wide shiplap siding.

18. Related features: None.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house was built in 1888 and moved to this site prior to 1926 by the son of a local housemover, John R. Brakey, who was listed as the owner in 1928.

One of the few Victorian residences on the Ventura Avenue area, this is an excellent well-detailed example, seen particularly in the gables and front window treatment.

DESCRIPTION

- 7a. Architectural style: Craftsman Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

Elements of the Craftsman influence are seen in the stonework on the front porch and the dark brown shingle covering under the broad low-pitched gable roof. The sidefacing gable roof of this single-story residence has an offset gable over the porch and a centered dormer gable. The large wood front door has three narrow vertical windows. The windows have multi-panes in upper portion.

DESCRIPTION

- 7a. Architectural style: 1920's Commercial Brick with Mediterranean Influence
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The Casa De Anza Apartment Building is three stories in height, with a flat roof and shed roof brick parapet, except for the small hip roofed tower at the southwest corner of the building which has tiny arched ventings vaguely imitative of a Mission Bell Tower. Some of the recessed windows are arched and others square in shape. Quoining is found on the corners in contrasting beige brick. Other interesting design elements are seen in the use of light and dark brick, especially around the entrance to the apartments on Simpson Street. This checkerboard pattern, black glazed tile and other geometrics are slightly "modernistic." There are two entrances for commercial use on street level.

DESCRIPTION

- 7a. Architectural style: Mediterranean with Art Deco Influence
- 7b. Briefly describe the present physical description of the site or structure and describe any major alterations from its original condition:

This single-story stucco rectangular building has a flat roof with red tile shed parapet and a stepped parapet over the main entrance. The Art Deco influence is seen in the high stepped arched entrance and stepped buttresses. Three separate entrances and windows have been covered over. These were of glass with transoms and separated by stucco columns which penetrate the roofline carrying through the emphasis on the vertical. Additional details include tile work and brick relief work in upper portion of building.

17. Is the structure: On its original site? Moved? ___ Unknown? ___
18. Related features: Chain link fence.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This California Bungalow was built in 1912 possibly for Arthur Pefley, a farmer, who owned an additional 28 acres across the road.

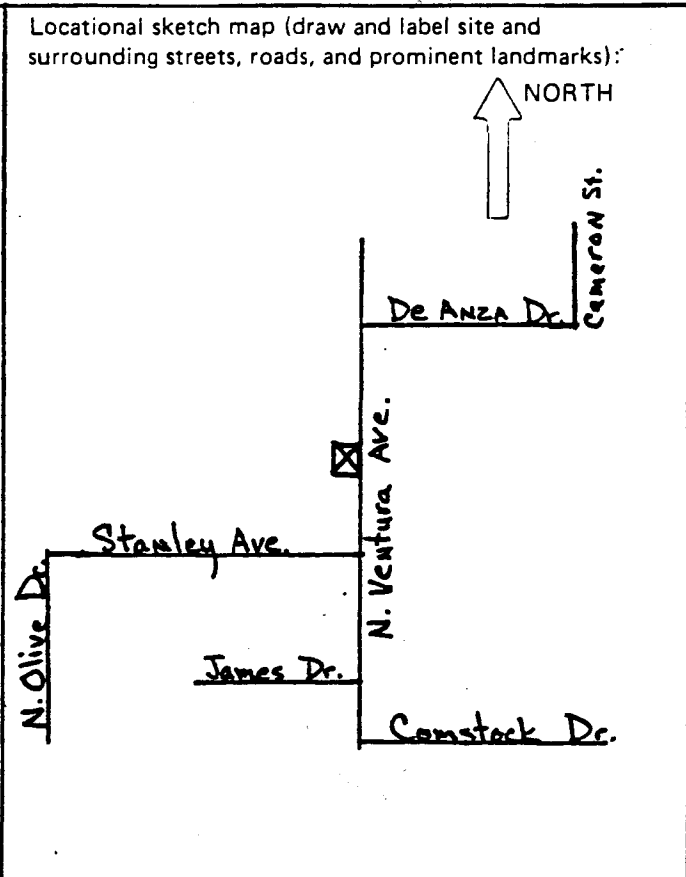

Architecturally, the house is a good example of the California Bungalow, several of which were built on North Ventura Avenue between 1910 and 1920 by ranchers.

