

Lifewater Australia

Portable, re-usable water purification filter for direct use and for a foldable bottle and pouch for travel, hiking, camping, boating, recreation vehicles, outback, daily domestic use, military, third world safe drinking water and disaster relief. The patented filter also fits used most regular PET drink bottles and thus saves on pollution and trashing caused by most plastics once only use.

FOLDABLE BOTTLE AND FOLDABLE POUCH

The Life water filter is compact and with mouthpiece at the top is used like a straw to purify direct from surface water. The filter can also be attached to the pouch or to re-cycle a clean bottle after either is filled with water and the mouthpiece used to draw filtered water from the bottle.

Removable and re-usable anti bacterial and patented hollow fibre membrane and antibacterial materials filter for removal of high molecular-weight substances, colloids, proteins, bacteria, pyrogens, and other organic/inorganic polymeric molecules in the water.

The filter cartridge can also screw on to single used PET water bottles for their re-use, thus saving their trashing as waste.

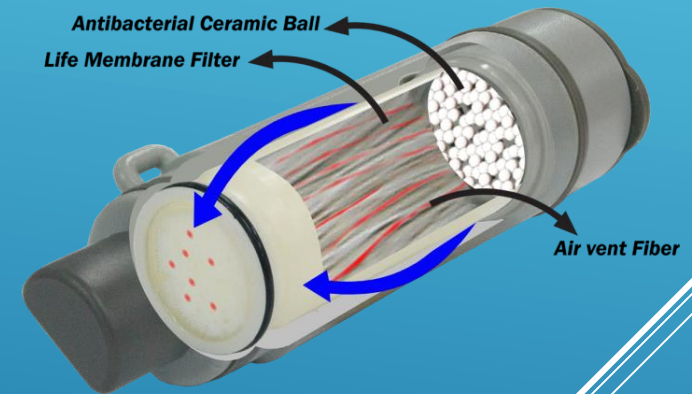

A filter can purify 800 litres before replacement is required.

Authentic Antibacterial Ag Ceramic Ball prevents pollution inside the water filter.

FILTER AND FOLDABLE BOTTLE

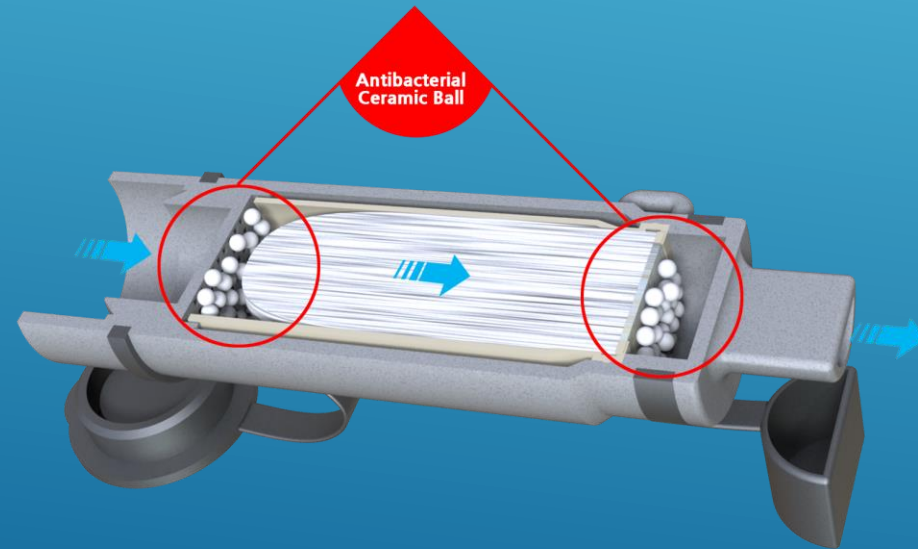

Attractive retail package containing filter, folded bottle, to purify 400mL of water, lanyard and carabiner clip.

FILTER AND FOLDABLE 3 LITRE POUCH

Purifying the water by gravity. When full the three litre pouch is easy to carry or hang up and, when empty, it easily folds up.
