# **BUILDPRO SYSTEM**

BuildPro offers a complete line of heavy-duty and ultra-duty tables for work holding in metal fabrication and woodworking. Our tried and tested system is the fastest method of locating and clamping your workpieces. The system consists of a working surface machined with equally spaced boreholes, allowing you to slip-fit clamps, stops, spacers, and other work holding tools into place.

#### **ALPHA TABLES**

The new heavy-duty table line from BuildPro; it features 5 sides fitted with 5/8" diameter boreholes for more versatility and expandability than before. Maintaining industry-leading requirements for flatness, squareness, and dimensional accuracy. Also available in ultra-duty 28 mm configurations.

#### **MAX TABLES**

Our single-sided heavy-duty tables feature boreholes on the top surface and feature patented self-locating and reversible table top plates. Available in standard and nitrided tabletop finishes.

#### MAX SLOTTED TABLES

Our slotted, single-sided heavy-duty tables feature open slots between the top plates. Providing extra versatility, allowing you to slide clamping tools or pliers using T-Slot adapters or Sliding Channel on the open slot edges as clamping surfaces. Available in standard and nitrided tabletop finishes.

#### **MOBILE WORKING STATIONS**

Get the best of both worlds; the functionality and quality of BuildPro tables with the mobility of a cart. The Rhino Cart and Manipulator feature a replaceable heavy-duty tabletop that accepts all 5/8" diameter TM fixturing components - giving you the ultimate, compact mobile working stations.

# THE NEW FIVE-SIDED ALPHA WELDING TABLE

Introducing the Alpha series, the toughest, flattest, hardest working welding tables from BuildPro by Strong Hand Tools.

The Alpha family consists of our 5 sided table systems, combined with our patent-exclusive, reversible, and replaceable top and side plates.

Precision ground steel plates, with CNC machined Ø5/8" holes in a 2" grid pattern for locating, positioning and mounting BuildPro clamps and accessories.

Plates can be reconfigured to expand the width of the table for larger projects. Heavy Duty Leveling Feet ensure proper leveling of the table on uneven surfaces.

Increase quality, consistency, and productivity while reducing scrap and setup times for repeating jobs.

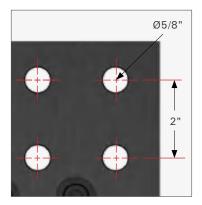

# ALPHA TABLE OVERVIEW

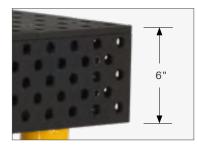

# **REVERSIBLE Self-Locating Top & Side Plates**

All BuildPro welding tables feature precision machined self-locating steel plates and reversible top plates; this enables each table plate to be removed and flipped 180 degrees to expose a new working surface if the top side has been damaged or worn down.

# Alpha Table Accuracy

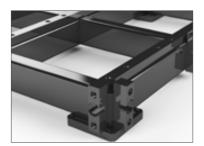

Table flatness:	±0.005" per 24" x 24"
Hole spacing:	2.000" ±0.001
Hole diameter:	0.625" + .002
Plate thickness:	0.47" ±0.004

# Alpha Tabletop Side Height

The new five-sided tables feature a 5-1/2" side plate combined with the top plate to create a 6" height.

Alpha table side plates feature an extended 5 borehole pattern for added precision and adjust-ability.

# Plate Mounting Detail for Side Plates

Side Plates also use self locating bushing system.

# Nitrided (Heat-Treated) Tabletop

All top and side plates of alpha table are constructed from heat-treated steel, hardened to 550 Vickers, and finished with a nitrite coating with a case depth of .0004-.0008".

# MANIPULATOR

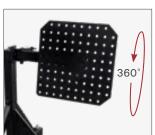

The manipulator uses two rotating axis and one tilting axis to position your work in the ideal spot. For best results, always position the center of gravity of the work piece in line with the two rotating axis to achieve low resistance repositioning.

- Access difficult joints without putting yourself in an awkward position
- Position the joint for fastest technique. Go from vertical up or overhead to a flat or downhill weld. Get the job finished with less mental and physical fatigue.
- Fast repositioning. No need to un-clamp.

