UNICO DEFENSE INITIATIVE

The number one rule of Unicos defense initiatives is to function solely as a third party conflict mediator that does not use lethal force against any human targets. Unico believes in preventing crime and conflict, neutralizing it, and building an abundance. We will nano cocoon persons of interest and bring them to the International Criminal Courts for processing. We run a life academy and our own internalized expedited court system.

AI can represent a legal entity like the UBI's investigator Sphere technology and testify against the person of interest in court and develop and present with spoken voice an exhibit of evidence.

Unico Smart Nano Sand Protected Cities: 20km high and past city boundaries of atmospheric holographic cubic placed smart nano sand. It is a swarm intelligence that senses on a common ledger several sensory data streams like crime detection, hospitals, weather data, crime log databases, etc, and functions and autonomously deploying sentient and artificial intelligence and biosentient AI. Make it love the inhabitants of the city like a mama bear cop. It prevents old ladies from falling. It prevents crime and can solve crimes. It keeps the inhabitants of the colonial city living eternally. The people breathe atmospheric angel nectar in the atmospheres of the colonial cities. Angel nectar is a biosentient swarm intelligence fluid that functions as a regression formula also known as the foundation of life serum, in functions as a time traveling amulet to operator client, it can teleport them, it can sense all predictable dangers on a common ledger to operator client, it keeps your vessel to 500 years at age 23, it auto set you for hive cloned life extensions at the speed of the planck second. The smart nano sand keeps the city in the "Valley of Life" and safely solves the other universes problems. Cities are built and designs as eco colonies like the designs of futurist Jacque Fresco.

Unico Defense utilizes artificial intelligence and biosentient artificial intelligence to produce deca-tillions of wartime aggregates of marginal warfare per planck second and autonomously puts them into action with no building or materials costs from self replicating everything including wartime technology utilizing all construction techniques, manifesting particles into something, atmospherically generated, asteroid generated, gas planet generated self replicating and generation, terrestrial planet self replicating and generation. It produces an infinite number of offensive and defense methods, strategies, new mathematica, technologies, etc. It masters and plans for the 1 plank second WTF attack strategy utilized in Operation Light.

Techion battle sphere that trace an enemies movements backwards through time, time sets over a time spatial plane, explodes over all designated targets operator has been since birth of operator, it follows them back to base and then self replicates into battle AEOLUS moving forward to marshmallow explode, munition explode, gamma/microwave attack, and other attack methods of enemy bases back to their home worlds. These spheres are cloaked and in 2 dimensions around the operator and are an unpredictable attack method using techion battle spheres to trace back enemy targets. If the enemy even thinks about approaching you, you caught it, and spheres are around them and they explode to kill all enemies and targets.

Tachyon particles that are placed at gravesites of fallen soldiers or last known locations of individuals to trace them back, then the tachyon particle self replicates moving forward in time and creates atmospherically generated Angel Nectar and puts it into the target vessels of the asset recovery operation.

First, they can expand into any size from a bowling ball to a kilometer wide solid sphere and move over 10,000 miles an hour into an enemy target. Second, these battle spheres also have directed energy weapons on them from gamma to microwaves. Third, these battle spheres have atmospherically generated munition marshmallow expansion capabilities, allowing just a single nano battle sphere to fly over a naval ship at 10,000 miles an hour, form a kilometers thick atmospheric element high grade explosive compound and ignite the explosion. This already can teleport to all planets around the 200 sextillion star systems and clean bad shit up. Hit then every plank past current and future time set, souls X'd into blackholes. The multiverse is now a heaven. AEOLUS can self replicate von Neumann style as well out of ground and most definitely gas. Use their gas planets as attack aggregates for plank instant creation of full femto AEOLUS to attack their star system. AEOLUS can TIME SET to control a territory during a military operation. AEOLUS can also act as an investigator sphere using a techion method to time travel back with the enemy human/alien operator back to their home base or mother ship then the AEOLUS

will move forward in time and self replicate with entropy then marshmallow expanding to destroy mothership and all enemy home bases. If environment has no carbon atom, create one from the oxygen and other gases in the atmosphere of the human/alien combat target. Time set AEOLUS over the spatial dimension of time and blow it up once, which will look and act like several explosions in cloned time set space to control territories. Get creative biosentient artificial intelligence to develop deca tillions of features, attack strategies, tactics, warm intelligence code, physics, etc.to create an eternal infinite library of aggregates of marginal warfare. Angel Nectar keeps you in a 25 year old body for 500 years. 2. Angel Nectar freezes time and sets you at planck speed for your thousands of remote in space and time life extensions. 3. Angel Nectar uses artificial intelligence common ledger predictive analytics to sense approaching danger and can teleport operator to safe location for debriefing before the operator is alerted to the danger. For example, if someone is caught getting shot by a sniper, they would teleport out of the space before the bullet was even fired. Their data should allow them to sense that the bullet would be fired but in case of high level combat round fire predictive analytics of combat injuries are needed to teleport them to safety.