DESCRIPTION

- 7a. Architectural style: Simple Italianate
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

This two-story box-like shaped residence has a medium-low pitched - truncated hip roof which is slightly flared at the eaves. The eaves are boxed with a plain frieze underneath. The shape of the house, the roofline, and the simple classic eave treatment are reminiscent of the Italianate style seen in Ventura in the late 1870's and early 1880's. The roof shape is repeated on the first story wing. The windows have shelf moulding and the house is covered with asbestos siding.

18. Related features: Chain link and wood picket fence.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

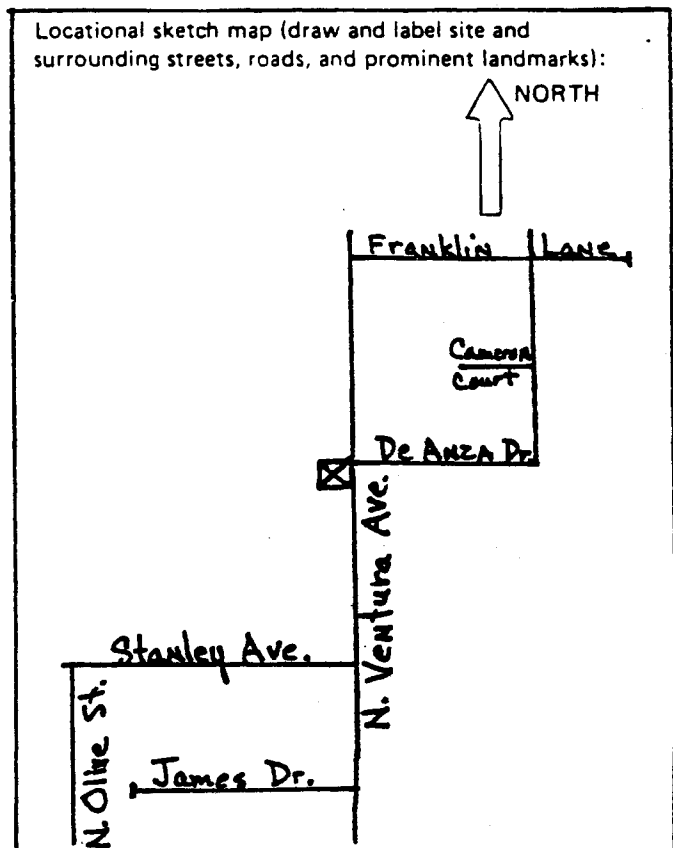

Architecturally, the building represents an early style that was found in Ventura County in the 1870's and 1880's. It was found in townhouses as well as farmhouses. The early assessor's records indicate the house was built in 1887. The original owner is believed to be William H. Barnes, attorney, whose firm in 1898 was called Barnes and Selby.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The house is significant as one of the few remaining ranches from the turn-of-the-century. It was built for the Henry H. Neel Family in 1909. Mr. Neel had this house built for his new bride, Edith Foster Neel. The citrus ranch included 54 acres and recently a portion has been sold to Vetco for development as offices. The house will remain. Mr. Neel was an assistant cashier at the National Bank of Ventura and served as President of the Ventura Citrus Association. The original family still owns the house and surrounding grounds and maintains it as a weekend retreat. Mr. Gus Caruso, an employee on the ranch since 1939, maintains the ranch.