\* We also offer a 30-pc. fixturing kit (TUK5300) to make your set up on the new manipulator fast and accurate, minimize variables for repeat jobs. See pg. 64 for kit details.

# **ROTARY POSITIONERS**

# **ROTARY POSITIONERS**

Mount your BuildPro<sup>®</sup> or Alpha 28 Welding Tabletop to the BuildPro<sup>®</sup> Rotary Positioner for plane rotation of your work surface. The low backlash gear drive allows for smooth operation, stability, and controlled turning and positioning.

The worm gears combined with center of gravity positioning minimizes the effort required for rotation while preventing free rotation of the table from gravity. A faceplate with 15° increments provides positive manual locking. The BuildPro<sup>®</sup> Rotary Positioner allows you to rotate your weld fixture to the best ergonomic position for worker safety,

comfort, and reduced operator fatigue.

The BuildPro<sup>®</sup> Rotary Positioner is universal, with an adjustable base to accommodate most standard BuildPro<sup>®</sup> or Alpha 28 Welding Tabletops. The Positioner features four swiveling, locking casters, and four leveling feet for setup at dedicated or alternating locations in the shop.

#### **T-POST CLAMPS**

Place the Adjustable T-Post Clamp in any of the Ø5/8" holes on the BuildPro<sup>®</sup> Tabletop or Heavy Duty Riser Blocks for vertical hold down clamping.

Adjust the clamp arm along the vertical or horizontal axis for each unique hold down application. Adjustable arm provides precise clamping location by sliding the spindle to any desired pressure point.

Move the Stop Ring as needed to set the height of the clamp.

#### **INSERTA CLAMPS**

Place the Inserta Clamps into the 5/8" holes on the BuildPro<sup>®</sup> tabletop and squares for fast, easy clamping. Clamp in the vertical or horizontal position at any height.

The Ratchet Handle Model is ideal for tight space clamping, and the ratchet mechanism ensures rapid, vibration and torsion resistant clamping.

Clip the optional Top V-Pads (*pg. 37*) onto the top spindle to clamp round or angled stock. Remove the clamp arm by depressing the spring stop, and slide the Sidekick attachment (*pg. 37*) onto the clamp bar, followed by the clamp arm, for two point horizontal and vertical clamping force.

#### **MOUNTING ADAPTER** for the Inserta Pliers

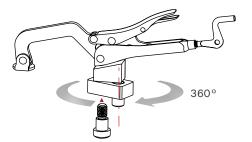

It allows you to precisely place the tip of the Inserta Pliers anywhere on the table surface.

The Mounting Adapter swivels 360° and provides a 1" extension of the Inserta Pliers base for the extended reach, or retraction, of the Inserta Pliers as needed for precise placement of the clamping pad.

Simply replace the existing stud on the Inserta Pliers with the swivel Mounting Adapter.

#### SIDE PUSH CLAMP XL

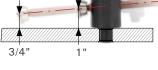

The side push clamp is designed for applying lateral pressure with a slight down force to keep the workpiece from lifting or rolling upwards.

Extra long spindle insures you can reach anywhere on the table. Copper plated spindle resists weld spatter.

A special flipping feature ensures that you can always get the pad placed at the right height, which is useful for smaller material sizes.

#### **FASTENERS**

#### **BALL LOCK BOLTS**

#### An essential time-saving fastener.

All Ball Lock Bolts are a time-saving and efficient method of locating and fastening fixture elements to the tabletop without having to reach underneath the table.

Insert the Ball Lock Bolt over the fixturing element and turn the knurled head with your hand for initial positioning.

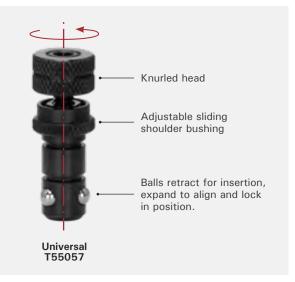

The Ball Lock Bolt consists of three locking steel balls in the bolt shank that move outward to lock against the bottom chamfer of the table plate, pulling the fixture components securely downward and tightening them in place. Once all the Bolts are positioned, tighten the socket head cap screw top of the Bolts with a light turn of a hex wrench. Ball Lock Bolts release quickly from the Bolt top with a turn of your hex wrench.
