

A Witch Called Wanda

That naughty witch called Wanda
Over her spells she did ponder
She could buy most ingredients online
Plump green toads covered in slime
Two wings of a horseshoe bat
Decanted essence of a feral cat
Everything available on Amazon Prime
Always delivered, usually on time

The cost of living crisis started to bite
Wanda's monthly bills gave her a fright
No more cauldron bubbling away
Would an air fryer save the day
The toads, the bats and some human hair
All to be cooked with just hot air
But little did she realise things cooked double quick
Faster than she could shake her own broomstick

The spell's strength was also double
And this was how she caused so much trouble
You see she had a wish to release a cat
Who's keeper was acting like a stupid prat
But what happened she didn't plan for
Comings and going through the famous door
Larry was now causing a furore
Pushing out Tory after Tory

Then followed all the fuss
Which HE made for the doomed Liz Truss.
Wanda checked her books for reverse
Before Richi fell under Larry's curse
Did she manage it, is it to be
Sadly we will just have to wait and see