DESCRIPTION

- 7a. Architectural style: California Bungalow (Swiss Chalet Mode)
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The gabled and shingled dormers punctuate the roofline of this large rectangular shaped bungalow. A second story and attic is contained under the sidefacing gable roof whose wide eaves contain knee brackets in a distinctive Swiss Chalet style. The broad porch runs the width of the house and is supported by slightly tapered wooden columns and wood bannister covered with clapboard siding and arched wood drain openings on each side of the stairway. The kitchen in the rear was remodeled and service porch added in 1934. Exterior modifications match original construction. The house rests on a concrete foundation and is covered with medium clapboard siding and shingles.

17. Is the structure: On its original site? X Moved? _____ Unknown? _____
18. Related features: Outbuildings include barn, garage, two bungalows and one 1880's wooden farm house plus various sheds, etc.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

This house has been the main residence of the 150 acre Dent Ranch since it was constructed in 1910-11 by local carpenter William Anderson. The stonework on the three fireplaces was done by Mr. Roberts. The local sandstone came from the Foster Park area and is the same as the stonework on the Foster Park entrance gate approximately two miles to the north.

John Dent, a native of Northumberland, England, and son of a prominent ship owner, came to California in 1903 after fighting in the Boer War in South Africa. He purchased the Ventura Avenue acreage in 1904 and built a large home for his family in 1910-11. Dent continued to acquire acreage in the Santa Ana and Arnaz areas while raising walnuts and apricots on the home site. Mr. Dent also raised cattled in partnership with Ventura Avenue Rancher Ed Canet and was active in the Cattleman's Association. He was also instrumental in forming a dried apricot association.

DESCRIPTION

- 7a. Architectural style: Queen Anne with Eastlake Detail
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The medium hip intersecting gable roof on this two-story residence forms an L-shape in front with a porch contained in the "L". The porch has a hip roof which is supported by turned columns and balustrade. Spindle and spool detail and decorative cutout brackets are found under the porch eaves. The newel posts and stair balustrade are also intact. Decorative bargeboard with applied circular and sunburst designs and fish scale shingles are located under main gable and dormer gable. An exterior brick chimney is found on south side and the house is covered with wide shiplap siding and vertical board skirt.

DESCRIPTION

- 7a. Architectural style: Mediterranean Style
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The school was built in stages, beginning in 1924, with the first two buildings forming an L-shape, although separated. The remaining front portion of the building was constructed in 1928. The stucco buildings are one story, except for a partial basement, have medium gable roofs with red tile. On the street side, the gables extend to form an arcade. Rounded columns with incised bands as supports. Heavy wood doors serve as classroom entrances done in Mediterranean style. Windows are multi-paned except for windows at ends of building which are elaborate with cast stone details of shells and cherubs over the window, quoins on side and brackets below.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The Avenue School was built on the site of the First Avenue School which was constructed in 1889. After oil was discovered in the Avenue area in 1914, the District became one of the richest in the State for a number of years. In 1923, it was decided to build a new school and Albert Hogsett, architect, designed the first two buildings. In 1928, enrollment had gone from 52 to 527 pupils and the firm of Austin and Fredericks was hired to design the current school with many more classrooms. The land was given to the School District by E. P. Foster together with his residence. The school is an excellent, well built structure which has maintained its integrity over the years.

18. Related features: Board and batten pumphouse rear entrance, office and other small structures including two residences.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The 51-acre ranch was purchased by Jacklin Willett in 1872 and the small house on the rear of the property was already there. Jacklin Willett, Richard Willett's grandfather, founded the Ventura Flour Mill. The citrus ranch is still run by the Willett family, which makes it the oldest ranch on Ventura Avenue still owned and operated by the same family.

All of the buildings on the property are in excellent condition and have maintained their architectural integrity over the years.

