Henna Alligator Block Coloring and Bling Kit Instructions

## AGZ Block 6 – The Alligator

Recommended Coloring Materials: The Alligator is done with Gelly Roll Stardust Pens and Pentel Sparkle Pop Pens. The following is a list of recommended colors (however there is a caveat following these pictures):

The colors are in order relative to the picture to the left.

1. Gelly Roll Stardust #703 Yellow
2. Gelly Roll Stardust #705 Orange
3. Gelly Roll Stardust #725 Sky Blue
4. Gelly Roll Stardust #736 Med Blue
5. Gelly Roll Stardust #738 Marine
6. Gelly Roll Stardust #727 Green
7. Gelly Roll Stardust #720 Pink
8. Gelly Roll Stardust #721 Rose
9. Gelly Roll Stardust #700 Clear
10. Pentel Green Sparkle Pop Pen
11. Pentel Blue Sparkle Pop Pen
12. Fabric Medium for Sparkle Pop Pen
13. Paint Brush for Fabric Medium

The Alligator is a wide variety of greens, blues, orange and yellows. In order to create a “color by number” system for the Alligator, I have numbered the picture above with numbers for each pen.

**HOWEVER! HERE IS THE CAVEAT!!!!** The Sparkle Pop Pens can sometimes bleed and/or fade with numerous washings. If you are planning to wash this block often I recommend switching the Sparkle Pop Blue Pen with Fabrico Blue Lagoon and the Sparkle Pop Green pen with Fabrico Emerald Green pen. If you decide to use the Fabrico markers, you can overcolor with the blue, the clear and/or green Stardust gel pens to achieve a “bling-ier” look.

**NOTE: WHEN USING LIGHT FABRICO MARKERS NEXT TO DARK COLORS, ALLOW THE FABRICO MARKER TO DRY FOR FIVE-TEN MINUTES BEFORE COLORING WITH DARKER COLOR. THIS WILL PREVENT BLEEDING!!!**

**After you color using the Sparkle Pop Pens and the area is dry, you must coat the color with fabric medium to set the color!!!!**

Use the Black and White Version of each Alligator section attached to test colors first and to set up a color code chart before coloring on sampler. In the case of the Alligator you may want to make several copies of the black and white version and color it several times to determine the best color combo for you.

Bling Kit – the bling kit for the Alligator is the smallest of the Animals Gone Zen series however many of the stones are size SS6 (sort of hard to see due to their small size). You may want a pair of magnifiers for placing these stones! The

Iron or Mini Iron. The best way to attach most of these stones is with a mini iron preferably one that has a rhinestone tip. A regular iron can be used but may prove to be cumbersome when setting the very smallest stones. **IN ORDER TO PREVENT SCORCHING YOUR FABRIC USE A PRESS CLOTH!!!!**

Pair of tweezers for placing the stones. Any tweezer will do but I find that embroidery tweezers or medical supply tweezers at least 4.5" long work the best.

Roxanne's Baste it with the small nozzle for precise glue placement. Although the stones are all hot fix (meaning that the glue on the stone is activated by heat), I found it somewhat easier to put a spot of Roxanne's Baste it glue down, place the stone on the glue then let the glue dry (for about 5 minutes). Then hit the stone with your iron or mini iron. The Baste it glue holds the stone exactly where you want so you can place the iron on it without worry of the stone shifting under the iron.

