1. | AEOLUS WEAPON SYSTEM.

Description: AEOLUS weapon system consists of an unlimited number and supply entangled swarm intelligence communication explosive battle spheres with directed energy weapons on each battle sphere the size of a golf ball.

These AEOLUS battle spheres are manufactured in place, in the air, by atmospheric nano generators that self replicate and can build battle spheres in place hovering in the air. The antigravity and propulsion system of the AEOLUS battle spheres is 10gs of constant acceleration.

The battle spheres can align themselves in a strategic flight pattern and use magnetic energy to accelerate the propulsion using destructive interference of the magnetic fields. Using this method, these spheres can be anywhere on the globe in seconds.

Performance: Destroys 1 entire USA level naval fleet from ocean line of sight, including underwater subs, in 10 seconds or less and the battle sphere returns to the sender.

Atmospherically generated Gas quick sets to hard puddy then explodes. 10m off ground creates a 50m crater. Marshmallow expansion.
