(see system options on page 2)

TANK 1 Activated Carbon (HAC)

HAC is an outstanding material for successfully reducing free chlorine from water supplies. The end product is clean, fresh water with no objectionable taste or odor characteristics. Additionally, HAC can be used for filtering waters having a wide range of pH levels and will impart a high “polish” to the filtered water. HALO HAC is NSF/ANSI Certified under NSF Standard 42.

AVAILABLE TANK 2 OPTIONS

OPTION 1 (10 YEAR WARRANTY)

10 year warranty on carbon media
10 year warranty on HALO ION

HALO ION Inline Water Conditioner

Our patented HALO ION In-line Water Conditioner uses multi-reversing polarity permanent magnetic fields to alter the molecular structure of positively and negatively charged ions of dissolved calcium and magnesium. This causes the hard water minerals that would normally cause lime scale to stay suspended in the water instead of attacking pipes and appliances. The conditioned water also helps prevent corrosion due to scale and will dissolve existing scale over time.

With a track record of over 50 years in use, the HALO ION Inline Water Conditioner is a proven, eco-friendly hard water treatment solution.

OPTION 2 (5/10 YEAR WARRANTY)

10 year warranty on carbon media
5 year warranty on scale media

HALO Proprietary Scale Media

HALO Water Systems proprietary scale media inhibits scale build-up in the water supply without the need for a backwash.