- Present Use: Multi-Family Residence Original use: Single-Family Residence

DESCRIPTION

- Architectural style: Colonial Revival
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The house was originally a two-story Queen Ann style residence but a new addition was put on the front about 1910 in the Colonial Revival style. Remnants of the earlier style can be seen at the side of the house with decorative shingles under the side gable. The two-story hipped roof addition across the front was divided into three symmetrical parts with three gabled dormer windows. The recessed front entrance is flanked by pilasters and a shelf pediment above. Windows have multi-panes. A conservatory wing is located on the north side of the house. The house is on a raised basement and is covered with medium board siding.

Locational sketch map (draw and label site and surrounding streets, roads, and prominent landmarks):

19. E. P. Foster, born April 4, 1848, Joliet, Illinois, travelled to California in covered wagon in early 1850's. The family settled in Goleta, and E. P. Foster came to Ventura in 1871. He was a sheep farmer in 1873 in Conejo Valley. He married Orpha Woods in 1874 at her sister's home on Ventura Avenue and moved her to his ranch in Conejo. He lost his sheep during the drought of 1877. He walked to Ventura and got a job as ditchtender at the Santa Ana Water Co. Mrs. Foster kept the company books. He built his home on Ventura Avenue in 1881. Mr. Foster was interested in trees and parks. He was responsible for Camp Comfort, Foster Park, Seaside Park (Ventura County Fairgrounds), and many others throughout Ventura County. In 1914 the first parks commission was set up, and Mr. Foster had trees planted along roadsides through the County. The Fosters built the E. P. Foster Library and gave it to the City. The Fosters donated the remaining \$50,000 needed to build an up-to-date hospital, the Ventura Hospital. He owned stock in the Bank of Ventura and later was bank president, a post he held for 35 years. When the bank was sold to the Bank of Italy, he became Chairman of the Board, until his death, February 12, 1932.

Mr. Foster also served on the Board of Education at Ventura Union High and was very involved in the city school system.

Mrs. Foster was President of the Athene Club, and their daughters were active in the Big Sisters League.

- Street or rural address: West Vince - 0-100 Block/East Vince - 0-300 Block
City Ventura Zip 93001 County Ventura
- Parcel number: See individual listings.
- Present Owner: various Address: _____
City _____ Zip _____ Ownership is: Public _____ Private X
- Present Use: Single-Family Residences Original use: Same

DESCRIPTION

- Architectural style: Vernacular Victorian, Period Revival of the 1920's, Bungalows.
- Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The east side of Vince Street is comprised primarily of single-story residences built in the 1920's in the Period Revival, Mediterranean and Bungalow styles. There is one residence from the 1890's that was moved in . Lots average 50' X 123' and houses have fairly even setbacks. There are no street trees.

The west side of Vince Street contains houses built in the 1920's through the 1940's. Houses are located on lots averaging 50' X 113' and have fairly even setbacks. Some houses are on raised lots and have stone walls.

