

Case Study Comparison

Research one case study where forensic science analysis had a significant impact on the outcome of the trial.

Identify a point in time on your timeline and describe how this case would have been solved differently had it occurred at that period in time.

Write a 350- 500- word summary explaining how this case may have evolved during a different time in history. Consider the following in your summary:

- What clues were available that may not have been at some point in the past?
