

## Organic Fertilizer Kit – Sasya Raksha- Kit includes the following:

Nutrient range:	Disease and Pest Protectants:	Sticker or spreader:	Fertilizer:
1. BCX Complex- 300 ml	4. Bugout- 100 ml	7. Prowet- 50 ml	8. Neem cake- 500gms
2. Bloom16- 100 ml	5. Alrounder- 100 ml		
3. Microvin- 100 ml	6. Pathorid- 100 ml		

### Description and usage instructions:

**1. BCX complex-** NPK for your plants. 15 days once- 10 ml per liter of water. Can be sprayed or drenched about 250 ml water per plant. Takes care of your plants macro nutrition NPK requirement.

**2. Bloom 16-** Plant growth stimulant. Induces flowers and fruiting. Controls fruit and flower drop. Yield enhancer and climate stress reliever. 15 days once/30 days once- 2 ml per liter spray or drench 250 ml water per liter.

**3. Microvin-** Rich in micronutrients- Magnesium, Manganese, Iron, Boron, Molybdenum, Zinc etc. Rich in amino acids. They are chelated with amino acids and so nurture your plants in their most critical metabolic activity. 15 days once/30 days once- 2 ml per liter spray or drench 250 ml water per liter.

**4. Bugout-** General pest repellent. Infact controls mosquitos in garden. 5 ml per liter of water 15 days once as foliar spray only.

**5. Alrounder-** Kills are pest including sucking and chewing pest more effectively. 2 ml per liter of water 15 days once as foliar spray only.

**6. Pathorid-** General bactericide and fungicide. Controls all diseases related to pathogens. Usage 2 ml per liter of water monthly once as foliar spray.

**7. Prowet-** As plants have different leaf types and surface, for effectively spreading and longer contact time, in spite of climate like hot weather and rainy reason, Prowet helps the sprayer to spread the product more evenly and effectively. To be used along with all products at a rate of 0.5 ml per liter. Mainly it is important to use with pesticide and fungicide. It is a spreading agent to be used in combination and has no use of using it separately.

**8. Neem cake** – Organic manure, contains adequate quantity of NPK in organic form for plant growth. It acts as a natural fertiliser with pesticidal properties.

### Benefits:

- Completely eco-friendly. Toxicity free to spray and use.
- Safe for humans, pets and ecosystem. Does not mutates pest
- Improves water holding capacity
- Enhances germination, plant growth, and crop yield
- Improves root growth and structure
- Enriches soil with micro-organisms``

**Note:** Although it is completely organic, direct consumption or misuse of pesticides may cause some nausea or vomiting. So reach physician immediately. But 2-5 ml concentrations of all the products can be used without even gloves and mask and it is safe for humans, pets and ecosystem.

No need of safety gloves, mask etc., for handling these organic products.