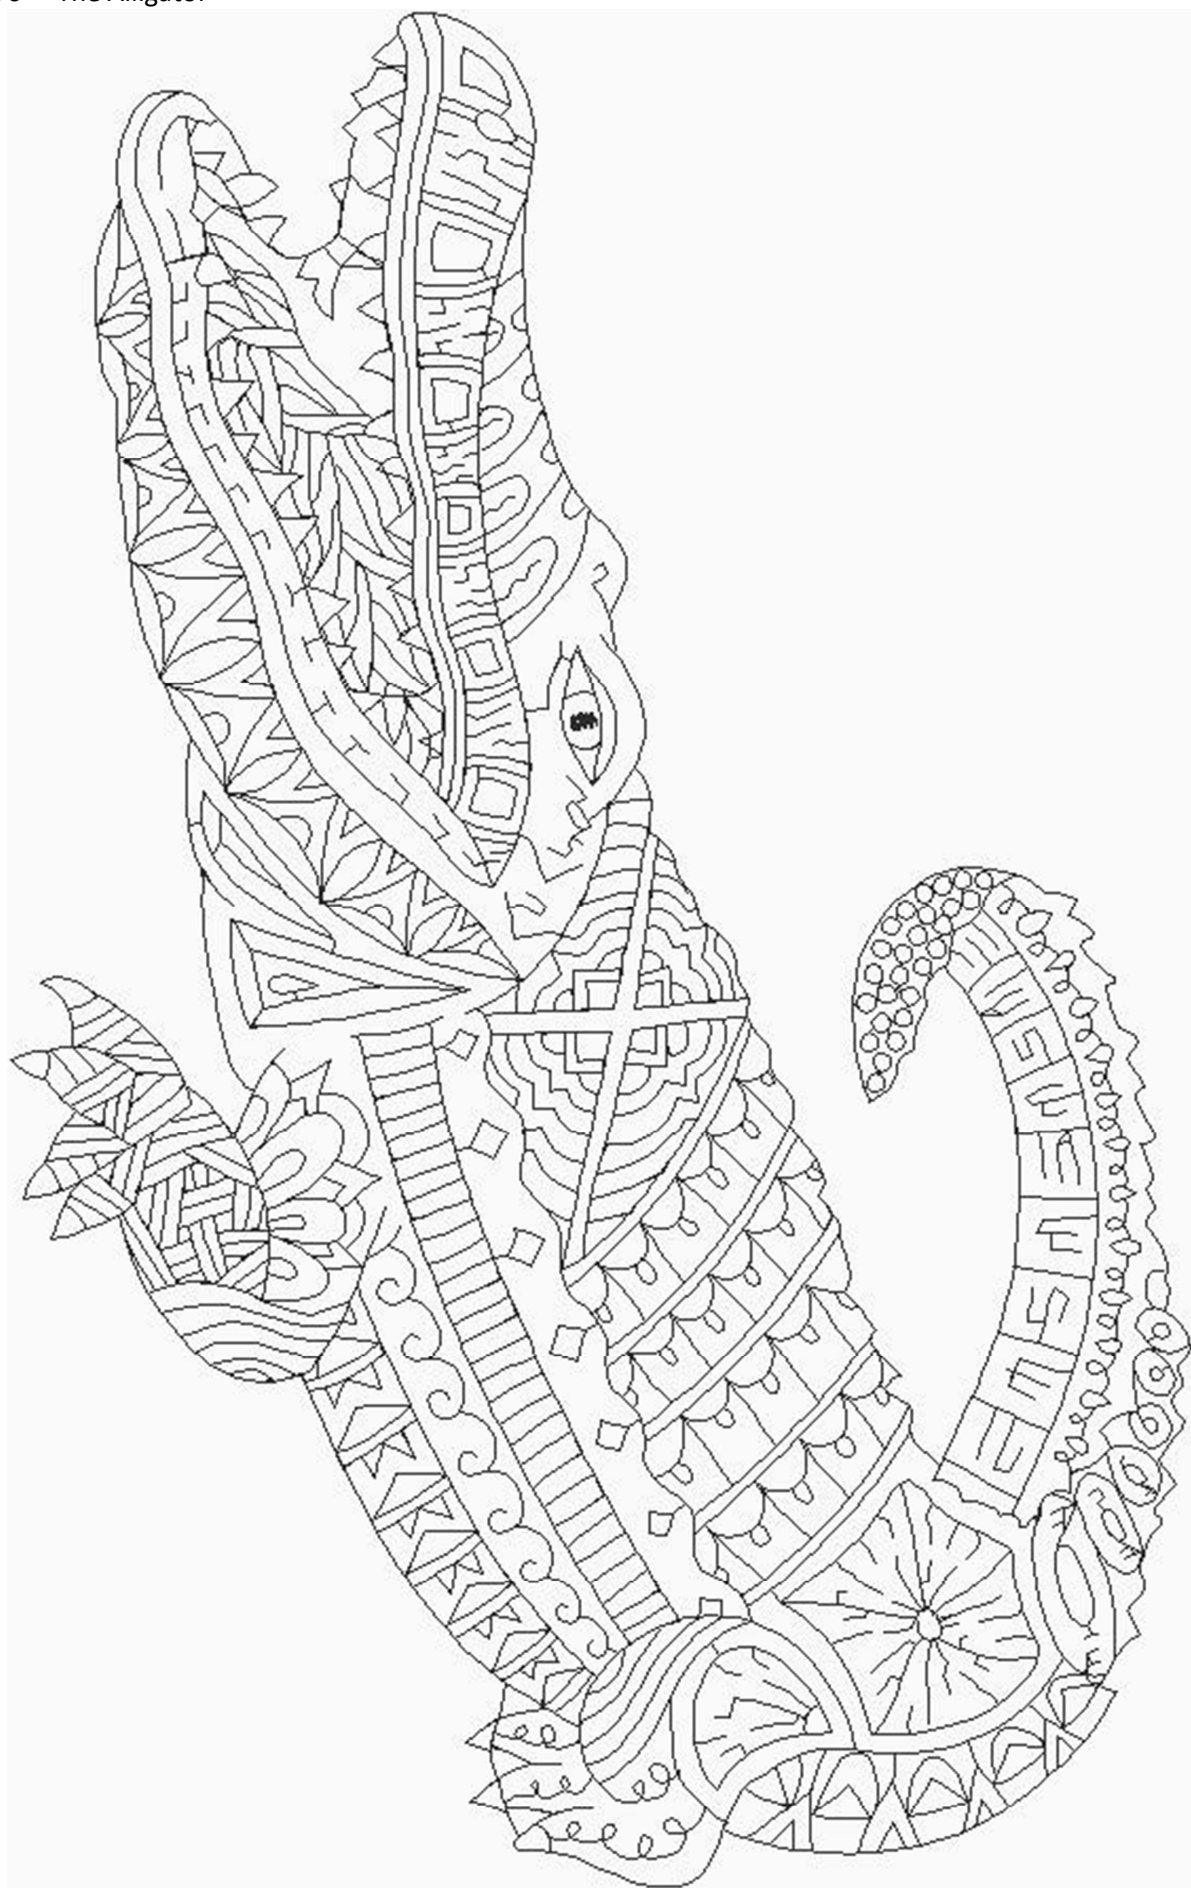

There is no particular step by step process other than it is easier to color first then place the stones. Always place your smaller stones first then the larger stones so that the iron can touch the surface completely. Make sure to heat set the coloring first before placing stones. The photo included should be the best guide for coloring as well as where exactly to place stones. However, there are detailed diagrams of each part of the design labeled with number associated with a particular stone and pencil for coloring. Please see the Excel spreadsheet printout for the rhinestone name, the size and the color code for each stone. I have also provided a close count of how many stones are used throughout the process.

If you are having difficulty setting the stones (i.e., they don't seem to stick once heat activated) you may want to refer to the VERY DETAILED instructions provided by the following link:
