

*Your Choice Today Shapes a Greener World Tomorrow*

To whom it may concern,

I write to formally introduce Phod the company and Tamara and Jason the owners of this company, as our current collaborators in Queensland.

Pureworx is a true 'Green' product that cuts through grease and grime, removes bacteria and is dilutable. Current chemicals usage is becoming less tolerated as they exacerbate OH&S standards and cause sickness in many instances. Workers and owners want change and Pureworx provides it.

Manufactured in Melbourne and sold throughout Australia, we are becoming the 'right choice' when it comes to change. The world's largest food retailer has started to make a change here in Australia, allowing licensees to start using Pureworx. Being Haccp certified food safe is certainly one reason, but two others stood out for them. After exhaustive tests it was proven that there were much less OH&S issues, in fact staff preferred using Pureworx as their skin was not harmed in any way, also the jobs are done quicker saving time, which in turn saved money, one month's supply of Pureworx was paid for in two weeks in savings.

One comment received was "Our shops have never been so clean".

Another comment sent as an email to other licensees...

"About 2 years ago, I came across this company called Pureworx at a Hospitality show. They have a natural product that is amazing at dissolving grease. I have been using this in my stores for over a year now and my teams are very impressed with its effectiveness. "

We would appreciate the opportunity to partner with you in a greener tomorrow. Jason and Tamara, have our full backing and both deeply understand the way Pureworx does its magic. I am always available for any questions and comments.

Best regards

Robert Erskine – Principal and founding Director
