

## Viscosity application sheet (VAS)

Company details	
	Phone:
Name:	Email:
Company:	
Address:	Date of inquiry:
Fluid	~
Type / composition of fluid	
Any non-Newtonian behaviour? (e.g. shear thinning/thic	kening, yield stress)
□ Is fluid a slurry?	Suspended solids (%)
□ Any bubbles or bubble formation?	Entrained debris?
Process	
Type of process	
	nits minimum normal maximum units
Temperature	Density
Pressure	Flow rate
×	~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~ ~
Viscosity	Vices it welves altained from
	its         Viscosity values obtained from:           Image: Uscometer         Image: Reference table         Image: Estimate
Viscosity	
at <b>at</b> at	If viscometer, please give type, model, shear rate, speed etc.
Temperature	
Measurement requirements	~
·	
	Required accuracy (cp / %)
Required viscosity range (cP)	Required accuracy (cp / %)
Required viscosity range (cP)	Required accuracy (cp / %)
Required viscosity range (cP)	~
Required viscosity range (cP)     Integral temperature sensor required?     Installation     Pipe   Dimensions (give units)	~
Required viscosity range (cP)     Integral temperature sensor required?     Installation     Pipe   Dimensions (give units)     Other   Details	Tank Capacity (give units)
Required viscosity range (cP)         Integral temperature sensor required?         Installation         Pipe       Dimensions (give units)         Other       Details         Stirrer / agitator       Diameter (give units)	Tank Capacity (give units)
Required viscosity range (cP)         Integral temperature sensor required?         Installation         Pipe       Dimensions (give units)         Other       Details	Tank Capacity (give units)
Required viscosity range (cP)         Integral temperature sensor required?         Installation         Pipe       Dimensions (give units)         Other       Details         Stirrer / agitator       Diameter (give units)	Tank Capacity (give units)
Required viscosity range (cP)         Integral temperature sensor required?         Installation         Pipe       Dimensions (give units)         Other       Details         Stirrer / agitator       Diameter (give units)         Ambient temperature (maximum)	□ Tank Capacity (give units) Maximum speed (rpm) Ambient temperature unit □ °C □ °F
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe Dimensions (give units)   Other Details   Stirrer / agitator Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting	□ Tank Capacity (give units) Maximum speed (rpm) Ambient temperature unit □ °C □ °F Sensor material
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe   Dimensions (give units)   Other   Details   Stirrer / agitator   Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange   Type, size, pressure rating   Other   Detail	□ Tank       Capacity (give units)         Maximum speed (rpm)
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe   Dimensions (give units)   Other   Details   Stirrer / agitator   Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange   Type, size, pressure rating   Other   Detail	□ Tank       Capacity (give units)         Maximum speed (rpm)
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe   Dimensions (give units)   Other   Other   Details   Stirrer / agitator   Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange   Type, size, pressure rating   Other   Detail   Safety certification Hazardous Area?	□ Tank       Capacity (give units)         Maximum speed (rpm)
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe   Dimensions (give units)   Other   Details   Stirrer / agitator   Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange   Type, size, pressure rating   Other   Detail   Safety certification Hazardous Area?     Hazardous Area?   Yes   No   A "Hazardous Area" is a location where there is a risk of explosion from flammable gas, vapours	□ Tank       Capacity (give units)         Maximum speed (rpm)
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe Dimensions (give units)   Other Details   Stirrer / agitator Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange Type, size, pressure rating   Other Detail   Safety certification Hazardous Area?     Hazardous Area? Yes   No   A "Hazardous Area" is a location where there is a risk of explosion from flammable gas, vapours or dust.	Tank Capacity (give units)      Maximum speed (rpm) Ambient temperature unit □ °C □ °F      Sensor material     316 stainless steel?     Other Detail      This section must be completed if instrument is for Hazardous Area use      IEC Zone Class
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe Dimensions (give units)   Other Details   Stirrer / agitator Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange Type, size, pressure rating   Other Detail   Safety certification Hazardous Area?     Hazardous Area? Yes   No A "Hazardous Area" is a location where there is a risk of explosion from flammable gas, vapours or dust.	Tank Capacity (give units)     Maximum speed (rpm)     Ambient temperature unit □ °C □ °F     Sensor material     316 stainless steel?     Other Detail  This section must be completed if instrument is for Hazardous Area use  IEC Zone Class Division
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe Dimensions (give units)   Other Details   Stirrer / agitator Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange Type, size, pressure rating   Other Detail   Safety certification Hazardous Area?     Hazardous Area? Yes   No   A "Hazardous Area" is a location where there is a risk of explosion from flammable gas, vapours or dust.	Tank Capacity (give units)     Maximum speed (rpm)     Ambient temperature unit □ °C □ °F     Sensor material     316 stainless steel?     Other Detail  This section must be completed if instrument is for Hazardous Area use  IEC Zone Class Division
Required viscosity range (cP)   Integral temperature sensor required?   Installation   Pipe Dimensions (give units)   Other Details   Stirrer / agitator Diameter (give units)   Ambient temperature (maximum)   Process connection/fitting   Flange Type, size, pressure rating   Other Detail   Safety certification Hazardous Area?     Hazardous Area? Yes   No A "Hazardous Area" is a location where there is a risk of explosion from flammable gas, vapours or dust.	Tank Capacity (give units)     Maximum speed (rpm)     Ambient temperature unit □ °C □ °F     Sensor material     316 stainless steel?     Other Detail  This section must be completed if instrument is for Hazardous Area use  IEC Zone Class Division
