

PARTS INTERCHANGABILITY FOR HISUN 250

- **Battery:** GTX9BS
- **Head light bulb** NON LED: H11
- **Spark plug:** DR8EA (others cross reference will work)
- **Front wheel bolt pattern:** 4x156
- **Rear wheel bolt pattern:** 4x115
- **Front brake pads:** EBC FA54
- **Rear brake pads:** EBC FA83 or EBC FA 372. See below for more info
- Front Hubs and front rotors the same as Yamaha banshee
- Front shocks 15.250" or 387mm center to center
- Rear shocks 17" or 432mm center to center
- Rear swing arm bushing dimensions: 34mm OD/ 45mm length/12mm ID
- Throttle body 34mm
- **Chain:** 520 pitch with 76 links OEM. I would suggest going with a high quality O ring
- **Sprocket size:** 2015 – 2016: 11 tooth front and 38 tooth rear, and that is a 3.45 ratio
- **Sprocket size** 2017-newer: 11 tooth front and 42 tooth, this is due to internal gear change
- **Oil Filter:** You can use K&N HP-1003 or Fram PH4967 which you can source at your local auto parts store.

Hisun uses different rear brake calipers on the 250 UTV. To know the right one you have, see the photo below:
