## The Art of Elevation

This large subterranean space has recently been converted for use as a private art gallery. Access has been provided by this Mylyft model TB2000 with off-centre platform configuration to help protect the adjacent artworks by bringing the user away from the wall.

The platform has a 50mm deep tray to accommodate the slate flooring, the lift is finished in RAL9005 PPC high gloss paint.

To aid installation the lift had to be dismantled and then reassembled in the basement.

Beautiful in Bronze

## Beautiful in Bronze

Bronze pearlescent metallic PPC with aged bronzed push buttons, smooth roller blind scissor protection, sealed platform tray to accommodate a poured resin floor finish and custom upper level gate to complement the contemporary bronze fin screens that feature highly in the interior styling of this central London office reception area. This Mylyft model TBD2000 demonstrates well the use of special surface coat finishes. In addition to a large variety of bronze metallics we also offer gold, brass, copper, gun-metal and other industrial colours.

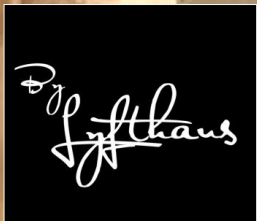

*Platform Lift Couture*

This bespoke Mylyft Cube model is located directly above the crypt of this incredibly ornate cathedral. The pit depth required was just 120mm. The design is intended to be honest to the original architecture yet complements the space and the juxtaposition of styles works beautifully.

Does this location look familiar? It was used as a set for the first Harry Potter movie!

Installed within a brand new corporate HQ this Mylyft model TLD2000 is one of two units. It has a timber floor and battery backed power pack. This lift has a 1450mm raised height, 1450mm x 1100mm platform and concertina bellows to three sides. This lift travels from ground to first floor mezzanine.

This unit travels from ground level down to undercroft parking level, a vertical distance of 1600mm. The platform is finished with Italian tiles to complement other surface finishes.

- Bespoke platform configurations
- In-house design service
- Three year parts and labour warranty

Like all pioneers, the Lyfthaus founders' approach to platform lift design had to be unique. To be different. They wanted Lyfthaus to stand out by standing for something different and for many years the company has done just that. Year after year, new platform lifts and refreshed designs have been introduced, each as impressive as the last, keeping pace with continually evolving architectural trends. As time has progressed a company style has emerged and now the Mylyft Collection created by Lyfthaus of Cambridge is internationally recognised as the open aspect platform lift industry's leader in stylish contemporary design, technical innovation and bespoke adaptability. All proudly made near Cambridge, England.
