

Product Brief

CUTCO®/KA-BAR® Explorer Item #5725

A field tested KA-BAR® with Cutco's The Forever Guarantee.

Only Cutco Knife with a unique combination-edge blade.

Solid, fearless and ready to work just as hard as you.

Why the CUTCO®/KA-BAR® Explorer?

- A classic KA-BAR design with Cutco's The Forever Guarantee. The unique combination straight- and exclusive Double-D®-edge blade maximizes cutting potential and stays sharp for years. The durable, slip-resistant handle provides a sure grip, even in wet conditions. Corrosion resistant. Sheath included.
- A knife for those who demand the best. The Explorer is rugged, durable and able to withstand the worst conditions mother nature has to offer. The combination blade maximizes your cutting potential and will stay sharp for years. Whether you're around the house, yard or in the woodlands, this American-made knife won't let you down.
- When you're outdoors, you want a knife that works with you. Something that moves like it's an extension of your hand. Enter the CUTCO®/KA-BAR® Explorer. It's easy to use but never backs down from a challenge. It's well balanced and built to last with a combination blade constructed to hold an edge for generations. Make feather sticks, and hack saplings to clear shooting lanes and cut lines for securing cargo.

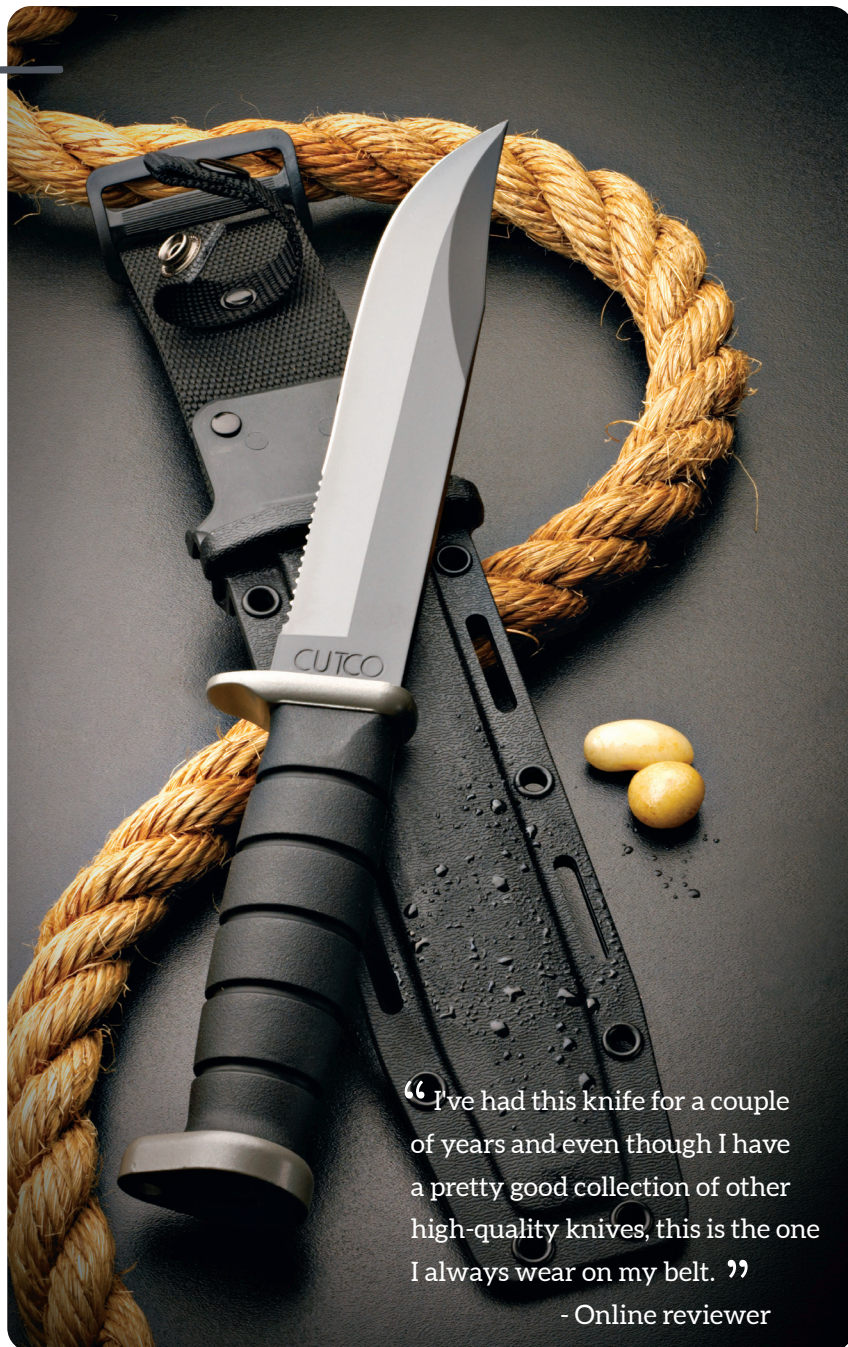

Use to:

- Set up camp.
- Clear brush.
- Cut paracord and rope.

American-Made Knives.
Guaranteed Forever.

Holds a sharp edge while maintaining its beauty. Resists rust and corrosion.

Combination straight- and Double-D®-edge

Maximizes cutting potential.

Full tang

Gives added strength.

Handle material

Thermoplastic elastomer. Is durable and provides a sure grip in wet conditions.

Epoxy powder coating

Aids in corrosion resistance.

Pommel

Includes hole for lanyard.

Includes leather sheath - sheath made in Taiwan.
Handle color available only in Black.
Blade can be engraved.
California Residents: Proposition 65 Warning

CUTCO®\KA-BAR® Explorer

#5725

Blade length: 7"

Overall length: 12"

Weight: 12.2 oz.

Special Manufacturing Steps

Laser Cut

A powerful beam of light is programmed to burn through the steel, following the exact shape and dimensions of the blade making very clean, smooth edges and is very precise.

Heat Treat Process

A unique three-step process of extreme heat, deep freezing and tempering that makes the blade hard yet flexible, stain resistant and able to hold a sharp edge.

High-Speed Buffing

The edge is buffed in this extra step, taking it from sharp to razor sharp.

“ This knife was given to me as a gift for Christmas two years ago and it's definately the best outdoor knife you can buy. Rugged, holds a nice edge even after chopping saplings down. Now I'm ordering one for my son's 21st birthday. If you're rough and tough on everything, this is the knife for you. You won't be disappointed. ”
