Dear Rudy,

May 16, 2018

Thanks for the letter postmarked the 10th. Guess this release will be pretty anti-climatic given the slow pace it appears to be taking. On par with watching paint dry. That Nevada case is interesting but unrelated generally to us. I do hope that the whole Federal claim that everything under the sun falls under their jurisdiction ends but don't believe that time has arrived just yet. Have you ever read the Montana Firearms Freedom Act that was signed into law in 2008 or so? It's real short. Basically, they said that any gun made within the confines of Montana is not subject to federal jurisdiction. The feds disagree and it seems nobody wants to call their bluff.

Anyway, thanks again and please keep me informed.

Jason

P.S. Check out the enclosed request to staff. ☺

Classic BOP spin technique.

You have a valid concern that should be addressed with your Unit Team and Safety.

Inmate Work Assignment: Ord Am

The Health Services Department recently posted a hand washing checklist on the inmate bulletin board. Those were good tips you provided. However, the key item listed, soap, is not readily available on the compound. Before the American Correctional Associate audit last year shiny new liquid soap dispensers were placed around the compound and on the housing units and filled with soap. And they were never filled ever again. There isn't any soap available in the gym bathrooms or housing unit bathrooms either. Other locations are probably devoid as well but I frequent those two locations the most and can say with certainty that those dispensers are drier than the Sahara desert.

While flashy notices with colorful pictures and type are nice to look at soap in the dispensers would be more useful.