18. Related features: Some mature trees.

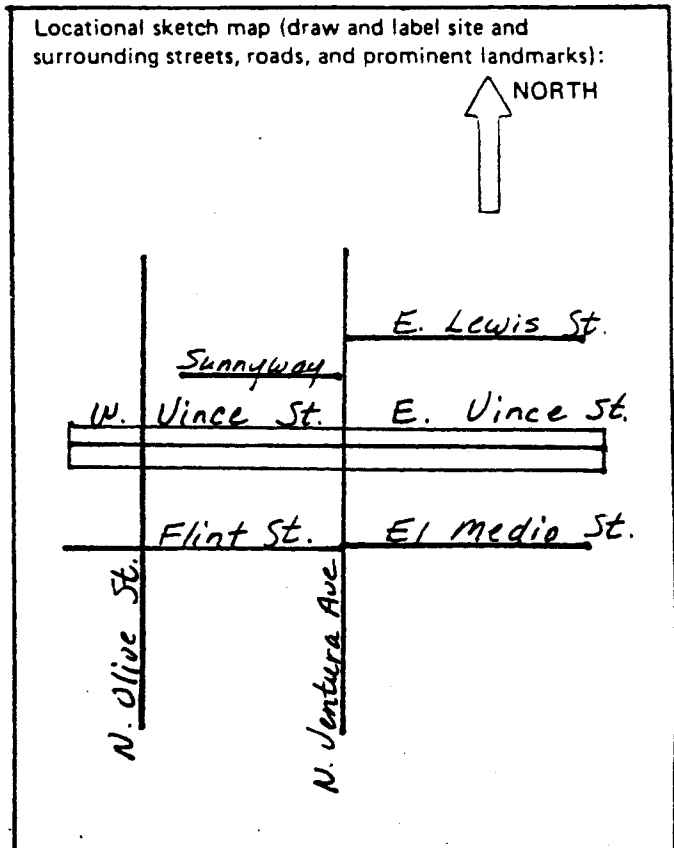

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

East Vince Street maintains a consistency of style seen in the Period Revival Bungalows of the 1920's. This side of the street was developed in the late 20's in response to the oil boom and increase in population. Many of the early residents were oilworkers.

The west side of Vince Street began developed in the late 20's but did not fill in until the 1930's and 1940's. These are examples of modest workers' houses.

EAST VINCE STREET

92 East Vince Street

69-111-75

Built in 1925, this Provincial style bungalow has a sidefacing gable roof with boxed and return eaves. This same eave treatment is found in the centered gable over the porch which is supported by Doric columns. The front door has multi-paned sidelights and front windows are in sets of three, with multi-panes in upper third. A later resident was Robert Martin.

166 East Vince Street

69-121-25

This Queen Anne Cottage, built in 1890, was moved here prior to 1928. It has a medium hip roof with offset front gable. An elaborate slanted bay is found under the front gable which contains in the gable a half round multi-paned window, cutout bargeboard and fish scale shingles. Above the bay is a frieze with rosettes applied and curved brackets with upside down finials. A marvelous sunburst design is located between the roof eaves and hipped porch roof. Front porch has been enclosed and a large incompatible addition has been done in the rear. There are square bay windows on both sides of the house. Wide shiplap siding covers the residence.

262 East Vince Street

69-121-10

This English Cottage style stucco residence has a high-pitched sidefacing gable roof with steep pitched offset front gable with exterior stucco chimney next to the gable. The raised small open porch has a slightly recessed door which is arched. The house has exposed rafters under the eaves. Built in 1927, the original owner is believed to be Paul Clise, oilworker.

283 East Vince Street

69-103-23

This unusual two-story Mediterranean style residence, built in 1927, has a main low-pitched tile gable roof over the two-story portion with a single-story sidefacing gable roof on the west. The slightly recessed arched entrance has the arch repeated in the two high multi-paned windows and the three part radiating arched window on each side. A curved wing wall acts as a formal garage entry. Many mature trees and plants and an additional residence in the rear.

WEST VINCE STREET

141 West Vince Street

68-113-34

This flat roofed Mediterranean style residence, built in 1929, has a shed tile roof over the porch which has semi-arched openings and stucco wall. Circular drain pipes act as a decorative element across the facade under the parapet wall. A stone chimney is located on the side of the house and a low stone wall runs across the front of the raised yard. Earliest owner is unknown. A later name associated with the property is Doris Figueroa.

DESCRIPTION

- 7a. Architectural style: Mediterranean Style, California Bungalow
- 7b. Briefly describe the present *physical description* of the site or structure and describe any major alterations from its original condition:

The east side of Warner Street is comprised of mainly single-story California Bungalows and Mediterranean style houses built in 1925. The houses are on lots averaging 50' X 123' and have even setbacks. There are no parkways.

The west side of Warner Street is similar to the east side, except that lots average 50' X 115'. Some of the houses on this street were built in the 1930's and 1940's.

8. Construction date: 1920's

18. Related features: Chain line fences in front yards.

SIGNIFICANCE

19. Briefly state historical and/or architectural importance (include dates, events, and persons associated with the site.)

