What the heck is a .223 Wylde?

A .223 Wylde chamber is a hybrid rifle chamber designed to allow .223 caliber barrels to safely fire both .223 Remington and 5.56x45mm NATO ammunition. While the cartridge dimensions of both rounds are basically the same, 5.56 NATO loads produce pressures in excess of the .223 Remington specifications. The 5.56 chamber allows higher pressures, so .223 Remington can be safely fired from a 5.56 chamber, but with reduced accuracy. The Wylde design allows both .223 & 5.56 ammo to be safely fired with good accuracy. It'll stop a coyote!

Tickets can be purchased at the NMTA Summer Rendezvous in Alto, NM June 14-15, 2024 or from any of the following NMTA directors:

Las Cruces, NM

Shelly Thedford - 575-649-1684
