About our brand

The company's history begins in 1927 with the joinery set up by Albert Nothdurft. Just a few years saw the wood-working business turn into a successful furniture producer.

In 1958, Nothdurft took the step from tradesman's business to industrial undertaking - ALNO Möbelwerke GmbH + Co. KG in Pfullendorf.

The ground had been prepared for practical innovations, first-class quality and award-winning design. But this wasn't only to the delight of consumers in Germany.

The kitchens "Made in Germany" soon became popular internationally too. This is why, in 1969, ALNO started to expand into other European countries, and later on even world-wide. Since 2018, production has been continued at the Pfullendorf site by the Neue Alno GmbH.

ALNO – certified quality

ALNO branded kitchens stand for high quality and exceptional durability. This is where it is all about first-class material, craftsmanship and, above all, precision.

From the product idea to developing it for production and from order processing to production and assembly, the ALNO QM system assures the standards that our customers can rightly expect from an international kitchen brand.

ALNO branded kitchens may only be fitted by properly trained personnel.

All our materials and components undergo an extensive programme of laboratory testing. The GS mark awarded by TÜV Rheinland LGA Products GmbH means maximum safety and reliability for our customers.

Your door style.

PLAIN STARLINE (1010)

A simple front that functions as the ideal basis for any kitchen architecture.

The handleless kitchen is convincing in its clear, timeless design: uncompromising in quality, form and functionality.

The horizontal recessed grip as a small engagement in the carcass emphasizes the beauty of the simple line.

Door finish 1

Lacquer high-gloss smooth
