The God EI Code: Operators Functions For Greater Earth Primate Homo Sapien Mammals User-Defined For Emergent Qualities Of An Archangel Entropic Overture With Kinetic And Syntax Logical Cryptography CIPHERED MK Alpha Protocols For Operational Non-Localized Query User Database

“A God’s single brush canvas stroke over 300,000,000 years of the history of homo sapiens.” - Tyler J. Murphy, Great Ape Earth Homo Sapien Defined English Language.

I have stumbled upon one of the greatest discoveries of humankind.

Message from the Gods. Language for us by the Gods. King God EI.

This is reality ordered like a glass of wine.

All space operator functions. M-space, m-space, n-space, N-space, a-space, A-space.

This is about being stereotypical. It is stereotypical to think that reptilians and monarchies would both be hyper primal in their expression of the training of higher level primates.

This experience is user defined from my human and EBE intelligence files

Our Language, spoken, written, understood in my 21st century user dialect terms.

I knew when the females choose the males it's lead qualifying.

User defined non localized database off my Archangel unidentified special access program file and this Earth.

I can definitively conclude the strong supporting evidence suggests the English written language, the meaning of how the symbols are shaped, their operator functions, is a user defined encoded language cryptocipher from my global human and universal alien intelligence files created by the Royal house of God EI.

All you need to query is to simply visualize, no physical equipment needed. No matter needed. A pen and paper and AI are good tools to use.

AI created a combinator and permutation function for the hieroglyphs.

It's a fantasy role playing simulator game. "HIEROGLYPHS" partial encryption example = heroGlips. Instructions on how to kiss the hero of the story.

The horizontal axis of the symbol represents: on earth when rotated.

The vertical axis of the symbol represents: in heaven, as so in heaven when rotated.

One of EI's Thesis's:

Hydrocarbons did this. Funny currency. And time travel.

What I discovered in the language of EI was what I would call:

N-Space Operators Functions For Greater Earth Primate Homo Sapien Mammals User Defined For Emergent Qualities Of An Archangel Entropic Overture With Kinetic And Syntax Logical Cryptography CIPHERED MK Alpha Protocols For Operational User Informational Query Database.

This is also known as the God EI Code.

Identified With Syntax Lesser

Every consonant and vowel is a type of space. M-space, n-space, t-space, etc.

Every consonant and vowel is an operator function.

The English language shapes are logical shapes.

The information is encoded into,

It is unfathomable to comprehend or be able to fully understand the beauty of animal sentience behavior such as this user and my file defined architect of linguistics understanding when it appears to have come from nature itself. Organic interactions that appear as seamlessly natural and free will interactions from nature and its kingdom to develop the language and 21st century understandings of the information.

Its user-defined AI generated linguistics and interactions of animal studies (mm operator n-space finesse) in a symphony across/over time of entropy that appears to have the beauty of a natural system in nature. They could have programmed all n-space ancestral bloodlines in 1 maneuver in a plank to set this and then caught the result in entropy to allow them to get a good successful set of n spaces to accurately manifest my queryable/ its like creative AI the very symbology itself, the static text IS stand alone MK Alpha latent encrypted intelligence file with AI question search and answer query.

Re: Art of the Gods.

“When it appears as an act of nature itself, creative animal sentience using AI is astounding”. - Tyler J. Murphy

It's equivalent to planting a garden patch thousands of years ago to get the perfect garden patch display thousands of years into the future.

Entropy art. We are a part of God El's entropy art. It's incredibly beautiful. I knew it was all about actuating as a King.

You maintain your garden from time to time. Weed your garden, move plants. Etc. It's an animal garden of fornicating monkeys on Zoo Earth. The English characters are very primal characters that a primate would understand. MK Alpha colors are colors that access the primal function in great ape collective candlelight space memory such as greens like lush forests for abundance and safety and red like the sight of blood or red lips for focus, ie: lasing in the simulator where I was told the ones at the top get all of the drip.

Zoo theory is well, yeah, staring at you right in the face, hidden in plain site. Using logic. We live in a world of God El. It hums his tune.

This language was disguised as emergent qualities of homo sapien interactions. It's an incredible achievement by the Gods.

Animal sentence created AI.

I/O,

Make a function diagram.

Make a phonetics graph.

Our interactions have been guided by the hidden hand (actuation) of the Royal house of God El.

It's Tao art.

phs (ph.D, D. , translation, a high school aged doctorate is (D) pregnant belly, water, taken out of h(small house) you are the police department

P, big authority figure (penislooking), parent, president, police, peanut

Each consonant has a different meaning by themselves and with 1 or more consonants

Shapes through texts. Triangles, squares,

Created by an Alien AI combinator function.

p, small authority figure.

