We **rise** by lifting others. Lyfthaus of Cambridge

Lyfthaus Limited, Steeple Bumpstead, Cambridge, CB9 7BN. Tel 01440 731111 lifts@lyfthaus.com www.mylyft.com

The gold lions that stand proudly outside this ornate central London property set the scene and are a measure of the opulence you will find within. Grandeur at every turn - only the very best is ever considered.

Made in England for a Great British Institution

The original platform lift in this historic and very British location in the heart of The City of London had been in use for many years, it was time for an up-grade. Due to very tight and challenging access the original lift had to be broken down to remove it by hand from the lightwell basement and the new Lyfthaus model Mylyft TBD2000 Autograph with custom burnt bronze metallic PPC had to be delivered in parts and then assembled on site.

In addition to bespoke paintwork this lift has matching stone flooring, intercom and autodialler, a built up floor frame to raise the lift within the lightwell and off lift matching grab bars.

The lift is used between ground floor and entrance level, a vertical distance of 1400mm. The platform size is 1800mm x 1150mm.

Platform Lift Couture

NEW

Making beautiful spaces
beautifully accessible

Mylyft premium open aspect platform lifts
can be found in Britain's finest buildings,
architectural icons and A-list properties.

High on Style

Low Visual Impact

Making beautiful spaces beautifully accessible

The new Mylyft Connex has been designed for low rise access below 600mm of travel within prestige property - low visual impact yet highly stylised. This adaptable lift can be clad with your own choice of material to complement your interior styling. This includes: stone, slate, tiles, marble, carpet and wood.

The platform size and configuration will be designed to suit your space. All lifts have integrated automatically rising edge protection. Options include grab bars with integral controls and low level barriers for open applications and independent use.

Platform lift Couture

Inset: Lift shown at basement level and upper level. Access gates in frameless glass with black gate posts and an adaption of the street side balustrade including the interlock mechanism

