

Environmental Policy - Renshaw Services

At Renshaw Services, we are committed to minimising our environmental impact and promoting sustainable practices in all aspects of our operations. We recognise that our carpet and upholstery cleaning activities have the potential to affect the environment, and we are dedicated to protecting and preserving it for future generations. Our environmental policy is based on the following principles:

Compliance: We will comply with all applicable environmental laws, regulations, and other requirements related to our industry. We strive to exceed these standards whenever possible to minimise our ecological footprint.

Pollution Prevention: We are committed to preventing pollution and reducing the environmental risks associated with our operations. We will continuously evaluate our processes, products, and services to identify opportunities for improvement in waste reduction, energy conservation, and the use of environmentally friendly materials.

Resource Conservation: We will strive to conserve natural resources, including water and energy, throughout our operations. This includes the efficient use of equipment, promoting responsible water usage, and implementing energy-saving measures wherever feasible.

Waste Management: We will implement effective waste management practices to minimise the generation of waste and promote recycling and reuse. Proper disposal methods will be followed for any waste that cannot be recycled.

Chemical Management: We are committed to using environmentally friendly and biodegradable cleaning agents whenever possible. We will educate our employees about the proper handling, storage, and disposal of chemicals to minimise their environmental impact.

Continuous Improvement: We will establish objectives and targets to continually improve our environmental performance. Regular monitoring, measurement, and review of our practices will allow us to identify areas for improvement and implement appropriate actions.

Employee Engagement: We believe that our employees play a crucial role in achieving our environmental goals. We will provide training and raise awareness among our staff about environmental issues and encourage their active participation in our sustainability initiatives.

Stakeholder Communication: We will communicate our environmental objectives, performance, and initiatives to our employees, customers, suppliers, and other stakeholders. We will seek their feedback and encourage their involvement in promoting sustainable practices.

Collaboration and Partnerships: We will actively seek partnerships with suppliers, contractors, and organisations that share our commitment to environmental sustainability. By collaborating with like-minded entities, we can collectively make a positive impact on the environment.

Review and Documentation: We will regularly review our environmental policy to ensure its relevance and effectiveness. This policy will be documented, communicated to all employees, and made available to the public upon request. Through the implementation of this environmental policy, Renshaw Services aims to demonstrate our dedication to environmental stewardship and contribute to a greener and more sustainable future.
