## About our brand

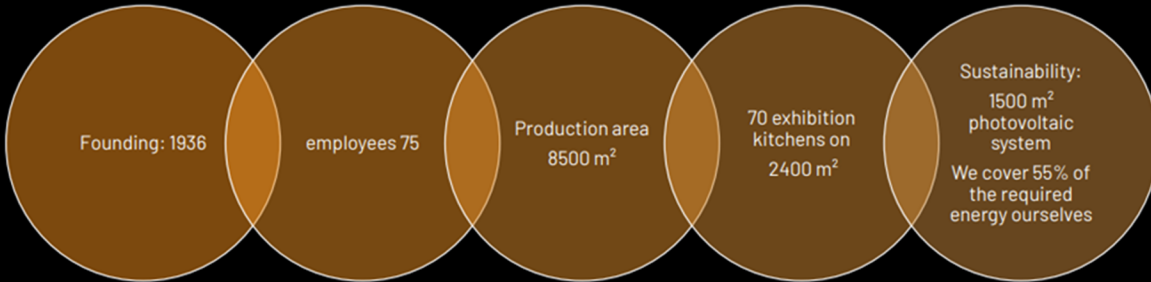

**BEECK**  
KÜCHEN

*88 years  
of experience and  
quality*

One company!

One team!

A 4th generation family business, they work with highly qualified employees to develop and produce top-quality Made in Germany kitchen furniture with passion, creativity, and the highest standards of quality. Ultimately, they want people to be happy with our kitchens from the moment they set eyes on them, and for many years afterward – after all, cooking should be enjoyable.

PEFC guarantees that wood and paper products come from only sustainably managed forests. PEFC is the largest institution for ensuring and marketing sustainable forest management, through an independent certification system.

All cabinets comply with the high US standards CARB2 and TSCA Titlke 6. Wood products made from CARB2 panels are sustainable, environmentally friendly and ensure a healthy indoor climate

### Solidity perfected!

The quality of Beeck Küchen craftsmanship never fails to impress. Sides and bases are 19 mm thick and back walls 8 mm thick. This guarantees good durability and many years of enjoyment in a unique, high-quality kitchen.

## Our Product

### Carcase (Cabinet)

Is made of a high-quality derived timber material board in 19 mm thickness. All wood-based materials used are made of sustainably cultivated PEFC-certified material that meets the new CARB2 standard. Only material coated on both sides with melamine is used in the carcase to prevent moisture from penetrating the wood-based material.

The carcase parts are glued permanently for stability with solid wood dowels.

The front edge consists of 1.2 mm thick ABS edge. The safety edge is glued with PUR glue (polyurethane). The strong and thermally resistant connection between the edge and the wood material ensures optimum protection against the penetra-

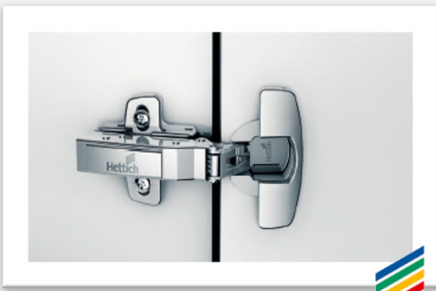

### Hinges

The Hihges are authentically German made, produced by Hettich, superior quality!

The all-metal clip hinges used are self-closing and are mounted / dis-mounted by clipping them in / out without tools. They are also equipped with integrated soft close.

The hinges are 3-dimensionally adjustable and have an opening angle of 110° or 165°.

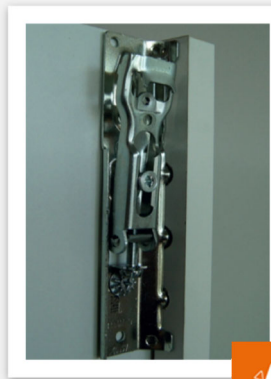

The hinge arm and cup are closed

with metal cover.

