Special Manufacturing Steps

Laser Cut

A powerful beam of light is programmed to burn through the steel, following the exact shape and dimensions of the blade making very clean, smooth edges and is very precise.

Heat Treat Process

A unique three-step process of extreme heat, deep freezing and tempering that makes the blade hard yet flexible, stain resistant and able to hold a sharp edge.

High-Speed Buffing

The edge is buffed in this extra step, taking it from sharp to razor sharp.
