NANOCERAMIC TECHNOLOGY

**CERAMIC PRO**<sup>®</sup>  
NANOCERAMIC TECHNOLOGY

# THE MOST ADVANCED COATING SYSTEM

CERAMIC PRO is a clear, liquid nano-ceramic coating, based on a revolutionary formula. When cured, this technology will chemically bond, transforming itself on the surface to become a rigid, superstructure of nanoglass, protecting the substrate it is applied to indefinitely.

Ceramic Pro was designed as an industrial, multi-functional, protective coating for all surfaces.

The nanoceramic glass coating forms an exceptionally strong and durable shield, resistant to solvents, acids, alkalis, UV rays, harsh weather conditions and corrosion.