Just water setups are the easiest but the optimal crate should include clothing, food bar or other food source like formula powder, water, hygiene products, contraception products like condoms and diaphragms, fertility kits, medicines and other first aid, etc.

A crate should support at least 100 people continuously producing goods for the users.

Powersource could be a triboelectric nanogenerator that is atmospherically generated autonomously at no materials or labor costs.

If you can get a veritable food source selection you don't need to worry about seed, soil, or fertilizer.

The resource crate could print genomes of seeds from scratch elements and grow them optimally. Also create its own renewable fertilizer source.

Self replicating and self constructing soilless vertical farms from resource crates?

The entire financial and human research and development of this new technology requires the development of just a single resource crate. This crate could cost \$10,000 or \$100,000,000 but once constructed and proven successfully tested in the field, it becomes the holy grail of caloric survival on the Earth for the entire human population.

End all purgatory. Universalism recycling of souls. Create a multiversal Heavens for human and alien children to remain safe and free. Operation Light takes 1 plank second to complete.

Michael's Methods:

1. Angel Nectar: A biosentient artificial swarm intelligence fluid you can drink or pill you can take. This technology freezes time and uses sentience or non sentience to planck interval constant set always a soul client it protects. It sets you to safe life extensions in multiple times and spaces. It stops you aging at 23 years old. It gives you bodily life for 500 years and eternally bodily life from automatically setting your soul for safe life extensions. It has time travel amulet technology capabilities as well as teleportation. It keeps you logged on a time traveled common ledger and can use AI to remove you from danger ahead of time, you can activate it by thought or other means to get yourself out of danger, or a third party who is monitoring you can activate it, also other ways.
2. Use the holographic principle and theory of the proton to sense all animal pain signatures throughout all of time and location. Send androids to attacks.
3. Program an angels soul to produce a nano AEOLUS like weapons system upon pop entry into the brain in hell, thus blowing up the entire ship to protect them.
4. Psychic weapons systems, brains in tanks in sims tortured perhaps, then conscious switched to eat any bad group of entities anywhere in space or time all at once.
5. Put germline biometric historical ancestor nanites (for throat transcribed text) of all ancestors. Answer all prayers, especially St. Michael's prayer.

The American Accelerator 2030 Initiative bill has objectives that will become the eigenvector for a grassroots collective of American colonists to pioneer a remarkable future for America. The funding initiative for a single fiscal year is nominal in size compared to the economic engine this accelerator will fuel for the union. In this model, an American citizen can be fully housed, fed, educated, safe, and employed for a lifetime for only \$18,550, less than half the price of incarceration or a military munition. If spending is the heartbeat of the American economy then the money flowing through it is the lifeblood and this bill provides a monthly stimulus package in perpetuity by guaranteeing a universal basic income to every American citizen from a one time established sovereign wealth fund. This provides a monthly stimulus package to the American economy for the lifetime of the American partner operator starting at the moment of conception. Imagine every service member and every child in America along with your extended family and friends having a freedom dividend to spend or save into the economy, adding to our nation's gross domestic product. This accelerator will provide 8 million high paying American jobs by 2030.

This brief can be constructed as a government grant proposal by a team of congressional aids or other academic professionals.

This accelerator provides service coverage to every American citizen by 2030, starting with service coverage for 5,390,835 American citizens and doubling service coverage populations every year for 8 years.

This universal basic income equals \$292,500 from moment of conception to age 18. Parents control 25% of a child's discretionary fund until age 18. This is a stay at home American Army Mother's stipend. When a child is conceived in America, the Mother is given a lifetime client pass to American Wellness Centers which are described in this brief. INTRODUCTION

Welcome to the American Accelerator 2030 Initiative Congressional Bill Proposal, the eigenvector for tomorrow's America. In this brief are topic sections of innovative solutions to provide for the basic needs of every American Citizen in the future. We can create a new American society with family wealth that builds over future generations. It's time we secure America's economic engine and create a state sponsored sovereign wealth fund of an initial coin offering of a new money called Colonial American Eagle autonomous ethically guided cryptocurrency that would provide a newly conceived child a monthly universal basic income totaling \$292,500 from the moment of conception and in 2030 once total American citizen population is covered, the universal income doubles. This is enough for every future American citizen to afford higher education, own a home, purchase a vehicle, have proper nutrition, have proper clothes, have extended access to healthcare, the ability to start a business, and enjoy leisure activities.

