About Epilepsy

Epilepsy is a central nervous system disease characterized by an enduring predisposition to generate recurrent unprovoked epileptic seizures and by the neurobiological, cognitive, psychological, and social consequences of this condition.

Epilepsy means the same thing as seizure disorder. There are three classifications of seizures: generalized onset (includes tonic-clonic, absence or atonic), focal onset (includes focal aware seizure and focal impaired awareness), and unknown onset

Our programs are currently experiencing higher than normal call volumes and extended wait times. Our number one priority is to provide timely support to our patients, caregivers, pharmacies, and healthcare providers who are seeking financial assistance from our programs. For the quickest access to register and/or apply for help OR to access grant information we invite you to visit the PAF CPR Online Portal <https://copays.org/portal/#/login>. Thank you for your support and patience during this busy time!
