Organize the unorganized

- HOME
- WE'RE RECRUITING *Account the unaccountable*

PoS terminals are expensive, bulky, fragile and complicated - making them useless for the small and micro retailers. This should not imply that the benefits of a PoS should be beyond their reach. The bompod way is to usher this technology to everybody's fingertips.

Go cashless

Exposing vendors to all modes of payment including UPI, debit/credit cards, digital wallets and virtual currencies

UI for the illiterate

No training coupled with highly intuitive interface makes literacy a redundant barrier to use Bompod PoS.

SNAP bills

- HOME
- WE'RE RECRUITING An image says more than a thousand words. Simply take a snap of your items and refer to it later when doing "hissaab".

SMS receipts

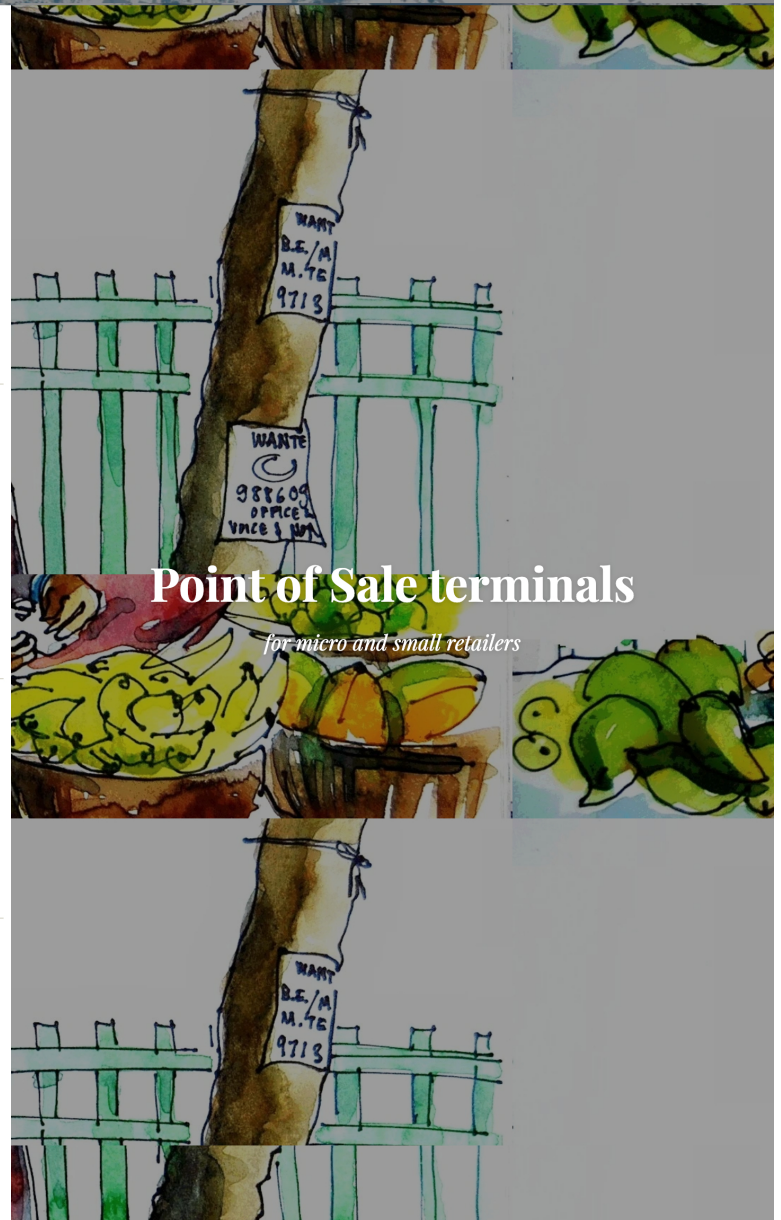

Customers get the benefit of receiving a concrete proof of transaction while the vendor gets a branding opportunity

Customer Loyalty

Identifying and rewarding frequent/loyal customers, seamlessly

Analytics

Advanced and insightful sales analytics presented in the simplest manner

The Bompod F&V PoS

Robust IP67 crate sized device
Requires minimal change/training for vendors
Designed to maximize operability for illiterate users

The future

Imagine a world where you walk up to a street vendor - whip out your credit card and walk away with your purchase certified with a proof of transaction.