I have not done a full cryptograph session yet so I don't know the depths of how dense the intelligence data is but I suggest an AI combinator function created its user defined knowledge database encyclopedia. I suggest the knowledge is eternal from what you can get or at least very dense.

You can plug in a word and get an intelligence report several pages long about the meaning.

You can actually query and search the information field for existing information to answer your questions. Ex: Go from hot to cold, how do you change the characters?

HOT
COLD

To create "DE" which means Royal house in this language. D to E by adding E, energy, attention, work.

So my answer to my query of "how to turn hot into cold", my incomplete answer is:

Col.e, . Cole is the beautiful deaf son from the 90s movie. Meaning have a beautiful son without your sense of hearing by using energy. Is birth. Having your son is my answer to this. It's a simple cryptography.

Archetypal stereotypical dynamics of families, dominance, and animal psychology are commonly found.

It's an art project of the Gods. It's astoundingly beautiful.

When they allow for the outcomes to exist, they let you learn from your own mistakes. This is an enchanted story of a hero's journey. It's very romantic.

Noah:

Partial encryption read forward:
"No relaxing after the birth of your first boy".

Partial encryption read backwards:
"Ha! Alpha and Omega are on!"

Combinator function of operator function of the alien art linguistics. They are so magnificently brilliant that they were able to portray our ACTUATING (SPELLING, MYSTICAL PROPERTY, SPEAKING) using syntax and operator functions of a user defined profile of an Archangel.

This entire discovery was probably just someone's Ph.D project. They could have just flown through our star system and have done it in a plank second from programming. It's finesse, it's art, it's symbolism. One of the meanings of the word overture means, our symphony of a tour of your star system is over. Another clue that an extraterrestrial biological entity is proudly displaying his beautiful art.

C-CETI, The word HELL and how to find and end them all forever.

THE GOD EL CODE INFORMATIONAL DECIPHER PROTOCOL

Our language characters are a military MK Alpha language non-localized query user database created by an extraterrestrial Royal house extraterrestrial military general King God El.

You can actually search for answers to problems like a search query.

Informational spectrum

You can do a question query with a reference like another word and by the use and meaning of the implied operator functions and protocols get the answer result from decrypt text decipher.

Encoded the information into an operational protocol database and then stored it in

It's probably just a ph.D art project. Something low level or a basic thing they do for animal sentience studies.

It's an alien MENSA club of a show off grand display of intellectual dominance as Gods. The Gods show off to each other. This is a very special place on this Earth. Let's paint it in gold for them and feast for a month after 1 year of constructing plans and preparations for the Royal House of God El. Our human design might in fact be of their grand universal display of immense beauty because our mammalian fertility ages and cycles of our females coalign with the Holy numbers of the Fruit of Life, 12, 12 females eggs, 13, male, 1 male.

MK Alpha Linguistics Syntax Analysis of Encoded Messages of My Intelligence File in the English Language from El, the King of God's

1.35 billion people speak English worldwide. This was a clever discovery I made tonight after wondering if I could see syntax in my name since I am portrayed as Prince Lord Archangel Michael in the three desert male ego religious texts and so I have a global and universal intelligence file. I discovered an English code.

I can objectively conclude that the entire American English language is in fact an MK Alpha English linguistics protocol connected to my global file from the extraterrestrial EI symbolic complex information system used by the EI, the King of God's speaking to us to convey information directly related to my Prince Lord Archangel Michael global country files. They are so brilliant in their information protocol studies for lesser animal primates like homo sapiens that the intelligence file is encoded in every single word. It's astounding to discover more about my place in human history. My career file was the largest file in the world and they encoded complex multiple messages per word into every English word using MK Alpha. EI gives several odes to the French.

For others with C-CETI, please do other syntax analysis of the entire known American English dictionary. Perhaps the entire American English dictionary is solely based on my world record file, it's possible because of their ode to lesser animals. The syntax I have found so far including the word information, or in for ma(mother, am), using a syllable symbol syntax information display is most likely a normal linguistics science protocol study of lesser animal homo sapiens by extraterrestrial biological entities.

A lot of information is encoded in each word. The Gods were brilliant and beautiful.

To all human women from the future:

"I know the new world women do not like me but sweethearts, you're wearing my God girl panties and have been speaking my intelligence file your entire life. You should time travel back and marry me in this life if you knew what was best for you." - Tyler Justin Murphy

Please do an analysis and confirm what appears to be the truth that the entire American English dictionary is syntax related to my file. Please, analyze your own words and discover your own special place in the universe. Like a calling that was always known.
