GASWorkS™ 10.0

The latest version of our flagship software -- GASWorkS -- is now available for purchase.

GASWorkS provides a complete network modeling solution. Click [here](#) to view a list of some of the features included in the new release. To request a 30-day evaluation copy, send an email to sales@b3pe.com. For those ready to upgrade, download an [order form](#) from our website.

New Feature - Grips

Occasionally in this space we would like to highlight new or improved features in our software. Our goal is to make the transition to the new programs as smooth as possible.

Grips are a graphic control added to GASWorkS 10 for moving model features in the GDI Display. Grips appear as small squares when a feature is highlighted. In the past, users had to use one of the *Move* commands to change the location of the feature. With Grips, left-click one of the squares, move the mouse cursor to another location, and left-click again to set the new position. This is especially handy for moving nodes, pipe end connections, vertices, and data text.

There is an option in the *Text Display Settings* to display Leader Lines for moved text items associated with pipes, nodes, or customers. If this option is selected (checked), when the associated text is moved, a leader line is automatically drawn between the text and the associated feature.

To use Grips, select (check) the *Display Grip Symbols* option in the *Settings* item under the *Graphics* menu.

Training Update

Only 2 seats remain open in our September [Basic GASCalc and GASWorkS course](#) in Colorado Springs. Register soon by emailing a completed registration form to training@b3pe.com to reserve your spot. This is our last scheduled training class in 2017.

If anyone is interested in sponsoring an off-site training course--particularly in the Southeast United States--please contact us at training@b3pe.com.

Feedback

GASWorkS 10 is out, but that doesn't mean our work is finished. We are constantly looking for tweaks and upgrades to provide the best possible user experience.

What do you like best? What do we need to work on? Tell us at news@b3pe.com.

You are receiving this email because you are a customer, sent us an inquiry, requested to be on our email list, or attended a conference where B3PE was exhibiting. Follow us on [Facebook](#) and [LinkedIn](#). Click [here](#) to be removed from this list.