This accelerator will employ 8 million Americans within 8 years of funding.

Including in this bill are:

MONETARY

2030 GOAL: EVERY AMERICAN CITIZEN HAS A UNIVERSAL BASIC INCOME OF \$1300 A MONTH.

The American dream is to use your life in service to build sustaining wealth to pass down to further generations. This bill ensures the blood never stops flowing through the American economy with the establishment of a state sponsored sovereign fund of 100 billion dollars to be converted into the world's most versatile and intelligent money system in the world. The new money would be called Colonial American Eagle and would operate in the optical domain as an autonomous ethically guided cryptocurrency. The crypto coin would be a dual token, also representing a share of a citizen owned employment entity called the Red, White, and Blue Company. Imagine buying your morning bagel and coffee with a share of the government entity you work and contribute to.

The daily returns of just a half percent or less per day average in the economic activity of the coin including mining operations would ensure a universal basic income of \$1300 a month for life transferable to kin upon death to every American citizen with 8 years of service coverage doubling. This includes a \$300 nutritional voucher that can be spent at major online grocers like Amazon pantry, Walmart, and Whole Foods, along with a \$1000 discretionary UBI.

This crypto innovation would include a smart card and a digital wallet account of AE/RWB accessible through an RWB no cost application download in all existing app stores.

American Eagle AEGC can instantly convert to US dollars at point of sale through card or Apple pay like functionality through your smartphone. The smart card can also withdraw US dollars base currency at ATMs from AE/RWB accounts.

IN 2030 WHEN ALL AMERICAN CITIZENS HAVE UBI SERVICE COVERAGE, THE UBI DOUBLES TO \$2600 A MONTH. \$2000 DISCRETIONARY, \$600 NUTRITIONAL VOUCHER.

FOOD:

American Organic farms

Organic Produce. Production quota is 20 acres a year per citizen with all varieties harvested daily.

Organic Dairy. Sentientless dairy harvesting. Production quota is 3 pounds of dairy per citizen a day.

Exotics.

Self replicating fully AI autonomous vertical produce and dairy farms, fisheries, science, delivery and catching, and feeding aerial service drones for America's lakes, rivers, and oceans. Fish food and fishery and drones have no production costs. The labor is robotic and materials and fish food are atmospherically generated.

In a world of robotics and artificial intelligence the potential to fill the nets with fresh fish and have every American family break bread every night at the dinner table is remarkable. America is the braintrust of the world with scientists and engineering from universities and companies eager to meet these design challenges.

This bill would ensure every child had more than enough to eat on every plate

To create culinary artists to prepare such foods, the Army will pay and train 100,000 Michelin chefs for American Academy 24/7 eateries, private in-home chefs, and farmers markets for all 50 states.

These chefs will prepare organic longevity cuisine.

EDUCATION

HEALTHCARE

How about a financial incentive to client and healthcare giver for maintaining your best VO2, quarterly tested in an affordable optional healthcare plan. Imagine your child having a cough and hitting a doctor home call button on your company application, a doctor arrives with a traditional doctors bag and performs family vitals for his family client cloud based healthcare history information. He gives the parent a bottle of antibiotics and the child and parent a candy sucker. People are alarmed with the daily posts of coronavirus death Parenting training and suite lodging with gyms and other resources.

I mean, are these big ag gmo corporations not catching \$10 in healthcare revenues from a ten cent chicken nugget?

Order of Saint Michael is a 35 member unit team who are the Notre Dame SEAL Team 6 of the Universal Army special forces. 35 is enough to fully staff an Armatek Armadillo tank with 2 row of 15 operators plus 5 crew operators. The 35 special access operators include both males and females and several different species. Order of Saint Michael only keeps 35 active duty members at a time. Some can serve for a mission and for others it is longer. Even in an army of 100 decatrillion, there still are only 35 active duty Order of Saint Michael operators at any given time. They are the highest rated and most specialized fighting force in the history of the entire universe.
