RADIANCE

A NEW LEVEL OF SHINE WITH CARNAUBA

"Top Line Chemicals is dedicated to your bottom line performance."

Radiance is a proprietary innovation made from the finest grade of Brazilian carnauba wax. The high foaming formula delivers uniform wax and polymer dispersion, creating unequalled shine and protection with a tropical fragrance. Radiance protects all automotive exterior surfaces from UV degradation, oxidation, bugs, tree sap, acid rain and other environmental threats. The following represents recommended concentrations according to application.

Automatic Car Wash: best applied through most controlled foaming devices. Typical application ranges from 20 ml – 50 ml per vehicle depending on desired shine. It may also be applied through v-jet or k-nozzle arches at approximately 1:70-1:128 depending on dwell time before final rinse.

Hand Application: best applied through a hand foamer using an appropriate dispensing tip (1:70-1:128) depending on adequate water pressure. After vehicle has been properly washed and rinsed apply from the bottom-up, and properly coating all automotive exterior surfaces. Allow product dwell time approximately 1-2 minutes and then rinse thoroughly.

It may also be applied with a spray bottle or garden sprayer at approximately 1:128 dilution and follow the same procedure as shown above.

Alternatively, it may be applied in a dry application: **1)** ensure that all surfaces are clean and free of any abrasive material, **2)** dilute product approximate 1:256 (1/8 oz per qt spray bottle), **3)** spray onto area to treat and wipe dry with microfiber towel.

Consult with your Top Line Chemical Solutions representative for maximum efficiency and results.
