Sustainability
Princeton University**

Major Areas of Work to Minimize Carbon Footprint:

- High performance envelope, passive design, use of hot water for heating
- Replace district steam system with district hot water system
- Create electric-powered Heat Pump facility
- Create daily thermal storage – tanks
- Create seasonal thermal storage – geoexchange
- Install on-site renewable energy production – solar PV
- Supplement with off-site renewable energy

**Assistant
Director for the
Office of
Sustainability,
Dr. Ijeoma
Nwagwu**

October 20, 2021 - Energy Production and Distribution At Princeton University

Environment

A great big thank you to the sixteen ladies who met at Joanne Hanson's house and made 72 posies for the Elms of Cranbury. They came out great!! We know the residents will enjoy them.

↑
Key ingredient.

Delivered!

Joanne Hanson is probably still getting glitter out of her rugs!

November 17, 2021 - Making Posies for the Elms

Environment

Eight members and one prospective member decorated the six barrels on Main Street.

December 1, 2021 - Barrel Decorating for the Holidays at Breinerd Lake