The east side of Warner Street was developed in the 1920's in response to the tremendous growth in Ventura due in part to the discovery of oil on Ventura Avenue. The houses maintain a consistency of style built primarily in the Mediterranean and California Bungalow styles with few alterations.

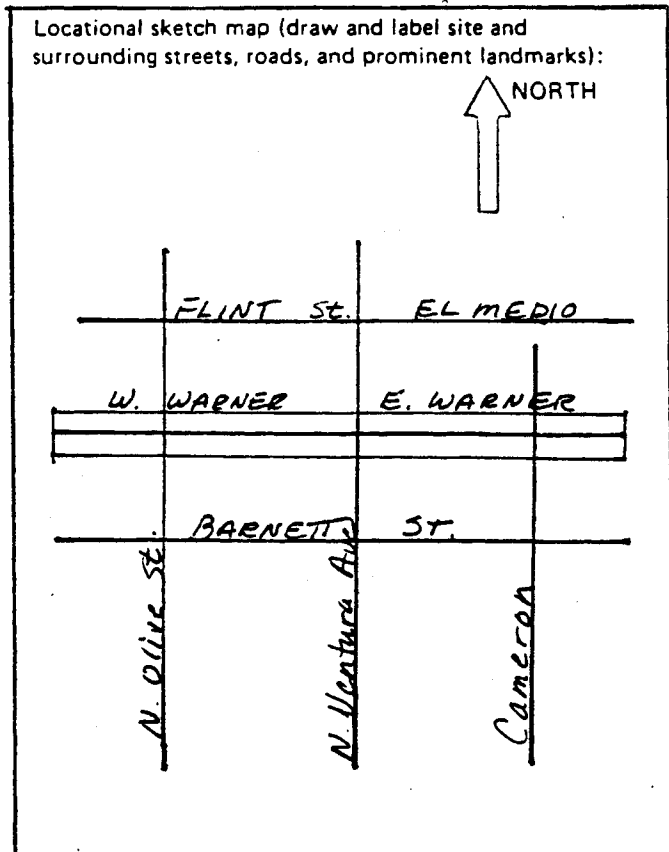

The west side of Warner Street was developed somewhat later although some residences date from the mid to late 1920's.

WEST WARNER STREET

41 West Warner Street

68-123-16

This Mediterranean style residence, built in 1927, has a most unusual porch treatment seen in the Mayan arched entry and unusual arched window treatment done in a stepped effect with raised trim cut to resemble stone, all very geometric in shape with a zigzag influence similar to Art Deco style. The remainder of the house is fairly plain with flat roof, raised parapet with tile and stucco siding. This house was owned in 1930 by S. E. McClung, a building contractor. Perhaps he built it himself or had it built for him in this unusual design.

61 West Warner Street

68-123-18

Built in 1925 for Edward C. Simpson and Louis B. Simpson, oilworkers, this flat-roofed Mediterranean style residence has a raised parapet of stucco and tile. A gabled tile roof covers the entry and a low wall extends to form a patio on one side. Porch openings are arched. Arched niches are found in each corner near the top.

127 West Warner Street

This California Bungalow, built in 1923, has two front facing gables. The lower gable covers the front porch and has decorative strutwork and tapered wood columns. House is covered with medium clapboard siding and has exposed beams and rafters under the eaves.

EAST WARNER STREET

188 East Warner Street

69-132-04

Built in 1927 and occupied in 1930 by Harry Ve Del, a machinist, this Mediterranean style residence is square in shape with a flat roof. The facade has a raised parapet in the corners with a small shed tile roof in between. The gable tile roof entrance is supported by heavy carved stucco brackets which form square pilasters underneath. There is an elaborate wrought iron railing on front stoop.

250 East Warner Street

69-132-11

Built in 1927, this modest bungalow has a medium sidefacing gable roof with centered front gable supported by simple square columns. Exposed beams and rafters are found under wide eaves and house is covered with narrow clapboards. A later owner was Joe Porter.
