TESTIMONIAL

Our team at SOG / Samardzic, Oreski & Grbovic law firm had an amazing team building workshop, JumpStart, led by the professional partners of Radomir Samardzic and Inga Estes from Dynamic Human Developments.

Radomir and Inga have done a tremendous job, helping us strengthen our team in an unforgettable manner, which was eye-opening for the whole team. They started with an interesting ice breaker and kept the group engaged all along the way, with the climax in the final project, in which we created a structure to accomplish in four months, important initiatives we had been talking about for five years. Our team embraced new methods of active listening, constructive communication, accountability and assertiveness, to be highly focused, take responsibility, and create a sense of belonging to the team. Improvements resulting from this learning are obvious in our everyday work.

The event was extremely well prepared and planned, with high level of professionalism and organizational detail. All activities and content were performed in a timely and structured manner. At the same time, trainers were flexible and able to adapt to sessions in order to accommodate our team's needs.

We highly recommend Dynamic Human Developments, its professional coaches, and especially their JumpStart Program to any organization who wants to quickly produce effective results by boosting their productivity, accountability, organization, communication and team strength. The program is very effective, inspiring, and fun.

Thank you both Radomir and Inga for a fantastic time, learning, and experience.

On behalf of the entire SOG Team,
Radovan Grbović, Partner
