

Robots in Inservice Pipeline Inspection

17th September, 2023

Advanced Creativity Company

“Dealing with tailored and unique industrial solutions for Oil & Gas and Petrochemicals Industries in Saudi Arabia to mitigate the surge in demand.”

Xplore Biz.

Collaboration of US Based Robotics company and Saudi based Industrial service company in Pipeline Inspection Service

Sulaiman UI Akram Ismail
Operations Excellence Manager
ADVCCO, Saudi Arabia

Mubarak Rashid
President Of ADVCCO,
Saudi Arabia

Tyler Flanagan
Director Of Service & Operations,
ARIX, USA

Keith Thomas
Director Of Business Development & Sa
ARIX, USA

PARTNERSHIP MEETING

ADVANCED CREATIVITY COMPANY and ARIX Technology discussing Business Portfolio to formulate Strategy and Execution

Venus 9.1 Demonstration to SABIC’s Panel of Technical Experts in the pursuit of adding value to Saudi Arabia’s sustainable technological growth in petrochemicals industries.

Advanced Creativity Company, Jubail Industrial City, Saudi Arabia in partnership with ARIX Technologies, USA brought one of the most leading and innovative technology with proven track record in Robotics-in-service for the Pipeline Inspection solution to Saudi Arabia’s Oil & Gas and Petrochemical Industry.

This Robotic technology has proven to **Reduce Cost, Enhance Data, and Improve Safety** for customers in USA and saves a huge time and efforts by performing inspection while the pipeline is insulated and still in service **without the need for scaffolding and avoiding risks of technicians performing inspection at height** by allowing Robots to climb itself and travel along pipe to inspect.

Identifying such a futuristic technology, Advanced Creativity Company President Mr.Mubarak Rashed took initiatives communicating with ARIX technologies and signed partnership to provide this service features to Saudi Arabia's Oil & Gas and Petrochemicals Industries. This technology has already got huge interest by Saudi Aramco & SABIC Asset Integrity Management. Demonstration and training workshop has been ongoing to adapt this technology in several industrial facilities in Saudi Arabia and believed to replace most of the convention inspection techniques that costs more time and risks.

Advanced Creativity Company successfully **mobilized VENUS Robot 9.1 & 9.2** to Saudi Arabia to provide Inspection service. Operational demonstration and service features are done successfully to a **Panel of Technical Experts from SABIC in the pursuit of adding value to Saudi Arabia's sustainable technological growth in petrochemicals industries. Venus 9.1** has already backed a **5-year contract** to inspect pipelines at **SABIC Facilities** and expected to start its journey to provide its service benefits shortly. Communication regarding technical discussion and clarifications are on-going with **Saudi Aramco** for similar service.

ADVCCO'S President Mr.Mubarak Rashed quoted,
"ADVCCO's management and associates executes the business operations keeping in mind that the end results align with our motto, " DO BUSINESS DELIVERING VALUES"
