

Tofino Ratepayers Association

Update on Current Issues

April 11, 2021

Hello Members,

Here is a copy of our latest correspondence with CAO Bob MacPherson, Mayor and Council. Please reference these issues in your own discussions with DoT staff, Council and your friends and neighbours.

Cheers Jack Gillie

Hello Bob, Please share this email with any staff who can shed light on these issues.

The members of the Tofino Rate Payers Association are hopeful of progress on the following issues/initiatives. Can you provide any updates or schedules for implementation or consultations with the public?

Bylaw enforcement. After last summer's difficulties what new approaches are forthcoming and when?

Pay Parking. What plans are underway? When will we see a plan? Will there be public input?

Water conservation (the 20% Challenge) Does the District meter use of water at public washrooms and showers? If not why not? What can be done to conserve water in high uses, low water availability months, for these public purposes?

In addition our members are very concerned about the future use of the MRDT. We want to give the District of Tofino a strong vote of support to secure a significant portion of these taxes for the benefit of the DOT's objectives, such as infrastructure. We know there is broad support for this in the general public and encourage a restructuring of the current agreement

Cheers Jack Gillie
