

About Howe2 Training and Consultancy

Howe2 training and consultancy deliver “real life” training based on in depth sector experience.

All courses are mapped (where applicable) to relevant qualification frameworks, regulatory bodies standards/requirements (both adults and children’s services) that are UK wide.

We offer various competency assessment frameworks & training (including, medication, manual handling, infection control etc).

A full training needs analysis is available. This is a proven technique that has been heavily developed over the last twenty years and is available regardless of the size of the organisation.

Bespoke training can also be developed (with the implementation of policies and procedures) if required, at no extra cost.

Let us help you determine your training requirements. We look forward to working together with you to provide the best training for your organisation.

Mark Howe-Senior - *Managing Director*
Howe2 Training and Consultancy

Over 30 years experience within the health, social care and education sectors of writing and delivering in excess of 50 different face-to-face training courses along with advising of training needs and analysis.
