

Lancaster County  
Broadband  
Infrastructure  
Project

**WE  
WANT  
YOUR  
INPUT!**

**Lancaster County is encouraging County residents located outside of Lincoln city limits to take a brief survey about current and future internet service in the County.**

The information collected will be used by Lancaster County to help telecommunications service providers understand anticipated internet service demand and what our residents and businesses value in internet service, like reliability, speed, and price.

**To take the survey, scan the QR code at right with the camera on your smart phone, or visit:**
