Engineering And Software For The Natural Gas Industry

October 2019

GASWorkS™ 10 - Geomapping

When we released GASWorkS 10.0 two years ago, it came with many new [features](#) and enhancements. Most of our work since then has focused on minor tweaks and improvements.

Now, we are excited to announce a new feature that has been in development for some time. We call it **Geomapping**.

Geomapping offers the ability to include background images directly from Google Maps™ or Bing™ Maps. This will allow Users to view their models overlaid on street maps or satellite imagery streamed from those services.

The new feature is not yet available for full release, but we are looking for testers. If you are a GASWorkS 10 license holder, and would be interested in trying out a beta version, send us an [email](#) with your name, the company you work for, and the email address where we should send the setup file.

Make sure your software is up-to-date by visiting our [Updates](#) page to download the latest revision, posted on **September 4**.

If you have not already tried GASWorkS 10, click [here](#) to request a 30-day evaluation copy. To upgrade today, fill out an [order form](#) and return it to sales@b3pe.com.

B3PE Conference Update

We will be appearing at the following conferences in the next month:

- [APGA Operations Conference](#), October 29 to 31, Huntsville, Alabama
- [Kansas Pipeline Safety Seminar](#), November 6 to 7, Manhattan, Kansas

If you are attending one of these conferences, we invite you to visit our booth to learn more about our innovative design and analytic solutions, and see demos of GASWorkS, GASCalc™, and GASPurge™.

Stay tuned to the newsletter for future announcements of events where B3PE will be exhibiting.

Newsletter Archives

Need to refresh your memory on a past newsletter help topic? Have a question about a feature that we might have already covered?

You can access previous editions of the newsletter on the [News](#) page of the B3PE website. Past newsletters are saved as PDFs, organized by date, and listed under the relevant help topic of the month.

Applications Portal

Check out our new Applications [Portal](#), where you will find links to GASPurge and the free GASCalc Web App.

Our Products

[GASWorkS™](#) - Affordable and robust network modeling.

[GASCalc™](#) - Suite of gas system design and analytical tools.

[GASPurge™](#) - Natural gas pipeline purging calculator.

[StationManager™](#) - Regulator and relief valve station management solution.

[WaterCalc™](#) - Suite of water system design and analytical tools.

You are receiving this email because you are a customer, sent us an inquiry, requested to be on our email list, or attended a conference where B3PE was exhibiting. Click [here](#) to be removed from this list.
