

I am the very model

(with apologies to Gilbert and Sullivan – I am the very model of a modern major general)

I am a very stable genius, a modern politician
I'm the only person who has an important mission
Build the wall, lock her up, the truth is evident
I have done more than any other President
My button is much bigger, powerful and works
Not like North Korea's and that little squirt
I give myself an A+, I won by more than anyone
Make America Great Again – you know I'm the only one
Nobody has a better respect for my supporters
The vote was rigged, they came from every quarter

With my big beautiful brain I defy the lies, fake news
With my big beautiful brain I defy the lies, fake news
With my big beautiful brain I defy the lies, fake news

He shines a light on idiocy and speaking out of turn
Even though he lost the election, this modern politician
