## About our brand

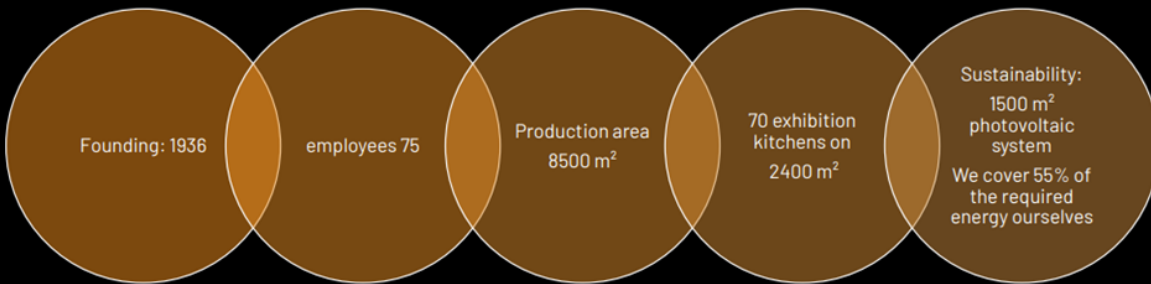

**BEECK**  
KÜCHEN

*88 years  
of experience and  
quality*

One company!

One team!

A 4th generation family business, they work with highly qualified employees to develop and produce top-quality Made in Germany kitchen furniture with passion, creativity, and the highest standards of quality. Ultimately, they want people to be happy with our kitchens from the moment they set eyes on them, and for many years afterward – after all, cooking should be enjoyable.

PEFC guarantees that wood and paper products come from only sustainably managed forests.

PEFC is the largest institution for ensuring and marketing sustainable forest management, through an independent certification system.

All cabinets comply with the high US standards CARB2 and TSCA Title 6.

Wood products made from CARB2 panels are sustainable, environmentally friendly and ensure a healthy indoor climate

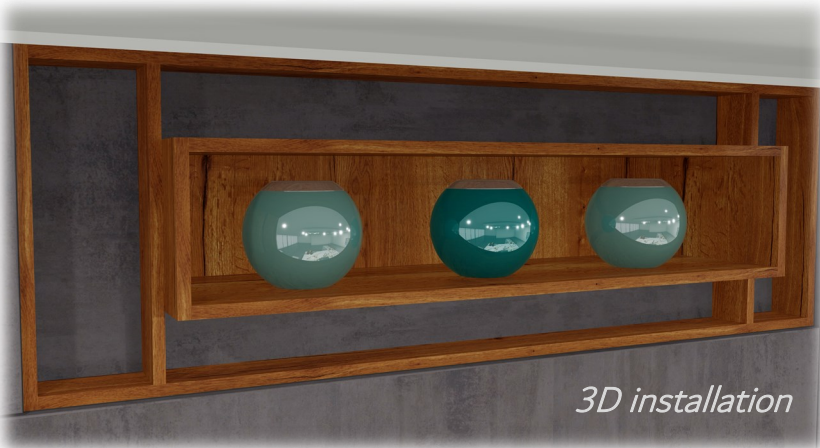

### Solidity perfected!

The quality of Beeck Küchen craftsmanship never fails to impress. Sides and bases are 19 mm thick and back walls 8 mm thick. This guarantees good durability and many years of enjoyment in a unique, high-quality kitchen.

## Your kitchen design Please note that the images are a 3D reference

**Your kitchen design** Please note that the images are a 3D reference

**Your kitchen design** Please note that the images are a 3D reference

*Double trim frame for  
the refrigerator*

**Your kitchen design** Please note that the images are a 3D reference

*Recessed niche details*

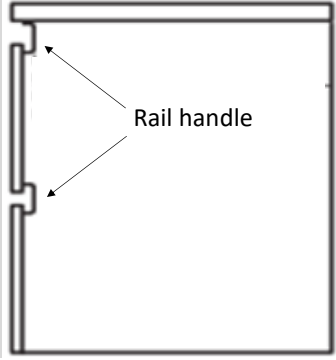

## Your door style.

### DOOR WITHOUT HANDLES

A simple front that functions as the ideal basis for any kitchen architecture.

The handleless kitchen is convincing in its clear, timeless design: uncompromising in quality, form and functionality.