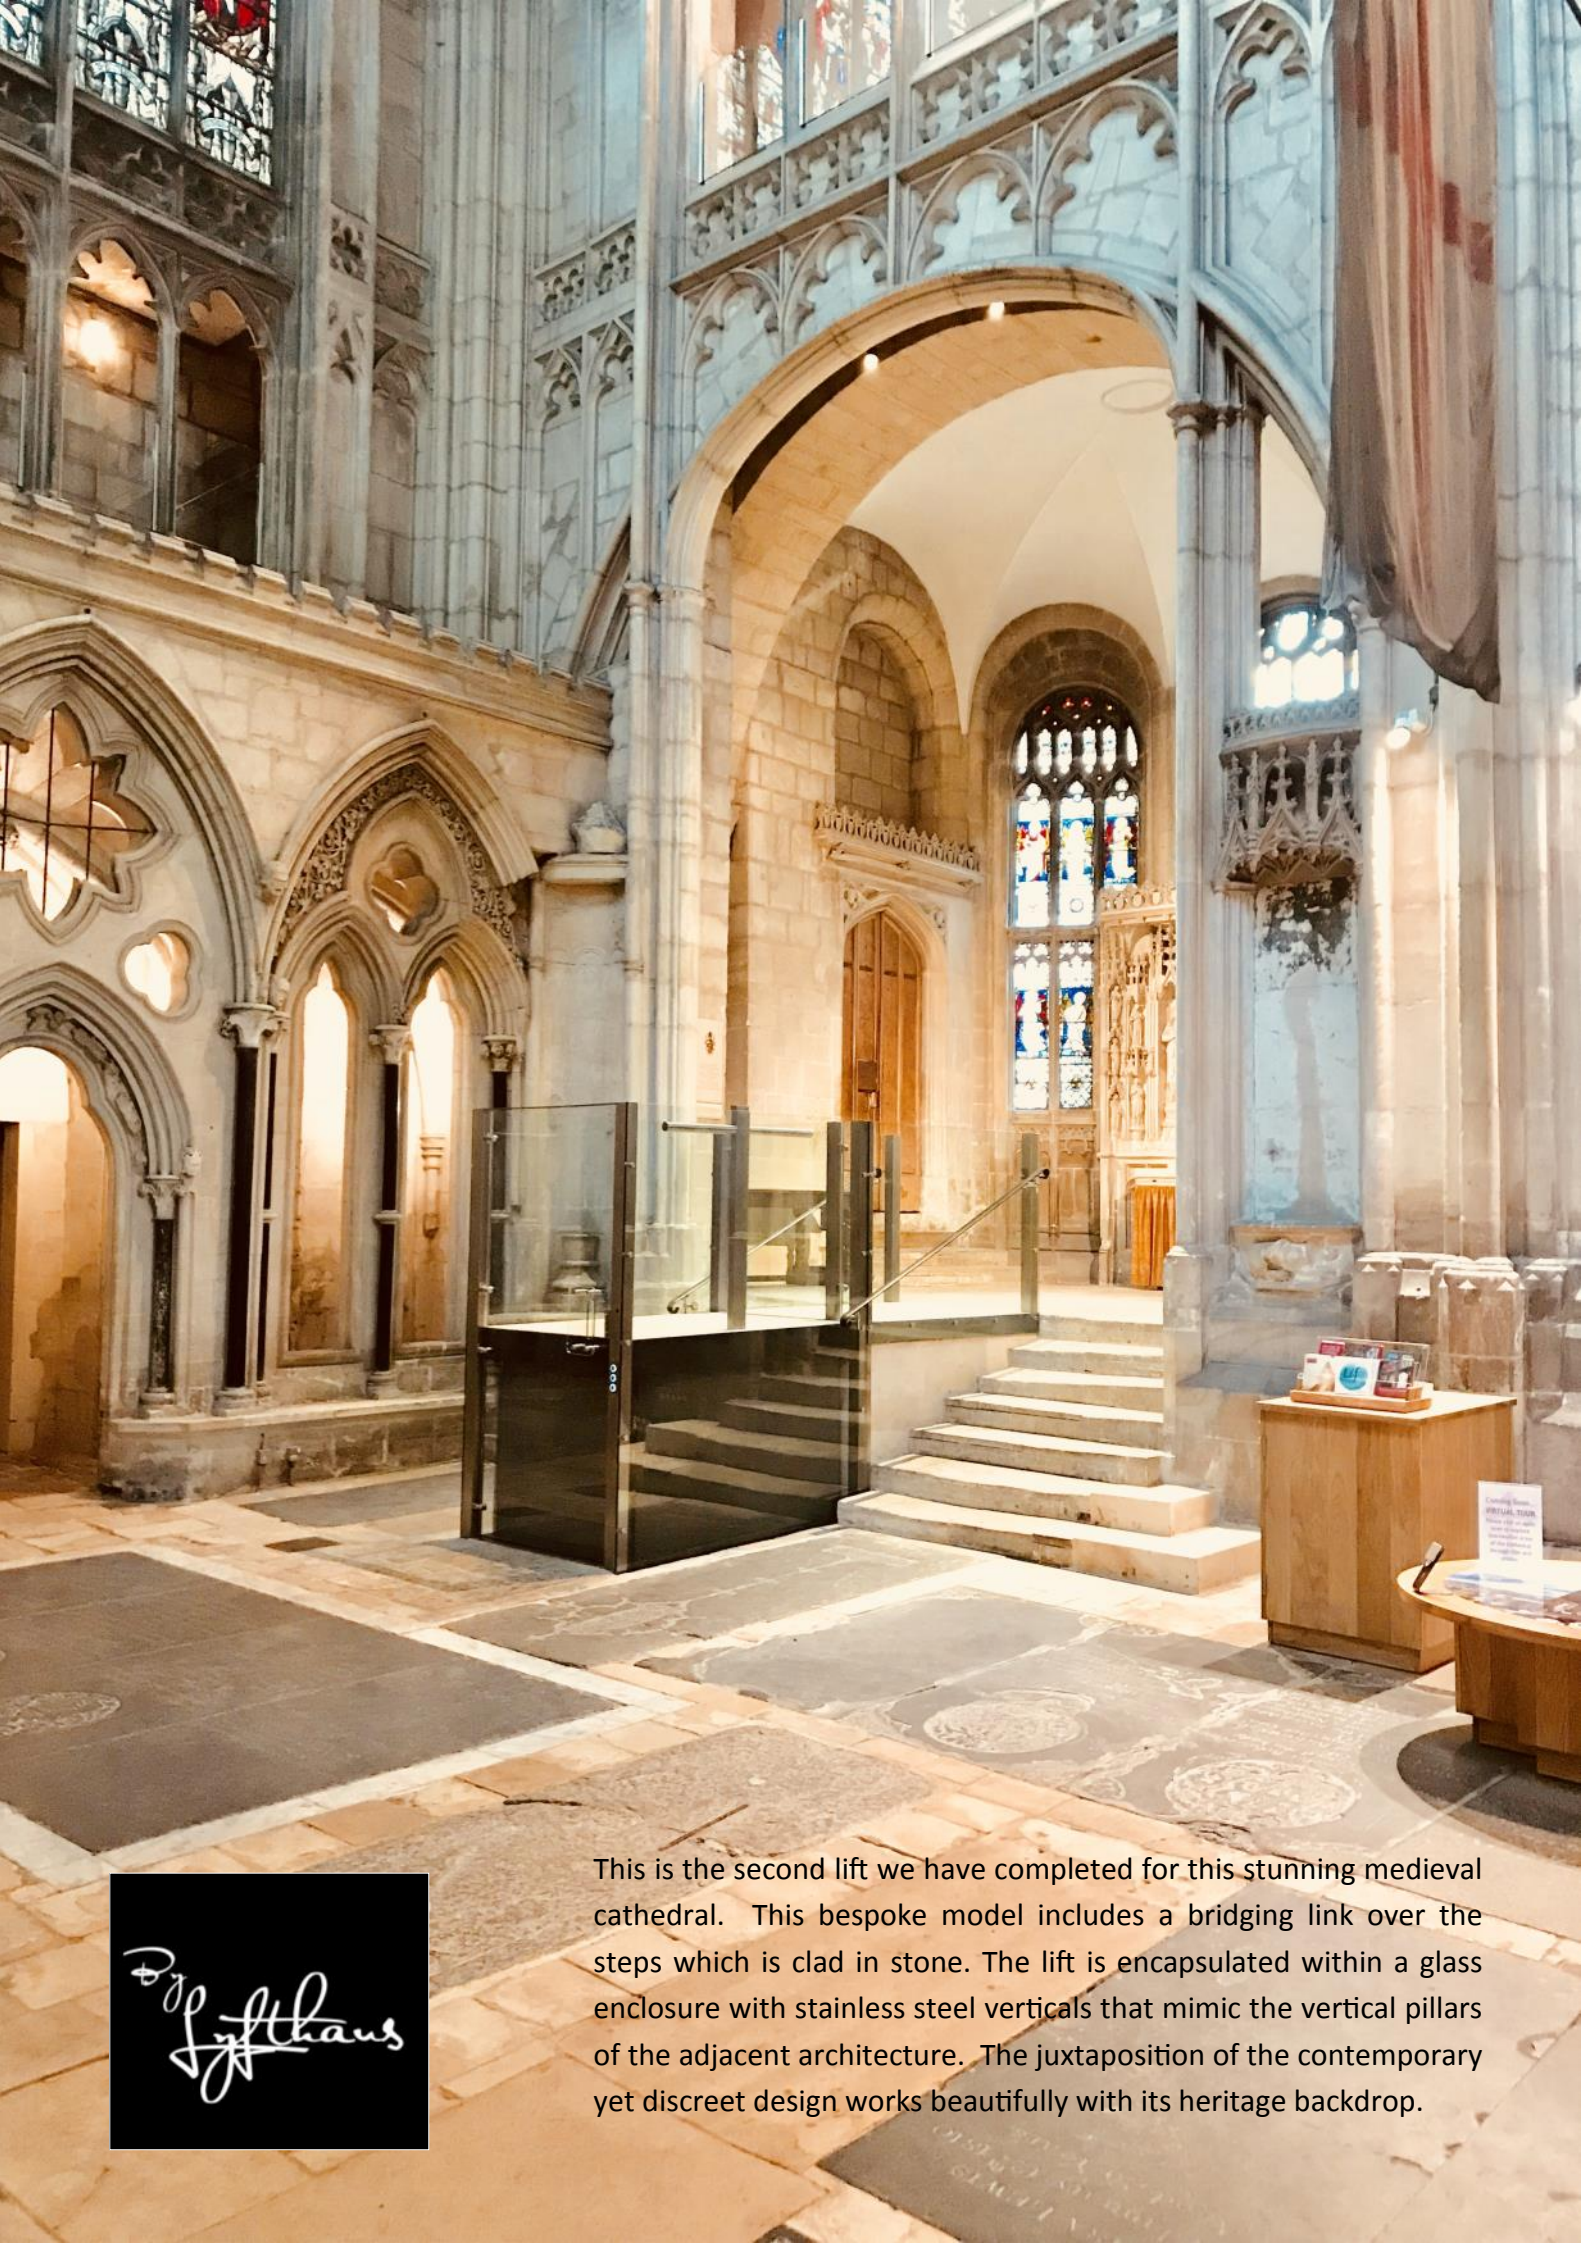

Harley Street Private Hospital

Lyfthaus lightwell lifts have set a planning precedence within central London where we now have lifts installed in every borough. From street level our lightwell basement lifts are virtually invisible to passing pedestrians. Our specialists adapt the street side balustrade to form an exceptionally, fully compliant interlocked gate. The lift is designed to match the local architecture. This lift is finished in black with a poured concrete platform to complement the lightwell floor surface

