JULY 22, 2020

Dear ERIN AND Rudy,

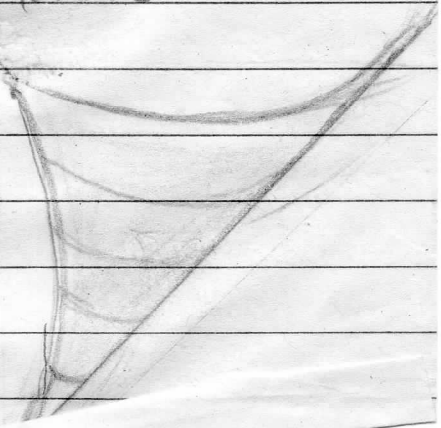

Today "is" the first day of the rest of my life. So begins another chapter or adventure of one who so dearly love's life and all of the gifts and wonders, that I have set my course on another seventy eight chapters. Blessed be He that gives us so much.

Having spent these last chapters bumbling my way through the vally's of the shadow's of death — all caused by free will, desire's and learning common sense — my path has become very narrow and much less traveled.

"If a man here's the the sound of a different drummer, let him step to that sound no matter how difrerent or far away!"

Walden Pond — David Thoreau

I hardly meet anyone that travels these pathes

I have enclosed two copies of
The Fort Fairfield Journal newspapers
for your edification. It would do
you well to read one of them from
cover-to-cover. You will get to
know another one of your
brothers. You are 'two peas in a pod';
and both benefit from knowing each
other. His wife is also 'salt of the
earth'. — Stop! — 4pm July 23, 2020

Coming to me

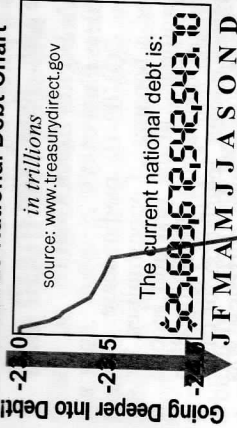

You are both of the brethren who dwell
in the kingdom of God here on earth. part of
a coming together of thousands, from all
over the world, extra-ordinary people have
the whispering call of God to blend and
assimilate the others knowledge and become
fully aware of His message(s) — i'm
understanding now. He is here.

"Stay on center of all things, feel
and find your center — first in your
quiet times, and as you learn it will
be with you always — stay at calm-
peace. There is much before you. —
The excitement within you will be
great — You are never alone.

Edward (Ed) Lewis
Brown

I'll have a sermon
for your flock. Ed

COVID-19 Death Numbers Being Artificially Inflated

By: David Deschesne

The accuracy of COVID-19 death numbers is increasingly being called into question as more and more states reveal the arbitrary and loosey-goosey way in which they are counting those deaths.

"Leave it to government to take something simple and make it complicated" is a very old maxim; however, when those same governments are attempting to justify their draconian lockdowns, business closures, social distancing and potentially harmful face mask mandates, there is going to be an incentive on their part

to take what are otherwise lackluster numbers and bump them up in order to save face with the voters.

This is what appears to be happening with the COVID-19 death numbers as some state bureaucrats are arguing over what their real death numbers are and others are just plain admitting they're skewing them upwards.

Whichever the case may be, it is going to be very difficult to get objective, scientific, statistical data on a virus that has now become so overtly politicized by establishment media.

Long-Term Face Mask Usage Creates "Cesspools" of Bacteria and Viruses Governor Mills' Face Mask Mandate Falls Under Maine Statutes Definition of "Public Health Threat"

By: David Deschesne

Face masks have been mandated at various levels across the country as a response to the media-generated COVID-19 scare. While used properly in a hospital setting, masks can be effective at reducing transmission of disease and infection, most people in the general public have received no training or discipline at the necessary

level to use face masks safely or effectively. Most aren't even using bona fide face masks purpose-built for the task of reducing disease spread, anyway. They are, instead, using homemade cloth masks or simple bandanas "cowboy style" both of which have been found to be as useless as wearing nothing at all.

Forget COVID-19; Could the Coming Solar Minimum Have an Even Worse Effect on Life?

The sun is entering the bottom of a grand cycle where solar output is expected to drop precipitously, potentially causing unseasonably cool temperatures and much shorter growing seasons globally over the next decade.

By: David Deschesne

It can't be cured with a vaccine; government lockdown mandates will be ineffective to combat it and no amount of socialist spin will get us through it. In fact, there is nothing mankind can do to stop it. That is

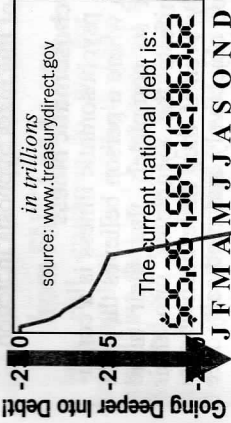

NASA chart/Wikipedia

what is now called the "Little Ice Age." It was named the Maunder Minimum after husband and wife team, Edward and Annie Maunder who studied the solar activity of that period in the late 1800's.

"Earning money the old-fashioned, honest way is still your best bet...unless you've got the government in your pocket."
- Bill Bonner

Ignored by Media: Maine Seasonal Flu Numbers Dwarf COVID-19

Seasonal Flu: 10,206 Cases COVID-19: 1,405 Cases
Maine CDC confirmed cases as of May 14, 2020

By: David Deschesne

The 2019-20 flu season was supposed to be the worst in recent history. Just after New Year's Day, Anthony Fauci, Director of the National Institute of Allergies and Infectious Diseases told CNN that this year's flu season was on track to be as severe as the 2017-18 season, which was the deadliest in at least a decade, claiming 80,000 deaths. "The initial indicators indicate this is not going to be a good season - this is going to be a bad season," Fauci told CNN.

Stress, Face Masks & Lockdowns Negatively Affect Human Health

By: David Deschesne

Governments and their accomplices in the mainstream news media the world over have, with perhaps the best of intentions, adversely affected the health and lives of billions of people with the recent COVID-19 coronavirus scare.

With incessant death predictions and the use of failed, error-filled computer models predicting millions of people dead by now, the stress levels of the average person has elevated way beyond the norm. Couple

that with the stress of financial insecurity and uncertainty due to a forced shut-down of the entire economic system on a whim, already elevated stress levels have peaked off the scale in many people.

This irresponsible behavior by government officials and the mainstream news media has undoubtedly caused much more harm than good, since prolonged stress has been found to damage the immune system in nearly all people.

"It is clear that religious issues are more theological than simply theological. We know that we are dealing not with Truth but with power in the final instance, power to communicate one's view of truth."

- Mary E. Hunt

Governor Mills' Ridiculous Face Mask Mandate!

Fort Fairfield Journal Editor/Publisher, David Deschesne models a M10M Biological/Chemical mask. If the COVID-19 coronavirus was in fact as deadly as the media and governments want us to believe, a mask like this is what should have been worn by people in public; not the flimsy paper disposable, and homemade/bandanna masks mandated by the government. At this point, COVID-19 is being found to have a slightly higher Case Fatality Rate than seasonal flu, for which face masks have historically never been mandated society-wide, or entire economies shut down, by government edict.
