

Creating value through customized geoscience solutions

- ❑ Streamline corporate G&A – geoscience staff when you need them, not when you don't
- ❑ Eliminate hiring guesswork with proven, experienced geologists
- ❑ Utilize an individual or a team of geologists to fit your company specific needs
- ❑ Custom build your geoscience team including managers and technicians
- ❑ Software and data available through Ops Geologic – no need for subscriptions
- ❑ Successful asset development experience across every major US onshore basin

Asset Development Planning

Our team has extensive experience planning the development and operations of some of the most successful US onshore assets of the last two decades. Each geologist is equipped to manage the most difficult challenges including parent-child issues, structural complexity, and reservoir heterogeneity.

Premier Operating Experience

- Top operations geologists in every major US onshore play
- ✓ Permian – Delaware, Midland, CBP
 - ✓ South Texas – Eagle Ford, Austin Chalk
 - ✓ Oklahoma – SCOOP, STACK, Granite Wash, Miss Lm
 - ✓ Appalachia – Marcellus, Utica
 - ✓ Rockies – DJ, Powder, San Juan, Williston
 - ✓ Gulf Coast – Cotton Valley, Haynesville, Middle Bossier
 - ✓ Conventional throughout the Lower 48

Customized asset development and operations geology solutions
