

The Miracle of Helping

MedPlus DME

At its greatest, the medical community comes together not just to help patients but to help each other. Little miracles of kindness, generosity, and aiding the people that need it most happen every day. At MedPlus, we love being part of those miracles.

As one of the leading suppliers of Durable Medical Equipment in Southern California, MedPlus serves as an extension of the exceptional care you already provide. Our mission is to provide seamless service to your patients every time. We proudly partner with clients throughout Los Angeles, Orange, Riverside, and San Bernardino Counties. Our services include:

- Delivery of our equipment to our clients 24 hours a day, 7 days a week, 365 days a year.
- 24-hour phone support available to your staff and nurses for troubleshooting assistance with our equipment.
- An on-call Respiratory Technician, available at all times, at little cost to you.
- Delivery at any time of day, including weekends, at no extra charge.
- Stat delivery within 2-4 hours (must include respiratory equipment). Urgent delivery requests are handled the same day. Regular delivery requests will be handled accordingly.

In addition, because we believe so strongly in miracles a percentage of our net profits are donated each year to **HIMala**, a charity organization devoted to providing medical support to the Philippines.
