GALORE COMMENCES DIAMOND DRILL PROGRAM ON DOS SANTOS

Vancouver, BC: Galore Resources Inc. (GRI-TSX.V) announces that it has commenced a 3,500-meter diamond-drilling program on its wholly owned Dos Santos Property in Zacatecas State, Mexico.

The first drill hole began testing the fault/vein system that is prevalent on Galore's San Jose claim. Galore's new geological team has selected and prioritized individual targets identified through structure-based geological mapping, geochemical sampling, and statistical processing. The program was laid out to test the newly identified individual vein targets at projected depths of 100 to 400 meters.

Craig Byington, Galore's Vice President of Exploration and its Qualified Person as defined by Canada's National Instrument 43-101, is responsible for supervising the Dos Santos program. Octavio Gonzales, Galore's Regional Exploration Manager, is managing the Dos Santos exploration program.

Galore Resources is a British Columbia-based exploration Company that has assembled a leading group of industry professionals to acquire and explore for promising deposits with an emphasis on gold in Mexico.

GALORE RESOURCES INC.

"Mike McMillan"
CEO and Director
