

AIRSIDE FIREARMS TRAINING

UK FIREARMS TRAINING LTD OFFERS EXPERIENCED, QUALIFIED FIREARMS TRAINING TO YOUR WILDLIFE OPERATIVES – REGARDLESS OF THEIR LEVEL OF EXPERIENCE.

As the Airside Operations Manager for your site, are your wildlife teams or fire crews required to use shotguns, firearms or air weapons in the delivery of their bird control duties?

Are they fully conversant and confident in their safe use, maintenance and operation? Are they up to date on relevant legislation and fully licensed in their roles? Are they currently compliant with the requirement for regular firearms training, which may be a stipulation of your insurance?

The correct and considered use of firearms or air weapons is likely an essential part of your site's 'toolbox' of equipment in ensuring the safety of your airfields, aircraft and, ultimately, passengers.

Our **Director and Lead Instructor** is **qualified City & Guilds Trainer Alastair Blant**, who has over 20 years of shooting and firearms

experience behind him. Alastair routinely works with airside teams to conduct their annual firearms safety reviews in a timely and professional manner. Current clients include amongst others London Southend, Cornwall Newquay and Cambridge Airports.

UK Firearms Training prides itself on delivering high-quality training to your operatives – some of whom may not be 100% confident in the use of firearms – to ensure the safety of themselves and their colleagues. We offer a personalised and targeted training package for your wildlife teams or fire crews, giving relevant advice and support with a paramount emphasis on safe and professional handling. Our aim is to ensure your operatives are fully briefed in all relevant legislation relating to their role, as well as giving them absolute confidence in their ability to work with a range of firearms safely and competently as they carry out their activities airside. ▶

www.airsidefirearmstraining.co.uk

As well as delivering standard courses in the safe and confident handling of firearms, Alastair can also design and deliver bespoke courses in dealing with escaped animals, humane despatch, use of Very pistols and drone interception.

A standard firearms course, delivered partly in a conference room and partly on your safe shooting range (we shall risk assess all external areas prior to delivering the practical element), incorporates:

- Safe shotgun, firearm and air weapon handling
- Air weapon effectiveness and ballistics
- Gun handling and field safety
- Loading / unloading
- Mis-fire drills
- Care and maintenance
- Points of aim for humane despatch
- Practical handling skills on your range or fire training ground
- Site safety audit

As mentioned previously, if a more bespoke course is required for your specific team, please do not hesitate to contact Alastair to discuss your requirements and our pricing.

“ WE HAVE USED UKFT LTD A NUMBER OF YEARS FOR FIREARMS TRAINING FOR OUR BIRD CONTROL UNIT, AS THEY PROVIDE A WELL PRESENTED AND PROFESSIONAL APPROACH TO ALL OUR FIREARM TRAINING REQUIREMENTS. WITH A GOOD MIX OF THEORY AND PRACTICAL TRAINING, OUR STAFF ENJOY THE COURSES AND FIND THEM VERY INFORMATIVE”
