

Wide range of coloured foil finishes

All aluplast coloured foil finishes feature innovative technology which improves performance characteristics providing a much longer life cycle of the surface finish. Our lamination foils utilise special patent-protected pigments which considerably reduce the surface temperature of coloured foil finished profiles.

The IDEAL systems are available in a beautiful white lustre finish (RAL 9016) and also in the following elegant coloured foiled finishes as a standard stock offer:

- Rosewood foil on one side on white base
- Rosewood foil on both sides on brown base
- Golden Oak foil on one side on white base
- Anthracite Grey Sanded on both sides on a dark grey base
- Palisander (black) foil on one side on white base
- Cream foil on one side on white base
- Anthracite on one side on white base

CHOICE OF COLOURS

Woodec colours

In the recent years, the way of thinking about architecture has changed significantly. This change is expressed primarily in the search, in both the design of the building and in the products used in it, for solutions allowing to give these projects a unique and individual style. The preferences regarding colors have also changed significantly, where currently among most predominant colors are anthracite, basalt and various shades of gray.

Now all grey and black foils are available to order on a Dark Grey Pvcu substrate.
