

## FEATURES

- Large 5in X 11in base plate to accommodate many sizes
- Six Strong Neodymium Magnets to securely hold the Vise Bases to the Base Plate
- Reversible Vise Wheels for Recessed Lip or Flush Edge Lip Clamping
- Reversible Vise Base
- Circuit Board Vise Wheels Rotate a Full 360 Degrees
- Easy Tighten Thumb Screws

## INSTRUCTIONS

- Place the edge of circuit board into the clamps edge, making sure no components are underneath the clamp jaws.
- With the rotation screws slightly loosened, tighten the clamp screws to grip the circuit board.
- Once the clamp jaws are tightened and the rotation screws slightly loosened place assembly onto the base plate.
- Rotate the circuit board to desired angle and tighten rotation screws

## Part # MWCBV

(PATENT PENDING)

The MetalWorx Circuit Board Vise was specifically designed for locksmiths by locksmiths doing eeprom work. It is by far the most versatile and secure vise on the market today.

(PART# MWCBV) (Patent Pending)

The MWCBV was designed to securely hold any size automotive circuit board in virtually any position.