The horizontal recessed grip as a small engagement in the carcass emphasizes the beauty of the simple line.

## 2100 Trend Struktur

*Finish: 108 Melamine struktur*

*Color: K186 Concrete anthracit*

Melamine resin coated front, concrete texture, surrounding edge in same colour

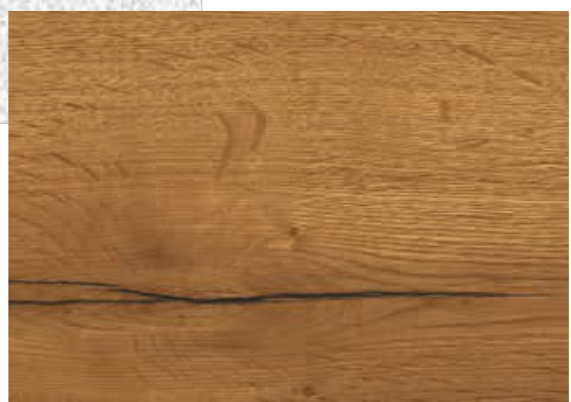

## 3090 Colora

*Finish: 113 high gloss melamine*

*Color: Y127 Xeno arctic white*

Melamine resin coated front, wood grain, surrounding edge

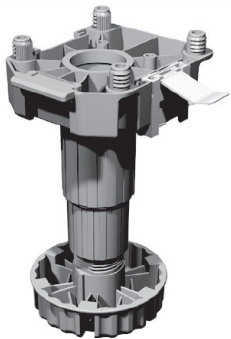

## 2150 Trend Holz

*Finish: 103 Melamine wood*

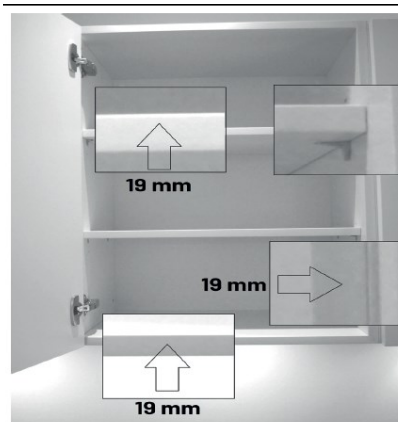

*Color: K036 Halifax oak cognac*

Melamine resin coated front, wood grain, surrounding edge

## You get more than a kitchen cabinet ... you get quality, engineering, invention and elegance

**Base** and tall units are supplied with height adjustable feet. The adjustment range from + 20 to - 10 mm guarantees millimetre accuracy. The plinth panel is protected against moisture by a sealing or U-profile.

**The carcass** is made of a high-quality derived timber material board in 19 mm thickness. All wood-based materials used are made of sustainably cultivated PEFC-certified material that meets the new CARB2 standard. Only material coated on both sides with melamine is used in the carcass to prevent moisture from penetrating the wood-based material.

The all-metal clip hinges used are self-closing and are mounted / dismantled by clipping them in / out without tools.

They are also equipped with integrated soft close.

The hinges are 3-dimensionally adjustable and have an opening angle of 110° or 165°.

The opening angle can be limited by optional limiters.

The carcass parts are glued permanently for stability with solid wood dowels.

The front edge consists of 1.2 mm thick ABS edge. The safety edge is glued with PUR glue (polyurethane). The strong and thermally resistant connection between the edge and the wood material ensures optimum protection against the penetration of moisture.

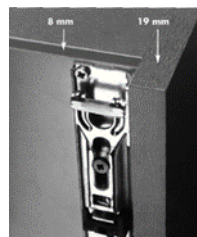

**The AvanTech system** offers you a modern and straightforward design without sacrificing any storage. It is particularly impressive due to the following points:

- 13 mm narrow frame thickness without cover caps.
- A unique running comfort.
- 3-fold adjustment possibilities, which are not visibly integrated in the frame.
- Powder-coated metal frames in color Carbon.
- Upper cover profile in stainless steel look.
- Load capacity 40/70 Kg.
- Integrated pull-in soft close..

### Cupboard suspension

Wall units are supplied with rear top and bottom recess to allow for ventilation,

★ All the information provided authentically corresponds to our supplier (Beeck Kuchen).
