PROFESSIONAL PORTFOLIO

THE DESIGN CONCEPT

Designer LaToya "LAW" Scott

With the creative mindset that Designer LaToya LAW Scott was born into a world of colors as she realized over 16 years ago that recreating and designing was her 1st dream. To know how to provide better living spaces through designing & decorating. With that passion she was able to become a very successful Software engineer and a more successful Interior Designer. With over 300 homes designed it started within. The design concept was created when She was hired for her first residential client who trust her with there vision. Only to find out that a \$500 job landed her a big 100k design project and the rest is inside this portfolio.

After all, it's the Organizer who determines the best solutions to make a space functional while a Decorator transforms the space into something more beautiful and functional. Sometimes, those two people can be one person, And that's me!

I want the best for my clients and my work speaks for its self!!!

Positive: Professionalism, Punctuality, Quality, Responsiveness, Value

We are in the planning stages of decorating our basement by Designbylaws - Ms. Laws aka LaToya. She has Great vision and understands her customer's needs. To help bring the vision to life she offers a 3-D design which I highly recommend, my husband and I look forward to working with Ms. Laws and having my basement transformed for the better.
