Líttle Green Stables - Herbal Choice Self Selection

Please indicate if you or anyone else to be handling the oils / herbs is pregnant, or has epilepsy.

I understand that the use of herbs and gentle essential oils for animal wellbeing does not replace veterinary advice or expertise.

I understand that a session with Rebeccah Baylis is on an educational / consultation basis, using the principles of applied behaviour to demonstrate the means by which animals self-select herbs and oils.

My vet is agreeable to this consultation session and my ongoing use of herbs and essential oils via self-selection for my animal's wellbeing.

My animal won't have had any new medication, vaccination or wormers within 3 days (either side) of the session.

Should my animal become ill or injured at any time between gaining vet permission and the session, I will inform my vet and Rebeccah Baylis.