### Cupboard suspesion

Wall units are supplied with rear top and bottom recess to allow for

ventilation and moisture accumulation

### Shelves

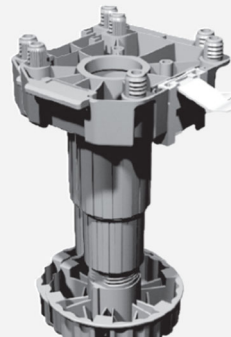

The shelves are made of a 19 mm material in a colour matching the body. The 1.2mm ABS edge is glued with PUR adhesive. The metal shelf supports in use have a locking device to prevent the shelf from slipping. For the shelves we use a 3 mm grid hole drilling.

### Plinth

Base and tall units are supplied with height adjustable feet.

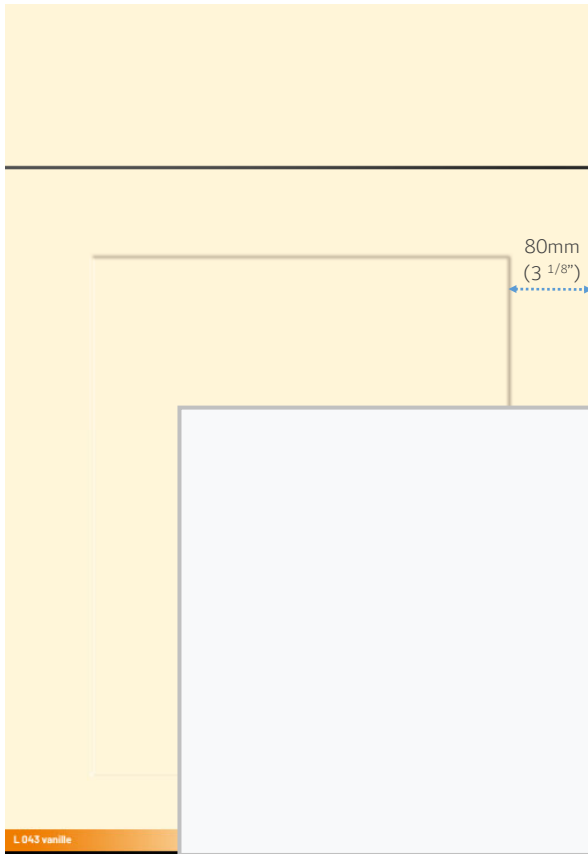

The adjustment range from + 20 to - 10 mm guarantees millimetre accuracy.

## Characteristics and details of your Kitchen Project

### Front: Level 6

Programm: 6018

Model: Signum L

Finish: MDF frame front, semi-matt coating

Color: L032 Arctic White

Door thickness: 20mm

### Drawer (interior and hardware)

Model: AvanTech System

Finish: Metal

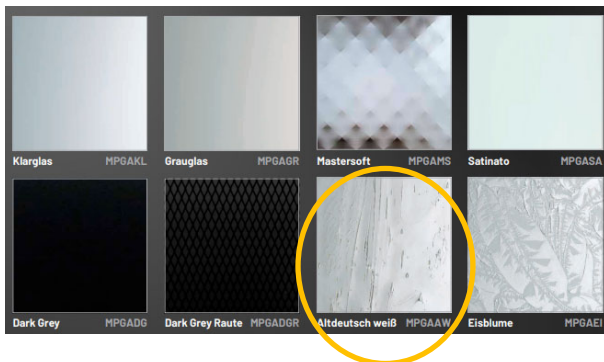

Color: ASWE Xeno White

The AvanTech system offers you a modern and straightforward design without sacrificing any storage. It is particularly impressive due to the following points:

- 13 mm narrow frame thickness without cover caps.
- A unique running comfort.
- 3-fold adjustment possibilities, which are not visibly integrated in the frame.

### Glass for door

### Handle

Model: 439 (for wall cabinets)

Finish: Stainless steel

Model: 771 (por base cabinet)

Finish: Stainless steel

### Tip-on

For glass wall cabinets

★ All the information provided authentically corresponds to our supplier (Beeck Kuchen).
