Catheterization Tray

Protection you can count on

Footprint Medical catheterization trays feature high quality components to allow clinicians to provide optimal neonatal care.

Let us show you the Footprint Medical difference... Talk to a representative today!

- Neonatal general procedure tray especially for umbilical vessel catheterization
- Compact bi-level tray design for ease of storage and transport
- High quality disposable stainless steel instrumentation
- Skin Prep, Umbilical Tape, Stopcocks and Suture provided in easy access compartments

*Umbilical catheters available separately

Safety Products

Safety Scalpel and sharps protection designed to lock onto and secure contaminated needles.

Medication Labels

Color coded Medication/Line labels and stopcocks.

Neonatal Micro Forceps

Both half and full-curved options provided for dilating small vessels.

Maximum Barrier Drape

Exclusive "Hybrid" drape provides visualization of neonate and prevents contamination.
