

Prof Sir Gregor Sm @DrGregorSr · 26 Apr 2021 ...

Replying to @DrGregorSmith

Appreciate the Qs about my ink - thank you. They're very personal & down to the skill of Vali Stefan. On my arm is Asclepius (god of medicine) & on my chest, his father, Apollo (god of healing, disease, music and light) with his sun chariot. More to come. valiart.uk

This was the list of publications linking antibiotics to asthma that I sent Gregor Smith and Caroline Lamb at the end of August 2023. I even offered to travel to Edinburgh to meet with them and give them a talk but despite over 100 emails to Gregor since, which usually also included Professor Sir Chris Whitty CMO England and sometimes Caroline Lamb, especially this year, I have never heard from any of them.

So it's obvious that they don't want the public to be told that antibiotics can cause hay fever, food allergies, asthma and diabetes. Perhaps the CMOs don't want the public to be informed because Chris has made a few videos that talk about asthma, diabetes and people with ailments, and I have told him that some of the statements that he has made on YouTube are total nonsense.

And Gregor has published an annual report 'Realistic Medicine' that doesn't mention that there are many medical publications that have reported a link between antibiotics asthma and a link between antibiotics and statins and diabetes. So perhaps they feel that they have failed as Chief Medical Officers.

I have sent well over 100 emails to both of them, they were usually both addressed in the same email that was also sent to the Western Australian Premier Roger Cook, the WA Minister of Health Amber-Jade Sanderson and later the Prime Minister of Australia Anthony Albanese.

Until the 26 September 2023 I had also included Dan Andrews the Premier of Victoria before he resigned; Anthony was only included towards the end of September just before Dan resigned as Dan had brought him into the loop.

I have also emailed Anthony via the government website in Canberra the capital of Australia and have the emails that I have sent together with the autoresponder showing my email. All 5 politicians communicated via coding, and I have booked and lost thousands on a few flights to Australia and accommodation in the state of New South Wales where I was due to meet Anthony at the front end of the land that the Sydney Opera House stands on, between certain pillars and lost money on flights to Perth and hostel accommodation as I made non-refundable bookings as they were cheaper.

I repeatedly told them that coding was unacceptable and after I told them twice that when I came to speak in Australia which they were to arrange, if I was asked how I came to meet them, I would have to say that I contacted Roger Cook first and a month later, I received a letter from the WA Government saying that my emails were being sent to the Health Minister Amber-Jade Sanderson. And that all they had done for four months is code and finally threaten me online via their Google pictures and Instagram with 'police' and 'mental health' sectioning. Amber as I called her had 5 pictures of her head for weeks coding MI5 for 'police' as she knew that the police had been involved in sectioning me in the UK. They knew that I had been illegally sectioned for 7.5yrs so they thought that they could threaten me with another - I have all the emails that I sent them - I was usually awake between 2 to 4 am to fit in with the time difference as Australia is about 8 hours ahead and have plenty of screenshots of their coding and threats.

I now think that perhaps they coded that they wanted me out to Australia to speak and then just like Gregor and Whitty were not available, because they wanted to burn me out emotionally, physically and financially. I spent an awful lot of time giving them excellent information about how they could improve their own health, help Australians beyond antibiotics causing asthma and diabetes and save Medicare money. Medicare being the equivalent of the NHS.

Their Director-General of Health David Russell-Weisz originally a GP from Scotland never answered my asthma questions but by his silence during the last 10 days has agreed with me that asthma is an iatrogenic disease. He is about to retire.

Roger Cook was also coding that China was interested in me speaking over there after he made a trade visit there, but that too was on and off. I also emailed the Health Minister of Victoria and New South Wales but never heard from them; I sent my asthma questionnaire to them to send to the chief medical officer of their state but never heard from any CMO either.

Perhaps the Health Minister of WA Amber-Jade Sanderson and the CMOs of Victoria and NSW don't want to know because like the English and Scottish CMOs they haven't known about the link between antibiotics and asthma and diabetes when they feel that they should have done.

I have also sent my four papers about asthma and diabetes to the CMO of Northern Ireland and Wales but have not heard a squeak out of either of them. It makes me question whether they are worthy of their positions and salaries funded by the trusting taxpayer.
