

FLAIR
PRECISION INC

Add a little "Flair" and cut into your bottom line

MANUFACTURER OF HIGH PERFORMANCE PCD, SOLID CARBIDE, AND CARBIDE TIPPED PRECISION CUTTING TOOLS AND COMPONENTS FOR ALL INDUSTRIES.

Specializing in **Solid Carbide, Carbide Tipped & PCD Tooling**

Our facility is fully equipped with the state of the art in equipment giving us the versatility and technical edge required to design and manufacture virtually all specials and providing our customers an edge to surpass their competition.

OUR EXPERTISE.

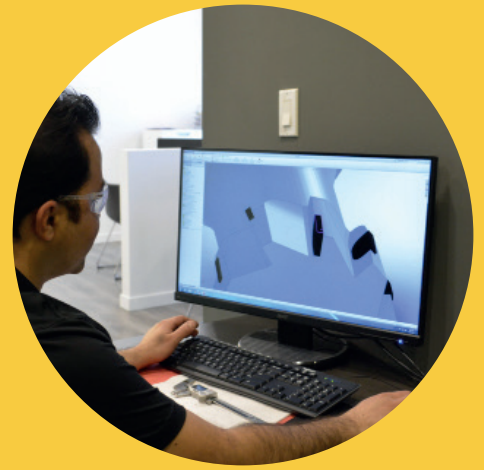

Capabilities

Flair Precision is located in the heart of Canada's manufacturing sector. Our experienced team can design and manufacture even the most complex tools. These include reamers, drills, milling tools, combination tools in PCD and carbide.

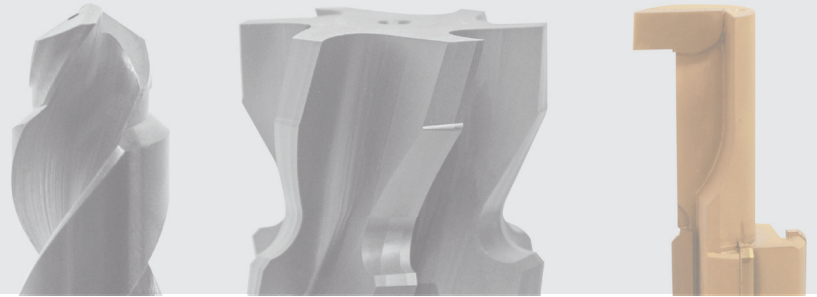

Flair also has the necessary support equipment to manufacture dies, jigs and fixtures for a variety of industries such as medical, optical, nuclear. We have various T1 OEM customers that have facilities worldwide including countries like Canada, US, Mexico, and Europe that can attest to our expertise.

Our Equipment Consists of Multiple CNC - 5 axis cutter grinders, cylindrical grinders, optical profile grinders, mills, lathes, wire EDM's and sink EDM'S as well a variety of manual machines for those tools that require that personal touch that can only be done by the most experienced of toolmakers.

WHY CHOOSE FLAIR?

Quality

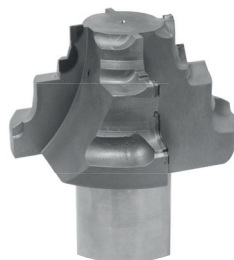

Flair Precision is an ISO 9001:2008 certified company. This means that we guarantee each and every tool that leaves our facility. We only use high quality certified materials in all of our tools to be sure they have the consistent high performance and reliability our customers have come to expect. Each tool is individually inspected to ensure it meets the specified tolerances using state of the art measuring equipment.

Increased Productivity

Our highly technical staff guarantees innovative cutting tools that will exceed expectations no matter the application. Our designs are optimized according to each application enabling our tooling to operate at higher speeds and feeds in many cases. Increasing cutter parameters provide a shorter cycle time and less down-time thereby greatly increasing productivity.

Reliability

We offer some of the best delivery times in the market. As industry shifts to just in time manufacturing on time delivery has become a top priority. Our delivery times consistently beat our global competitors and our tool performance is bar none. We all know crashes happen, but with Flair on your team you can rest easily knowing we're ready to help get you up and running again.

After utilizing Flair you'll quickly see the difference a personal touch can make.
Don't just hire the experts, partner with them.

Flair Precision Inc. is a privately-owned ISO 9001:2008 certified company specializing in the manufacturing of precision specialty tools for all industries. We leverage advanced technology and traditional tool-making skills and experience to create the highest quality PCD and carbide tooling from North American made materials. Our highly technical team can provide innovative cutting tools to match your application and make your finished product a cut above the rest.