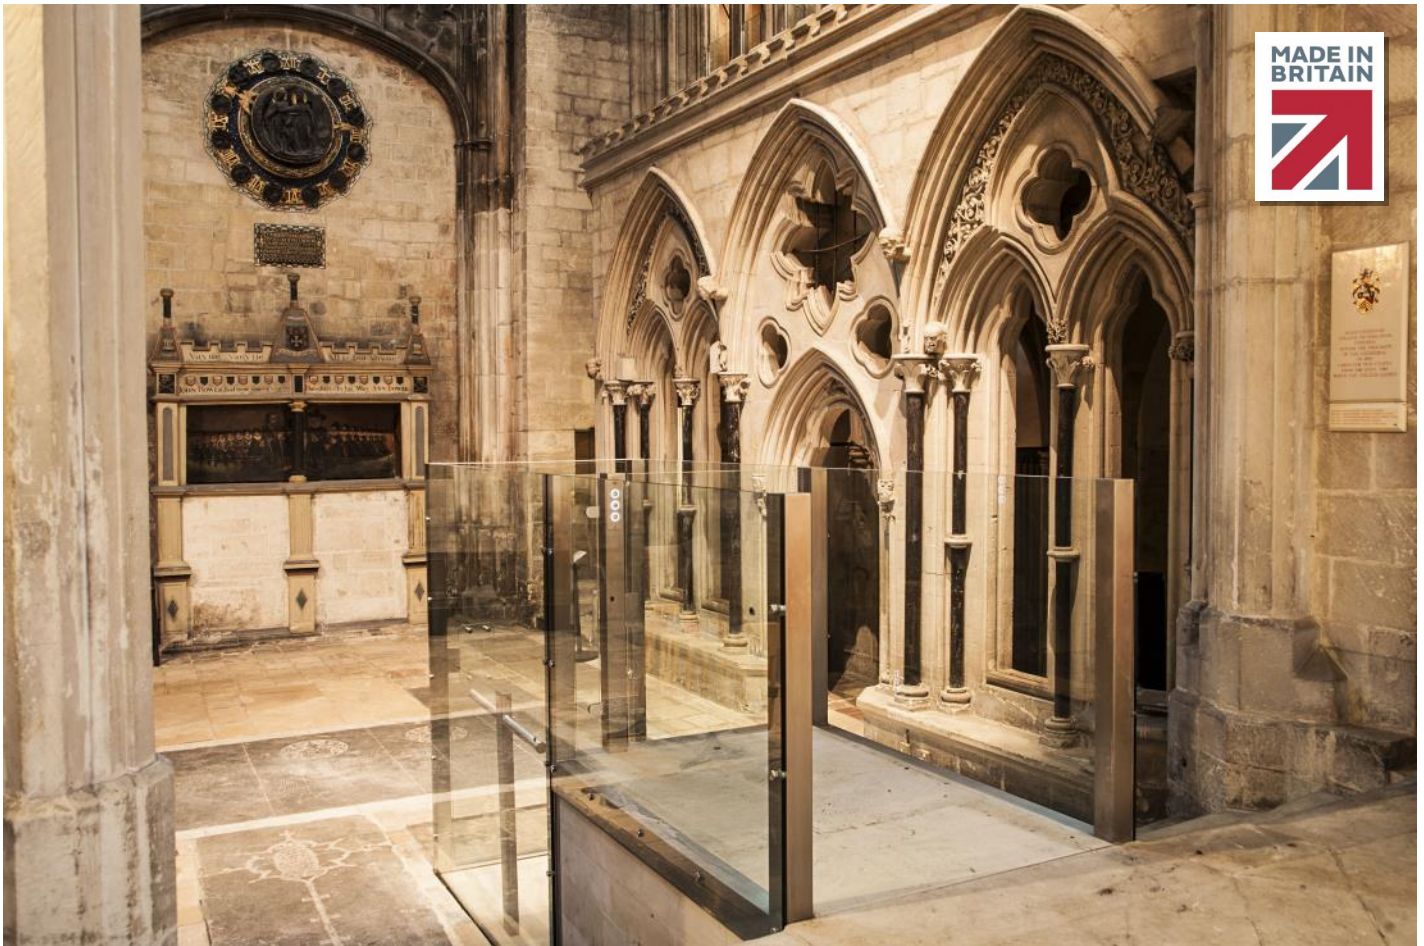

Harley Street Private Hospital

Platform easily accommodates the patient in a wheelchair along with the healthcare professional

This is the second lift we have completed for this stunning medieval cathedral. This bespoke model includes a bridging link over the steps which is clad in stone. The lift is encapsulated within a glass enclosure with stainless steel verticals that mimic the vertical pillars of the adjacent architecture. The juxtaposition of the contemporary yet discreet design works beautifully with its heritage backdrop.

The Mylyft SOLO is the first in a whole new category of platform lift (Standing Compact) which has been designed specifically for the vast majority of mobility impaired people who are capable of walking but require a helping hand with obstacles. This compact lift has a 600mm raised height and is suitable for private residential property and workplaces.

- BS6440/2011 and EN1570 compliant
- Low profile, single, double and triple scissor mechanism lifts to heights of 3M
- 500Kg load capacity + 500Kg floor finish capacity (stone, slate, marble etc)
- Platform sizes from 1400mm x 900mm upwards plus bespoke options
- Frameless glass or bespoke gates and barriers
- Stainless steel, bronze, copper, brass metallic pearlescent and all RAL code paint finishes
- Bespoke platform configurations
- In-house design service
- Three years parts and labour warranty

Like all pioneers, the Lyfthaus founders' approach to platform lift design had to be unique. To be different. They wanted Lyfthaus to stand out by standing for something different and for many years the company has done just that. Year after year, new platform lifts and refreshed designs have been introduced, each as impressive as the last, keeping pace with continually evolving architectural trends. As time has progressed a company style has emerged and now the Mylyft Collection created by Lyfthaus of Cambridge is internationally recognised as the open aspect platform lift industry's leader in stylish contemporary design, technical innovation and bespoke adaptability. All proudly made near Cambridge, England.
